The acceptance of applications for filing is a procedure designed for making preliminary determinations of eligibility and for providing the opportunity for public comment on applications. Acceptance of an application does not preclude subsequent return or disapproval of an application if it is found to be not in accordance with the provisions of either the Act or 15 CFR Part 2301, or if the applicant fails to file any additional information requested by the Public Telecommunications Facilities Program (PTFP). Acceptance for filing does not assure an application of being funded; it merely qualifies it to compete for funding with other applications which have also been accepted for filing.

Pursuant to 15 CFR 2301.09, applicants were required to publish in a newspaper of general circulation, in the community to be served by the applicant, a notice that such application has been tendered to the PTFP of the National Telecommunications and Information Administration. The notice shall have been published once a week for two consecutive weeks on or before February 28, 1983. The notice included (1) information as to where within the community to be served a copy of the application, and any amendments thereto, may be inspected by the public during normal business hours; and (2) an invitation for parties supporting or opposing the application to file comments with the Administrator, National Telecommunications and Information Administration, Public Telecommunications Facilities Program, Washington, D.C. 20230. All comments must be filed within fifteen (15) calendar days from the date of this public notice of acceptance of the application and must be accompanied by a written assurance that a copy of the comments has been mailed to the applicant.

Scott Mason,
Chief, Management Branch.

Alabama

File No. 3159CRB, University of Alabama, 1028 7th Avenue, Birmingham, AL 35294. Signed by: Kenneth M. Pruitt, Assistant Vice Pres. Research. Funds Requested: $16,387. Total Project Cost: $21,850. To expand the SCA service of WBHM–FM by adding SCA receivers to the four station SCA network—Birmingham, Huntsville, Montgomery and Tuscaloosa.

File No. 3274PRB, Alabama Educational TV Commission, 2101 Magnolia Avenue, Birmingham, AL 35256. Signed by: Wilbur H. Hinton, General Manager. Funds Requested: $50,000. Total Project Cost: $58,362. To plan the establishment of an interconnected statewide radio network among interested stations and the identification and implementation of specific radio facilities needed to provide for unserved audiences.

File No. 3292CTB, Alabama Educational TV Commission, 2101 Magnolia Avenue, Birmingham, AL 35256. Signed by: Wilbur H. Hinton, General Manager. Funds Requested: $1,209,200. Total Project Cost: $1,882,467. To replace the fallen tower of WCIQ–TV, Channel 7, in Cheaha State Park, and to replace the worn out, obsolete, or dangerous transmission plus selected directly related production items in order to stabilize the rapidly eroding technical base of the Alabama TV network.

File No. 3252PTN, Miles College, 5500 Avenue G, Fairfield, AL 35064. Signed by: W. Clyde Williams, President. Funds Requested: $61,057. Total Project Cost: $84,057. To plan for the establishment of a public telecommunications facility in Fairfield using radio or low power TV or combination of both for educational purposes.

File No. 3155PRB, Alabama State University, 915 South Jackson, Montgomery, AL 36195. Signed by: Robert Randolph, President. Funds Requested: $71,875. Total Project Cost: $81,875. To plan the construction of a minority owned and operated radio station operating on 90.7 MHZ with a power of 25,000 watts to provide an alternate program service for the citizens of Montgomery and Elmore County.

File No. 3074CRB, Troy State University, University Avenue, Troy, AL 36082. Signed by: Ralph W. Adams, President. Funds Requested: $164,651. Total Project Cost: $219,535. To establish a repeater radio transmitter to extend the program service of WTSU–FM to the unserved communities around Phenix City, Alabama and Columbus, Georgia.

File No. 3075CRTB, Stillman College, 3600 15th Street, Tuscaloosa, AL 35403. Signed by: Cordell Wynn, President. Funds Requested: $1,040,084. Total Project Cost: $1,859,780. To construct an FM radio station and a low power TV station on the campus of Stillman College for the training of students in telecommunications and to provide the local community with college educational, cultural, and informational programs.

File No. 3223CTN, University of Alabama, P.O. Box 2846 Old Union Bldg., University, AL 35486. Signed by: Robert A. Wright, VP and Treasurer. Funds Requested: $174,285. Total Project Cost: $232,380. To significantly improve the basic production equipment flexibility for the increase and improvement of the program series provided by this University of Alabama production center for the Alabama Public Telecommunications Network.

Arkansas

File No. 3238CRB, Arkansas Broadcasting Foundation, 1501 Arch Street, Little Rock, AR 72202. Signed by: Pat House, President. Funds Requested: $32,384. Total Project Cost: $43,179. To acquire origination equipment, satellite reception equipment and test equipment to assist in the activation of KABF–FM in Little Rock, AR. Station will benefit 608,000 citizens in Little Rock area.

File No. 3334CTB, Newark Public Schools, P.O. Box 280 Fourth College, Newark, AR 72562. Signed by: Bobby R. DePoyster, Superintendent. Funds Requested: $175,000. Total Project Cost: $250,000. To construct a TV station in Newark on channel 17. Station would provide first local origination broadcast service for area.

File No. 3348CRB, Newark Public Schools, Fourth and College Streets, Newark, AR 72562. Signed by: Bobby R. DePoyster, Superintendent. Funds Requested: $150,000. Total Project Cost: $201,900. To activate a noncommercial FM radio station on 90.9 MHZ in Newark. Station will serve 51,000 people. Facility will be utilized as a training facility for students and staff of the school district.

Arizona

File No. 3226CTB, Arizona State Univ/ Board of Regents, Tempe, AZ 85287. Signed by: H.B. Hunnicutt, Asst. VP for Research. Funds Requested: $1,470,000. Total Project Cost: $1,960,000. To replace obsolete and worn out production equipment at Arizona's primary public television station, KAET–TV.

File No. 3227CTB, Navajo Community College, Tsaile, AZ 86556. Signed by: Dean C. Jackson, President. Funds Requested: $508,429. Total Project cost: $677,05. To establish first service television to the Arizona and New Mexico Navajo Nation, utilizing low power and translator dissemination equipment, and including first local origination capability.

File No. 3355PTB, Silvercloud Video Productions, 1321 E. King Road, Tucson, AZ 85719. Signed by: John Howard Crouch, President. Funds Requested: $38,771. Total Project cost: $38,771. To plan for the extensive use of a mobile television production facility to provide locally-originated programming, especially for and about Arizona's Native American tribes. Project would focus on servicing those areas where first local origination is not currently experienced.

California

File No. 3192CRB, Humboldt State University, Arcata, CA 95521. Signed by: Dr. Donald F. Straham, VP Administrative Affairs. Funds Requested: $57,184. Total Project Cost: $77,247. To increase the power of KHSU–FM in Arcata to bring first service public radio to 45,000 residents of Humboldt County.

File No. 3061PRTB, California State College at Bakersfield, 9001 Stockdale Highway, Bakersfield, CA 93309. Signed by: P. M. Rice, Vice President. Funds Requested: $126,864. Total Project Cost: $126,864. To plan to establish first service radio and television stations' primarily for the counties of Bakersfield and Kern, as well as some parts of Tulare, Inyo, Mono, and San Bernardino. Also, to explore other telecommunications services that would prove relavent and cost effective for the communities to be served.

File No. 3271RTNC, Regents of University of California, Systemwide Administration, 2200 University Avenue, Berkeley, CA 94720. Signed by: David F. Mears, Univ Coord of Contracts & Grants. Funds Requested: $451,835. Total Project Cost: $602,447. To construct transmit/receive earth stations at colleges in Berkeley and LaJolla for data transmission and further development of the University system's library automation services.

File No. 3279CRB, The University Foundation, California State University at Chico, West 1st & Normal Streets, Chico, CA 95929. Signed by: Len C. McCandliss, Executive Officer, CSVC Fdn. Funds Requested: $99,702. Total Project Cost: $132,936. To provide first service public radio to 40,000 residents of northern California with the purchase of higher power transmission equipment, relocation of one translator and acquisition of a new one. The project also proposes to extend KCHO's subcarrier reading service to the extended service areas.

File No. 3288TNC, California State University at Chico, W. First & Normal Streets, Chico, CA 95929. Signed by: Dr. Gerald Stairs, Vice President. Funds Requested: $863,746. Total Project Cost: $1,151,661. To upgrade an instructional television fixed service with satellite transmit capability, replacement of origination equipment and an increase of the number of regional learning centers.

File No. 3247CTB, Rural California Broadcasting Corp., 325 East Cotati Avenue, Cotati, CA 94928. Signed by: John F. Kramer, Treasurer. Funds Requested: $201,890. Total Project Cost: $269,186. To increase the power of KRCB–TV to 5 KW, and thereby providing additional first service to 43,000 residents of the Sonoma, Marin, Napa, Lake and Solano Counties, when the station goes on air later in 1983.

File No. 3121CTB, Redwood Empire Public TV, Inc., 7246 Humboldt Hill Co., Eureka, CA 95501. Signed by: Maj. Gen. William T. Daly, Ret., President. Funds Requested: $146,700. Total Project Cost: $195,600. To acquire production equipment that would allow greater local programming origination, particularly in Hoopa, Redwood, Eureka and other communities of Humboldt County.

File No. 3286CRB, Hoopa Tribal Broadcasting Co., Box 1220, Hoopa Valley Shop Ctr, Hoopa, CA 95546. Signed by: David A. Contreral, Board Chairman. Funds Requested: $79,956. Total Project Cost: $106,129. To move KIDE's transmitter, and to extend the station's signal coverage with the addition of seven translators designed to reach over 39,000 residents of Humboldt County who do not currently receive a public radio signal.

File No. , 3053TNP, Corp. on Disabilities and Telecommunications, P.O. Box 27573, Los Angeles, CA 90027. Signed by: Neil W. Goldstein, Chairman of the Board. Funds Requested: $61,570. Total Project Cost: $61,570. To determine the feasibility of creating a nationwide distribution network of programs specifically directed to and developed by the disabled. Planning will focus on cable and satellite interconnection, as well as the marketing of modeling programming.

File No. 3059CTB, Community TV of Southern California, 4401 Sunset Boulevard, Los Angeles, CA 90027. Signed by: Joseph J. Sands, Senior Vice President. Funds Requested: $399,547. Total Project Cost: $532,729. To replace obsolete and necessary origination equipment for state-of-the-art interfacing with the national television system from Los Angeles.

File No. 3225CTN, University of Southern California, Olin Hall 214, University Park, Los Angeles, CA 90089. Signed by: Cornelius J. Pings, Provost. Funds Requested: $165,730. Total Project Cost: $220,974. To acquire a satellite receive terminal to enhance and expand current instructional television services.

File No. 3340RNC, Pacific Foundation, 5316 Venice Blvd., Los Angeles, CA 90019. Signed by: Sharon Maeda, Executive Director. Funds Requested: $54,838. Total Project Cost: $73,718. To provide the essential equipment that would allow the Program Service Radio Archives to become state-of-the-art in its capability to effectively distribute recordings over 30 years old. Project would assure the availability of quality, historical recordings, especially for and about minorities and women.

File No. 3242TNC, City of Los Gatos, 110 E. Main Street, Los Gatos, CA 96030. Signed by: Brent N. Ventura. Funds Requested: $240,000. Total Project Cost: $320,000. To establish a cable access center to provide the first local origination service to the Los Gatos area.

File No. 3291PTN, Yosemite Community College District, 2201 Blue Gum Avenue, Modesto, CA 95352. Signed by: Tom Van Groningen, District Superintendent. Funds Requested: $38,664. Total Project Cost: $68,644. To establish a plan of action to interconnect telecommunications systems, operations, and maintenance with the contiguous counties of Amador, Calaveras, El Dorado, Sacramento, San Joaquin, Stanislaus, Tuolumne and Yolo.

File No. 3200CTB, Indian Wells Valley TV Booster, 205 Silver Ridge Drive, Ridgecrest, CA 93555. Signed by: Edward R. Middlemiss, Treasurer. Funds Requested: $19,100. Total Project Cost: $25,467. To extend the signal of KVCR–TV of San Bernardino with two translators that will provide first service public television to areas of Ridgecrest, China Lake, Inyokern, Sky Place, College Heights, and part of San Bernardino County.

File No. 3284CRB, California State University, 6000 J Street, Sacramento, CA 95819. Signed by: Phil Corriveau, General Manager, KXPR. Funds Requested: $4,576. Total Project Cost:

$8,101. To the extend the signal of KXPR–FM to the Lake Tahoe Basin area and its surrounding communities by replacing a translator on Angels Roost Peak in El Dorado County. This project will provide first service to 36,000 residents.

File No. 3240CTN, Superintendent of Schools, Department of Education, 6401 Linda Vista Road, San Diego, CA 92111. Signed by: Gerald A. Rosander, Superintendent of Schools. Funds Requested: $194,250. Total Project Cost: $259,000. To extend the services of the San Diego Department of Education's instructional television by adding 50 additional receiving sites.

File No. 3263CTB, San Diego State University Foundation, 5300 Campanile Drive, San Diego, CA 92182. Signed by: Lawrence B. Feinberg, Assoc Dean Grad Div & Research. Funds Requested: $587,672. Total Project Cost: $791,062. To replace the antenna and tower of KPBS-TV, and to upgrade the transmitter, as all of the station's dissemination equipment is obsolete and experiences significant amounts of breakdowns.

File No. 3303CRB, San Diego State University Foundation, 5300 Campanile Drive, San Diego, CA 92182. Signed by: Lawrence B. Feinberg, Associate Dean Graduate Div. Funds Requested: $174,946. Total Project Cost: $233,261. To activate a full service radio station in Imperial County at the Calexico branch of San Diego State University. This project will provide first service to over 92,000 residents in Calexico, Imperial, Holtsville, Brawley, and El Centro.

File No. 3040RNC, Broadcast Services for the Blind, 420 Taylor Street, San Francisco, CA 94102. Signed by: R. L. Schoenberger, Jr., President, Board of Directors. Funds Requested: $35,561. Total Project Cost: $47,414. To purchase 300 additional SCA recievers to further service print handicapped population in Bay Area, and to upgrade origination equipment to strengthen the quality of operation.

File No. 3218PRB, Poor People's Radio, Inc., P.O. Box 11008, San Francisco, CA 94101. Signed by: Joe Rudolph, General Manager. Funds Requested: $37,095. Total Project Cost: $41,605. To investigate the poor radiation of KPOO-FM's signal, and to plan to implement the technology necessary to strengthen the signal and provide KPOO's unique offerings to the numerous residents currently unserved by programming for minorities and women. Plan includes extension of signal to the five Bay Area counties as well as Vallejo and San Jose.

File No. 3218PRB, Western Comm. Bilingual Radio Inc, 385 Eighth Street, San Francisco, CA 94103. Signed by: Suzanne D. Manriquez, Treasurer/Secretary. Funds Requested: $100,000. Total Project Cost: $117,480. To plan for the extension, expansion and upgrading of the bilingual public radio station network for the benefit of California's, Colorado's, Texas's, and Washington's Latino residents.

File No. 3220PTB, Community Action for Urbanized American Indians, Inc., 225 Valencia Street, San Francisco, CA 94103. Signed by: Francis Allen, Chairman. Funds Requested: $70,000. Total Project Cost:- $94,000. To plan for a multi-faceted telecommunications delivery of programs geared specifically to currently unserved Indian populations across the country. This planning would provide the basic steps for activating first signal public television in several reservation communities.

File No. 3237CTB, KQED, Inc., 500 Eight Street, San Francisco, CA 94103. Signed by: Bonnie J. Smith, VP & Chief Financial Officer. Funds Requested: $103,275. Total Project Cost: $137,700. To reduce energy usage and operating costs of the UHF transmitter for KQEC-TV, Channel 32, by refurbishing equipment.

File No. 3282CRB, Pataphysical Broadcasting Foundation., Inc., 203 8th Avenue, Santa Cruz, CA 95061. Signed by: Jeffrey Werner, President, Board of Directors. Funds Requested: $106,424. Total Project Cost: $141,899. To extended the signal of KUSP-FM by translator to reach the Big Sur area, and to upgrade and replace obsolete and worn out origination equipment in Santa Cruz. Project will provide first service to over 1,200 residents of Santa Cruz, Monterey, San Benito, Santa Clara and Big Sur Counties.

File No. 3265TNRP, Mendocino County Superintendent of Schools, 589 Low Gap Road, Ukiah, CA 95482. Signed by: Louis G. Dolsol, Superintendent of Schools. Funds Requested: $26,800. Total Project Cost: $30,800. To plan the establishment of a telecommunications system to link existing services with facilities to be determined. Project proposes to especially provide instructional services to isolated rural communities.

File No. 3167CTB, California Community TV Network, 10 Alexander Street, Watsonville, CA 95076. Signed by: Lewis Friedland, Director. Funds Requested: $1,135,486. Total Project Cost: $1,513,982. To activate a full service public television station in Santa Cruz County to provide a first signal to over 184,000 residents of this and seven surrounding counties.

Colorado

File No. 3058CTB, Front Range Educational Media Corp., 6801 W. 117th Avenue, Broomfield, CO 80020. Signed by: Michael J. August, General Manager. Funds Requested: $103,365. Total Project Cost: $137,820. To improve the dissemination and program production capability of KBDI–TV operating on Channel 12 at Broomfield, CO.

File No. 3222CRB, The Colorado College, 1000 N. Cascade Avenue, Colorado Springs, CO 80903. Signed by: Gresham Riley, President. Funds Requested: $59,868. Total Project Cost: $81,168. To move the transmitter/antenna of public radio station KRCC–FM, operating on 91.5 MHZ in Colorado Springs, to an elevation of 9550 ft. on Cheyenne Mt. to enable it to reach 90 percent of the population of El Paso County and provide 42,000 residents with their first public radio service, and to upgrade the station's capability to provide radio reading services to the print handicapped over SCA as well as to provide NPR programming to Colorado Springs.

File No. 3275CRB, Colorado State Board of Agriculture, Lory Student Center, Fort Collins, CO 80523. Signed by: Joe Spease, General Manager. Funds Requested: $40,867. Total Project Cost: $54,490. To replace the obsolete 1 KW transmitter of public radio station KCSU–FM with 5 KW at its present site, change and frequency on which it operates from 90.9 to 90.5 MHZ, and upgrade production capabilities to provide relevant local programming to parts of the City of Ft. Collins as well as Loveland, Wellington & La Porte, and first service to Estes Park, CO.

File No. 3152CRB, Western Colorado Public Radio, 2685 Caribbean Drive, Grand Junction, CO 81501. Signed by: Marsha L. Gobbo, Director. Funds Requested: $162,720. Total Project Cost: $217,062. To establish a public radio station in Grand Junction, CO, operating on 88.9 MHZ which will make it possible to bring first public radio programming to eight counties on the western slope in the near future—Rio Blanco, Mesa, Garfield, Delta, Ouray, Montrose, Eagle and Pitkin.

File No. 3213CRB, Colorado Radio Info Service, Inc., P.O. Box 1652, Greeley, CO 80632. Signed by: Robert Caron, President. Funds Requested: $9,600. Total Project Cost: $12,800. To acquire SCA receivers for use by the print handicapped in the reception areas of public radio stations KUNC–FM in Greeley, KCFR–FM in Denver, and KRCC–FM in Colorado Springs. This proposal brings first radio reading service to print handicapped persons residing in Colorado Springs and nearby communities.

File No. 3236CRB, Trustees for University of Northern Colorado, Greeley, CO 80639. Signed by: John Burke, VP Univ Relations, Sec, Trustees. Funds Requested: $54,427. Total Project Cost: $72,570. To extend by translators the signal of public radio station KUNC–FM, operated on 91.5 MHZ, by the University of Northern Colorado, and to bring a first noncommercial radio service to the communities of Sterling, Estes Park, Walden, Steamboat Springs, and Kremmling in Colorado, Torrington, Wyoming, and Scottsbluff, Kimball and Sidney in Nebraska.

File No. 3148CRB, Denver Educational Broadcasting, Inc., 7932 S. Lamar Court, Littleton, Co 80123. Signed by: Hugo Morales, President Board of Directors. Funds Requested: $228,936. Total Project Cost: $305,249. To establish a bilingual public radio station on 89.3 MHZ in Denver, CO, and provide programming service to other parts of the State. This station will provide the first bilingual radio facility with access to a satellite uplink which will enable the licensee to begin to meet some of the daily national program needs of bilingual and Spanish-speaking audiences.

File No. 3261PRB, Pueblo Community College, 900 W. Orman Avenue, Pueblo, Co 81004. Signed by: Glen Allen, Vice President for Contracts. Funds Requested: $24,238. Total Project Cost: $32,238. To plan for the activation of an FM noncommercial public radio station as a CPB-qualified, National Public Radio outlet serving Pueblo, CO, with translators serving southern and southeastern Colorado.

Connecticut

File No. 3101CRB, Connecticut Educational Telecommunications Corp, 24 Summit Street, Hartford, CT 06106. Signed by: Paul K. Taff, President & General Manager. Funds Requested: $144,524. Total Project Cost: $196,815. To modify and move the transmitter of WPBH, a noncommercial FM radio station operating on Channel 213B and presently serving Hartford, CT, to increase power and provide first local service to western CT including Danbury. Also includes request for mobile unit for local program production.

Washington, DC

File No. 3084CTN, Appalachian Community Service Network, 1200 New Hampshire Ave, NW, #240, Washington, DC 20036. Singed by: Harold E. Morse, President ACSN. Funds Requested: $22,500. Total Project Cost: $30,000. To replace non-type accepted microwave hardware (as required by the FCC) between the University of Kentucky and ACSN's earth station located in Fayette County, KY.

Delaware

File No. 3169PRB, Delaware Technical and Community College, 1832 N. DuPont Parkway, Dover, DE 19901. Signed by: Dr. John R. Kotula, President. Funds Requested: $15,357. Total Project Cost: $18,555. To Plan for first public radio signal for the Delaware counties of Kent and Sussex.

Florida

File No. 3062CTB, South Florida Public Telecommunications, Inc., 505 S. Congress Avenue, Boynton Beach, FL 33435. Signed by: Sam J. Barbaro, Vice President & General Manager. Funds Requested: $304,740. Total Project Cost: $406,321. To replace and upgrade the basic local production capability of WHRS-TV in Boynton Beach to maintain and increase its community service programs.

File No. 3044CTB, Daytona Beach Community College, 1200 Volusia Avenue, Daytona Beach, FL 32015. Signed by: Dr. Charles H. Polk, President. Funds Requested: $390,000. Total Project Cost: $520,000. To construct a full power TV station to provide first service to Flagler County and the first reliable signal to most of Daytona Beach and Volusia County. The proposed Daytona Beach station will operate at a power of 70.6 KW on Channel 15.

File No. 3123CRB, Indian River Community College, 3209 Virginia Avenue, Fort Pierce, FL 33450. Signed by: Herman A. Heise, President. Funds Requested: $53,250. Total Project Cost: $71,000. To extend the coverage of WQCS–FM to provide service to 24,471 people now unserved in the Indian River Community by constructing a 500-foot tower which will be 200 feet higher than the present tower.

File No. 3005CTB, University of Florida, 219 Grinter Hall, Gainesville, FL 32611. Signed by: Ann R. Stevens, Ph.D., Assoc. Dean for Research. Funds Requested: $21,451. Total Project Cost: $28,602. To improve the remote local program capability of WUFT–TV by securing two microwave antennas to be mounted on the existing tower.

File No. 3008CTB, University of Florida, 219 Grinter Hall, Gainesville, FL 32611. Singed by: Ann R. Stevens, Ph.D., Assoc. Dean for Research. Funds Requested: $127,151. Total Project Cost: $169,535. To improve the basic production capability of WUFT–TV by adding a studio camera to provide the needed flexibility for increasing local programming.

File No. 3293CRB, WJCT, Inc., 100 Festival Park Avenue, Jacksonville, FL 32202. Signed by: Fred Rebman, President. Funds Requested: $237,289. Total Project Cost: $316,386. To construct a repeater transmitter with a power of 100,000 watts to provide the first public radio signal for the Jasper/Live Oak area, and improve the basic local origination capability of WJCT–FM.

File No. 3294CTB, WJCT, Inc., 100 Festival Park Avenue, Jacksonville, FL 32202. Signed by: Fred Rebman, President. Funds Requested: $665,047. Total Project Cost: $886,730. To replace the worn out 6 Bay transmitting Antenna and the worn out and obsolete local origination equipment in order to eliminate the present interruptions and serious degradation of the WJCT–TV programming services.

File No. 3177PTBN, Barry University telecommunications Department, 11300 N.E. 2nd Avenue, Miami, FL 33161. Signed by: Sister Jeanne O'Laughlin, President. Funds Requested: $32,190. Total Project Cost: $36,966. To plan for the development of an interactive telecommunications system, a county-wide multi-distribution system and a public telecommunications facility at Barry University, the combination of which will improve the quality of life for minorities in greater Miami and Dade County.

File No. 3337CRB, Bascomb Memorial broadcasting Foundation, Inc., P.O. Box 558636, Miami, FL 33155. Signed by: Thomas G. Becker, President. Funds Requested: $17,668. Total Project Cost: $23,558. To improve the basic production capability of WDNA–FM by securing origination equipment which will result in a stereo production facility.

File No. 3283CTB, Pensacola Jr. College, 1000 College Boulevard, Pensacola, FL 32504. Signed by: Dr. C. Noojin Walker, VP, Academic Affairs. Funds Requested: $789,409. Total Project Cost: $1,052,546. To replace the present WSRE tower to accommodate a much heavier high gain antenna, install a new TV antenna and a new 55 KW transmitter (present is 2 KW), in order to provide the first public TV signal for the unserved areas of Escambia, Santa Rosa, and Okaloosa Counties.

File No. 3129CTN, State of Florida, Division of Communications, Larson Bldg., Room 651, Tallahassee, FL 32301. Signed by: Donald R. Allen, Dir., Div. of Communications. Funds Requested: $888,818. Total Project Cost: $1,775,118. To provide for innovative uses of uplink and downlink satellite communications and slow-scan TV systems for public distribution of agricultural weather

information, agricultural information, and teleconferencing.

Georgia

File No. 3127CRB, Georgia Public Telelcommunications Commission, 1540 Stewart Avenue, SW, Atlanta, GA 30310. Signed by: Richard E. Ottinger, Executive Director. Funds Requested: $317,692. Total Project Cost: $423,590. To establish two station state radio networks which will provide first public signal to approximately 1.1 million listeners. Project is first phase of eight station state public radio networks. Initially programming will originate from Atlanta. Warm Springs station will operated at 100 KW on 88.1 MHZ. Cochran station will operate at 100 KW on 89.7 MHZ.

File No. 3234RNC, Georgia Radio Reading Service, Inc., 1580 Peach Tree Street, N.W., Atlanta, GA 30309. Signed by: James E. Cashin, Executive Director. Funds Requested: $28,125. Total Project Cost: $37,500. To acquire 500 SCA receivers for use by the blind and print handicapped. Users will receive the programming broadcast by WABE–FM in Atlanta. Power increase by WABE–FM is providing additional receiver demands.

File No. 3171CRB, West Georgia College, Maple Street, Carrollton, GA 30118. Signed by: Maurice K. Townsend, President. Funds Requested: $56,437. Total Project Cost: $75,256. To extend the signal of WWGC–FM to better serve the Carrollton area. Project will relocate antenna and replace 32-year-old transmitter.

Iowa

File No. 3030CRB, University of Northern Iowa, 324 Communications Arts Center, Cedar Falls, IA 50614. Signed by: Harold J. Burris, Admin., Grants & Contracts. Funds Requested: $119,986. Total Project Cost: $170,181. To replace antenna and improve STL of KUNI, a public radio station serving Cedar Falls, Iowa.

File No. 3333CRB, Oakhill-Jackson Economic Development Corp., POB 1405, 625 5th Avenue, S.E., Cear Rapids, IA 52406. Signed by: Robert J. Irwin, President. Funds Requested: $66,635. Total Project Cost: $160,442. To increase the power of noncommercial radio station KOJC from 10 watts to 250 watts. KOJC serves Cedar Rapids, Iowa.

File No. 3071CTB, Eastern Iowa Community College District, 284 Eastern Avenue, Davenport, IA 52803. Signed by: Michael E. Crawford, Chancellor. Funds Requested: $912,553. Total Project Cost: $1,303,647. To establish the Eastern Iowa Telecommunications Network using ITFS and microwave technology which will link three colleges and extension sites.

File No. 3069PRTB, State Educational Radio & TV Facility Board, Iowa Public TV, 2801 Bell Avenue, Des Moines, IA 50321. Signed by: Larry G. Patten, Executive Director. Funds Requested: $150,000. Total Project Cost: $183,193. To identify and to plan for coverage of areas of Iowa unserved by public radio and/or TV. To assess state information and processing systems and to develop plans for a more efficient system.

File No. 3070CTB, State Educational Radio & TV Facility Board, Iowa Public TV, 2801 Bell Avenue, Des Moines, IA 50321. Signed by: Larry G. Patten, Executive Director. Funds Requested: $237,214. Total Project Cost: $316,286. To replace essential studio equipment of public TV station KDIN, Channel 11, Flagship Station of Iowa Public TV, serving the entire state.

File No. 3072CTB, Iowa Lakes Community College, 300 South 18th Street, Estherville, IA 51334. Signed by: R. H. Blacker, Superintendent. Funds Requested: $142,476. Total Project Cost: $189,969. To expand the ITFS system of Iowa Lakes Community College in order to increase the population able to receive the system's educational programming. The system currently serves five northeastern rural counties.

Idaho

File No. 3091CTB, Nez Perce Tribal Foundation, Veterans Memorial Bldg., Lapwai, ID 83540. Signed by: J. Herman Reuben, Acting Secretary. Funds Requested: $112,408. Total Project Cost: $149,877. To activate a low-power TV station on the Nez Perce Reservation in northern Idaho which will operate on Channel 36 at Lapwai, and also serve the communities of Sweetwater and Spalding.

Illinois

File No. 3186PRB, Prairie Air, Inc., 113 North Market, Champaign, IL 61856. Signed by: Bill Thomas, Station Coordinator. Funds Requested: $3,564. Total Project Cost: $3,564. To plan for the expansion of noncommercial radio station WEFT, 90.1 MHZ, Champaign, IL, to provide increased public broadcast services to the communities in the greater Champaign-Urbana, Illinois area.

File No. 3187CRB, Prairie Air, Inc., 113 N. Market, Champaign, IL 61856. Signed by: Bill Thomas, Station Coordinator. Funds Requested: $40,103. Total Project Cost: $53,603. To improve studio and acquire remote mobile origination equipment for noncommercial radio station WEFT, 90.1 MHZ, Champaign, IL, to offer expanded local programming services to the residents of the Champaign-Urbana metropolitan area.

File No. 3116CRB, Board of Education, City of Chicago, 228 Worth LaSalle Street, Chicago, IL 60601. Signed by: McNair Grant, Assoc. Supt., Govt. Funded Prog. Funds Requested: $648,420. Total Project Cost: $864,560. To improve the production and distribution facilities of noncommercial FM radio station WBEZ, 91.5 MHZ, Chicago, IL, by replacing and expanding apparatus needed to deliver programming to the metropolitan Chicago area.

File No. 3219CRB, Northern Illinois University, DeKalb, IL 60115. Signed by: Richard J. Smith, VP for Business Affairs. Funds Requested: $482,436. Total Project Cost: $643,248. To extend the signal and provide first origination program capabilities in Rockford, IL, for noncommercial radio station WNIV, 89.5 MHZ, DeKalb, IL, to provide first service in the area surrounding Rockford and improve broadcast services to the metropolitan areas of both Rockford and DeKalb.

File No. 3264CTN, Oakton Community College, 1600 E. Golf Road, Des Plaines, IL 60016. Signed by:,W.A. Koehnline, President. Funds Requested: $192,244. Total Project Cost: $273,825. To establish an interconnection among several community cable systems via activation of a noncommercial ITFS service on Channels B3 & B4, Des Plaines, IL, to provide locally originated program services to the townships of Maine, New Trier, Northfield and Niles of surburban Chicago.

File No. 3199CRB, Illinois Eastern Community Colleges, 2200 College Drive, Mt. Carmel, IL 62863. Signed by: James S. Spencer, Chancellor. Funds Requested: $20,000. Total Project Cost: $27,826. To provide significant improvement in programming flexibility for noncommercial FM radio station WVJC, 89.1 MHZ, by adding satellite reception facilities to receive National Public Radio programming.

File No. 3231PTBN, Governors State University, Stuenkel Road, Park Forest, IL 60466. Signed by: Dr. Sheadrick A. Tillman IV, Asoc. VP for Research. Funds Requested: $12,775. Total Project Cost: $19,927. To plan for noncommercial television services to enable the dissemination of educational and cultural programs from Governors State University by a variety of telecommunications means to serve the communities of Kankakee, Joliet, Palos Hills, IL, and St. John, IN.

File No. 3017/CRB, Bradley University, 1501 W. Bradley Avenue, Peoria, IL 61625. Signed by: Dr. John C. Hitt, Provost & VP for Academic Affairs.

Funds Requested: $16,610. Total Project Cost: $22,210. To improve the origination capabilities of noncommercial radio station WCBU 89.9 MHZ of Bradley University, Peoria, IL, by replacing old and adding additional equipment needed to better serve the Peoria service area.

File No. 3325CRB, Augustana College, 639 38th Street, Rock Island, IL 61201. Signed by: J. Thomas Tredway, President. Funds Requested: $18,796. Total Project Cost: $25,812. To extend the signal of noncommercial radio station WVIK, Rock Island, IL, by activating translators in both Galesburg, Channel 283, and Dixon, Channel 214, IL, to provide first service for public broadcasting in those communities.

File No. 3128CRB, The Board of Trustees University of Illinois, 354 Administration Building, Urbana, IL 61801. Signed by: Linda Wilson, Assoc Vice Chancellor for Res. Funds Requested: $46,200. Total Project Cost: $61,600. To improve dissemination and origination facilities of noncommercial radio station WILL, operating on 90.0 MHZ, Urban, Illinois, by replacing obsolete equipment necessary to deliver services to east central Illinois and west central Indiana.

Indiana

File No. 3154CTB, Board of Trustees of Indiana University, Indiana Univ. Bryan 215E, Bloomington, IN 47405. Signed by: J. D. Mulholland, Treasurer. Funds Requested: $301,016. Total Project Cost: $401,355. To replace existing essential broadcast dissemination and origination facilities of noncommercial TV station WTIU, Channel 30, Bloomington, Indiana, to enable continued telecommunications services to communities in and about Bloomington.

File No. 3140CTB, Fort Wayne Public TV, Inc., 227 E. Washington Blvd, PO Box 39, Fort Wayne, IN 46801. Signed by: Donald R. Sugarman, MD, President. Funds Requested: $82,170. Total Project Cost: $109,560. To improve the programming flexibility of noncommercial television repeater station on Channel 39, Fort Wayne, Indiana, by installing a satellite receiving dish to receive PBS programming for dissemination to the Fort Wayne metropolitan area.

File No. 3145CTN, Indiana University Foundation, 355 Lansing Street, Indianapolis, IN 46202. Signed by: Wendell F. McBurney, Dean Research & Spon. Programs. Funds Requested: $172,566. Total Project Cost: $230,088. To extend and improve statewide interconnection network facilities by activating ITFS Channel G–1, Westville, IN and ITFS Channel B–1 and B–2, South Bend, IN, further to remote control transmission equipment and replace obsolete signal reception equipment at nine college and university locations of the system.

File No. 3098CTB, Michigan Public Brdcstg Corp., 2424 California Rd, PO Box 34, Mishawaka, IN 46544. Signed by: Thomas E. Brubaker, Executive Director & Gen Manager. Funds Requested: $30,605. Total Project Cost: $40,806. To replace obsolete equipment in order to maintain dissemination and program services on noncommercial television station WNIT–TV, Channel 34, South Bend, Indiana, providing service to communities in the South Bend metropolitan area.

File No. 3241CTB, WIPB, Ball State University, 246 Minnestrista Blvd., Muncie, IN 47303. Signed by: Thomas J. Kinghorn, VP Business Affairs, Treasurer. Funds Requested: $189,000. Total Project Cost: $252,000. To provide for the replacement of equipment of existing broadcast facilities and to improve the origination facilities of noncommerical television station WIPB, Channel 49, Muncie, IN, to maintain local and other program services to the communities in east central Indiana.

File No. 3277CRB, Earlham College, 509 National Rd. West, Richmond, IN 47374. Signed by: G. Richard Wynn, VP, Financial Affairs. Funds Requested: $28,081. Total Project Cost: $55,950. To extend the signal of noncommercial radio station WECI, 91.5 MHZ, Earlham College, Richmond, IN, by increasing dissemination capacity with significantly higher power transmission equipment to provide first service to the Richmond, IN area communities.

File No. 3060CTB, Vincennes University Board of Trustees, 1002 N. First Street, Vincennes, IN 47591. Signed by: Phillip M. Summers, Ph.D., President. Funds Requested: $84,600. Total Project Cost: $112,800. To improve transmission facilities of noncommercial television station, WVUT, Channel 22, Vincennes, IN, by making more efficient and reliable dissemination equipment necessary to serve the 24-county area of metropolitan Vincennes.

Kansas

File No. 3251CTB, Smokey Hills Public TV, P. O. Box 98th & Elm Street, Bunker Hill, KS 67626. Signed by: Kenneth F. Gardner, Vice President & General Manager. Funds Requested: $171,176. Total Project Cost: $228,235. To extend the signal of KOOD–TV to the residents in Pratt, Kiowa, Edwards, Kingman, Barber and Stafford Counties by translator and microwave. Project will provide first signal to over 1,000 currently unserved residents.

File No. 3202PRB, Emporia State University, 1200 Commercial, Emporia, KS 66801. Signed by: John E. Visser, President. Funds Requested: $25,900. Total Project Cost: $25,900. To plan for a public telecommunications broadcast facility at Emporia State University to serve Emporia, Kansa.

File No. 3338CRB, The University of Kansas, 1150 W. 11th Street/POB 647, Lawrence, KS 66044. Signed by: Carolyn Hallenbeck, Dir of Research Support. Funds Requested: $22,560. Total Project Cost: $30,500. To purchase SCA receivers to provide radio reading services to 400 additional print handicapped in Lawrence, Kansas.

File No. 3013CRB, Friends University, 2100 University Avenue, Wichita, KS 67213. Signed by: Richard Felix, President. Funds Requested: $43,054. Total Project Cost: $57,405. To improve facilities of public radio station KSOF operating at 91.1 in Wichita, Kansas, by purchasing studio and remote equipment.

File No. 3103CRB, Kansas Public T/C Service, Inc., 320 West 21st Street, Wichita, KS 67201. Signed by: Zoel Parenteau, President & General Manager. Funds Requested: $167,206. Total Project Cost: $222,943. To improve facilities of KPTS, a public TV station in Wichita, Kansas, operating on Channel 8.

Kentucky

File No. 3181CRB, Western Kentucky University, Academic Complex 153, Bowing Green, KY 42101. Signed by: Dr. Paul B. Cook, Asst. to Pres. for Resources Mgmt. Funds Requested: $36,150. Total Project Cost: $48,200. To establish a noncommercial radio station on frequency 89.7, Sommerset, KY, by erecting tower facilities at Purdy, KY, in order to provide public radio service programming to communities in that area.

File No. 3042CRB, Black American Communications, Inc. of Kentucky, 315 W. Lexington Street, Harrodsburg, KY 40330. Signed by: William A. Taylor, President. Funds Requested: $72,135. Total Project Cost: $96,180. To establish a noncommercial FM radio station operating on FM 89.9, Frankfort, KY, to provide first local program services to minorities in Owen and Henry Counties, KY, and additional service to the Frankfort, KY, metropolitan area.

File No. 3276CTB, Kentucky Authority for Educational TV, 600 Cooper Drive, Lexington, KY 40502. Signed by: O. Leonard Press, Executive Director. Funds Requested: $273,180. Total Project Cost: $364,240. To extend the signal of noncommercial television station

VOL 48 ISS 91 MAY 10 1983 UMI

WKMJ, Channel 58, Louisville, KY, by replacing obsolete dissemination equipment at its transmitting site, Floyd Knobs, Indiana, to better serve the people in the Louisville metropolitan area.

File No. 3280CTB, Kentucky Authority for Educational TV, 600 Cooper Drive, Lexington, KY 40502. Signed by: O. Leonard Press, Executive Director. Funds Requested: $236,250. Total Project Cost: $315,000. To improve the origination facilities of the Kentucky Authority for Educational Television, KET, Lexington, by replacing obsolete apparatus needed to provide locally originated programming throughout the State.

File No. 3077TNP, University of Louisville Foundation, Inc., 2301 S. Third St./Balknap Campus, Louisville, KY 40292. Signed by: John W. Brown, Dir., Ofc. of Sponsored Programs. Funds Requested: $44,827. Total Project Cost: $44,827. To plan for an expansion of ITFS systems operated by the University of Louisville Instructional Communications Center for the Kentuckian Metroversity, Louisville, KY, to bring additional telecommunications services to the Fort Knox, KY, community.

File No. 3001CRB, Appalshop, Inc., 306 Madison Street, Whitesburg, KY 41858. Signed by: Katharine Pearson, President. Funds Requested: $99,557. Total Project Cost: $132,770. To establish a noncommercial FM radio station on a frequency of 88.7 in Mayking, KY and provide origination facilities at Whitesburg, KY to provide programming to rural and isolated communities in southeastern Kentucky.

Louisiana

File No. 3096CTNC, Louisiana Educational Television Authority, 2618 Wooddale, Baton Rouge, LA 70805. Signed by: A. Fred Frey, Executive Director. Funds Requested: $276,683. Total Project Cost: $368,911. To expand the closed-circuit educational TV network by utilization of 6 ITFS transmitters located at 6 hospitals in Louisiana. Stations will be located at Baton Rouge, Shreveport, Monroe, Lafayette, Alexandria, and Lake Charles.

File No. 3326CTB, Greater New Orleans Educational TV Foundation, 916 Navarre Avenue, New Orleans, LA 70124. Signed by: Vincent F. Saele, President & CEO. Funds Requested: $768,273. Total Project Cost: $1,024,365. To replace worn out equipment at station WYES–TV, Channel 12, in New Orleans. Station presently provides only public TV signal for 1,800,000 people.

Massachusetts

File No. 3011CRN, Talking Information Center, 440 Plain Street, Box 487, Marshfield, MA 02050. Signed by: Ron Bersani, Executive Director. Funds Requested: $98,150. Total Project Cost: $130,866. To improve production capabilities of Talking Information Center radio reading service and to purchase 15000 SCA receivers to serve the sight impaired of Marshfield, MA.

Maryland

File No. 3253PRB, University of Maryland, Eastern Shore, Backbone Rd. JT Williams Admin., Princess Anne, MD 21853. Signed by: William P. Hytche, Chancellor. Funds Requested: $26,320. Total Project Cost: $26,960. To plan for a noncommercial FM radio station which will serve Princess Anne and surrounding areas and which would provide first public radio signal to unserved areas.

File No. 3066CRN, The Washington Ear, Inc., 35 University Blvd., East, Silver Spring, MD 20901. Signed by: Margaret Rockwell Pfanstiehl, President and CEO. Funds Requested: $2,732. Total Project Cost: $3,643. To acquire audio description equipment for use with WETA–FM SCA. Project will provide descriptions of video for visually impaired. Service will benefit approximately 28,000 in Washington, DC area. Service could potentially benefit two million visually impaired in USA.

Maine

File No. 3043CTB, Colby-Bates-Bowdoin Educational Telecasting Corp., 1450 Lisbon Street, Lewiston, ME 04240. Signed by H. Odell Skinner, President and General Manager. Funds Requested: $1,031,983. Total Project Cost: $1,544,983. To improve the transmitting system of WCBB–TV, a public television station serving Lewiston, Maine, and to extend that signal via translators, to four unserved areas of Maine.

File No. 3298CRB, Saint Joseph's College, White's Bridge Road, North Windham, ME 04062. Signed by: Anthony R. Santoro, Ph.D., President. Funds Requested: $23,119. Total Project Cost: $30,827. To activate a noncommercial radio station on 91.5 to serve North Windham, Maine.

File No. 3232CTB, University of Maine, Alumni Hall, Orono, ME 04469. Signed by: William J. Sullivan, Vice Chancellor for Admin. Funds Requested: $148,897. Total Project Cost: $198,897. To improve the production facilities of WMBG–TV providing first public television local origination to southern Maine.

File No. 3243CTB, University of Maine, Alumni Hall, Orono, ME 04469. Signed by: William J. Sullivan, Treasurer. Funds Requested: $306,784. Total Project Cost: $409,045. To replace obsolete transmitting equipment of public television station WMEM serving Aroostook County, Maine.

Michigan

File No. 3108CTB, Grand Valley State College, 301 Manitou Hall, Allendale, MI 49401. Signed by: James Starkweather, Director of Budgets. Funds Requested: $182,426. Total Project Cost: $243,235. To activate a repeater noncommercial TV station on Channel 52, Kalamazoo, MI, providing first service to communities in the west central portion of Michigan.

File No. 3087CTB, Regents of the University of Michigan-Flint, 400 4th Street, Admin. Bldg., Ann Arbor, MI 48109. Signed by: J. F. Brinkerhoff, VP & Chief Financial Officer. Funds Requested: $172,023. Total Project Cost: $229,365. To extend the broadcast signal of noncommercial television station WFUM, Channel 28, Flint, MI, by constructing a translator on Channel 46, Port Huron, MI, to bring residents of that and surrounding communities a first public broadcast signal in the area.

File No. 3151CTB, Detroit Educational TV Foundation, 7441 Second Blvd., Detroit, MI 48202. Signed by: John T. Caldwell Jr., President and General Manager, Funds Requested: $315,499. Total Project Cost: $420,666. To improve origination facilities of noncommercial broadcast television station WTVS, Channel 56, Detroit, MI, by replacing obsolete production equipment to provide better programming to communities of the metropolitan Detroit area and to the PBS network.

File No. 3175CTB, Board of Trustees Michigan State Univ., 212 Comm. Arts Building, East Lansing, MI 48824. Signed by: Roger E. Wilkinson, Secretary, Board of Trustees. Funds Requested: $326,250. Total Project Cost: $435,000. To replace basic equipment at existing noncommercial television station WKAR, Channel 23, East Lansing, MI, and thereby improve origination facilities necessary to provide program services to the metropolitan areas of Lansing and Jackson, Michigan.

File No. 3081PRTBN, Gwinn Area Community Schools, Gwinn, MI 49841. Signed by: Dr. Allen Ahola, Superintendent. Funds Requested: $79,800. Total Project Cost: $121,600. To plan for a noncommercial public telecommunications service system to meet educational, social, health and other basic needs of rural and isolated communities in Michigan's upper peninsula region.

File No. 3051CTB, Central Michigan University, 155 Anspach Hall, Mt. Pleasant, MI 48859. Signed by: Harold Abel, President. Funds Requested: $1,032,445. Total Project Cost: $1,376,594. To establish noncommercial TV repeater stations operating on Channels 27 in Cadillac and Channel 21 in Manistee, MI, operated by Central Michigan University, Mt. Pleasant, MI, station WCMU, Channel 14, to serve the Cadillac, Manistee and Ludington areas.

File No. 3124CRB, Blue Lake Fine Arts Camp, Rural Route #2, Twin Lake, MI 49457. Signed by: William F. Stansell, President. Funds Requested: $13,817. Total Project Cost: $18,423. To provide auxiliary remote studios by acquiring mobile origination facilities for noncommercial FM radio station WBLV, 90.3 MHZ, Twin Lake, Michigan, to better serve the communities within its coverage area.

Minnesota

File No. 3165CTB, West Central Minnesota Educational TV Council, 25 South Miles Street, Appleton, MN 56208. Signed by: James T. Hegland, Secretary KWCM Bd of Directors. Funds Requested: $1,231,664. Total Project Cost: $1,642,219. To extend the signal of noncommercial television station KWCM, Channel 10, Appleton, MN, by acquiring additional dissemination apparatus to meet the need of communities in southwest Minnesota.

File No. 308CRB, Markato State University, MSU Student Union Room 119, Markato, MN 56001. Signed by: Margaret R. Preska, President. Funds Requested: $81,615. Total Project Cost: $108,820. To extend the signal of public radio station KMSU, 89.7 MHZ. Mankato State University, Mankato, MN, by interconnecting station KAVT, Austin, MN, and by translators in the communities of Albert Lea, Fairmont, and Blue Earth, MN, to provide service to those communities.

File No. 3150BTBNC, Minnesota Tele-Media, Marshall, MN 56258. Signed by: Gerritt Groen, Chairperson. Funds Requested: $1,569,870. Total Project Cost: $2,093,159. To establish a noncommercial telecommunications network by acquiring low power television translators, instructional TV fixed service and microwave interconnection apparatus for dissemination and origination purposes to provide educational and cultural programs to central southwest Minnesota's rural and isolated communities.

File No. 3025CTB, Twin Cities Public TV, Inc., 1640 Como Avenue, St. Paul, MN 55108. Signed by: James E. Carufel, Ast. Gen. Mgr., VP–Admin. Funds Requested: $408,450. Total Project Cost: $544,600. To provide replacement of essential and improve other origination facilities of noncommercial TV station, KTCA, Channel 2, St. Paul, MN, to assure uninterrupted service to residents of Minnesota.

File No. 3073TRBNP, Minnesota Department of Education, 550 Cedar Street, St. Paul, MN 55101. Signed by: John J. Feda, Commissioner of Education. Funds Requested: $99,150. Total Project Cost: $120,050. To plan for facilities to establish transmission and production for a variety of noncommercial telecommunications services to unserved rural and isolated communities in Minnesota and to interconnect them with existing broadcast and nonbroadcast services.

File No. 3112CRB, Minnesota Public Radio, Inc., 45 East Eighth, St. Paul, MN, 55101. Signed by: William H. Kling, President. Funds requested: $122,170. Total Project Cost; $187,910. To purchase transmission equipment for a new FM public radio station and translator to serve Virginia, Hibbing, and International Falls.

File No. 3113CRB, Minnesota Public Radio, Inc., 45 East Eighth Street, St. Paul, MN 55101. Signed by: William H. Kling, President. Funds Requested: $62,287. Total Project Cost: $83,050. To establish a noncommercial radio station on 88.1 MHZ, Sioux Falls, SD, to offer origination services from Augustana College's Sioux Falls campus and from Minnesota Public Radio Station, KRSW, Worthington, MN, to provide telecommunications services to Sioux Falls and unserve rural communities north of the city.

File No. 3114CRB, Minnesota Public Radio, Inc., 45 East Eighth Street, St. Paul, MN 55101. Signed by: William Kling, President. Funds Requested: $370,089. Total Project Cost: $493,452. To replace obsolete dissemination equipment for noncommercial radio station KSJM, 91.1, St. Paul, MN, and to improve the origination capabilities of Minnesota Public Radio by adding remote studio capabilities and satellite uplink equipment in order to provide services to its network in Minnesota and elsewhere.

File No. 3300PTB, Educational Cooperative Service, Box 15, Star Route, Staples, MN 56479. Signed by: Richard T. Hegre, Executive Director. Funds Requested: $41,000. Total Project Cost: $41,000. To plan for the activation of first noncommercial television services to serve a fourteen county area in north central Minnesota in order to provide educational, cultural, and informational programming to the rural and isolated communities.

Missouri

File No. 3314CRB, The School of the Ozarks, Point Lookout, MO 65726. Signed by: Howell Keeter, Acting President. Funds Requested: $38,038. Total Project Cost: $50,710. To improve signal of public radio station KSOZ serving Point Lookout, Missouri.

File No. 3009CRB, Curators of the University of Missouri, G–6 Library, Rolla, MO 65401. Signed by: Neil K. Smith, Dir. Business Services. Funds Requested: $9,704. Total Project Cost: $12,939. To replace obsolete studio equipment of KUMR–FM, a public radio station serving Rolla, MO.

File No. 3205PTB, Ozark Public Telecommunications, Inc., MPO Box 21, Springfield, MO 65801. Signed by: Christopher W. Nattinger, Chairman of the Board. Funds Requested: $14,475. Total Project Cost: $14,475. To plan for the extension of signal from public station KOZK–TV and KSMU–Fm in Springfield to Joplin, Missouri.

Mississippi

File No. 3345PRB, Mississippi Valley State Uuniv, Highway 52 & Sunflower Road, Itta Bena, MS 38941. Signed by: Joe I. Boyer, President. Funds Requested: $26,638. Total Project Cost: $31,338. To plan for the establishment of a noncommercial FM station at Itta Bena, MS. Station would serve 23,000 people in Leflore County.

File No. 3228PTB, Mississippi Band of Choctaw Indians, RT 7, Box 21, Philadelphia, MS 39350. Signed by: Phillip Martin, Chief. Funds Requested: $42,954. Total Project Cost: $42,954. To plan the establishment of a noncommercial TV station to serve the Choctaw Indian Reservation and surrounding area.

Montana

File No. 3346CRB, Blackfeet Media Inc., Tribal Admin. Bldg., Box 850, Browning, MT 59417. Signed by: Darnell Doore, Blackfeet Media Director. Funds Requested: $204,830. Total Project Cost: $273,107. To establish a noncommercial radio station on the Blackfeet Indian Reservation which will operate on 88.7 MHz in Browning, MT, and will provide a first public radio service including locally originated, culturally-related programming, to listeners in a northwest section of the State of Montana.

File No. 3208BNCT, Bitter Root Electric TV Cooperative Inc., P.O. Box 109, Corvallis, MT 59828. Signed by: Reno Peressini, President. Funds Requested: $92,527. Total Project Cost:

VOL 48 ISS 91 MAY 10 1983 UMI

$123,370. To activate a noncommercial low-power television facility to bring first public television to the residents of Darby, Hamilton, Grantsdale, Corvallis and Victor, MT, plus homes in surrounding rural areas.

File No. 3184CTB, Valley County TV Dist #1, c/o Clerk & Recorders Office, Glasgow, MT 59230. Signed by: Everett Breigenzer, President. Funds Requested: $81,000. Total Project Cost: $108,000. To establish a public low-power television facility, operating on Channel 6 in Glasgow, MT, and one translator to bring first public television to residents of the Milk River Valley, including a portion of the Ft. Peck Indian Reservation.

File No. 3215CRB, Great Falls Public Radio Association, 1400 First Ave., N., POB 3343, Great Falls, MT 59403. Signed by: Bruce Mackenzie, President. Funds Requested: $99,341. Total Project Cost: $133,455. To establish a noncommercial radio station which will bring a first public radio signal to residents of Cascade County and portions of Teton, Pondera, and Chouteau Counties. This station will rebroadcast KUFM–FM, from the University of MT, with the capability to substitute local programming, and carrying SCA which permits reading services for the print handicapped.

File No. 3166CTB, Dull Knife Memorial College Telecommunications, Box 206, Lame Deer, MT 59043. Signed by: Darius T. Rowland, President. Funds Requested: $556,838. Total Project Cost: $742,584. To expand the broadcast capability of the low-power TV facility under construction by Lame Deer Memorial College using translators, six of which will be solar powered, to bring public TV to the entire Northern Cheyenne Indian Reservation, a portion of the Crow Reservation and off-reservation mining towns expected to rapidly develope in this energy impacted area over the next five years.

File No. 3248CTB, Shields & Paradise Valley TV District, Court House, Treasurer's Office, P.O. Box 34, Livingston, MT 59047. Signed by: Harry A. Livingston, President. Funds Requested: $61,660. Total Project Cost: $82,215. To establish a low-power television facility, operating on Channel 49, six miles south of Livingston, to bring first public television south into Paradise Valley as well as north to the Livingston area and Shields River Valley.

File No. 3209CTB, Phillips County TV Tax District, P.O. Box 821, Malta, MT 59538. Signed by: Ray Holzhey, Chairman. Funds Requested: $70,500. Total Project Cost: $94,000. To establish a noncommercial low-power television facility in Malta, MT, operating on Channel 15, which will bring a first public TV signal to the citizens of Phillips County.

File No. 3244BNCT, Whitehall Low Power TV, Inc., 400 First Street, Whitehall, MT 59759. Signed by: Dale Davis, President. Funds Requested: $100,987. Total Project Cost: $134,650. To establish a low-power public television facility to bring first service to the residents of Whitehall, MT and the immediate outlying area, and to distribute the signal over the local system.

North Carolina

File No. 3092CRB, University of North Carolina at Chapel Hill, Swain Hall 044A, Chapel Hill, NC 27514. Signed by: Donald M. Wood, Dir. of Research Services. Funds Requested: $97,200. Total Project Cost: $129,600. To activate a repeater FM radio station on 88.3 MHz in Greenville. Station will provide first service to six counties in eastern North Carolina. Primary coverage for Edgecomb, Pitt, Greene, Lenoir, Wayne, Wilson counties. Station will repeat the signal of WUNC–FM in Chapel Hill.

Nebraska

File No. 3086CTB, University of Nebraska, 1800 North 33rd Street, Lincoln, NE 68501. Signed by: Earl J. Freise, Asst. Vice Chancellor for Res. Funds Requested: $709,569. Total Project Cost: $946,093. To replace the unreliable 20-year-old KUON–TV transmitter and replace the worn out, obsolete local and network origination equipment in order to provide a reliable and quality program service to 97.5 percent of the State.

File No. 3157CRB, Union College, 3800 South 48th Street, Lincoln, NE 68506. Signed by: Dean Hubbard, President. Funds Requested: $447,750. Total Project Cost: $597,000. To construct a statewide radio network by activating four stations at Norfolk, Kearny, North Platte, and Scottsbluff, with an off-air pickup from KUCV in Lincoln, which will provide first radio service to 450,000 people, and to activate an SCA system to be used throughout the network.

File No. 3126PRN, Radio Talking Book Service, Inc., 3219 Cuming Street, Omaha, NE 68131. Signed by: David E. Robinson, Director. Funds Requested: $14,599. Total Project Cost: $14,599. To plan for the extension of the Radio Talking Book Service in Omaha to provide this service statewide.

File No. 3302PRB, Omaha Black Telecommunications, Inc., 4732 N. 41st Street, Omaha, NE 68111. Signed by: Ruth Williams, Grant Coordinator Funds Requested: $121,800. Total Project Cost: $122,344. To plan the construction of a 5,500 watt minority radio station for the Omaha area, in order to provide an alternative program service for Black citizens.

New Hampshire

File No. 3118CRB, Granite State Public Radio, Inc., 26 Pleasant Street, Concord, NH 03301. Signed by: Keith Thompson, General Manager. Funds Requested: $7,762. Total Project Cost: $10,350. To extend, via translator, the signal of public radio station WEVO–FM of Concord, NH, to the unserved Nashua County area of New Hampshire.

File No. 3297CTB, University of New Hampshire, Pettee Brook Lane, Durham, NH 03824. Signed by: Lennard A. Fisk, Director of Research. Funds Requested: $278,685. Total Project Cost: $371,580. To replace and increase power of WLED, Channel 49, serving Littleton, New Hampshire, and to replace obsolete microwave distribution system for New Hampshire Public Tv system.

New Jersey

File No. 3104PRB, Newark Public Radio, Inc., 54 Park Place, Newark, NJ 07102. Signed by: Robert Gottenhof, General Manager. Funds Requested: $22,000. Total Project Cost: $28,000. To plan to extend the signal of public radio station WGBO–FM, currently serving the Newark, New Jersey area, into the unserved communities of Vineland and Atlantic City.

File No. 3328PRB, Rutgers University, 180 University Avenue, Newark, NJ 07102. Signed by: Albert Hanna, Assistant Comptroller. Funds Requested: $42,555. Total Project Cost: $57,825. To plan for first public radio service to Vineland and Atlantic City, New Jersey.

File No. 3176PTN, Somerset County College T/C, P.O. Box 3300, Somerville, NJ 08876. Signed by: S. Charles Irace, President. Funds Requested: $41,638. Total Project Cost: $41,638. To plan a telecommunications network which will link Somerset County College in Somerville, NJ, to local industry, government agencies, and other educational centers.

File No. 3033 CTN, Borough of South River, 64–66 Main Street, South River, NJ 08882. Signed by: William Reichenbach, Jr., Borough Clerk. Funds Requested: $88,762. Total Project Cost: $118,350. To activate a community cable channel that would serve South River, New Jersey.

File No. 3137CRN, State of New Jersey, Department of Education State Library, 2300 Stuyvesant Avenue CN 501, Trenton, NJ 08625. Signed by: Sam Cooperman, Commissioner of Education.

Funds Requested: $80,384. Total Project Cost: $115,964. To construct a radio reading service for the print handicapped using the aural subcarriers of UHF New Jersey television station WNJT in Trenton and WNJB in New Brunswick.

New Mexico

File No. 3245CTB, Regents of the University of New Mexico and Board of Education, City of Albuquerque, 1130 University Blvd., NE, Albuquerque, NM 87102. Signed by: Ivan Martinez, Manager Grants and Contracts. Funds Requested: $122,077. Total Project Cost: $162,770. To acquire and replace equipment necessary to operate and maintain KUME–TV in Albuquerque, NM. Also, project will re-institute translator in the Farmington, Herfano, and Bloomfield areas. Translators will replace service previously provided by San Juan Non-Profit TV.

File No. 3254RBC, Regents of Univ of New Mexico, 305 Onate Hall, Campus & Girard, Albuquerque, NM 87131. Signed by: Ivan Martinez, Manager, Contracts and Grants. Funds requested: $37,350. Total Project Cost: $49,800. To replace worn out origination equipment at KUNM–FM, Albuquerque. Station provides service to approximately 660,000 in northern and central NM. Station is only NPR/CPB qualified station in geographic area.

File No. 3089CRB, Northern New Mexico Community College, POB 250, US285 ½m. n/City Hall, Espanola, NM 87532. Signed by: Ted J. Trujillo, VP of Student Affairs & Inst Opr. Funds Requested: $45,723. Total Project Cost: $60,964. To extend the signals of KANW/KUNM, Albuquerque, by FM translator. Translator will provide first service to 20,000 in Espanola area. Project proposes local origination capability for translator. Station will serve Rio Arriba and Santa Fe counties.

File No. 3282CRB, Regents of New Mexico State University, Milton Hall, Room 120, Las Cruces, NM 88003. Signed by: John J. Monagle, Dir Arts & Science Research Cntr. Funds Requested: $18,950. Total Project Cost: $25,267. To extend the signal of KRWG–FM by translators in four NM cities. Alamogordo on 89.5, Silver City on 91.3, Lordsburg on 91.9, and Truth or Consequences on 91.9, will receive first public radio signals. Project will provide first service to 54,074 citizens.

File No. 3330CTB, Regents of New Mexico State University, Milton Hall, Room 110, Las Cruces, NM 88003. Signed by: Jane A. Youngers, Dir Office of Grants & Contracts. Funds Requested: $32,625. Total Project Cost: $43,500. To improve the efficiency of KRWG–TV, operating on Channel 22 in Las Cruces, NM. Project would purchase an energy-saving device for the UHF which would save $9,500 per year in electrical costs.

File No. 3010CRB, Ramah Navajo School Board, Inc., P.O. Box 18, Ramah, NM 87321. Signed by: Bennie Cohoe, Executive Director. Funds Requested: $295,506. Total Project Cost: $394,008. To expand the service of KTDB–FM in Ramah. Signal will extend into the Shiprock Agency in parts of NM, AZ, and UT. Service will be provided by translators with local origination. Translators will be connected via microwave.

File No. 3198CRB, Fine Arts Radio, Inc., 1010 San Lorenzo Drive, Santa Fe, NM 87501. Signed by: William Dunning, Project Director. Funds Requested: $121,347. Total Project Cost: $161,797. To extend signal of KUNM–FM by use of translators in Santa Fe and Los Alamos. Project would provide local origination capacity of FM translators. Stations would be connected by microwave relay. Project would provide first acceptable local services to area.

Nevada

File No. 3321PRTB, Rural Television System, Inc., 70 Artemisa, Reno, NV 89507. Signed by: Daniel J. Tone, Executive Director. Funds Requested: $328,000. Total Project Cost: $328,000. To plan for the establishment of first service public broadcasting in unserved rural areas of the western United States, including, but not only California, Nevada, Montana, Wyoming, and Minnesota. Project proposes to approach at least 40 rural communities.

New York

File No. 3160CRB, Genesee Community College, 1 College Road, Batavia, NY 14020. Signed by: Chuck Platt, Associate Professor. Funds Requested: $22,500. Total Project Cost: $30,000. To construct an FM radio station operating at 90.7 MHZ with a power of 534 watts to provide local program service to the community with an accent on student training.

File No. 3107CRB, UHURU Communications, Inc., POB 653 Westview Station, Binghamton, NY 13905. Signed by: Ashimba A. Tariq, President. Funds Requested: $113,951. Total Project Cost: $151,934. To construct a minority owned and operated radio station which will provide an alternate program service for Binghamton, Endicott, Johnson City, and Broome County, operating on 91.5 with a power of 1000 watts.

File No. 3197CRB, STETA, Inc., 1168 Conklin Road, Binghamton, NY 13902. Signed by: Michael J. Ziegler, President & General Manager. Funds Requested: $138,723. Total Project Cost: $184,965. To extend the radio signal of WSKG–FM via six translators in order to provide the first radio service to six of the unserved cities in the southern tier—Corning, Cortland, Watkins Glen, Ithaca, Mansfield, and Oneonta.

File No. 3076CRB, Sun Ship Communications, Inc., 763 Humboldt Parkway, Buffalo, NY 14208. Signed by: Clarence Smith, Chairman of the Board. Funds Requested: $300,000. Total Project Cost: $600,000. To construct a minority-owned AM radio station in Buffalo, operating on 820 KHZ with a daytime power of 50 KW and a nighttime power of 2.5 KW in order to provide minority focused educational and informational progams for the greater western New York area.

File No. 3041CRB, St. Lawrence University, Payson Hall, Canton, NY 13617. Signed by: James A. Arvidson, Director of Broadcasting. Funds Requested: $17,250. Total Project Cost: $24,750. To secure a new antenna with a power gain of 2.5 which is necessary in order for WSLU to get the 18 KW effective radiated power needed to provide the first radio signal to 120,000 people.

File No. 3313CRB, Boces #1 Monroe County, 41 O'Connor Road, Fairport, NY 14450. Signed by: Kenneth F. Harris, Superintendent. Funds Requested: $88,442. Total Project Cost: $117,923. To expand the transmitter power of WRHR–FM from 10 watts to 2500 watts and interconnect three high school production studios by a microwave system in order to provide a network of instructional programs for the Rochester area.

File No. 3018CRTB, The Public Broadcasting Council of Central New York, 506 Old Liverpool Road, Liverpool, NY 13088. Signed by: Richard W. Russell, President & General Manager. Funds Requested: $364,147. Total Project Cost: $485,530. To provide the first public radio signal for Utica and Watertown via repeater transmitters. To provide SCA receivers for Syracuse, Utica and Watertown, and replace three worn out video tape recorders.

File No. 3170CTN, Chinese Community TV Network, 22 East Broadway, New York, NY 10002. Signed by: Chung Lo, President. Funds Requested: $375,000. Total Project Cost: $500,000. To install 30 city blocks with an industrial-type cable system to provide 100,000 Asians in Chinatown with local programs and to improve the origination capability of the Chinese Community TV Network's production studio.

VOL 48 ISS 91 MY 10 1983 UMI

File No. 3235CTB, Educational Broadcasting Corp., 356 West 58th Street, New York, NY 10019. Signed by: Charles S. Warren, Sr. VP, Chief Admin. Officer. Funds Requested: $453,750. Total Project Cost: $605,000. To replace worn out and obsolete local and national origination equipment essential to maintain and improve WNET's considerable program commitments.

File No. 3270PTN, Asian-Cine-Vision, Inc., 32 East Broadway, New York, NY 10002. Signed by: Peter Chow, Executive Director. Funds Requested: $46,410. Total Project Cost: $46,410. To plan the establishment of an Asian American Program Network by the development of a broadcast facility in New York and the most effective system for delivery of Asian programming to the target cities.

File No. 3295CTN, Hispanic Information & Telecomunications Network, 80 East 11th Street, New York, NY 10003. Signed by: Jose Luis Rodriguez, President. Funds Requested: $561,149. Total Project Cost: $748,199. To establish a complete production studio and microwave linkage to WNYE-TV for broadcast to the Western Union uplink satellite transponder for cable distribution in order to serve the communications needs of the Hispanic community in the Nation.

File No. 3134CTN, New York Institute of Technology, Wheatly Road, Old Westbury, NY 11568. Signed by: Mathew Schure, President. Funds Requested: $158,931. Total Project Cost: $211,910. To establish a microwave interconnect between New York Institute of Technology and cable systems in Manhattan and Nassau Counties, providing cultural and educational programs to meet the needs of minorities and women.

File No. 3285CTB, Northeast New York Public Telecommunications Council, Inc., PO Box 617, Plattsburgh, NY 12901. Signed by: Gerald K. Bates, President & General Manager. Funds Requested: $315,193. Total Project Cost: $420,258. To correct severe deficiencies in the signal coverage of WCFR-TV by replacing the antenna and RF exciter and replacing worn out and unreliable local origination equipment. The transmission upgrade will povide first service to 15,000 people in the Plattsburgh area.

File No. 318CTB, State University College at Potsdam, Pierrepont Avenue, Potsdam, NY 13676. Signed by: Dr. Cornelius Robbins, Acting President. Funds Requested: $124,215. Total Project Cost: $165,620. To establish a low-powered TV station at the State University College at Potsdam to provide local program service to the 18,000 residents in the community.

File No. 3094CTB, Rochester Area ETV Assoc., Inc., 280 State Street, Rochester, NY 14614. Signed by: William J. Pearce, President. Funds Requested: $330,000. Total Project Cost: $440,000. To provide an additional program service over cable designed to serve Rochester's 92,000 Black and Hispanic residents and to replace worn out production equipment.

File No. 3281CRB, Mohawk-Hudson Council on Educational TV Inc, P. O. Box 17, Schenectady, NY 12301. Signed by: Donald E. Schein, President. Funds Requested: $6,000. Total Project Cost: $8,000. To extend WMHT's radio information service for the print handicapped by securing an additional 100 SCA receivers.

Ohio

File No. 3185CTB, Ohio Univeristy Telecommunications Center, 9 S. College Street, Athens, OH 45701. Signed by: Ron Barr, Associate Provost. Funds Requested: $59,962. Total Project Cost: $79, 962.To upgrade the production capability of Ohio public TV stations WOUB, Channel 20, serving Athens and WOUC, Channel 44, serving Cambridge.

File No. 3122CTB, Bowling Green State University, Troup Avenue, Bowling Green, OH 43403. Signed by: Garrett T. Heberlein, Vice Provost for Research. Funds Requested: $755,514. Total Project Cost: $1,245,514. To increase ERP and replace transmitter of WGBU-TV which will provide first public TV service to 47,000 people in SE Michigan and NW Ohio.

File No. 3120CTB, The Ohio State University Telecommunications Center, 2400 Olentangy River Road, Columbus, OH 43210. Signed by: Dale K Ouzts, Director. Funds Requested: $1,024,072. Total Project Cost: $1,500,000. To replace transmitter and antenna of public TV station WOSU, Channel 34, serving Columbus, Ohio.

File No. 3106PRN, Miami Valley Radio Reading Service, Inc., Ste. 207 Roesch Library, Dayton, OH 45469. Signed by: Richard Dershem, Executive Director. Funds Requested: $20,000. Total Project Cost: $20,000. To establish a radio reading service to serve the print handicapped of Dayton, Ohio. Radio station WQRP-FM will supply both air time and use of subcarrier.

File No. 3178CTB, The Public Broadcasting Foundation of Northwest Ohio, P.O. Box 30, Toledo, OH 43692. Signed by: Robert D. Smith, President & General Manager. Funds Requested: $221,945. Total Project Cost: $296,945. To upgrade WGTE, a public TV station operating on Channel 30 and serving Toledo, Ohio, by replacing essential VTR units and editing system and acquiring state-of-the-art production equipment.

Oklahoma

File No. 3268CRB, University of Oklahoma, 780 Van Vleet Oval, Norman, OK 73019. Signed by: Taylor C. Anthony, Dir Office Research Admin. Funds Requested: $58,401. Total Project Cost: $77,868. To augment existing local origination facilities of KGOU-FM in Norman and provide a satellite earth terminal for greater flexibility of programming.

File No. 3339CRB, Carrie Williams Communication Foundation, Inc., Box 48538, Tulsa, OK 74106. Signed by: Gerald L. Davis, Chairman, Bd. of Directors. Funds Requested: $74,460. Total Project Cost: $99,280. To construct a minority owned and operated radio station, operating on 88.7 MHZ with a power of 3 KW in Tulsa.

Oregon

File No. 3133CRB, State of Oregon Acting by and through State Board of Higher Education, 1250 Siskiyou Blvd., Ashland, OR 97520. Signed by: Ernest E. Ettlich, Dean of Academic Affairs. Funds Requested: $30,906. Total Project Cost: $41,208. To extend the signal of KSOR-FM, operating on 90.1 MHZ from Ashland, OR, by translator to provide first public radio service to rural communities in northern California of Dunsmuir, McCloud and Mt. Shasta City, and to replace outdated equipment which prevents KSOR from providing adequate, quality service to its listeners.

File No. 3173PTN, Oregon Association of Hospitals Fdn., 220 S.W. Morrison, Portland, OR 97204. Signed by: Steven D. Berkshire, President. Funds Requested: $132,710. Total Project Cost: $132,710. To plan for a comprehensive broadcast system for the purpose of broadcasting health education to professionals and patients within hospitals and the community.

File No. 3174CRB, State of Oregon Acting by and through Oregon Commission on Public Broadcasting, 2828 SW Front Avenue, Portland, OR 97201. Signed by: Gerald L. Appy, Executive Director. Funds Requested: $183,000. Total Project Cost: $260,000. To upgrade and extend the signal of KOAP-FM, operating on 91.5 MHZ in Portland by replacing its transmitter and moving its antenna to a new tall tower (to be shared by KOAP-TV and other entities) which is being constructed at an antenna farm. This project will permit 300,000 additional persons to receive Oregon's flagship public radio station for the first time

File No. 3357CRB, KBOO Foundation, 20 S.E. 8th Avenue, Portland, OR 97214. Signed by: David F. Keyes, Treasurer. Funds Requested: $10,235. Total Project Cost: $13,647. To replace the antenna of public radio station KBOO-FM operating on 90.7 MHZ in Portland, OR, and provide a reliable, continuous signal to all listeners within the community.

Pennsylvania

File No. 3201, Bloomsburg State College, Main & Penn. Streets, Bloomsburg, PA 17815. Signed by: James H. McCormick, President. Funds Requested: $22,615. Total Project Cost: $30,154. To activate a cable access center based at Bloomsburg State College and serving the community of Bloomsburg, Pennsylvania.

File No. 3130CNBT, South Central Educational Broadcasting Council, 1982 Locust Lane, Harrisburg, PA 17109. Signed by: Dr. Robert Larson, President and General Manager. Funds Requested: $598,447. Total Project Cost: $797,929. To extend via translator the signal of WITF in Harrisburg, Pennsylvania, to unserved Franklin County, to improve the WITF signal received in Chambersburg, and to establish a narrowcasting telecommunication system of ITFS and cable.

File No. 3343CRB, Indiana University of Pennsylvania, 121 Stouffer Hall, Indiana, PA 15705. Signed by: Kurt P. Dudt, Assistant Professor. Funds Requested: $46,550. Total Project Cost: $64,733. To improve signal of public radio station WIUP serving Indiana, Pennsylvania.

File No. 3161CRB, Spanish American Civic Association, 545 Pershing Avenue, Lancaster, PA 17602. Signed by: Iris Macrae, President. Funds Requested: $35,595. Total Project Cost: $46,095. To activate a 100 watt public radio station which will provide first service to Lancaster and to the Hispanic community.

File No. 3093CTB, Metro. Pittsburgh Public Broadcasting, Inc., 4802 Fifth Avenue, Pittsburgh, PA 15213. Signed by: Henry Enright, Assistant to the President. Funds Requested: $113,010. Total Project Cost: $150,680. To extend by translator the signal of public TV station WQED-TV, serving Pittsburgh, to the unserved area of Somerset, Pennsylvania.

File No. 3168CRB, Northeastern Pennsylvania Educational TV Association, Old Boston Road, Pittston, PA 18640. Signed by: Dr. John E. Walsh, President & General Manager. Funds Requested: $6,178. Total Project Cost: $8,238. To extend via translators the signal of public radio station WUIA-FM, currently serving the Pittston area, to the unserved community of Allentown, Pennsylvania.

File No. 3259CTN, Northeastern Pennsylvania Educational TV Association, Old Boston Road, Pittston, PA 18640. Signed by: John E. Walsh, President & General Manager. Funds Requested: $111,317. Total Project Cost: $148,423. To activate a regional narrowcast distribution network using ITFS to provide instructional, educational, and informational programming to the Scranton-Wilkes Barre, Pennsylvania area.

File No. 3289CTB, Pennsylvania State University, Wagner Annex, University Park, PA 16802. Signed by: Robert J. Scannell, VP, Dean Commonwealth Educ Syst. Funds Requested: $113,010. Total Project Cost: $150,680. To extend via translators, the signal of public televison station WPSX-TV to Bedford and Fulton Counties in Pennsylvania.

Puerto Rico

File No. 3085TBC, Ana G. Mendez Education Foundation, Caretera Estatal #176, POB E, Rio Piedras, RQ 00928. Signed by: Jose F. Mendez, President. Funds Requested: $449,167. Total Project Cost: $635,390. To activate a repeater noncommercial TV station on Channel 26, Jayuya, Puerto Rico, to serve the metropolitan area of Ponce and rural isolated communities near the mountains of that city with first service educational programming.

South Carolina

File No. 3064CRB, Barnwell School District 19, Pascallas Streets, Blackville, SC 29817. Signed by: Richard L. Huggins, Superintendent. Funds Requested: $36,148. Total Project Cost: $48,198. To establish a 100 watt FM station on 91.9 MHZ in Blackwell, SC. Station will be located in Blackwell High School and will provide first public signal to 30,000. Station will be staffed by volunteers and students.

File No. 3179CRB, South Carolina Educational TV Commission, 2712 Millwood Avenue, Columbia, SC 29205. Signed by: Henry J. Cauthen, President & General Manager. Funds Requested: $79,841. Total Project Cost: $106,455. To establish a new public FM radio station on 90.1 MHZ in Conway which will provide first public and institutional radio service to 153,498 people. Station will serve Georgetown, Horry and Marion Counties. The station will initially repeat the SCETV signal from Columbia.

File No. 3182CRB, South Carolina Educational TV Commission, 2712 Millwood Avenue, Columbia, SC 29250. Signed by: Henry J. Cauthen, President & General Manager. Funds Requested: $112,004. Total Project Cost: $149,339. To establish a new public FM radio station on 91.7 MHZ in Greenwood which will provide first public and institutional radio services to 105,000 people. Station will serve Abbeville, Greenwood and Newberry Counties. The station will initially repeat the SCETV signal from Columbia.

South Dakota

File No. 3117CRB, South Dakota Educational TV Board, 310 E. Clark Street, Vermillion, SD 57069. Signed by: Martin P. Busch, Excutive Director. Funds Requested: $88,399. Total Project Cost: $118,285. To construct a public radio station near Reliance, SD, to operate on 91.1 MHZ and provide first public radio programming to approximately 52,000 residents.

File NO. 3136CRB, South Dakota Educational TV Board, 310 E. Clark Street, Vermillion SD 57069. Signed by: Martin P. Busch, Executive Director. Funds Requested: $46,308. Total Project. Cost: $61,745. To construct a public radio station at Rapid City, SD, to operate on 90.5 MHZ and provide first public radio programming service to approximately 72,000 residents of western South Dakota.

Tennessee

File No. 3324CRB, Southern Missionary College, PO Box 670, Collegedale, TN 37315. Signed by: Richard Reiner, Business Manager. Funds Requested: $30,461. Total Project Cost: $40,615. To improve and upgrade the studio production equipment for WSMC-FM in Collegedale, which provides program service for the Chattanooga area.

File No. 3090CTN, Kingsport City School System, 1800 Legion Drive, Kingsport, TN 37664. Signed by: Dr. Ralph E. Evans, Superintendent. Funds Requested: $191,520. Total Project Cost: $296,153. To construct two ITFS systems, one at Kingsport and one at Johnson City along with a multi-cable distribution system in order to produce and transmit a continuing series of educational TV programs.

File No. 3224CTB, Tennessee State Board of Education, 209 Communications Bldg., Knoxville, TN 37916. Signed by: Dr. Robert L. McElrath, Commissioner on Education. Funds Requested: $475,252. Total Project Cost: $661,299. To replace a worn out, unreliable TV transmitter for WSJK, Channel 2, and thereby improve the quality and overall reliability of the signal delivery throughout the station's service area of Knoxville and the tri-

VOL 48 ISS 91 MY 10 1983 UMI

cities of Kingsport, Bristol, and Johnson City.

File No. 3097CRB, Memphis Community TV Foundation Box 80000, Memphis, TN 38512. Signed by: Howard D. Holst, Treasurer. Funds Requested: $56,520. Total Project Cost: $84,770. To increase WKNO's effective radiated power to 100 KW by securing a new antenna and thereby bring the first radio signal to 40,200 people.

File No. 3296CRB, Radio Free Broadcasting, 156 Drakes Lane, Summertown, TN 38483. Signed by: Jeffrey Keating, Station Manager. Funds Requested: $25,087. Total Project Cost: $33,450. To extend the coverage of WUTZ–FM in Summertown by expanding the transmitter power from 10 W to 300 W and improve local origination capability. WUTZ is in the 1M/V per meter coverage radius of WUOT–FM, 100,000 W in Knoxville.

Texas

File No. 3329PTNP, Southwest Center for Educational TV, 7703 N. Lamar Blvd., Suite 500, Austin, TX 78752. Signed by: Louis Barbash, General Manager. Funds Requested: $24,890. Total Project Cost: $24,890. To plan for a national cable network that will offer programming of special interest to ethnic groups. Project will survey the interest in ethnic programming and evaluate the means of electronic dissemination.

File No. 3119TNP, Navarro College, 4200 West Highway 31, Corsicana, TX 75110. Signed by: Kenneth P. Walker, President. Funds Requested: $22,818. Total Project Coast: $22,818. To plan the design of video-based interactive telecommunications system between the main campus in Corsicana and the distant educational centers. Educational centers are located in Waxahachie, Ennis, and Mexia. Project would benefit 3,000 people.

File No. 3163CRB, Public Comm Foundation for North Texas, 3000 Harvey Hines Blvd., Dallas, TX 75201. Signed by: Richard J. Meyer, President. Funds Requested: $283,849. Total Project Cost: $378,466. To extend and improve the signal of KERA–FM on 90.1 MHZ in Dallas. Project would increase power and replace worn out equipment. Station will serve north central Texas including Dallas and Forth Worth.

File No. 3063CTB, El Paso Public TV Foundation, P.O. Box 146, El Paso, TX 79942. Signed by: Dr. William R. Williams, Chairman. Funds Requested: $131,064. Total Project Cost: $174,752. To improve the signal of KCOS–TV in El Paso. Project proposes to replace worn out equipment.

File No. 3036CRB, University of Houston, 4600 Gulf Freeway, Suite 500, Houston TX 77023. Signed by: Dr. Robert C. Maxson, Sr. V.P. Academic Affairs. Funds Requested: $153,937. Total Project Cost: $205,250. To extend the signal of noncommercial radio station, KUHF, in Houston. Project will provide first public radio signal to 90,771. KUHF proposes to relocate transmitter and increase antenna height.

File No. 3309CTB, Central Texas College, Highway 190 West, Killeen, TX 76542. Signed by: Marjory I. Crane, Deputy Chancellor for Contracts. Funds Requested: $175,062. Total Project Cost: $233,417. To improve the facilities of KNCT–TV in Killeen. Proposal would replace worn out TV equipment. Station provides only service to approximately 480,000 in central Texas.

File No. 3193CTB, Odessa Jr. College District, 201 West University, Odessa, TX 79762. Signed by: Phillip T. Speegle, President. Funds Requested: $409,275. Total Project Cost: $545,700. To activate new nonncommercial TV station on Channel 36 in Odessa, which will serve 305,000 in Ector, Midland and Andrews Counties.

Utah

File No. 3057CRTBN, University of Utah, Media Services Department, 204 James Talmage Building, Salt Lake City, UT 84112. Signed by: James J. Brophy, Vice President for Research. Funds Requested: $1,878,633. Total Project Cost: $2,504,884.To extend the signal of KUSU–FM with two FM translators to serve the Uintah Basin area. To interconnect via microwave the cities of Park City, Coalville, Herber, Roosevelt, Vernal and Manila with existing state systems, to acquire production equipment for Snow College in Ephriam, to replace KUER–FM's transmitter and antenna, and to upgrade KUED–TV production capability.

Virginia

File No. 3289TBNP, Northern Virginia Community College, 8333 Little River Turnpike, Annandale, VA 22003. Signed by: Richard J. Ernst, President. Funds Requested: $76,079. Total Project Cost: $117,289. To plan for the increased utilization of existing telecommunications resources in northern Virginia.

File No. 3102CTB, Shenandoah Valley Educational TV Corp., Port Republic Road, Harrisonburg, VA 22801. Signed by: Richard L. Parker, Exec. VP/General Manager. Funds Requested: $145,325. Total Project Cost: $193,834. To replace obsolete translator in Luary, and also increase station coverage to unserved communities. To replace worn out production equipment.

File No. 3131CRB, Hampton Roads Educational Telecommunications Assoc., Inc., 5200 Hampton Blvd., Norfork, VA 23508. Signed by: John R. Morison, President and General Manager. Funds Requested: $109,252. Total Project Cost: $145,670. To replace worn out and obsolete transmission, origination, and interconnection equipment to provide quality service to greater Norfolk community.

File No. 3135CTB, Hampton Roads Educational telecommuinications Association, Inc., 5200 Hampton Boulevard, Norfolk, VA 235508. Signed by: John R. Morison, President and General Manager. Funds Requested: $747,387. Total Project Cost: $996,515. To replace worn out and obsolete production equipment and to complete transmitter efficiency project, both of which will strengthen the quality of service to greater Norfolk community.

File No. 3048PTN, Viriginia Commonwealth University, 1015 W. Main St., 4052 Oliver H1., Richmond, VA 23284. Signed by: Herbert B. Chermside, Dir. of Spon. Program Admin.. Funds Requested: $63,448. Total Project Cost: $63,448. To plan for the most feasible interconnection of adult education programs nationwide using modern telecommunications. Project intended to service nation's illiterate population.

File No. 3083TNC, Richmond Public Schools, 301 N. Ninth Street, Richmond, VA 23219. Signed by: Dr. James W. Tyler, Deputy Superintendent. Funds Requested: $320,205. Total Project Cost: $426,900. To extend current ITFS in Richmond with the addition of two more channels and necessary production equipment for servicing overall Richmond community.

File No. 3311TNC, Central Virginia Educational TV Corp., 22 Sesame Street/PO Box 23, Richmond, VA 232235. Signed by: Richard E. Hall, Vice President/Broadcasting. Funds Requested: $175,123. Total Project Cost: $233,498. To establish instructional television services for higher educational offerings as well as to connect with other existing ITFS at the local level.

File No. 3146TNC, National University of the Air, Inc., 1118 Ironbound Road, Williamsburg, VA 23185. Signed by: John A. Curtis, Chairman of the Board. Funds Requested: $1,182,870. Total Project Cost: $1,577,160. To expand the educational, medical, and social services telecommunications network in Tidewater, Virginia, Atlanta, Georgia, Washington, D.C, and other cities by purchasing dissemination and origination equipment.

Virgin Islands

File No. 3095CTB,Virgin Islands Public Television System, 8A Ross Estate/ Barbel Plaza S., Charlotte Amalie, VQ 00801. Signed by: Orville Kean, Board Chairman. Funds Requested: $299,978. Total Project Cost: $399,978. To replace essential broadcast dissemination facilities and improve origination equipment of public television station WTJX, Channel 12, Virgin Islands Public TV system, Charlotte Amalie, U.S. Virgin Islands to provide program services to the islands of St. John, St. Croix and St. Thomas.

Washington

File No. 3214CRB, Public Radio for Okanogan Valley, RTE 2, Klein Apts., No. 3, Okanogan, WA 98840. Signed by: John Wilson, President. Funds Requested: $4,481. Total Project Cost: $5,975. To extend the signal of KPBX–FM, Spokane, WA, by translator on Omak Mtn. to bring first public radio programming to residents of central Okanogan Valley including a portion of the Colville Indian Reservation.

File No. 3195PRB, Seattle Public Library, 1000 4th Avenue, Seattle, WA 98104. Signed by: Ronald A. Dubberly, City Librarian. Funds Requested: $35,773. Total Project Cost: $35,773. To plan for statewide accessibility of radio reading services designed for individuals who cannot read because of visual or physical handicaps. Such service is currently limited to 1,300 recipients in the greater Seattle area from transmission via the SCA of KUOW–FM licensed to the University of Washington.

File No. 3246CRB, University of Washington, 325 Communications Bldg., Seattle, WA 98195. Signed by: Donald R. Baldwin, Director, Grant Services. Funds Requested: $148,455. Total Project Cost: $197,940. To upgrade and replace the transmission facilities of public radio station KUOW–FM to assure continued service to 80,000 persons and first service to 85,000 persons within Seattle by overcoming limitations of obsolete equipment and hilly terrain, more reliable signals to the Bellevue-Redmond area, and establishment of a solid signal for future expansion of public radio to unserved northwestern Washington communities by translators and a repeater station.

File No. 3158CRB, Pacific Lutheran University, Inc., P.O. Box 2068, Tacoma, WA 98447. Signed by: William O. Rieke, President. Funds Requested: $55,011. Total Project Cost: $73,349. To extend the signal of KPLU–FM, operating on 88.5 MHZ at Tacoma, by translators to reach unserved communities in southwest Washington encompassing the Counties of Grays Harbor, Pacific, Wahkiakum, Lewis, Cowlits as well as parts of Clark.

Wisconsin

File No. 3032CTN, Lakeshore Technical Institute, 1290 North Avenue, Cleveland, WI 53015. Signed by: Frederick J. Nierode, District Director. Funds Requested: $34,800. Total Project Cost: $46,500. To provide the first local public telecommunications service (videotex) for the predominantly rural population of 120,000 and to upgrade worn out production equipment.

File No. 3158CTB, State of Wisconsin Education Communications Board, 732 N. Midvale Blvd., Madison, WI 53705. Signed by: Viggo Rasmusen, Chairperson. Funds Requested: $155,175. Total Project Cost: $206,900. To expand the state educational TV system to provide the network service to the unserved areas of Florence and Adams Counties via translators.

West Virginia

File No. 3088CRB, West Virginia Educational Broadcasting Authority, B424 Bldg., Six State Capitol, Charleston, WV 25305. Signed by: Presley D. Holmes, Executive Director. Funds Requested: $596,466. Total Project Cost: $1,020,016. To construct three FM public radio stations serving Parkersburg, Keyser, and Martinsburg, WV and a microwave system which will distribute from Charleston to the new station a radio reading service. The microwave system will also interconnect three West Virginia public TV stations.

File No. 3139CRB, Kanawha Economic Development Corp., One Bruce Street, Institute, WV 25112. Signed by: Robert T. Lipscomb, President. Funds Requested: $109,034. Total Project Cost: $145,366. To activate a job training program in conjunction with a previously funded public radio station to operate on 90.9 in Institute, West Virginia.

Wyoming

File No. 3143PRB, University of Wyoming, Box 3984 University Station, Laramie, WY 82071. Signed by: Durward Long, Acting Vice President/Finance. Funds Requested: $24,500. Total Project Cost: $24,500. To study the feasibility of and ways and means to extend the educational and cultural resources of the University of Wyoming to all areas of the State by means of telecommunications including noncommercial radio and television.

File No. 3316PRB, Big Horn Basin Foundation for Public Broadcasting, 864 Lane 11½, Powell, WY 82435. Signed by: Paul D. Friend, Registered Agent. Funds Requested: $24,436. Total Project Cost: $27,936. To plan for a noncommercial radio station which will bring a first public radio signal to nearly 24,000 residents of the Big Horn Basin, primarily Park County and the northwestern portion of Big Horn County.

File No. 3016CRB, Goshen Public Radio Committee, 215 E. 21st Street, Torrington, WY 82240. Signed by: Robert Heyl, Chairman. Funds Requested: $6,000. Total Project Cost: $8,000. To extend by translator the signal of KUWR–FM, Laramie, WY, to bring first public radio service to the residents of Torrington, WY.

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

VOL 48 ISS 91 MY 10 1983 UMI

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 886]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 4, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

VOL 48 ISS 91 MY 10 1983 UMI

[Volume 887]

Issued: May 4, 1983.

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the Federal Register.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PB: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup

Kenneth F. Plumb,

Secretary.

Environmental Protection Agency

Hazardous Waste Management System: The Hazardous Waste Permit Program; Proposed Rules

VOL 48 ISS 91 MY 10 1983 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 124 and 270

[SWH–FRL 2251–6]

Hazardous Waste Management System: The Hazardous Waste Permit Program; Procedures for Decisionmaking

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule and request for comments.

SUMMARY: The Environmental Protection Agency is proposing to amend its hazardous waste permit regulations today. These regulations were promulgated pursuant to Subtitle C of the Resource Conservation and Recovery Act (RCRA), and were included in the Consolidated Permit Regulations. The Agency is proposing to allow owners and operators of existing hazardous waste management facilities who submit an incomplete Part A of the RCRA permit application to receive a notice of the deficiency and an opportunity to explain or cure the deficiency before the owner or operator is subject to EPA enforcement for operation without a permit. The Agency also is proposing to amend the regulations to require that if the Administrator denies a request for a panel hearing on an initial permit for an existing hazardous waste management facility, he must give his reasons for the denial.

Today's actions are prompted by a settlement stipulation concerning these issues in the lawsuit on the Consolidated Permit Regulations. These proposed amendments will not have an economic impact on the regulated community, nor will they have any impact on public health or the environment.

DATE: EPA will accept comments on these proposed amendments until July 11, 1983.

ADDRESS: Comments on these amendments should should be addressed to the Docket Clerk (Docket 3005—Hearings), Office of Solid Waste (WH–563), U.S. Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: RCRA Hotline, toll free at (800) 424–9346 or in Washington, D.C. at 382–3000. For specific information on this proposed amendment, contact Deborah Wolpe, Office of Solid Waste (WH–563), U.S. Environmental Protection Agency, Washington, D.C. 20460 (202) 382–4754.

SUPPLEMENTARY INFORMATION:

I. Background

On February 26, 1980, and May 19, 1980, EPA promulgated regulations implementing Subtitle C of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (RCRA), 42 U.S.C. 6901 *et seq.* These regulations establish the first phase of a comprehensive program for the handling and management of hazardous waste (40 CFR Parts 260–265, 45 FR 33066–33289). In addition, on May 19, 1980, EPA promulgated the Consolidated Permit Regulations, governing five permit programs.[1] On January , 1983, the Consolidated Permit Regulations were deconsolidated. Each permit program now appears in a separate Part of the Code of Federal Regulations. The changes proposed today concern only the RCRA portion of the Consolidated Permit Regulations, now codified at 40 CFR Part 270.

The Subtitle C RCRA regulations, among other things, require hazardous waste management (HWM) facilities which treat, store, or dispose of hazardous waste to obtain a permit from EPA or an authorized state [2] and require that hazardous wastes be designated for, delivered to, and treated, stored, or disposed of only in these permitted facilities.

Recognizing the EPA would not be able to issue permits to all HWM facilities before the Subtitle C program became effective, Section 3005(e) of RCRA provides that a facility that meets certain requirements will be treated as having been issued a permit until such time as final administrative action is taken on its permit application. This statutory authorization to operate a HWM facility between the effective date of the Subtitle C program (November 19, 1980) and the issuance or denial of a final permit, is known as "interim status."

Interim status is conferred on any person who:

(1) Owns and operates a facility required to have a permit, which is in existence on November 19, 1980;

(2) has complied with the requirements of Section 3010(a) of RCRA (notification of hazardous waste activity); and

(3) has made an application for a permit under Section 3005 of RCRA.

EPA has defined the term "application for a permit" under section 3005(e) to mean only Part A of the permit application [See 40 CFR 270.70]. The application for a RCRA hazardous waste management permit is in two parts—A and B. Part A includes some very basic information about a facility such as its location, owner, the wastes it handles and the processes it employs [see 40 CFR 270.13]. Part B consists of more technical information reflecting the facility standards in 40 CFR Part 264. To qualify for interm status, however, only Part A of the permit application must be submitted.

This preamble and today's proposed amendments relate to the procedural aspects of failure to qualify for interim status, and denial of a permit.

II. Failure to Qualify for Interim Status

An owner or operator of a HWM facility may fail to qualify for interim status for any of the reasons listed in the statute as prerequisites to interim status: (a) The facility was not in existence on or before November 19, 1980; (b) the owner or operator failed to comply with Section 3010 of RCRA (*i.e.*, failed to notify, if required); or (c) the owner or operator failed to submit Part A of his permit application on time.[3] In addition, an owner or operator may fail to qualify for interim status if he fails to submit a complete Part A permit application. Section 270.70 of the regulations currently states that if, upon examination or reexamination of a Part A application, EPA determines that it fails to meet the standards of the regulations, EPA may notify the owner or operator that the application is deficient. Section 270.70 provides that the result of such a determination is that the owner or operator is not entitled to

[1] The five permit programs which were covered by the Consolidated Permit Regulation are: the hazardous waste management (HWM) program under Subtitle C of RCRA, the Underground Injection Control (UIC) program under Part C of the Safe Drinking Water Act, the National Pollutant Discharge Elimination System (NPDES) program under section 402 of the Clean Water Act, the "Dredge and Fill" program under section 404 of the Clean Water Act, and the Prevention of Significant Deterioration (PSD) program under regulations implementing section 165 of the Clean Air Act [45 FR 33290–33388 (May 19, 1980), previously codified at 40 CFR Parts 122–124].

[2] Pursuant to Section 3006 of RCRA, a state may obtain authorization to run the hazardous waste program in lieu of the Federal program. For a discussion of state authorization of the RCRA program, see the preamble to 40 CFR Part 123 (now Part 271) in the May 19, 1980 **Federal Register**, 45 FR 33380, and the preamble discussion accompanying the January 26, 1981 amendments to those regulations, 46 FR 8298; and subsequent amendments on July 26, 1982, 47 FR 32373.

[3] Failure to file a Part A on time may not always result in a failure to qualify for interim status. The Agency may, by compliance order issued under Section 3008 of RCRA, extend the date by which the owner or operator of an existing HWM facility may submit Part A of its permit application, as there is no statutory deadline for submitting the permit application. [See 40 CFR 270.10(e)(3)].

interim status, and is subject to EPA enforcement for operating without a permit.

Petitioners in the litigation on the Consolidated Permit Regulations, *NRDC v. EPA*, No. 80–1607, and consolidated cases (D.C. Cir., filed June 2, 1980),[4] argued that a determination that an owner or operator never acquired interim status cannot be made without some procedural safeguards. They argued that notice and opportunity for comment are necessary before the Agency can require a facility to cease operations because it failed to qualify for interim status.

The Agency believes that, as a practical matter, there are procedural safeguards already in place. It is standard operating procedure to allow a facility to correct, explain, or resubmit Part A of the permit application if it is found deficient, although such a procedure is not included in the regulations. To assuage petitioners' concerns, however, the Agency is today proposing to amend § 270.70 to expressly provide that before EPA determines that Part A of a permit application is deficient, it will notify the owner or operator in writing of the apparent deficiency. The notice will specify the grounds for EPA's belief that the application is deficient, and will give the owner or operator 30 days from the date of receipt to respond to the notification and to explain or cure the deficiency. If, after such notice and opportunity for response, EPA still finds that the application is deficient, it then can take appropriate enforcement action.

Some petitioners asserted that, in addition to notice and opportunity for comment on EPA's decision that a Part A application is deficient, the permit applicant should be granted a hearing on request. In EPA's view, a hearing is unnecessary. The statute does not require a hearing and issues in controversy should be simple and straight-forward enough to be resolved without resort to a hearing.

This proposal would put in regulatory form what is already standard Agency procedure. EPA believes that it is reasonable to give permit applicants an opportunity to cure deficient applications. Today's proposal would guarantee applicants that opportunity.

III. Opportunity for a Hearing Prior to Denial of an Initial Permit

As stated earlier, Section 3005(e) of RCRA states that any person who owns or operates an existing facility meeting the criteria listed in that section, shall be treated as having been issued a RCRA permit until such time as final administrative disposition of the permit application is made. Final administrative disposition occurs when EPA either issues or denies the permit.

The petitioners in the NRDC lawsuit raised several issues concerning the issuance or denial of an initial RCRA permit. They argued that due process requires the opportunity for a hearing before a permit is denied for a facility operating under interim status. In addition, they argued that the imposition of extensive, expensive, conditions in a permit might be tantamount to a denial of a permit, therefore a hearing should be available in such situations as well. The petitioners admitted that a full evidentiary hearing would not be necessary in every case, but some type of hearing ought to be available.[5]

EPA's position with respect to formal adjudicatory hearings was stated in the preamble to the May 19, 1980 regulations. It is EPA's position that such hearings are not required for the issuance of RCRA permits. The Agency stated that the requirements of due process are flexible, and that other procedures may be used which can be adapted to the nature of the problem being addressed (See 45 FR 33409–33411).

EPA believes that the current regulations meet the applicable due process tests. The regulations provide for notice of what the Agency proposes to do, an opportunity to challenge that proposal both through written comments and an informal public hearing, and a response to comments and a decision based on the administrative record.

Petitioners believed that the May 19, 1980 regulations only gave a right to this public hearing in situation were EPA proposed to issue a permit, and not when the Agency proposed to deny a permit. As promulgated on May 19, 1980, section 124.12(a) stated that the Director shall hold a public hearing whenever there is a " * * * significant degree of public interest in a draft permit." EPA's intention when promulgating this regulation was to provide a public hearing in situations where EPA issues either a tentative decision to issue or to deny a permit. In fact, a notice of intent to deny a permit is considered a draft permit.[6] This was clarified in amendments promulgated on July 15, 1981 (46 FR 36704) in response to an amendment to Section 7006(b) of RCRA.

As stated in the preamble to those amendments, the Agency intends that the requirement to hold an informal hearing (when one is requested) apply to cases where the Agency has tentatively decided to deny a permit as well as when the Agency has tentatively decided to issue a permit. All that RCRA and due process require is the opportunity for an informal hearing. That opportunity exists both for the issuance and denial of a RCRA permit.

The petitioners also were concerned that in some instances, there would be complicated factual issues that could be addressed better through a formal, rather than an informal, hearing. As the regulations are currently written, the Regional Administrator always has the discretion to hold a formal panel hearing. However, the petitioners objected to a lack of assurance in the regulations that they would receive a written response to a request for such a hearing, should the Regional Administrator deny the request. They were concerned that there would be situations were EPA and the permit applicant would disagree about changes necessary to bring the facility into compliance with the regulations. In situations where the Regional Administrator proposes to issue a permit, but the applicant disagrees as to major permit conditions, the petitioners want the opportunity for a panel hearing.

As a matter of policy, EPA has determined that permit applicants should have an opportunity for a panel hearing when there is a tentative decision to deny the initial permit for an

[4] For further discussion of the *NRDC v. EPA* case and the settlement agreement filed on the RCRA-related issues, see the preamble to the proposed amendments on owner signature and certification, 47 FR 32030 (July 23, 1982).

[5] There are three types of hearings available under Part 124. These are: (1) Public hearings. Public, or informal, hearing must be held whenever the Director receives written notice of opposition to a RCRA draft permit and a request for a hearing within 45 days of public notice of the draft permit [See 40 CFR 124.121]; (2) Evidentiary hearings. Evidentiary hearings under Subpart E of Part 124 are formal adversarial hearings conducted by a judicial officer pursuant to formal rules of practice. Evidentiary hearings are available under Section 3008 of RCRA in connection with the termination of a RCRA permit. They are not available upon the issuance or denial of a RCRA permit. See 40 CFR 124.12 and 124.71(a) and the preamble discussion at 45 FR 33408–11; and (3) Panel hearings. Panel hearings under Subpart F of Part 124 are nonadversarial hearings before a panel consisting of three or more EPA employees having special expertise or responsibility in areas related to the issues to be decided. A panel hearing is available whenever the Regional Administrator determines that as a matter of discretion, it would be an appropriate way to process a draft permit. Evidentiary hearings and Panel hearings are both considered formal adjudicatory hearings, as they conform to the formal hearing requirements of the Administrative Procedure Act.

[6] If the Director tentatively decides to deny the permit, he issues a "notice of intent to deny" the permit. A notice of intent to deny is a type of draft permit, which is processed under the same procedures as any draft permit [See 40 CFR 124.6(b)].

VOL 48 ISS 91 MY 10 1983 UMI

existing facility, and where the applicant and EPA disagree on major conditions in the initial draft permit for an existing facility. Today's proposed amendment to § 124.12(e)(2) provides assurance that such a hearing will not be arbitrarily denied.

Under today's proposal, the permit applicant may request a panel hearing pursuant to §124.114. Such a request must be made before the end of the 45-day public comment period. The applicant must explain in his request why he believes that the issues for which he requests a hearing are genuine issues of material fact, and are issues which are determinative with respect to one or more contested permit conditions. If the Regional Administrator denies the request for a panel hearing, he must send a brief written statement to the applicant explaining his reasons for concluding that no determinative issues have been presented for resolution in a panel hearing.

This proposal would give the petitioners the assurance they want that a panel hearing will not be unreasonably denied.

It should be noted that in circumstances where the Administrator remands an appeal to the Regional Administrator, the Administrator may direct the Regional Administrator to hold a non-adversary panel hearing, if none has been held before.

VI. Economic Impact

These proposed amendments will not have any economic impact on the regulated community, as stated in the background information. It is standard operating procedure for the Agency to allow an applicant the opportunity to correct, explain or cure an incomplete Part A of the RCRA permit. This proposal, therefore does not change anything but the regulatory language.

The second regulatory change requires the Regional Administrator to provide a written reason for denying an applicant's request for a formal hearing. This proposed change increases the paperwork of the Regional Administrator, but does not affect the regulated community.

VII. Request for Comments

The Agency invites comments on all aspects of these proposed regulations. EPA anticipates that finalization of today's proposal will provide part of the basis for the settlement of the *NRDC* v. *EPA* litigation affecting the RCRA portion of the Consolidated Permit Regulations. However, EPA will carefully consider all public comments on this proposal before making its final decision.

VIII. Effective Date

Section 3010(b) of RCRA provides that EPA's hazardous waste regulations, and revisions thereto take effect six months after their promulgation. In addition, Section 553(d) of the Administrative Procedure Act requires publication of a substantive rule not less than 30 days before its effective date. The purpose of these requirements is to allow the regulated community sufficient lead time to prepare to comply with major new regulatory requirements. For the amendments proposed today, however, the Agency believes that an effective date 30 days or six months after promulgation would cause unnecessary disruption in the implementation of the regulations and might deny the public certain safeguards in the permitting process. These amendments, if promulgated in final form, would not impose substative requirements on the regulated community, but rather would guarantee certain procedural safeguards. The Agency believes that this is not the type of regulation that Congress had in mind when it provided a delay between the promulgation and the effective date of revisions to regulations. Consequently, EPA believes that it will have good cause to make these amendments effective immediately if and when they are promulgated in final form, but requests comments on whether such action would cause hardship for the regulated community or would otherwise be inappropriate.

IX. Executive Order 12291

Under Executive Order 12291 (46 FR 12193, February 19, 1981), EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. A major rule is defined as a regulation which is likely to result in:

—An annual effect on the economy of $100 million or more;

—A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or

—Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This regulation is not major because it will not result in an effect on the economy of $100 million or more. It merely provides some procedural safeguards upon the failure to qualify for interim status and the issuance or denial of a RCRA permit. There will be no adverse impact on the ability of U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This amendment is not a major regulation, therefore no Regulatory Impact Analysis is being prepared.

This amendment was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

X. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, the reporting or recordkeeping provisions that are included in this proposed rule have been submitted to the Office of Management and Budget (OMB) for approval under Section 3504(h) of the Act. Any final rule will include an explanation of how the reporting or recordkeeping provisions contained therein respond to any comments by OMB or the public.

XI. President's Task Force on Regulatory Relief

The President's Task Force on Regulatory Relief designated the Consolidated Permit Regulations (40 CFR Parts 122–124) for review by EPA. This proposal supports the goals of the Task Force by reducing the burden of the RCRA portion of the Consolidated Permit Regulations (now deconsolidated) on the regulated community. This proposal also fulfills one of EPA's obligations in the settlement of industry litigation on the RCRA portion of the Consolidated Permit Regulations. In addition to issuing proposals aimed at settling the litigation, the Agency has deconsolidated the regulations to make them more easily usable by the public. As a result of deconsolidation, there was some reorganization of the regulations. Thus, this proposed amendment is in somewhat different format and location than it appeared in the settlement agreement.

XII. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, whenever an agency is required to publish a general notice of proposed rulemaking for any rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the proposed rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment imposes no substantive requirements on the regulated community. Accordingly, I hereby certify that this proposed regulation, if issued in final form, will not have a significant economic impact on a substantial number of small entities.

Dated: April 26, 1983.

Lee L. Verstandig,
Acting Administrator.

List of Subjects

40 CFR Part 270

Administrative practice and procedure, Air pollution control, Hazardous materials, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Confidential business information.

40 CFR Part 124

Administrative practice and procedure, Air pollution control, Hazardous materials, Waste treatment and disposal, Waste pollution control, Water supply, Indians—lands.

PART 270—[AMENDED]

It is proposed that 40 CFR Parts 270 and 124 be amended as follows:

1. The authority citation for Part 270 reads as follows:

Authority: Sections 1006, 2002(a), 3005, 3007 and 7004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (RCRA) (42 U.S.C. 6901, 6912(a), 6925, 6927 and 6974).

2. In Part 270, it is proposed to amend § 270.70 by revising paragraph (b) to read as follows:

§ 270.70 Qualifying for interim status.

* * * * *

(b) *Failure to qualify for interim status.* If EPA has reason to believe upon examination of a Part A application that it fails to meet the requirements of § 270.13, it shall notify the owner or operator in writing of the apparent deficiency. Such notice shall specify the grounds for EPA's belief that the application is deficient. The owner or operator shall have 30 days from receipt to respond to such a notification and to explain or cure the alleged deficiency in his Part A application. If, after such notification and opportunity for response, EPA determines that the application is deficient it may take appropriate enforcement action.

PART 124—[AMENDED]

3. The authority citation for Part 124 reads as follows:

Authority: The Resource Conservation and Recovery Act, 42 U.S.C. 6901 *et seq.*; the Safe Drinking Water Act, 42 U.S.C. 300(f) *et seq.*; the Clean Water Act, 33 U.S.C. 1251 *et seq.*; the Clean Air Act, 42 U.S.C. 1857 *et seq.*

4. In Part 124, it is proposed to amend § 124.12 by revising paragraph (e) to read as follows:

§ 124.12 Public hearings.

* * * * *

(e)(1) At his or her discretion, the Regional Administrator may specify that RCRA or UIC permits be processed under the procedures in Subpart F.

(2) For initial RCRA permits for existing HWM facilities, the Regional Administrator shall have the discretion to provide a hearing under the procedures in Subpart F. The permit applicant may request such a hearing pursuant to § 124.114 on one or more issues, if the applicant explains in his request why he or she believes those issues: (1) Are genuine issues of material fact and; (2) are determinative with respect to one or more contested permit conditions, identified as such in the applicant's request, that would require extensive changes to the facility ("contested major permit conditions"). If the Regional Administrator decides to deny the request, he or she shall send to the applicant a brief written statement of his or her reasons for concluding that no such determinative issues have been presented for resolution in such a hearing.

40 CFR Parts 264 and 270

[SW FRL 2251-7]

Hazardous Waste Management System: Standards Applicable to Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities; and the Hazardous Waste Permit Program

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is today proposing to amend the hazardous waste permit regulations. The regulations require, among other things, that a permittee under the Resource Conservation and Recovery Act maintain records of all ground-water monitoring data for the active life of the hazardous waste mangement facility. Today's proposal would change this requirement to allow the permittee to retain records of ground-water monitoring data for ten consecutive years only. This proposal eliminates a burdensom recordkeeping requirement without compromising protection of human health and the environment.

This amendent, if promulgated in the same form as proposed here, would result in an estimated savings to the regulated community of approximately $45,000 a year by reducing the burden of retaining ground-water monitoring records.

DATE: EPA will accept comments on this proposal until July 11, 1983.

ADDRESS: Comments should be addressed to the Docket Clerk, Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, Washington, D.C. 20460. Communications should identify the docket as "Docket 3004—Ground-water Monitoring Data."

FOR FURTHER INFORMATION CONTACT: The RCRA Hotline toll-free at (800) 424–9346 or in Washington, D.C. at 382–3000; or Deborah Wolpe, Office of Solid Waste (WH–563), U.S. Environmental Protection Agency, Washington, D.C. 20460 (202) 382–4754.

SUPPLEMENTARY INFORMATION: On February 26, 1980, and May 19, 1980, EPA promulgated regulations implementing Subtitle C of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (RCRA), 42 U.S.C. 6901 *et seq.* These regulations established the first phase of a comprehensive program for the handling and management of hazardous waste (40 CFR Parts 260–265, 45 FR 33066–33289). In addition, on May 19, 1980, EPA promulgated the Consolidated Permit Regulations governing five permit programs.[1] On January ——, 1983, the Consolidated Permit Regulations were deconsolidated. Each of the five permit programs now appears in a separate Part of the Code of Federal Regulations. The changes proposed today affect only

[1] The five permit programs which were covered by the Consolidated Permit Regulations are: The Hazardous Waste Management (HWM) program under Subtitle C of RCRA, the Underground Injection Control (UIC) program under Part C of the Safe Drinking Water Act, the National Pollutant Discharge Elimination System (NPDES) program under Section 402 of the Clean Water Act, the State "Dredge or fill" program under Section 404 of the Clean Water Act, and the Prevention of Significant Deterioration (PSD) program under regulations implementing Section 165 of the Clean Air Act. [Previously codified in 40 CFR Parts 122–124, 45 FR 33290–33358].

UMI

the hazardous waste permit program under Subtitle C of RCRA, now codified at 40 CFR Part 270.

Section 270.30 lists conditions which are applicable to all RCRA permits. Among them is a requirement that the permittee retain records of all monitoring information for a period of at least three years from the date of the sample, measurement, report or application. See 40 CFR 270.30(j)(2) [originally § 122.7(j)(2)]. Section 270.30(j)(2) additionally requires, however, that the permittee maintain records "from all ground-water monitoring wells and associated ground-water surface elevations, for the active life of the facility, and for disposal facilities for the post-closure care period as well."

In addition, 40 CFR 264.73 states that the owner or operator of a permitted facility must keep a written operating record at the facility containing certain information, including ground-water monitoring data, which must be included in the operating record *until closure* of the facility. (See 40 CFR 264.73(b)).

Section 270.30(j)(2) has been challenged as unreasonable in a lawsuit on the Consolidated Permit Regulations, *NRDC* v. *EPA*, No. 80–1607 and consolidated cases, (D.C. Cir., filed June 2, 1980).[1] Petitioners in the suit claimed that this requirement of maintaining records for the active life of the facility is unnecessary, as the permit-issuing authority can readily obtain the necessary information from the RCRA annual reports required under 40 CFR 265.75(f) and 265.94.[2]

Athough EPA does not agree that it is duplicative to require the facility owner or operator to maintain such data for the lifetime of the facility, the Agency believes that this recordkeeping requirement is more burdensome than it need be. The Agency is therefore proposing to amend § 270.30(j)(2) to require the permittee to retain records of all ground-water monitoring activities for ten consecutive years only, and to amend § 264.73 to require that the permittee maintain the ground-water monitoring data in the facility's written operating record also for ten years. The Agency believes that ten years is a reasonable period of time to require the facility owner or operator to maintain records. In addition to this ten year record of monitoring data, ground-water quality background values will be specified in the permit itself. The last ten years of ground-water monitoring data, in addition to the background values is sufficient information for the facility owner or operator and EPA to make a realistic assessment of changes in ground-water quality.

It should be noted that on a case by case basis, EPA may always require a facility to retain the ground-water monitoring records for more than ten years. Section 264.74 states that the retention period for all records under Part 264 is extended automatically during the course of any unresolved enforcement action regarding the facility or as requested by the Administrator for other reasons. Therefore, the effect of this proposal would be to eliminate a burdensome recordkeeping requirement without compromising EPA's access to information, or the protection of human health and the environment.

[1] For further discussion of the *NRDC* v. *EPA* lawsuit and the settlement agreement filed on the RCRA-related issues in the case, see the preamble to the proposed amendments to §§ 122.4 and 122.7 concerning owner signature and certification, (now §§ 270.7 and 270.11), 47 FR 32038 (July 23, 1982).

[2] This was the litigants' actual argument. Their assumption was that Part 264 would contain requirements very similar to §§ 265.75(f) and 265.94. In fact, however, the Part 265 requirements do not apply to permitted facilities. There currently is no such requirement that ground-water monitoring data be reported in the annual report for permitted facilities (Part 264). Therefore, the argument that maintaining these records at the permitted facility is duplicative has no basis.

IV. Request for Comments

The Agency invites comments on all aspects of these proposed regulations. EPA anticipates that finalization of today's proposal will provide part of the basis for settlement of the *NRDC* v. *EPA* litigation affecting the RCRA portion of the Consolidated Permit Regulations. However, EPA will carefully consider all public comments on this proposal before making its final decision. EPA is specifically requesting comments on whether reducing the recordkeeping requirement for groundwater monitoring data to ten years is sufficient to meet the objectives of Subpart F, and whether it is clear that this proposal requires the owner or operator to retain the data from the last ten consecutive years, and not any random ten years.

V. Economic Impact

The change proposed today will only affect facilities that require ground water monitoring, i.e, landfills, surface impoundments, land treatment units and some waste piles.

EPA estimates that this proposal will reduce compliance costs to the regulated community by approximately $45,000 a year. This represents an annual cost savings of approximately $30 per facility.

VI. Executive Order 12291

Under Executive Order 12291, (46 FR 12193, February 19, 1981), EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a Regulatory Impact Analysis. A major rule is defined as a regulation which is likely to result in:

—An annual effect on the economy of $100 million or more;

—A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or

—Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This regulation is not major because it will not result in an effect on the economy of $100 million or more annually. Although it will effect the economy, the effect will not be the result of an increase in costs or prices to industry in terms of compliance with the regulations. Rather, the effect is to reduce the cost of compliance slightly. There will be no adverse impact on the ability of the U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, this amendment is not a major regulation, and no regulatory impact analysis is being prepared.

This amendment was submitted to the Office of Management and Budget for review as required by Executive Order 12291. Any comments from OMB to EPA and any EPA response to those comments are available for public inspection at the Office of Solid Waste Docket, Room S–269, U.S. EPA, 401 M Street, SW, Washington, D.C., 20460.

VII. Paperwork Reduction Act

The information reporting and recordkeeping provisions in this rule have been submitted for approval to the Office of Management and Budget (OMB) under Section 3504(b) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Any final rule will explain how its reporting or recordkeeping provisions respond to any OMB or public comments.

VIII. President's Task Force on Regulatory Relief

The President's Task Force on Regulatory Relief designated the Consolidated Permit Regulations (40 CFR Parts 122–124) for review by EPA. This proposal supports the goals of the Task Force by reducing the burden on the regulated community. This proposal also fulfills one of EPA's obligations in the settlement of the RCRA portion of industry litigation on the Consolidated Permit Regulations. In addition to issuing proposals aimed at settling the litigation, the Agency has deconsolidated the regulations to make them more easily usable by the public. As a result of deconsolidation, there was some reorganization of the regulations. Thus, this proposed amendment is in somewhat different format and location than it appeared in the settlement agreement.

IX. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, whenever an agency is required to publish a general notice of proposed rulemaking, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the proposed rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have a significant economic impact on a substantial number of small entities because it imposes no new substantive requirements. It will result in a slight reduction of regulatory requirements. Accordingly, I hereby certify that this proposed regulation, if issued in final form, will not have a significant economic impact on a substantial number of small entities.

Dated: April 20, 1983.

Lee. L. Verstandig,

Acting Administrator.

List of Subjects

40 CFR Part 264

Hazardous materials, Packaging and containers, Recordkeeping and reporting requirements, Security measures, Surety bonds, Waste treatment and disposal.

40 CFR Part 270

Administrative practice and procedure, Hazardous material, Air pollution control, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Confidential business information.

PART 270—[AMENDED]

It is proposed that Title 40, Part 270 of the Code of Federal Regulations be amended as follows:

1. The authority citation for Part 270 reads as follows:

Authority: Sections 1006, 2002(a), 3005, 3007 and 7004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. §§ 6905, 6912(a), 6925, 6927 and 6974).

2. It is proposed that 40 CFR Part 270 be amended by revising paragraph (j)(2) of § 270.30 to read as follows:

§ 270.30 Conditions applicable to all permits.

* * * * *

(j) * * *

(2) The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 3 years from the date of the sample, measurement, report or application. The permittee shall maintain records of all ground-water monitoring data and associated evaluations for ten years. Whese time periods may be extended by request of the Director at any time.

PART 264—[AMENDED]

3. The authority citation for Part 264 reads as follows:

Authority: Sections 1006, 2002(a), 3001 through 3007, 3010 and 7004 of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6905, 6912(a), 6921 through 6927, 6930 and 6974).

4. It is proposed that 40 CFR Part 264 be amended by revising paragraph (b) of § 264.73 to read as follows:

§ 264.73 Operating record.

* * * * *

(b) The following information, other than the Subpart F ground-water monitoring data required in paragraph (b)(6) of this section, must be recorded, as it becomes available, and maintained in the operating record until closure of the facility. Data associated with Subpart F ground-water monitoring must be recorded, as it becomes available, and maintained in the operating record for ten years.

BILLING CODE 6560–50–M

40 CFR Part 270

[SW H–FRL 2251–8]

Hazardous Waste Management System; the Hazardous Waste Permit Program

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is today proposing to amend its hazardous waste permit regulations to allow some hazardous waste permits to be automatically transferred from the original permitted owner to the new owner of a hazardous waste treatment, storage, or disposal facility if the original owner gives 90 days advance notice of the transfer. This proposal would only allow such transfers to occur automatically if the new owner makes no changes in the operation of the facility, and meets other prerequisites specified in these proposed regulations.

Because these amendments are proposed, they will have no immediate economic impact. If these amendments are promulgated in the same form as proposed today, the Agency expects that they will result in a minimal savings to the regulated community. The savings would be realized by reducing the time and procedural requirements involved in transferring a permit to a new owner or operator. There would be no impact on the environment as this proposal would result in a reduction of paperwork, but no reduction of substantive requirements.

DATE: The Agency will accept comments on these proposed amendments until July 11, 1983.

ADDRESS: Comments on these amendments should be addressed to the Docket Clerk (Docket 3005—Transfers of Permits), Office of Solid Waste (WH–562), U.S. Environmental Protection Agency, Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: The RCRA hotline toll-free at (800) 424–9346 in Washington, D.C. at (202) 382–3000; or Deborah Wolpe, Office of Solid Waste (WH–563), U.S. Environmental Protection Agency, Washington, D.C. 20460 (202) 382–4754.

SUPPLEMENTARY INFORMATION:

I. Introduction

On February 26, 1980 and May 19, 1980, EPA promulgated regulations implementing Subtitle C of the Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act of 1976, as amended (RCRA), 42 U.S.C. 6901 *et seq.* These regulations established the first phase of a comprehensive regulatory program for the handling and management of hazardous waste (40 CFR Parts 260–265, 45 FR 33066–33289). In addition, on May 19, 1980, EPA promulgated the Consolidated Permit Regulations governing five permit programs.[1] (40

[1] The five permit programs which were governed by the Consolidated Permit Regulations are: the

VOL
48
ISS
91
MY
10
1983
UMI

CFR Parts 122–124, 45 FR 33290–33588). Subsequently, on January ——, 1983, the Consolidated Permit Regulations were deconsolidated. Each of the five permit programs now appears in a separate Part of the Code of Federal Regulations. The changes proposed today concern only one of these permit programs—the hazardous waste permit program under Subtitle C of RCRA, now located at 40 CFR Part 270.

The Subtitle C regulations require, among other things, that facilities which treat, store, or dispose of hazardous waste obtain a permit from EPA or an authorized state,[2] and require that hazardous wastes be designated for, delivered to, and treated, stored, or disposed of only in these permitted facilities. A RCRA permit is obtained by the owner, and, if the facility is owned by one person and operated by another, by the operator of a hazardous waste management (HWM) facility. See 40 CFR 270.7(b).

The privileges associated with a RCRA permit attach only to the person authorized to conduct the permitted activity and are not inherently assignable. As a practical matter, however, the Agency allows changes in ownership or operational control of some facilities to occur without requiring the issuance of an entirely new permit.

II. Current Regulations on Transferring Permits

Permits are not transferable to any person except after notice to the Director.[3] When the Director receives notice of a proposed change in ownership or operational control, he decides whether the change should involve: (1) A revocation and reissuance of the permit; (2) a "major" modification to the existing permit; or (3) a minor modification to the existing permit.[4] The type and extent of the changes to the permit necessitated by the transfer of control determine whether and how the permit will be transferred. Each of these approaches entails different procedures and consequences.[5]

A. Transfer by Revocation and Reissuance

The Director may require revocation and reissuance of any permit that is being transferred. As a practical matter, such procedures probably would be invoked only when the new owner or operator proposes significant changes to the facility such as changes in the processes used and the wastes handled.

The revocation and reissuance of a permit entails essentially the same procedures as issuance of a permit. A new permit application must be submitted, and all applicable procedures in 40 CFR Part 124 must be followed, i.e., a draft permit must be prepared, and public notice and an opportunity for public comment and hearing on the draft permit must be given. The entire permit is reopened when a permit is being revoked and reissued.

This method of transferring permits is therefore time-consuming. For this reason it generally will be used only when the new owner or operator will change the operation of the entire facility significantly.

B. Transfer by "Major" Modification of the Permit

In many cases, a change in ownership or operational control will involve only a modification to the existing permit, rather than a complete revocation of the existing permit and issuance of a new permit. A modification generally should be adequate if the changes necessitated by the transfer do not entail numerous significant changes to the existing permit. For example, if the new pemittee proposes changes to the closure or post-closure plan, or financial mechanisms, but not the actual operation of the currently permitted facility, a major modification should be sufficient.

A major modification to a permit still requires that the procedures outlined in 40 CFR Part 124 (i.e., draft permit, public notice etc.) be followed. However, only those portions of the permit application concerning the conditions being changed or added is required, and only those permit conditions which are being modified are reopened at this time. Thus, the public is informed of the changes and has an opportunity to comment, but the transfer would not be as involved or time-consuming as a transfer which entails revocation and reissuance of a permit. Of course the permittee may always request that the transfer be handled as a revocation and reissuance, rather than a modification to an existing permit.

C. Transfer by Minor Modification of the Permit

Some changes in ownership or operational control may require only a minor modification of the permit under 40 CFR 270.42(d). Section 270.42 provides that, in certain circumstances, with the consent of the permittee, the Director may modify a permit without following the procedures of Part 124 when there is a change in ownership or operational control. A transfer may only be handled as a minor modification to the permit if the Director determines that no changes to the permit other than the change in ownership or operational control (and any other changes listed in § 270.42 as minor modifications[6] are necessary, and provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the Director. (See 40 CFR 270.42(d)). For example, a transfer of control between subsidiaries of the same corporation should involve only a change in name, and therefore could be treated as a minor modification to the permit.

A minor modification may be processed much faster than either a major modification, or a revocation and reissuance, as no draft permit need be prepared, and no public notice procedures are required. However, the permittee must wait for EPA to act on the modification before the transfer may take place, and transfer by minor modification is only available under very limited circumstances.

---

hazardous waste management (HWM) program under Subtitle C of RCRA; the Underground Injection Control (UIC) program under Part C of the Safe Drinking Water Act; the National Pollutant Discharge Elimination System (NPDES) program under Section 402 of the Clean Water Act; the State "Dredge or Fill" program under Section 404 of the Clean Water Act; and the Prevention of Significant Deterioration (PSD) program under regulations implementing Section 165 of the Clear Air Act.

[2] Section 3006 of RCRA provides that the Administrator of EPA shall authorize state hazardous waste management programs to operate in their respective jurisdictions in lieu of the Federal program. Such programs must meet minimum EPA guidelines. See the preamble to 40 CFR Part 123 (now Part 271) in the May 19, 1980 **Federal Register**, 45 FR 33380; the preamble discussion accompanying the January 20, 1981 amendments to those regulations, 46 FR 6298; and subsequent amendments on July 26, 1982, 47 FR 32373.

[3] The term "Director" as used in the hazardous waste permit regulations, is defined to mean the EPA Regional Administrator or the State Director of an authorized state program, as the circumstances require. See 40 CFR 270.1.

[4] See 40 CFR 270.30(1)(3). The Director may require modification or revocation or reissuance of the permit to change the name of the permittee and incorporate such other requirements as may be necessary.

[5] Automatic transfers are allowed for NPDES and certain UIC permits only, but not RCRA permits. See 40 CFR 122.61 and 144.38.

[6] The other changes listed in § 270.42 as minor modifications to RCRA permits are changes in the lists of facility coordinators or equipment in the contingency plan; changes in the estimates of maximum inventory in the closure plan; changes in the estimates of the expected year of closure; changes approving periods longer than 90 or 180 days for the time allowed for closure; certain changes in the trial burn for incinerators; and certain changes in land treatment programs. The Agency is planning to propose to expand the list of minor modifications in the near future.

D. Automatic Transfer of Permits

The regulations currently do not provide for automatic transfers of RCRA permits. However, NPDES and some UIC permits may be transferred to a new permittee automatically, if the requirements of §§ 122.61 or 144.38 are fulfilled. For an NPDES or UIC permit to be transferred automatically, the current permittee must notify the Director at least 30 days in advance of the proposed transfer date, and include in the notice a written agreement containing a specific date for the transfer of permit responsibility, coverage and liability. The transfer is automatic if the Director does not notify them of his intent to modify or revoke and reissue the permit within the 30 days.

For NPDES and UIC permits that are automatically transferred under §§ 122.61 or 144.38 the cause for modification survives the transfer, so that the Director may later modify the permit to reflect the changes to the facility resulting from the transfer, without holding up the transfer. This procedure allows a transfer to take place with no delay other than the 30-day notice period. This procedure is less burdensome on new owners or operators, therefore, as they need not wait for EPA to make the change to the permits, as they do when the permit is modified or revoked and reissued prior to the actual transfer.

III. Proposed Changes

Section 270.40, concerning transfers of RCRA permits, has been challenged as unreasonably restrictive. Industry petitioners, in settlement discussions dealing with the lawsuit on the consolidated permit regulations,[7] have argued that requiring a modification or revocation and reissuance of a permit for most RCRA permits before a transfer may take place is unduly burdensome. They have asserted that the requirements, details, and formalities attending property transfers are burdensome enough without involving EPA. Thus, they suggest that EPA should allow transfers of RCRA permits under an approach similar to that used for NPDES and UIC permits, allowing "automatic" transfers of permits for RCRA facilities.

Today the Agency is proposing to allow some RCRA permits to be transferred automatically, under a scheme similar to that used for NPDES and some UIC permits. The Agency agrees that many transfers ought to be subject to a streamlined transfer procedure, one not involving prior Agency action.

Today's proposal provides that a transfer may take place "automatically" if the new permittee proposes no changes in the operation of the facility and the Director receives notice from the existing permittee at least 90 days in advance of the proposed transfer date and receives a written agreement containing: (1) A specific date for transfer of permit responsibility, coverage and liability; (2) a demonstration that the financial responsibility regulations will be met by the new permittee, including a copy of the appropriate documents; and (3) a signed statement by the new permittee agreeing to comply with the existing permit conditions and the revised financial instruments.

If the new permittee does not receive notice from the Director within the 90-day advance notice period that modification or revocation and reissuance is necessary prior to the transfer, the transfer is effective on the date specified in the notice. EPA would plan to modify the permit, after the date of transfer, to reflect the new owner or operator's name and the revised financial instruments. If, however, the Director gives notice within the 90-day advance notice period, that a major or minor modification or revocation and reissuance of the permit is necessary prior to the transfer, the applicable procedures must be followed.

This is a change from the May 19, 1980 regulations. In the preamble to those regulations, the Agency stated that for RCRA facilities, it would always be necessary to modify the permits upon the transfer of ownership or operational control of the permitted facility. EPA had determined that this was necessary because we believed that all RCRA permits would contain conditions which would be personal to the permittee and which necessarily would change when the permittee changes, such as the closure and post-closure plans, the contingency plan, and provisions for financial responsibility.

The Agency no longer believes that all of the closure, inspection, and contingency plans are personal to the permittee. Many can be generally applicable to the facility. To expedite transfers of property, EPA is proposing to allow an automatic transfer of the permit when these conditions would not change, and then later process the facility's change of name and financial instruments as a modification to the permit.

It will be up to the original and new permittees whether they wish to apply to the Director for an automatic transfer or a minor modification, the major difference being that for a minor modification, they would wait for the Agency to take action on the permit modification before the transfer takes place.

It should be noted that EPA does not intend to allow any automatic transfers where a major modification to the permit would be necessary.

Ninety days is the same amount of advance notice that is required by EPA for transfers of facilities during interim status. (See 40 CFR 270.72). The Agency believes that in most cases, it needs that amount of time to review the revised financial instruments. It has been the Agency's experience, however, that the 90-day notice period may need to be shortened in certain circumstances, *e.g.*, a court-ordered transfer of ownership necessitating a permit transfer in less than 90-days. Therefore, the Agency is proposing to add a provision to § 270.40(b) that for good cause shown by either the existing or new permittee, the Director may allow a shorter advance notice period.

The Director must get actual notice of the transfer before the 90-days advance notice period begins. The permittee is therefore advised to send his notice by certified mail.

IV. Transfer of State Permits

Many states preclude any permit transfers and require that new facility owners apply for and obtain a new permit in all instances of changes in ownership or operational control. This proposal would not affect transfers of permits in states which preclude permit transfers under state law because Section 3009 of RCRA allows States to impose requirements that are more stringent than those imposed by the Federal regulations.

V. Economic Impact

EPA estimates that the savings attributable to this proposal would be equal to the difference between the cost of a minor modification to a permit and the cost of the automatic transfer (i.e., difference in when the modification to the permit occurs). This amendment merely allows the permittee a measure of convenience, by assuring the permittee that he may make his modification within 90 days. Because the cost of this convenience is negligible, there would be very little if any cost savings.

---

[7] *NRDC* v. *EPA*, No. 80–1607 and consolidated cases (D.C. Cir., filed June 2, 1980). For further discussion of the lawsuit and the settlement agreement dealing with the RCRA-related issues in the case, see the preamble to the proposed amendments to §§ 122.4 and 122.6 (now §§ 270.7 and 270.11), 47 FR 32038 (July 23, 1982).

VOL 48 ISS 91 MY 10 1983 UMI

VI. Request for Comments

The Agency invites comments on all aspects of these proposed regulations. EPA anticipates that finalization of today's proposal will provide part of the basis for the settlement of the *NRDC v. EPA* lawsuit on the RCRA portion of the consolidated permit regulations. However, EPA will carefully consider all public comments on this proposal before making its final decision.

VII. Effective Date

Section 3010(b) of RCRA provides that EPA's hazardous waste regulations, and revisions thereto take effect six months after their promulgation. In addition, section 553(d) of the Administrative Procedure Act requires publication of a substantive rule note less than 30 days before its effective date. The purpose of these requirements is to allow the regulated community sufficient lead time to prepare to comply with major new regulatory requirements. For the amendments proposed today, however, the Agency believes that an effective date six months after promulgation would cause unnecessary disruption in the implementation of the hazardous waste management program and would contravene the purpose of these amendments. These amendments, if promulgated in final form, would allow some RCRA permits to be transferred from a permittee to a new owner or operator without prior modification or revocation and reissuance.

The Agency believes that this is not the type of regulation that Congress had in mind when it provided a delay between the promulgation and the effective date of revisions to regulations. Indeed, this is a rule that would relieve an existing restriction. (See 42 U.S.C. 553(d)(1)). Consequently, EPA believes that it will have good cause to make these amendments effective immediately if and when they are promulgated in final form, but requests comments on whether such action would cause hardship for the regulated community or would otherwise be inappropriate.

VIII. Executive Order 12291

Under Executive Order 12291 (46 FR 12193, February 19, 1981), EPA must judge whether a regulation is "Major" and therefore subject to the requirement of a regulatory Impact Analysis. A major rule is defined as a regulation which is likely to result in:

—An annual effect on the economy of $100 million or more;

—A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or

—Significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The regulation is not major because it will not result in an effect on the economy of $100 million or more. There will be no adverse impact on the ability of the U.S.-based enterprises to compete with foreign-based enterprises in domestic or export markets. This amendment is not a major regulation, therefore no Regulatory Impact Analysis is being prepared.

This amendment was submitted to the Office of Management and Budget for review as required by Executive Order 12291.

IX. Paperwork Reduction Act

The reporting or recordkeeping provisions in this rule have been submitted for approval to the Office of Management and Budget (OMB) under Section 3504(b) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et. seq.* Any final rule will explain how its reporting or recordkeeping provisions respond to any OMB or public comments.

X. President's Task Force on Regulatory Relief

The President's Task Force on Regulatory Relief designated the Consolidated Permit Regulations (40 CFR Parts 122–124) for review by EPA. This proposal supports the goals of the Task Force by reducing the burden on the regulated community. This proposal also fulfills one of EPA's obligations in the settlement of the RCRA portion of industry litigation on the Consolidated Permit Regulations. In addition to issuing proposals aimed at settling the litigation the Agency has deconsolidated the regulations to make them more easily usable by the public. As a result of deconsolidation there was some reorganization of the regulations. Thus, this proposed amendment is in somewhat different format and location than it appeared in the settlement agreement.

XI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, whenever an agency is required to publish general notice of proposed rulemaking for any rule, it must prepare and make available for public comment a regulatory flexibility analysis which describes the impact of the proposed rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). No regulatory flexibility analysis is required, however, if the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

These amendments will not have a significant economic impact on a substantial number of small entities. If these amendments are promulgated in the same form as proposed today, the Agency expects that it will result in minimal savings to the community.

Accordingly, I hereby certify that this proposed regulation, if issued in final form, will not have a significant economic impact on a substantial number of small entities.

Dated: April 26, 1983.

Lee L. Verstandig

Acting Administrator.

List of Subjects in 40 CFR Part 270

Administrative practices and procedure, Reporting and recordkeeping requirements, Hazardous materials, Waste treatment and disposal, Water pollution control, Water supply, Confidential business information.

PART 270—[AMENDED]

It is proposed that 40 CFR Part 270 be amended as follows:

1. The authority citation for Part 270 reads as follows:

Authority: Sections 1006, 2002, 3005, 3007 and 7004 of the Solid Waste Disposal Act, as amended by of the Resource Conservation and Recovery Act of 1976, as amended (RCRA) (42 U.S.C. 6905, 6912, 6925, 6927 and 6974).

2. It is proposed that § 270.40 be amended by designating the existing section as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 270.40 Transfer of permits.

* * * * *

(b) *Automatic Transfers.* As an alternative to transfers under paragraph (a) of this section, any RCRA permit may be automatically transferred to a new permittee if the new permittee proposes no changes in operation, and:

(1) The Director receives notice by certified mail from the existing permittee at least 90 days in advance of the proposed transfer date specified in the agreement mentioned in paragraph (b)(2) of this section, unless the Administrator allows a shorter advance notice period for good cause shown by the existing or new permittee;

(2) The notice includes: (i) A written agreement between the existing and new permittee, signed by both,

containing a specific date for transfer of permit responsibility, coverage, and liability; (ii) a demonstration that the financial responsibility requirements of 40 CFR Part 264 will be met by the new permittee, including a copy of the revised financial instruments or other appropriate documents; (iii) a signed statement by the new permittee agreeing to comply with the existing permit conditions, and the revised financial requirements; and

(3) The new permittee receives no notice from the Director, within 90 days from the date the Director received the notice referred to in paragraph (b)(1) of this section, that modification, or revocation and reissuance of the permit is necessary. If such notice is not received, the transfer is effective on the date specified in the agreement mentioned in paragraph (b)(2) of this section. EPA may modify the permit after the effective date of the transfer to include the new permittee's name and the revised financial instruments. If, within the 90 day advance notice period, the Director gives notice that modification or revocation and reissuance of the permit is necessary under § 270.41(b)(2), the applicable procedures of Part 124 must be followed, rather than these procedures for an automatic transfer.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

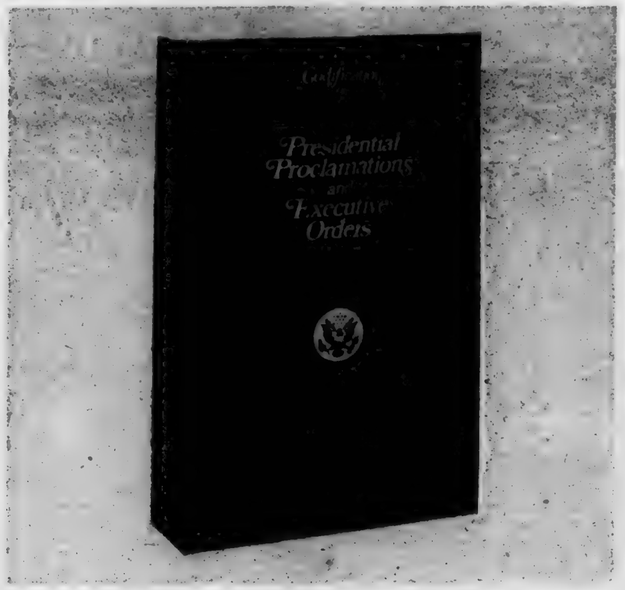
UPDATED EDITION NOW AVAILABLE



For those of you who must keep informed about Presidential proclamations and Executive orders, there is a convenient reference source that will make researching these documents much easier.

Arranged by subject matter, this edition of the *Codification* contains proclamations and Executive orders that were issued or amended during the period January 20, 1961, through January 20, 1981, and which have a continuing effect on the public. For those documents that have been affected by other proclamations or Executive orders, the codified text presents the amended version. Therefore, a reader can use the *Codification* to determine the latest text of a document without having to "reconstruct" it through extensive research.

Special features include a comprehensive index and a table listing each proclamation and Executive order issued during the 1961–1981 period, along with any amendments, an indication of its current status, and, where applicable, its location in this volume.

Published by the Office of the Federal Register, National Archives and Records Service, General Services Administration

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 92
Wednesday, May 11, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

OFFICE OF MANAGEMENT AND BUDGET

5 CFR Part 1320

Collections of Information in Federal Acquisition Regulations

AGENCY: Office of Management and Budget, Office of Information and Regulatory Affairs.

ACTION: Notice concerning collections of information in Federal Acquisition Regulations.

SUMMARY: This notice is being issued to inform all affected parties of our intent to review collections of information contained in the Federal Acquisition Regulation and agencies' implementing and supplementing regulations, under the Paperwork Reduction Act of 1980, prior to April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Edward C. Springer, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503; telephone (202) 395–4814.

The Paperwork Reduction Act of 1980 (Pub. L. 96–511) imposes a requirement on Federal agencies to obtain approval from the Office of Management and Budget before collecting information from ten or more members of the public. As evidence of such approval, agencies are required to display an OMB control number on collection of information requirements. As stated in Pub. L. 96–511, "Notwithstanding any other provision of law, no person shall be subject to any penalty for failure to maintain or provide information to any agency if the information collection request involved was made after December 31, 1981, and does not display a current control number assigned by the Director of OMB, or fails to state that such request is not subject to this chapter."

Collections of information from ten or more firms in connection with the acquisition of goods and services by the Federal Government are subject to the same review and approval requirements as other collections of information under Pub. L. 96–511. Furthermore, private sector firms, as "persons" within the meaning in the Act, are accorded protections in the Act. The Office of Information and Regulatory Affairs recently issued a rule (5 CFR Part 1320) 48 FR 13666 which clarifies the applicability of Pub. L. 96–511 to collections of information associated with Federal acquisitions.

Over the last few years, OMB has been working with the General Services Administration, the Department of Defense, and the National Aeronautics and Space Administration in developing a single, standard Federal Acquisition Regulation (FAR). That regulation is intended to replace and simplify the myriad of agency procurement regulations currently in place. It will contain numerous reporting and recordkeeping requirements, which OMB is planning to review under Pub. L. 96–511 prior to the April 1, 1984 implementation date for the FAR.

In addition to the FAR, some agencies will be issuing new acquisition procedures or retaining existing acquisition procedures applicable to particular agency requirements. The reporting and recordkeeping associated with such procedures will also be reviewed by OMB under Pub. L. 96–511 in time for the April 1, 1984 implementation of the FAR.

It is the purpose of this notice to inform all affected parties that for acquisitions for which solicitations are issued on or after April 1, 1984, only those collections of information required by acquisition regulations, bearing a current OMB control number displayed in the text of the Federal Acquisition Regulation or agency implementing and supplementing acquisition regulations, will be considered to be approved under the Paperwork Reduction Act. There will be continuing approval for solicitations issued prior to April 1, 1984 and contracts entered into as a result of solicitations issued prior to April 1, 1984.

Christopher DeMuth,
Administrator for Information and Regulatory Affairs.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1464

[Amdt. 4]

Tobacco Loan Program

AGENCY: Commodity Credit Corporation (CCC), USDA.

ACTION: Final rule.

SUMMARY: An interim rule which was published on November 16, 1982 (47 FR 51554), is hereby adopted as a final rule except for an amendment to more precisely indicate the method by which the Secretary of Agriculture may adjust the level of price support for tobacco. The interim rule amended certain provisions of the regulations found at 7 CFR Part 1464 which govern the Commodity Credit Corporation price support program for tobacco in order to implement certain changes in that program which were required by the No Net Cost Tobacco Program Act of 1982, (Pub. L. 97–218, 96 Stat. 197, approved July 20, 1982). These program changes affect the terms and conditions under which price support will be made available to producers for the 1982 and subsequent crops of tobacco.

EFFECTIVE DATE: May 11, 1983.

FOR FURTHER INFORMATION CONTACT: Thomas R. Burgess, Program Specialist (202) 447–2715. A final Regulatory Impact

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified "not major." The provisions of this rule will not result in: (1) An annual effect on the economy of $100 million or more; (2) major increases in costs or prices for consumers, individual industries, Federal, State or local government agencies or a geographic region; or (3)

VOL

significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program to which this rule applies are: Title: Commodity Loan and Purchases: Number 10.051, as set forth in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this rule since the Commodity Credit Corporation ("CCC") is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

The No Net Cost Tobacco Program Act of 1982 (the "Act") amended the Agricultural Adjustment Act of 1938 and the Agricultural Act of 1949 to establish a tobacco price support and adjustment program which would result in no net cost to the taxpayer, other than administrative costs. The Act provided for the establishment of Funds or Accounts which would be used to receive contributions by tobacco producers to pay for any losses sustained by the CCC for 1982 and subsequent crops of tobacco in its operation of a tobacco price support program.

The Act also amended Section 106 of the Agricultural Act of 1949 to provide that if the Secretary determines that any grade of any kind of tobacco of a crop for which marketing quotas are in effect will likely be excessive, the Secretary may reduce the support rate which would otherwise be established for such grade of tobacco. Before making such reduction, the Secretary must take into consideration the effect such reduction may have on the supply and price of the other grades of the kinds of quota tobacco.

On November 16, 1982, an interim rule was published in the **Federal Register** (47 FR 51554) which amended the regulations at 7 CFR Part 1464 to implement the foregoing provisions of the Act. The public was afforded 60 days to comment on the interim rule. Only one comment was received during the comment period which ended on January 17, 1983. The American Farm Bureau Federation expressed support with respect to the provisions of the interim rule.

Accordingly, the interim rule as published on November 16, 1982, is adopted as a final rule, except that § 1464.3(b) is revised to make it clear that once the Secretary has, in accordance with § 1464.3(b), reduced the support rate which would otherwise be established, the support level for the current marketing year shall be the announced support level for the preceding marketing year plus any increase determined in accordance with the provisions of Section 106(d) of the Agricultural Act of 1949.

List of Subjects in 7 CFR Part 1464

Price support programs, Tobacco.

Final Rule

Accordingly, the interim rule published at 47 FR 51554 November 16, 1982, which amended the regulations at 7 CFR Part 1464 is hereby adopted as a final rule, except that § 1464.3(b) is revised to read as follows:

§ 1464.3 Level of price support

* * * * *

(b) Effective for the 1982 and subsequent crops of tobacco, if the Secretary determines that the supply of any grade of any kind of tobacco of a crop for which marketing quotas are in effect or are not disapproved by producers will likely be excessive, the Secretary, after prior consultation with the appropriate association, may reduce the support rate which would otherwise be established for such grade of tobacco. Before reducing the support rate for a particular grade of tobacco, the Secretary must take into consideration the effect such reduction may have on the supply and price of other grades of other kinds of quota tobacco. After such reduction, however, the weighted average of the support rates for all eligible grades of such kind of tobacco shall reflect not less than (1) 65 percent of the increase in the support level for such kind of tobacco which would otherwise be established under paragraph (a) of this section, if the support level for such kind of tobacco is higher than the support level for the preceding crop, or (2) the support level for such kind of tobacco established under paragraph (a) of this section, if the support level for such kind of tobacco is not higher than the support level for the preceding crop. All official grades shall be considered in determining the weighted average of the grade loan rates. In determining whether the supply of any grade of any kind of tobacco of a crop will be excessive, the following factors will be considered: (i) The domestic supply, including domestic inventories, (ii) the amount of such tobacco pledged as security for price support loans, and (iii) anticipated domestic and export demand, based on the maturity, uniformity and stalk position of such tobacco. Any adjustment in the support level for any marketing year shall be determined by comparing the support level computed in accordance with the provisions of paragraph (a) of this section for the preceding marketing year to the support level computed in accordance with the provisions of paragraph (a) for the current marketing year. If the computed support level for the current marketing year is higher than the computed support level for the preceding marketing year, an amount which is not less than 65 percent of such increase shall be added to the adjusted support level (determined in accordance with the provisions of this paragraph) which was in effect for the preceding marketing year and such total shall be the adjusted support level for the current marketing year. If the computed support level for the current marketing year is lower than such level for the preceding marketing year, the current marketing year support level shall be the preceding marketing year's adjusted support level: *Provided*, That if the computed support level for the current marketing year is less than the adjusted support level for the preceding marketing year, the computed support level shall be the support level in effect for the current marketing year.

Signed at Washington, D.C., on May 5, 1983.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 120

[Rev. 6, Amdt. 29]

Business Loan Policy

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: The Small Business Administration (SBA) is issuing today a final rule that SBA will not participate in any loan in which the lender has issued a real estate forward commitment. Inquiries by lenders and others concerning the alleged vagueness of the so-called conflict provision is the basis for the SBA decision to clarify the proscription of the forward commitment type of transaction.

EFFECTIVE DATE: May 11, 1983.

FOR FURTHER INFORMATION CONTACT: Charles Hertzberg, Deputy Associate Administrator for Financial Assistance, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416, (202) 653-6574.

SUPPLEMENTARY INFORMATION: On November 15, 1982, SBA published in the **Federal Register** (47 FR 51403) a proposed rule clarifying conflict of interest situations in the financial assistance programs and adding an example covering the issuanvce of forward commitments by participating lenders. The rule clarifies that SBA will not participate in any loan where the lender has issued a real estate forward commitment to a builder/developer with respect to a project in which the applicant will use the loan proceeds to acquire business or industrial space. Public comment was invited to be received by December 15, 1982.

Only two comment letters were received on the proposed rule, one from a real estate consulting organization, and the second from that organization's legal counsel. These comments were opposed to the proposed rule change.

One of the comment letters maintained that small businesses would be severely impacted through higher costs and lost growth opportunities. In fact, the rule change does not impact on small businesses since it is merely clarifying a pre-existing prohibition on forward commitment arrangements. Any adverse impact that may affect real estate purchases results from recent changes in the availability of long term real estate mortgage financing rather than any change in SBA lending practices.

The respondent further maintains that SBA's assumption that builders/developers are the beneficiaries is misleading, and that the proposed rule is prejudicial in that it addresses real estate forward commitments but not other types of forward commitments.

It is the position of SBA that if an identifiable small business desires to purchase specific real estate and finance that purchase through a lender with SBA's guaranty, such a transaction would be eligible for SBA assistance provided no previous agreement existed between the lender and the builder/developer. Such and arrangement would clearly assist the small business concern. Since a forward commitment runs between a lender an a builder, prior to initiation of construction, and in the absence of an identified small business purchaser, it is clear that the builder is the beneficiary at the time the commitment is issued. SBA does not consider valid the comment on the prejudicial aspect since real estate forward commitments are the only type known to involve SBA financing. However, since the real estate forward commitment is only an example of ineligibility, the prohibition would be equally applicable should a similar situation arise not involving real estate.

Finally, the respondent maintains that neither the lender nor SBA is under any obligation to accept unworthy credit risks. SBA does not disagree with this comment; however, SBA does not believe this is a relevant point since it does not bear on the underlying basis for the rule clarification.

The second comment letter suggests that SBA has no factual basis upon which to base a prohibition on forward commitments, and does not describe "conflict of interest" as that term is used under the Small Business Act, and existing regulations.

In fact, "conflict of interest" is a principle commonly understood and used in both business and government. The principle embodies requirements that permit decisions and/or recommendations to be made free of factors which would or could influence the judgment of the decisionmaker because of other interests or relationships he or she may have.

This respondent has gone on to suggest that existing SBA regulations limit conflict of interest to those situations where the lender would have or acquire an interest in the small business concern being financed by that lender. While existing regulations could be read in such a way, the SBA never intended to so limit its ability to determine the existence of a conflict of interest in any other situation. It is eminently clear to SBA that conflicts of interest can and do take many other forms, and this is precisely the reason that such clarification in the regulations is necessary.

This respondent raised several other issues also covered in the first comment letter and addressed above.

SBA has determined that the rule does not constitute a major rule within the meaning of Executive Order 12291 dated February 17, 1981 (47 FR 13193). The Agency is certain that the annual effect of the rule on the economy will be less than $100 million. The rule will not result in a major increase in costs or price for consumers, individual industries, Federal, State or local government agencies or geographic regions, and will not have significant adverse effects on competition, employment, investment, productivity or innovation.

The SBA also certifies that the promulgation of this rule will not have a significant economic impact on a substantial number of small entities. In this regard, while the result of promulgation of this rule will be to restrict forward commitment situations from participation in SBA's loan program, it will not by itself result in the deprivation or granting of a loan to a given small business. If a business which might be aided by a forward commitment is otherwise eligible for SBA assistance, it should be able to receive that assistance notwithstanding a prohibition on forward commitments.

Loan programs—business, Small business.

PART 120—[AMENDED]

Accordingly, pursuant to the authority in Section 5(b)(6) of the Small Business Act (15 U.S.C. 631 et seq.), Part 120, Chapter I, Title 13 of the Code of Federal Regulations, is amended by revising § 120.5(a)(1) introductory text, and renumbering paragraphs (a)(1) (iv) and (v) of § 120.5 as (a)(1) (v) and (vi), respectively, and by adding a new paragraph (a)(1)(iv) to § 120.5, to read as follows:

§ 120.5 Operations of eligible participants.

(a) *General.* * * *

(1) *Conflicts.* Without the prior written approval of the responsible SBA district office, SBA will not participate in any loan to a small business concern where the lender has, or acquires while the loan is outstanding, an interest in any form which could constitute a conflict of interest with respect to the loan or the small business concern. For example:

* * * * *

(iv) SBA will not participate in any loan to a small business concern where the lender has issued a real estate forward commitment to a builder/developer with respect to a project of such builder/developer in which the applicant will use the proceeds of the loan to acquire business or industrial space.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

Freedom of Information Act Release No. 65

AGENCY: Securities and Exchange Commission.

ACTION: Interpretive Release.

SUMMARY: The Commission takes the position that a letter requesting confidential treatment for materials submitted to the Commission is not entitled to confidential treatment under the Freedom of Information Act.

EFFECTIVE DATE: May 11, 1983.

FOR FURTHER INFORMATION CONTACT: Harry J. Weiss, Office of the General Counsel (202) 272–2454.

SUPPLEMENTARY INFORMATION: The Freedom of Information Act, 5 U.S.C. 552, as amended, (FOIA) generally provides that any person has a right, enforceable in court, of access to the extent that such records, or portions thereof, are protected from disclosure by one of nine exemptions.[1] The Commission has adopted rules which allow persons submitting information to make requests for confidential treatment in order that such information not be disclosed pursuant to the FOIA.[2]

A number of persons requesting confidential treatment have also requested that the letter requesting confidential treatment itself be afforded confidential treatment. The Commission takes the position that a request for confidential treatment is not protected under the FOIA. Accordingly, the Commission will release copies of requests for confidential treatment if they are requested under the FOIA.[3]

Persons requesting confidential treatment should avoid including in their requests information which is itself confidential.[4] Under the Commission's confidential treatment regulations, a request for confidential treatment need only "specif[y] the information as to which confidential treatment is requested." [5]

The requester should not attempt to substantiate a request at the time the request is made. Should the Commission receive a request under the FOIA for the designated information, the requester will then be afforded an opportunity to substantiate the request and, under the Commission's regulations, the requester may, if necessary, request confidential treatment for portions of the substantiation.[6]

By the Commission.

May 5, 1983.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 83-12870 Filed 5-10-83; 8:45 am]

BILLING CODE 8010-01-M

[1] *See also* 17 CFR 200.80.

[2] 17 CFR 200.83.

[3] The Commission may, in its discretion, release a copy of a request under the FOIA even if a FOIA exemption would permit nondisclosure. *See Chrysler Corp. v. Brown*, 441 U.S. 281, 292–294 (1979).

[4] The Commission recognizes that, on rare occasions, it may be necessary to afford confidential treatment to the request itself in order to preserve the confidentiality of the information as to which confidential treatment is requested (*e.g.*, where an informant requests that confidential treatment be afforded to the letter in which he seeks confidential treatment for his investigative testimony because of his desire to avoid disclosure of his identity or the fact that he has provided information to the Commission). On those occasions, the requester should request, and describe the extraordinary circumstances that necessitate, confidential treatment of the request.

[6] 17 CFR 200.83(d)(2)(viii).

INTERNATIONAL TRADE COMMISSION

19 CFR Part 210

Procedures for Investigations Involving Requests for Temporary Relief—Investigations of Unfair Practices in Import Trade

AGENCY: International Trade Commission.

ACTION: Interim rules; request for comments.

SUMMARY: These rules amend part 210 of the Commission's *Rules of Practice and Procedure*. Part 210 governs procedures to be followed in investigations of unfair acts and unfair methods of competition under section 337 of the Tariff Act of 1930. 19 U.S.C. 1337. The amendments clarify and modify the procedures for investigations involving requests for temporary relief pursuant to 19 U.S.C. 1337 (e) and (f).

Under existing Commission practice (19 CFR 210.20(a)(2) and (a)(10)), the complainant sets forth its request for temporary relief and any factual allegations underlying the claim in the complaint. The request and accompanying factual allegations are reviewed by the Commission prior to institution of the investigation. If the request and allegations are deemed sufficient under 19 CFR 210.11(a), the Commission defines the scope of the investigation to include a request for temporary relief pursuant to 19 CFR 210.12. After institution, the investigation is assigned to a presiding officer who conducts any hearings required.

The amended rules change existing practice by requiring the complainant to set forth the request for temporary relief and supporting allegations in a motion submitted concurrently with the complaint. The rules further provide for the filing of a formal response to the motion by any parties opposed to the issuance of temporary relief. As the amended rules make clear, the presiding officer assigned to the case, rather than the Commission, will review the sufficiency of the claim and allegations and decide what action is appropriate.

EFFECTIVE DATE: May 11, 1983. The procedures established by these interim rules will be applicable only to section 337 complaints filed subsequent to the effective date. The superseded rules provisions will continue in effect for all previously filed complaints. Comments on these interim rules will be considered if received on or before June 10, 1983.

ADDRESS: Send comments to the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436.

FOR FURTHER INFORMATION CONTACT: N. Tim Yaworski, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0311.

SUPPLEMENTARY INFORMATION: Section 335 of the Tariff Act of 1930 (19 U.S.C. 1335) authorizes the Commission to adopt such reasonable procedures and rules and regulations as it deems necessary to carry out its functions and duties. Under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337), the Commission has the authority to conduct investigations of alleged unfair acts and unfair methods of competition in import trade. Pursuant to sections 337 (e) and (f), the Commission may order the temporary exclusion of the articles under investigation, except under bond, or issue temporary cease and desist orders. 19 U.S.C. 1337 (e) and (f). The purpose of these amendments is to modify the procedures for section 337 investigations involving requests for temporary relief. The amendments are intended to formalize the procedures for resolving the issues presented and to provide respondents with a formal opportunity to respond to a request for temporary relief prior to any adjudicatory hearings.

Under existing Commission practice, the complainant sets forth any allegations underlying its request for

temporary relief in a complaint filed with the Commission under 19 CFR 210.20(a). Prior to institution of the investigation, the Commission reviews the complaint, including any allegations regarding temporary relief, pursuant to 19 CFR 210.11(a). In certain instances, at complainant's request, the Commission, upon institution, has requested that the presiding officer issue an initial determination on temporary relief by a specific date.

After the Commission has voted to institute an investigation, the Secretary to the Commission serves the respondents with the complaint and notice of investigation (19 CFR 210.13). The respondents have 20 days from the date of service to respond to the allegations of the complaint, including any allegations regarding temporary relief. After the complaint, response, and discovery (if any), the presiding officer conducts a temporary relief hearing and issues an initial determination pursuant to § 210.53(b) of the Commission's rules. 47 FR 25134 June 10, 1982 (to be codified at 19 CFR 210.53(b)).

The amendments are intended to remedy problems that have arisen under existing Commission practice. At the institution stage, the Commission does not know either how many respondents will be contesting the allegations in the complaint or the substance and complexity of respondents' defenses. Thus, the Commission must rely exclusively on complainant's allegations in evaluating the sufficiency of any statements regarding temporary relief. This is a particular problem when the Commission is being asked to order an initial determination on temporary relief by a specific date, since the respondents' views as to temporary relief and the presiding officers' availability to schedule a hearing are unknown. Thus, the Commission believes that the more appropriate procedure is to permit respondents to file a formal reply prior to consideration of the sufficiency of any allegations regarding temporary relief or any decision as to a hearing date. The presiding officer will review the motion and response, and will then be in a position to resolve any conflict in the positions of the parties, including any conflict regarding the complainant's request for temporary relief by a specific date.

Rule 210.20 is amended in paragraph (a)(10), which concerns requests for relief contained in the complaint. The paragraph is amended to include a reference to the new procedure by which requests for temporary relief must be made by way of separate motion as provided for in new § 210.24(e).

Rule 210.24, which concerns motions, is amended with the addition of a new paragraph (e) to be codified at 19 CFR 210.24(e). This provision deals with motions for temporary relief and responses thereto. Under § 210.24(e)(1), a complaint must be accompanied by a motion for temporary relief, a memorandum of points and authorities, and supporting affidavits. The motion must set forth specific facts relating to (1) complainant's likelihood of success on the merits; (2) immediate and substantial harm to the domestic industry; (3) harm, if any, to the proposed respondents; and (4) the effect, if any, on the public interest as enunciated in §§ 337 (e) and (f) and 19 CFR 210.14. The Commission considers these four factors in evaluating requests for temporary relief. See, e.g., *Certain Apparatus for the Continuous Production of Copper Rod*, Action, Order and Opinions concerning Temporary Relief, Investigation No. 337–TA–89, USITC Pub. 1132, April 1981, at 4.

Rule 210.24(e)(2) allows for motions for temporary relief to be filed after the institution of an investigation. Such a motion has the same requirements as a motion accompanying the complaint with the exception that a later motion has the additional requirement of showing extraordinary changed circumstances of which the moving party was not, and could not have been, aware at the time the complaint was filed.

Rule 210.24(e)(3) provides for responses to motions for temporary relief. This provision permits any party to file a response to the temporary relief motion. The response must set forth specific facts relating to (1) complainant's likelihood of success on the merits; (2) immediate and substantial harm to the domestic industry; (3) harm, if any, to the respondents; and (4) the effect, if any, on the public interest. Time for responses to motions accompanying the complaint is 20 days, the same time allowed for responses to the complaint itself. Motions brought after the institution of an investigation shall have a response time of 10 days after service of the motion, the same response time as for other motions. The presiding officer is given authority to alter response times according to the needs of particular circumstances. Responses must be accompanied by the same types of supporting materials, except that affidavits are required only where feasible.

Rule 210.13, which concerns service of the complaint, has been amended to reference service of any accompanying motion for temporary relief.

Rule 210.14, which concerns Commission actions, public interest factor, and bonding, is amended to permit the presiding officer to consider and make appropriate findings in the initial determination regarding the effect, if any, that the issuance of the requested temporary relief would have on the public interest. Paragraph (b) has been amended to make it consistent with section 7 of the Administrative Procedure Act (5 U.S.C. 556(d)) and to prohibit the compelling of discovery in connection with settlement terminations or requests for temporary relief where such discovery relates solely to the public interest.

The Commission expects a complainant to come forward with specific facts supporting its entitlement to temporary relief. When temporary relief is requested by a specific date, complainant should present specific facts to support such a request. When there is no genuine issue of material fact and a party is entitled to summary determination as a matter of law, the Commission intends that the motion be summarily determined in accordance with 19 CFR 210.50.

The complainant carries the burden of establishing its entitlement to temporary relief. Similarly, the respondent, whenever possible, must present by affidavit facts essential to justify its opposition.

The Commission recognizes that in certain instances, parties may be unable to present certain essential facts in order to support or contest motions for temporary relief. In such instances, the presiding officer may permit discovery or make such other order as is just under the circumstances. Nevertheless, where the facts are readily available without discovery, the reasons given for the need for discovery are insufficient, or there is an appearance of improper or unjustified delay, the presiding officer may rule upon a motion without further discovery.

In accordance with the Regulatory Flexibility Act, it is hereby certified that these interim rules will not have a significant economic impact on a substantial number of small entities. Adoption of these rules is will make it less costly and time consuming for all private parties, including small entities, to participate in Commission section 337 proceedings.

List of Subjects in 19 CFR Part 210

Administrative practice and procedure, Customs duties and inspection, Imports, Investigations.

PART 210—[AMENDED]

Part 210 is amended as set forth below:

1. Section 210.13 which concerns service of the complaint is revised as follows:

§ 210.13 Service of Complaint.

Each respondent named in the complaint, and other respondents as later discovered, shall be served by the Commission with a copy of the complaint and any accompanying motion for temporary relief, and notice instituting the investigation. The Department of Health and Human Services, the Department of Justice, the Federal Trade Commission, and such other departments and agencies as the Commission considers appropriate shall also be served with a copy of the complaint and any accompanying motion for temporary relief, and notice instituting the investigation. Service shall be effected upon institution of the investigation or as soon as possible after respondents are discovered.

2. Section 210.14(b) is revised as follows:

§ 210.14 Commission action, public interest factor, and bonding.

* * * * *

(b) Unless otherwise ordered by the Commission or permitted by this subsection, the presiding officer shall not take evidence or other information or hear arguments from the parties and other interested persons with respect to the subject matter of paragraphs (a)(1), (a)(2), (a)(3), and (a)(4) of this section. However, with regard to settlements by agreement or consent order under § 210.51 (c) and (d), the parties may file statements regarding the impact of the proposed settlement on the public interest, and the presiding officer may in his discretion hear argument, although no discovery may be compelled with respect to issues relating solely to the public interest. Thereafter, the presiding officer shall consider and make appropriate findings in the initial determination regarding the effect of the proposed settlement on the public health and welfare, competitive conditions in the U.S. economy, the production of like or directly competitive articles in the United States, and U.S. consumers. With respect to initial determinations concerning temporary relief issued pursuant to § 210.53(b), the parties may present oral or documentary evidence regarding the impact of the requested temporary relief on the public interest, submit rebuttal evidence, and conduct such cross-examination as may be required for a full and true disclosure of the facts, and the presiding officer shall thereafter in his initial determination make appropriate findings regarding the effect, if any, that the issuance of the requested temporary relief would have on the public interest, although no discovery may be compelled with respect to issues relating solely to the public interest.

* * * * *

3. Section 210.20(a)(10) is amended as follows:

§ 210.20 The complaint.

(a) * * *

(10) Contain a request for relief sought. When the complaint contains a request for temporary relief pursuant to 19 U.S.C. 1337 (e) or (f), a separate motion for temporary relief shall accompany the complaint in accordance with § 210.24(e) of this part.

* * * * *

4. In § 210.24, a new paragraph (e) is added to read as follows:

§ 210.24 Motion.

* * * * *

(e) *Motion for Temporary Relief.* Requests for temporary relief pursuant to 19 U.S.C. 1337 (e) or (f) shall be made through a motion under § 210.24(e) (1) or (2) of this part.

(1) *Motion accompanying complaint.* A complaint requesting temporary relief pursuant to § 210.20(a)(10) of this part shall be accompanied by a motion which sets forth complainant's request for temporary relief. The motion shall contain a detailed statement of specific facts bearing on:

(i) Complainant's probability of success on the merits;

(ii) Immediate and substantial harm to the domestic industry in the absence of the requested temporary relief;

(iii) Harm, if any, to the proposed respondents if the requested temporary relief is granted; and

(iv) The effect, if any, that the issuance of the requested temporary relief would have on the public interest.

The motion shall contain in addition a memorandum of points and authorities in support of the motion and affidavits executed by persons with knowledge of the facts specified in the motion. A motion for temporary relief accompanying a complaint shall be deemed filed on the date that the Commission institutes an investigation and shall be served with the complaint and notice of investigation in accordance with § 210.13 of this part. A motion for temporary relief accompanying a complaint shall be forwarded to the presiding officer for decision in the form of an initial determination to be issued pursuant to § 210.53(b) of this part.

(2) *Motions filed after institution of the investigation.* A motion for temporary relief may be filed after the institution of an investigation by the Commission. Such a motion shall contain a statement of specific facts, memorandum of points and authorities, and affidavits as required in § 210.24(e)(1), and a showing that extraordinary changed circumstances exist warranting temporary relief and that the moving party was not and with due diligence could not have been aware of the extraordinary changed circumstances at the time the complaint was filed.

(3) *Response to motion for temporary relief.* Any party may file a response to a motion for temporary relief. Responses shall be filed within 20 days after the service of a motion accompanying the complaint and 10 days after service of a motion filed after the institution of an investigation, unless otherwise ordered by the presiding officer. The response shall contain.

(i) A statement which sets forth with particularity any objection to the motion for temporary relief;

(ii) A statement which sets forth with specificity facts bearing on:

(A) complainant's probability of success on the merits;

(B) immediate and substantial harm, if any, to the domestic industry in the absence of the requested temporary relief;

(C) harm, if any, to the respondents if the requested temporary relief is granted; and

(D) the effect, if any, that the issuance of the requested temporary relief would have on the public interest.

(iii) A memorandum of points and authorities in opposition to the motion;

(iv) Affidavits, where possible, executed by persons with knowledge of the facts specified in the response.

By order of the Commission.

Issued: May 5, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

19 CFR Part 210

Initial Determinations; Addition of Motions for Designating Investigations

AGENCY: International Trade Commission.

ACTION: Final rule.

SUMMARY: This rule amends section 210.53 of the Commission's *Rules of Practice and Procedure* which concerns the issuance of initial determinations in investigations under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). The effect of the amended rule is to add motions for designating investigations under section 337 "more complicated" to those motions which the presiding officer may grant by filing an initial determination with the Commission.

EFFECTIVE DATE: May 11, 1983. The amendment effected by this final rule is applicable only to section 337 investigations instituted subsequent to June 10, 1982.

FOR FURTHER INFORMATION CONTACT: N. Tim Yaworski, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0311.

SUPPLEMENTARY INFORMATION:

Authority for adoption of this rule is contained in 19 U.S.C. 1335, which authorizes the Commission to adopt such reasonable procedures and rules and regulations as it deems necessary to carry out its functions and duties, including those exercised under section 337 of the Tariff Act of 1930 (19 U.S.C 1337). Authority is also derived from the Administrative Procedure Act (5 U.S.C. 551, et seq.), which authorizes the adoption of certain procedures in an adjudicative proceeding when an agency does not preside over the hearing at which the evidence is received. Under 5 U.S.C. 557, the agency may require the presiding officer to make an initial decision that becomes the decision of the agency without further proceedings unless the decision is appealed to, or reviewed by, the agency. Alternatively, the agency may require that the entire record be certified to it for decision with a recommended decision by the presiding officer.

The purpose of this amendment to the Commission's rules is to include motions for designating investigations "more complicated" within the meaning of subsection 337(b)(1) of the statute and section 210.15 of the Commission's rules among those motions which the presiding officer may grant by filing an initial determination with the Commission. Such motions are not presently covered by section 210.53 of the rules which concerns the issuance of initial determinations.

In accordance with the Regulatory Flexibility Act, it is hereby certified that this final rule will not have a significant economic impact on a substantial number of small entities. Adoption of this rule is anticipated to make it less costly and time-consuming for all private parties, including small entities, to participate in Commission section 337 proceedings.

List of Subjects in 19 CFR Part 210

Administrative practice and procedure, Customs duties and inspection, Imports, Investigations.

Explanation of Amendment

Section 210.53 Initial Determinations.

Paragraph (c) is amended to add motions for designating investigations under section 337 "more complicated" to those motions which the presiding officer may grant by filing an initial determination with the Commission. This amendment will conform the treatment of such motions to that accorded the other types of motions enumerated in § 210.53(c). It is also expected to reduce the amount of time required to obtain final disposition of motions to designate investigations "more complicated".

PART 210—[AMENDED]

19 CFR Part 210 is amended as set forth below.

1. In § 210.53, paragraph (c) is revised to read as follows:

§ 210.53 Initial determinations.

* * * * *

(c) *On motions for summary determination, termination, finding of default, amendment to complaint or notice, or "more complicated" designation.* Following the filing of a motion for summary determination pursuant to § 210.50, motion for termination pursuant to § 210.51, motion for a finding of default pursuant to §§ 210.21(d) and 210.53(b), motion to amend the complaint or notice of investigation pursuant to § 210.22(2), or motion to designate the investigation as "more complicated" pursuant to § 210.15, the presiding officer shall grant such motions by filing with the Commission an initial determination, or shall deny such motions by issuing an order directing denial.

By order of the Commission.

Issued: May 4, 1983.

Kenneth R. Mason,

Secretary.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 5f

[T.D. 7892]

Income Tax; Public Approval and Information Reporting Requirements

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations under section 103 (k) and (l) of the Internal Revenue Code relating to the public approval and information reporting requirements applicable to certain issues of State and local government obligations. Changes to the applicable tax law were made by the Tax Equity and Fiscal Responsibility Act of 1982. The public approval requirements apply only with respect to industrial development bonds. The information reporting requirements apply to all issues of industrial development bonds, student loan bonds, and State and local governmental issues at least a major portion of the proceeds of which are used by organizations described in section 501(c)(3). These temporary regulations would provide issuers with the guidance needed to comply with the Act. Failure to comply with these requirements will result in loss of tax exemption for the interest on these bonds. In addition, these temporary regulations serve as the text of proposed regulations found in the Proposed Rules section of this issue of the **Federal Register**.

DATE: The regulations are effective on January 1, 1983.

FOR FURTHER INFORMATION CONTACT: George T. Magnatta of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (attention: CC:LR:T) (202–566–3288).

SUPPLEMENTARY INFORMATION:

Background

This document contains temporary regulations under section 103 (k) and (l) of the Internal Revenue Code, which was enacted by section 215 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248; 96 Stat. 324, 468).

VOL 48 ISS 92 MAY 11 1983 UMI

The regulations are promulgated under the authority contained in section 7805 of Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805) and will remain in effect until superseded by final regulations on this subject.

Rules—Public Approval Requirement

New section 103(k) added a requirement for issues of industrial development bonds (IDBs). In general, IDB issues must be approved prior to issuance by affected governmental units either by voter referendum or by their elected representatives following a public hearing for which there was reasonable public notice. For IDBs issued after December 31, 1982, failure to comply with this requirement results in the loss of tax exemption for the interest on these bonds. There are two exceptions, however: the first, for obligations issued solely to refund an issue that was issued before July 1, 1982, with a term which does not exceed 3 years; the second, for obligations that refund an issue that has been publicly approved, without extending the term of the refunded obligation.

Under the temporary regulations, the issuing governmental unit (or the governmental unit on behalf of which the obligations are issued) and each host governmental unit, i.e., each unit in which a financed facility is located, must approve the issue. Facilities are located in a unit if the unit has jurisdiction over the site of the facility. A unit has jurisdiction over the site of a facility if the facility is located within the unit's boundaries or, if such boundaries are unknown, within the area in which the unit possesses discretion under State law to exercise sovereign power.

Inasmuch as the site of a facility typically will be within the geographic jurisdiction of more than one governmental unit of a State, the temporary regulations provide that approval by the host unit is satisfied when any one host unit with jurisdiction over the entire site approves the issue. Thus, for example, if the entire site of a facility is within the geographic jurisdiction of a county, city, and the State, either the State, county, or city may approve the issue to comply with the host approval requirement. However, if the obligations in the preceding example are issued by the city or an authority acting on behalf of the city, the city would have to approve the issue in any case.

Under the temporary regulations, facilities located within two or more governmental units (including two or more States) but not entirely within any one such unit may be treated as separate facilities for public approval purposes, each located entirely within the appropriate unit. For example, a manufacturing plant located in two counties may be treated as two facilities, each located entirely within the respective county. Therefore, in addition to the issuer, both counties, or the State, may approve the issue.

The temporary regulations further describe the method by which units may approve an issue. A unit approves an issue when the issue is approved by its applicable elected representative following a public hearing for which there was reasonable public notice. Alternatively, an issue may be approved by a voter referendum.

Generally, the applicable elected representative must be either the chief elected executive officer of the unit (e.g., a governor), its legislature, or, if the State is the approving unit, the chief elected State legal officer of the executive branch of State government (e.g., the Attorney General). However, the chief elected executive officer or applicable law may designate another elected official of such unit to approve issues in its behalf. Because this is an additional requirement of the Federal tax law it may not correspond to State and local law requirements. The various acts comprising an approval by a governmental unit therefore need not find authorization under State law, in order collectively to satisfy the approval requirement under the temporary regulations. It is anticipated, however, that State and local governments may desire to take appropriate steps to facilitate the approval process set forth in these temporary regulations.

This public approval requirement may be independent of the requirements of § 1.103–8(a)(5) (relating to a bond resolution or similar official action). Thus, the approval by an applicable elected representative may occur after the governmental unit provisionally commits itself to issue the bonds. For example, costs incurred after the commencement of construction but prior to public approval may be funded from a prospective IDB issue, provided that the costs are incurred after a bond resolution or similar official action has been taken by the issuer. However, a jurisdiction cannot bind itself to exercise the approval required under section 103(k), prior to fulfilling the hearing requirement.

The applicable elected representative of a governmental unit with no chief elected executive officer or elected legislative body is that of the next higher unit with such an applicable elected representative. The next higher unit is the unit from which the authority of the governmental unit with no such representative is derived. Rules are provided for determining whether a governmental unit is the next higher unit with respect to another unit.

The public-hearing requirement is satisfied under the temporary regulations if the hearing is designed to provide individuals of the affected governmental unit(s) a reasonable opportunity to express their views on the proposed issue. It is not necessary that the applicable elected representative who approves the bonds or any other particular officials be present at the hearing or that a report on the hearing be submitted to the approving official. Thus, a hearing may be conducted by a person appointed or employed by the governmental unit or by an agency such as an entity that issues the obligations on behalf of the governmental unit. Generally, if more than one governmental unit must approve an issue, necessary hearings may be consolidated, provided that all of the individuals of the affected governmental units are accorded a reasonable opportunity to be heard, the hearing is a joint undertaking of all the governmental units, and the location of the hearing is in reasonable geographic proximity to all affected jurisdictions.

Section 103(k)(2) requires reasonable public notice for any required public hearing. Notice is presumed reasonable under the temporary regulations if it is published no fewer than 14 days before the hearing and is reasonably designed to inform citizens of the affected governmental units. In general, publication is presumed to be reasonably designed to inform the affected residents if provided in the same manner and the same locations as required of the approving governmental unit(s) for any other purposes for which state law specifies a notice of public hearing requirement. However, notice is presumed to be reasonable in a locality where the facility is located only if published in one or more newspapers of general circulation available to residents of the locality or if announced by radio or television broadcast to those residents.

Information Reporting Requirement

Section 5f.103–3 describes the new information reporting requirement under section 103(l) for issuers of "private purpose" bonds. Private purpose bonds include industrial development bonds and obligations issued as part of an issue all or a major portion of the proceeds of which are to be used directly or indirectly to finance loans either to individuals for educational

expenses or to organizations described in section 501(c)(3) which are exempt from taxation by reason of section 501(a).

This information reporting requirement applies to private purpose bonds issued after December 31, 1982, and includes obligations that are issued after such date which refund private purpose bonds, even if the refunded bonds were issued before such date.

The information is to be supplied to the Internal Revenue Service on Form 8038. This form must be filed no later than the 15th day of the second calendar month after the close of the calendar quarter in which the private purpose bond is issued. It may be filed at any time before that date, including before the date of issue, but it generally must be based on the facts as of the date of issue. Furthermore, the Secretary may grant an extension of time for filing this form if there is reasonable cause for the delay.

The information required to be submitted to the Internal Revenue Service includes (1) date of issue, (2) amount of lendable proceeds, (3) stated interest rate of each maturity, (4) the term of each maturity, (5) face amount of each maturity, (6) a general description of property to be financed by the obligation, (7) each initial principal user of any financed facilities, and (8) certain other information.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for temporary regulations. Accordingly, the Regulatory Flexibility Act does not apply, and no Regulatory Flexibility Analysis is required for these rules.

Nonapplication of Executive Order 12291

The Commissioner has determined that this temporary regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Drafting Information

The principal author of these temporary regulations is George T. Magnatta of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects in 26 CFR Part 5f

Income taxes, Taxable income, Deductions, Exemptions, Tax Equity and Fiscal Responsibility Act of 1982.

Adoption of Amendments to the Regulations

Accordingly, Part 5f, Temporary Income Tax Regulations under the Tax Equity and Fiscal Responsibility Act of 1982, is amended by adding new §§ 5f.103–2 and 5f.103–3 immediately after 5f.103–1, to read as follows:

Paragraph 1. A new § 5f.103—2 is added to read as follows:

§ 5f.103–2 Public approval of industrial development bonds.

(a) *General rule.* An industrial development bond (within the meaning of § 1.103–7(b)(1) issued after December 31, 1982, shall be treated as an obligation not described in section 103(a) unless it is issued as part of an issue which satisfies the public approval requirement of section 103(k) and paragraph (c) of this section or is described in the exceptions set forth in paragraph (b) of this section.

(b) *Exceptions.*—(1) *No extension of maturity.* Paragraph (a) of this section does not apply to a refunding obligation if—

(i) It refunds an obligation which was approved under section 103(k) and this section (or which is treated as approved pursuant to paragraph (f) of this section), and

(ii) It has a maturity date which is not later than the maturity date of the obligation to be refunded.

(2) *Refunding of pre-July 1, 1982, obligation.* Paragraph (a) of this section does not apply to an obligation issued solely to refund an obligation which—

(i) Was issued before July 1, 1982, and

(ii) Has a term which does not exceed 3 years.

The term of an obligation is determined without regard to whether it is a refunding obligation. With respect to the refunding of an issue also containing obligations with terms which exceed 3 years, paragraph (b)(2) applies only if the refunding issue proceeds are used solely to refund obligations with terms not exceeding 3 years and to pay reasonable incidental costs of the refunding (*e.g.*, legal and accounting fees, printing costs, and rating fees) attributable thereto. Paragraph (b)(2) applies only to issues issued after December 31, 1982, the proceeds of which are used to refund issues issued prior to July 1, 1982. Thus, subsequent refundings of such refunding issues must satisfy the public approval requirement of section 103(k) and paragraph (c) of this section.

(c) *Public approval requirement.* —(1) *In general.* An issue is publicly approved if prior to the date of issue the governmental unit(s) described in subparagraphs (2) and (3) this paragraph (c) approve the issue, in the manner described in paragraph (d) of this section. See paragraph (f) for rules pertaining to determining the scope of an approval and paragraph (g)(1) for the definition of "governmental unit".

(2) *Issuer approval.* The governmental unit (i) which will issue the obligations or (ii) on behalf of which the issue is to be issued must approve the issue ("issuer approval"). If the issuer is not a governmental unit, the governmental unit on behalf of which the issuer acts shall be determined in a manner consistent with determinations under § 1.103–1, and such unit must approve the issue. However, in the case of an issuer which issues obligations on behalf of more than one governmental unit (*e.g.*, an authority which acts for two counties), any one of such units may give the issuer approval required by this paragraph (c)(2).

(3) *Host approval.* Each governmental unit the geographic jurisdiction (as defined in paragraph (g)(4)) of which contains the site of a facility to be financed by the issue must approve the issue ("host approval"). However, if the entire site of a facility to be financed by the issue is within the geographic jurisdiction of more than one governmental unit within a State (counting the State as a governmental unit within such State), then any one of such units may provide host approval for the issue with respect to that facility. For purposes of this paragraph (c)(3), if property to be financed by the issue is located within two or more governmental units but not entirely within either of such units, each portion of the property which is located entirely within the smallest respective governmental units may be treated as a separate facility. The issuer approval (as described in paragraph (c)(2)) may be treated as a host approval if the governmental unit giving the issuer approval is also a governmental unit described in this paragraph (c)(3). See paragraph (e)(2) with respect to host approval by a governmental unit with no applicable elected representative.

(d) *Method of public approval.* For purposes of this section, an issue is approved by a governmental unit only if—

(1) An applicable elected representative (as defined in paragraph (e)) of such unit approves the issue following a public hearing (as defined in paragraph (g)(2)) held in a location which, under the facts and circumstances, is convenient for residents of the unit, and for which there

VOL
48
ISS
92
MY
11
1983
UMI

was reasonable public notice (as defined in paragraph (g)(3)), or

(2) A referendum of the voters of the unit (as defined in paragraph (g)(5)) approves the issue.

An approval may satisfy the requirements of this section without regard to the authority under State or local law for the acts constituting such approval. The location of hearing will be presumed convenient for residents of the unit if it is located in the approving governmental unit's capital or seat of government. If more than one governmental unit is required to provide a public hearing, such hearings may be combined as long as the combined hearing is a joint undertaking that provides all of the residents of the participating governmental units (*i.e.*, those relying on such hearing as an element of public approval) a reasonable opportunity to be heard. The location of any combined hearing is presumed to provide a reasonable opportunity to be heard provided it is no farther than 100 miles from the seat of government of each participating governmental unit beyond whose geographic jurisdiction the hearing is conducted.

(e) *Applicable elected representative.*—(1) *In general.* The applicable elected representative of a governmental unit means—

(i) Its elected legislative body,

(ii) Its chief elected executive officer,

(iii) In the case of a State, the chief elected legal officer of the State's executive branch of government, or

(iv) Any official elected by the voters of the unit and designated for purposes of this section by the unit's chief elected executive officer or by State or local law to approve issues for the unit.

For purposes of subdivisions (ii), (iii), and (iv) of this paragraph (e)(1), an official shall be considered elected by the voters of the unit only if he is popularly elected at-large by the voters of the goverenmental unit. If an official popularly elected at-large by the voters of a governmental unit is appointed or selected pursuant to State or local law to be the chief executive officer of the unit, such official is deemed to be an elected chief executive officer for purposes of this section but for no longer than his tenure as an official elected at-large. In the case of a bicameral legislature which is popularly elected, both chambers together constitute an applicable elected representative, but neither chamber does independently, unless so designated under paragraph (e)(1)(iv). If multiple elected legislative bodies of a governmental unit have independent legislative authority, however, the body with the more specific authority relating to the issue is the only legislative body described in paragraph (e)(1)(i) of this section. See paragraph (h), Example (7) of this section.

(2) *Governmental unit with no applicable elected representative.* (i) The applicable elected representatives of a governmental unit with no representative (but for this paragraph (e)(2) and section 103(k)(2)(E)(ii)) are deemed to be those of the next higher governmental unit (with an applicable elected representative) from which the governmental unit derives its authority. For purposes of this subparagraph (2), a governmental unit derives its authority from another unit which—

(A) Enacts a specific law (*e.g.*, a provision in a State constitution, charter or statute) by or under which the governmental unit is created,

(B) Otherwise empowers or approves the creation of the governmental unit, or

(C) Appoints members to the governing body of the governmental unit.

In the case of a governmental unit with no applicable elected representative (but for this paragraph (e)(2)), any unit described in subdivision (A), (B), or (C) or this paragraph (e)(2)(i) may be treated as the next higher unit, without regard to the relative status of all of such units under State law.

(ii) In the case of a host approval (as required under paragraph (c)(3) of this section), a unit may be treated as the next higher unit, only if—

(A) The facility is located within its geographic jurisdiction, and

(B) Eligible individuals, if any, residing at the site of the facility are entitled to vote for the applicable elected representative of that unit (as determined under this paragraph (e)).

(3) *On behalf of issuers.* In the case of an issuer which is not a governmental unit but which issues bonds on behalf of a governmental unit, the applicable elected representative is any applicable elected representative of the unit on behalf of which the bonds are issued. If the unit on behalf of which the bonds are issued has no applicable elected representative (but for paragraph (e)(2) of this section), the applicable elected representative of the governmental unit is determined in the manner described in paragraph (e)(2).

(f) *Scope of approval.*—(1) *In general.* Public approval is required by section 103(k) and this section for issues of industrial development bonds, except as otherwise provided in paragraph (a) and (b) of this section. An issue is treated as approved if the governmental units (described in paragraph (c) of this section in relation to the issue) have approved either—

(i) The issue (by approving each facility to be financed), not more than one year before the date of issue, or

(ii) A plan of financing for each facility financed by the issue pursuant to which the issue in question is timely issued (as required in paragraph (f)(3) of this section).

In either case, the scope of the approval is determined by the information, as specified in paragraph (f)(2), contained in the notice of hearing (when required) and the approval.

(2) *Information required.* A facility is within the scope of an approval if the notice of hearing (when required) and the approval contain—

(i) A general, functional description of the type and use of the facility to be financed (*e.g.*, "a 10,000 square foot machine shop and hardware manufacturing plant", "400-room airport hotel building", "dock facility for supertankers", "convention center auditorium and sports arena with 25,000 seating capacity", "air and water pollution control facilities for oil refinery"),

(ii) The maximum aggregate face amount of obligations to be issued with respect to the facility,

(iii) The initial owner, operator, or manager of the facility,

(iv) The prospective location of the facility by its street address or, if none, by a general description designed to inform readers of its specific location.

An approval is valid for purposes of this section with respect to any issue used to provide publicly approved facilities, notwithstanding insubstantial deviations with respect to the maximum aggregate face amount of the bonds issued under the approval for the facility, the name of its initial owner, manager, or operator, or the type or location of the facility from that described in the approval. An approval or notice of public hearing will not be considered to be adequate if any of the items in subdivisions (i) through (iv) of this subparagraph (2), with respect to the facility to be financed, are unknown on the date of the approval or the date of the public notice.

(3) *Timely issuance pursuant to a plan of financing.* An issue is timely issued pursuant to a plan of financing for a facility if—

(i) The issue is issued no later than 3 years after the first issue pursuant to the plan, and

(ii) The first such issue in whole or in part issued pursuant to the plan was issued no later than 1 year after the date of approval.

(4) *Facility—definition.* For purposes of this paragraph (f), the term "facility" includes a tract or adjoining tracts of land, the improvements thereon and any personal property used in connection with such real property. Separate tracts of land (including improvements and connected personal property) may be treated as one facility only if they are used in an integrated operation.

(g) *Definitions.* For purposes of this section—(1) *Governmental unit.* Governmental unit has the same meaning as in § 1.103–1. Thus, a governmental unit is a State, territory, a possession of the United States, the District of Columbia, or any political subdivision thereof. The term "political subdivision" denotes any division of any State or local governmental unit which is a municipal corporation or which has been delegated the right to exercise part of the sovereign power of the unit.

(2) *Public hearing.* Public hearing means a forum providing a reasonable opportunity for interested individuals to express their views, both orally and in writing, on the proposed issue of bonds and the location and nature of a proposed facility to be financed. In general, a governmental unit may select its own procedure for the hearing, provided that interested individuals have a reasonable opportunity to express their views. Thus, it may impose reasonable requirements on persons who wish to participate in the hearing, such as a requirement that persons desiring to speak at the hearing so request in writing at least 24 hours before the hearing or that they limit their oral remarks to 10 minutes. For purposes of this public hearing requirement, it is not necessary, for example, that the applicable elected representative who will approve the bonds be present at the hearing, that a report on the hearing be submitted to that official, or that State administrative procedural requirements for public hearings in general be observed. However, compliance with such State procedural requirements (except those at variance with a specific requirement set forth in this section) will generally assure that the hearing satisfies the requirements of this section. The hearing may be conducted by any individual appointed or employed to perform such function by the governmental unit or its agencies, or by the issuer (if on behalf of issuer). Thus, for example, for bonds to be issued by an authority that acts on behalf of a county, the hearing may be conducted by the authority, the county, or an appointee or employee of either.

(3) *Reasonable public notice.* Reasonable public notice means published notice which is reasonably designed to inform residents of the affected governmental units, including residents of the issuing unit and the governmental unit where a facility is to be located, of the proposed issue. The notice must state the time and place for the hearing and contain the information contained in paragraph (f)(2) of this section. Notice is presumed reasonable if published no fewer than 14 days before the hearing. Except in the locality of the facility, publication is presumed to be reasonably designed to inform residents of the approving governmental unit if given in the same manner and same locations as required of the approving governmental unit for any other purposes for which applicable State or local law specifies a notice of public hearing requirement (including laws relating to notice of public meetings of the governmental unit). Notice is presumed reasonably designed to inform affected residents in the locality of the facility only if published in one or more newspapers of general circulation available to residents of that locality or if announced by radio or television broadcast to those residents.

(4) *Geographic jurisdiction.* Geographic jurisdiction is the are aencompassed by the boundaries prescribed by State or local law for a governmental unit or, if there are no such boundaries, the area in which a unit may exercise such sovereign powers that make that unit a governmental unit for purposes of § 1.103–1 and this section.

(5) *Voter referendum.* A voter referendum is a vote by the voters of the affected governmental unit conducted in the manner and at such a time as voter referenda on matters relating to governmental spending or bond issuances by the governmental unit under applicable State and local law.

(h) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). State X proposes to issue an industrial development bond, the proceeds of which are to finance a facility located entirely within the geographic jurisdiction of City Y (which is located in State X). Under the provisions of paragraph (c), only State X must approve the issue because State X is the issuer and the facility is to be located entirely within the State's geographic jurisdiction. Its applicable elected representative must approve the issue after the public notice and public hearing requirements are satisfied.

Example (2). (i) Industrial Development Authority X proposes to issue an industrial development bond, the proceeds of which are to finance a facility located entirely within the geographic jurisdiction of City Y (which is located in State Z). Authority X acts on behalf of State Z. Under the provisions of paragraph (c), only State Z must approve the issue because State Z is the governmental unit on behalf of which Authority X, the issuer, is acting and the facility is to be located entirely within its geographic jurisdiction.

(ii) State Z has a governor, an elected bicameral legislature and an appointed attorney general who is the chief legal officer of State Z. Under the laws of State Z, the attorney general must approve any issue of industrial development bonds. The approval by the attorney general is not a sufficient approval under this section, since the attorney general is not an applicable elected representative within the meaning of this section. Under the provisions of paragraphs (d) and (e), either the governor, both chambers of the legislature or any popularly elected official of the State who is designated for this purpose by the governor or by State law must approve the issue after the public notice and public hearing requirements are satisfied.

Example (3). (i) County Y, a county in State X, proposes to issue an industrial development bond, the proceeds of which are to finance a facility located entirely within its jurisdiction. Under the provisions of paragraph (c), only County Y must approve the issue because County Y is the issuer and the facility is to be located entirely within the geographic jurisdiction of County Y.

(ii) County Y has no elected officials or legislature. County Y derives its authority from State X which is the next higher governmental unit with an applicable elected representative. The laws of State X designate the attorney general, who is an official of State X elected at-large, as the official who must approve any issue of industrial development bonds for the State. Under this section, State X's attorney general is an applicable elected representative who may approve the issue after the public notice and public hearing requirements are satisfied.

Example (4). (i) City X, a city located in County Y and State Z, proposes to issue an industrial development bond, the proceeds of which are to finance a facility located entirely within the geographic jurisdiction of City X. Under the provisions of paragraph (c), only City X must approve the issue because it is the issuer and the facility is to be located entirely within the geographic jurisdiction of City X.

(ii) Mayor A, the chief elected executive officer of City X, has designated, for purposes of this section, Deputy Mayor B, an official of City X elected at-large, to approve industrial development bond issues for the city. Under the provisions of paragraph (e), Deputy Mayor B may approve the issue, since he is an applicable elected representative, after the public notice and public hearing requirements are satisfied.

Example (5). (i) County M proposes to issue an industrial development bond to finance a project located partly within the geographic jurisdiction of County M and partly within the geographic jurisdiction of County N. Both

VOL 48 ISS 92 MY 11 1983 UMI

counties are located in State X. The part of the project in County N is also located partly within the geographic jurisdiction of City O and partly within the geographic jurisdiction of City P. Under the provisions of paragraph (c)(2), County M must give issuer approval. Additionally, under the provisions of paragraph (c)(3), either State X, County N, or both Cities O and P, must give host approval.

(ii) Counties M and N will approve the issue, but neither has any officials who are elected at-large by the voters of the respective governmental units. Both governmental units derive their authority from State X which is the next higher governmental unit with an applicable elected representative. Under the provisions of paragraph (e), an applicable elected representative of State X must approve the issue for Counties M and N after the public notice and public hearing requirements are satisfied.

Example (6). (i) County M proposes to issue an industrial development bond to finance two facilities. One facility is located entirely within the geographic jurisdiction of County M and the second facility is located partly within the geographic jurisdiction of County M and partly within the geographic jurisdiction of County N. The second facility is also located within the geographic jurisdictions of Cities O and P, which cities are located within the geographic jurisdiction of County N. Under the provisions of paragraph (c)(2), County M must give issuer approval. Additionally, under the provisions of paragraph (c)(3), either State X, County N, or both Cities O and P, must give host approval.

(ii) Counties M and N will approve the issue. Each has a chief elected executive officer. Under the provisions of paragraphs (d) and (e), the chief elected executive officer of each county may approve the issue, after the public notice and public hearing requirements are satisfied.

Example (7). (i) State X proposes to issue an industrial development bond to finance a facility located partly within the geographic jurisdiction of State X and partly within the geographic jurisdiction of State Y. That portion of the facility located in State Y is located entirely within the geographic jurisdiction of City Z. State X must give issuer approval. Additionally, either State Y or City Z must give host approval as that part of the facility to be located outside State X will be entirely within the geographic jurisdiction of each unit.

(ii) Under the provisions of paragraphs (d) and (e), the governor of State X may approve the issue, after the public notice and public hearing requirements are satisfied. City Z (assuming that it give host approval for the bond) has a city council and a school board, both of which are elected legislative bodies with independent jurisdiction. The authority of the school board is limited under State law to matters directly concerning the provision of public education. Under paragraph (e), the school board is not an applicable elected representative of City Z but the city council is an applicable elected representative of City Z. The city council may approve the issue after the public hearing and public notice requirements are satisfied.

Example (8). (i) Public Housing Authority M, a governmental unit, proposes to issue an industrial development bond to finance several housing projects with known sites located entirely within its geographic jurisdiction. M's geographic jurisdiction is coextensive with the combined geographic jurisdictions of Counties N and O. The projects are separately owned and managed. They are not adjacent to each other. The projects also are located in County N. Under the provisions of paragraph (c), M must give issuer approval.

(ii) M, which has no elected officials or legislature, was created by both Counties N and O pursuant to a special statute of State Q permitting such a joint undertaking. Both Counties N and O have an applicable elected representative. Under the provisions of paragraph (e)(2), either County N, County O, or State Q is deemed to be the next higher governmental unit with an applicable elected representative, and an applicable elected representative from any of these units may give the issuer approval for Authority M. Therefore, either the applicable representative of County N, County O, or State Q can give the issuer approval for Authority M.

(iii) For purposes of the host approval, the issuer approval by M will satisfy the host approval requirement only if the applicable elected representative of County N or State Q gives issuer approval for M. Under the provisions of paragraph (e)(2), the host approval requirement is satisfied only if qualified persons residing at the site of the facility are entitled to vote for the applicable elected representative who gave the approval (*i.e.*, the representative of State Q or County N). However, if the applicable elected representative of O gave issuer approval for Authority M, a separate host approval would be required because the residents of the sites where the projects are located (*i.e.*, County N) could not note for the applicable elected representative of County O.

(iv) Public Housing Authority M conducts a public hearing concerning prospective housing projects following notice thereof published in a newspaper of general circulation in County N. Additionally, M provides notice to the residents of O (which are also within M's jurisdiction) in the manner required for notice of public hearing for other purposes under State Q law. Following the public hearing, the chief elected executive officer of County N approves for Authority M prospective issues for the project. M issues two $7 million issues, one for each project. One issue is issued six months after the date of approval; the second issue is issued thirteen months thereafter. On these facts, only the first issue satisfied the public approval requirement of this section.

Par. 2. A new § 5f.103–3 is added to read as follows:

§ 5f.103–3 Information reporting requirements for certain bonds.

(a) *General rule.* Under section 103(l), any private purpose bond issued after December 31, 1982 (including any obligation issued thereafter to refund private purpose bonds issued before December 31, 1982) shall be treated as an obligation not described in section 103(a) unless the information reporting requirement (as described in paragraph (c) of this section) is substantially satisfied with respect to the issue of which the bond is a part.

(b) *Private purpose bonds.* For purposes of this section, the term "private purpose bond" means—

(1) Any industrial development bond (as defined in section 103(b)(2) and § 1.103–7(b)(1)), or

(2) Any obligation which is issued as part of an issue all or a major portion of the proceeds of which are to be used directly or indirectly—

(i) To finance loans to individuals for educational or related expenses (hereinafter referred to as a "student loan bond"), or

(ii) By an organization described in section 501(c)(3) which is exempt from taxation by reason of section 501(a) (hereinafter referred to as "private exempt entity bond").

The meaning of the terms "major portion" and "directly or indirectly" shall be the same as under § 1.103–7. Student loan bonds include, but are not limited to, qualified scholarship funding bonds (as defined in section 103(e)).

(c) *Information required.* An obligation satisfies the requirements of section 103(l) and this section only if it is issued as part of an issue with respect to which the issuer, based on information and reasonable expectations determined as of the date of issue, submits on Form 8038 the information required therein, including—

(1) The name, address, and employer identification number of the issuer,

(2) The date of issue (as defined in paragraph (g)(1)),

(3) The face amount of the issue,

(4) The total purchase price of the issue,

(5) The amount allocated to a reasonably required reserve or replacement fund,

(6) The amount of lendable proceeds (as defined in paragraph (g)(4) of this section),

(7) The stated interest rate of each maturity (as defined in paragraph (g)(2) of this section) or, if the interest rate is variable, a description of the method under which the interest rate is computed,

(8) The term (as defined in paragraph (g)(3)) of each maturity.

(9) A general description of the property to be financed by the issue (including property financed by an obligation that will be refunded with the issue proceeds) which includes—

(i) The type of bond issued, that is, a student loan bond, a private exempt entity bond, or an industrial development bond and in the case of an industrial development bond described in section 103(b)(4), the subparagraph of section 103(b)(4) that describes the property, *e.g.*, for a football stadium, that the property is described in section 103(b)(4)(B),

(ii) The recovery classes (as defined in section 168(c)(2)), if applicable, of the various items of financed property and the approximate amount of lendable proceeds attributable thereto,

(iii) The approximate amount of lendable proceeds attributable to land or other property not described in subdivision (ii),

(iv) In the case of obligations described in section 103(b)(6) or private exempt entity bonds, the four-digit Standard Industrial Classification Code of the facilities financed.

(10) If section 103(k) (relating to public approval requirement for industrial development bonds) applies to such issue, the name(s) of the approving governmental unit(s) and of the applicable elected representative(s) (as defined in section 103(k)(2)(E) and § 5f.103–2(e)) or a description of the voter referendum that approved the issue for such unit(s).

(11) The name, address, and employer identification number of—

(i) Each initial principal user (as defined in paragraph (g)(5) of this section) of any facilities provided with the proceeds of the issue,

(ii) The common parent, if any, of any affiliated group of corporations (as defined in section 1504(a) but determined without regard to the exceptions of section 1504(b)) of which such initial principal user is a member, and

(iii) Any person (not included under paragraph (c)(11)(i)) that is treated as a principal user under section 103(b)(6)(L), but only if the issue is treated as a separate issue under section 103(b)(6)(K).

The information to be supplied must be determined based on information and reasonable expectations as of the date of issue. Therefore, such statement need not be amended to report information learned subsequent to the date of issue. However, if the statement is filed after the date of issue it may reflect such information and the reasonable expectations of the issuer as of that date.

(d) *Additional information.* An issuer may supply the following information—

(1) The average maturity of the issue (as defined in section 103(b)(14)), and

(2) The average reasonably expected economic life (as defined in section 103(b)(14)) of the facility which is financed with the issue.

(e) *Time for filing.* The statement required by section 103(l) and this section shall be filed not later than the 15th day of the 2nd calendar month after the close of the calendar quarter in which the obligation is issued. It may be filed at any time before such date but must be complete based on facts and reasonable expectations as of the date of issue. The Secretary may grant an extension of time for filing the statement required under section 103(l) and this section if there is reasonable cause for the failure to file such statement in a timely fashion.

(f) *Place for filing.* Form 8038 is to be mailed to the Internal Revenue Service Center, Philadelphia, Pennsylvania 19255.

(g) *Definitions.* For purposes of this section—

(1) The term "date of issue" means the date on which the issuer physically exchanges the first of the obligations which are part of the issue for the underwriter's (or other purchaser's) funds. In the event that amounts are periodically advanced with respect to an issue, the date of issue is when the first of such obligations under the issue is created and the funds are advanced.

(2) The term "maturity" means those obligations of the issue having both the same maturity date and the same stated interest rate.

(3) The term "term of an issue" means the duration of the period beginning on the date of issue and ending on the latest maturity date of any obligation of the issue without regard to optional redemption dates.

(4) The term "lendable proceeds" means the amount of the original proceeds, net of amounts allocated to a reasonably required reserve or replacement fund. See generally § 1.103–13(b) and § 1.103–14(d) for further definitions.

(5) The term "initial principal user" means each person who as of the date of issue is obligated to use the facility to such an extent that under section 103(b)(6) such person would be treated as a principal user. With respect to organizations described in section 501(c)(3), however, such determination is made without regard to whether such organization is treated as an exempt organization under section 103(b)(3) and § 1.103–7(b)(2).

There is need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917, 26 U.S.C. 7805).

Roscoe L. Egger, Jr.,
Commissioner of Internal Revenue.

Approved: April 29, 1983.

John E. Chapoton,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

National Park Service

36 CFR Ch. I

Land Protection Plans

AGENCY: National Park Service, Interior.

ACTION: Final interpretive rule.

SUMMARY: The National Park Service has developed instructions for the preparation of land protection plans and is providing the list of National Park System units expected to begin preparing these plans during Fiscal Year 1983. These plans are being prepared in response to the Department of the Interior's policy for the Federal Portion of the Land and Water Conservation Fund (47 FR 19784). The public is invited to participate in the planning process for individual areas.

DATE: This interpretive rule will become effective on May 11, 1983.

ADDRESS: Correspondence concerning this rule should be addressed to Director, National Park Service (Attn: 763), Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Donald Humphrey or Warren Brown, Division of Park Planning and Special Studies, National Park Service, Washington, D.C. 20240 (202) 343–8377.

SUPPLEMENTARY INFORMATION: On May 7, 1982 the Department of the Interior published a new final policy statement on Use of the Federal Portion of the Land and Water Conservation Fund (47 FR 19784). In response to this policy, the National Park Service has, by notice in the **Federal Register** on January 3, 1983 (48 FR 85), withdrawn its 1979 land acquisition policy and guideline (44 FR 24790), and is beginning the preparation of land protection plans consistent with the instructions printed below.

VOL
48
ISS
92
MY
11
1983
UMI

These plans will be prepared for each unit in the National Park System containing non-Federal land within its authorized boundary. Priority is being given to those areas with current appropriations. Approximately one-third of all plans are scheduled for completion by September 30, 1983, one-third by September 30, 1984, and the remaining plans will be completed by September 30, 1985.

Each individual plan will be prepared in compliance with the National Environmental Policy Act and other applicable legislation, regulations, executive orders, and Departmental and Service directives. In some cases compliance requirements will already have been met in previous planning documents. The planning process will include consultation with the Fish and Wildlife Service where proposed actions may have an impact on endangered species, and the Advisory Council on Historic Preservation where actions may impact historic resources.

1. *Environmental Effects:* The action being taken in adopting these instructions will establish a general format and approach for completing these plans. Each plan will consider various alternatives for carrying out the purposes of the area as authorized by Congress and will, as necessary, consider environmental implications associated with implementation of the plan. The preparation of individual plans will guide future actions to protect unit resources. The development of instructions for land protection planning will have no significant effect on the human environment and is categorically excluded from the procedural requirements of the National Environmental Policy Act. Further environmental compliance will occur as necessary at the individual land protection plan level.

2. *Statement of Effects:* The Department of the Interior has determined that these interpetive instructions are not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act. National Park Service land protection is carried out under authorizing legislation for each area and annual appropriations acts. These instructions and individual land protection plans will provide landowners with more current information about National Park Service (NPS) intentions for buying land or protecting it through other methods.

3. *Paperwork Reduction Act:* These interpretive instructions do not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

4. *Authorship Statement:* This document has been prepared by the National Park Service within the Department of the Interior. Principal authors are Donald Humphrey and Warren Brown.

5. *Public Participation and Comments:* The public was invited to comment on the proposed Departmental policy statement that was published in the **Federal Register** of March 18, 1982 (47 FR 11777). The final departmental policy statement was published on May 7, 1982 (47 FR 19784). These instructions implement that policy.

These instructions were published on pages 6676–6683 of the **Federal Register** on February 14, 1983 inviting public comment for 30 days. Comments were received from 21 sources including organizations and individuals. Ten comments offered general support for the instructions and the policy that they implement. One response expressed opposition to Federal acquisition of private lands. The remaining responses included a variety of suggestions and views.

Two responses were critical of the emphasis on alternatives to fee acquisition of private land. These reviewers suggested that zoning and regulations were inadequate, while several other reviewers supported the consideration of these methods as very useful approaches to protection of land. The discussion of fee acquisition has been modified to eliminate some adjectives that one reviewer suggested were unnecessarily restrictive as applied to this method of protection. The instructions as proposed direct that all reasonable methods of protection should be considered in the plans, with attention to cost-effectiveness and ability to achieve unit purposes as established by Congress.

Some comments questioned the legal authority of the National Park Service to use regulatory methods of protecting resources. The text is clear that the section on regulations refers primarily to authorities of other Federal agencies and State or local governments. Additional emphasis has been placed on the advisory role of the National Park Service in cooperating with States, local governments, or other Federal agencies on such protection methods. However, the text also notes that there are circumstances where direct regulatory authority may be exercised by the National Park Service. One revision has been made to explain that regulations are generally to be considered as one part of a protection program, appropriate to prevent harm to public interests and property rather than a substitute for acquisition necessary to provide for National Park Service management or public use.

Several reviewers encouraged public participation in the planning process for individual areas. Public involvement is clearly emphasized in the instructions as proposed, and planning teams will continue to be encouraged to involve interested parties as soon as possible. Individuals and organizations interested in being involved in the planning process for any specific unit should contact the Regional Director or the Superintendent at the addresses given in Appendix A. In response to recommendations in House Report 97–978 on Interior Appropriations for fiscal year 1983, the planning process is being initiated as quickly as possible, and contacts with individual units should be made promptly. Further notices and opportunities for public involvement will be handled at the regional and local levels.

Several reviewers expressed concerns about funding, the acquisition process, use of condemnation, and other aspects of plan implementation. These comments will be considered as the plans are approved, but were not considered relevant to these instructions on how the plans should be prepared.

One comment questioned the need for detailed information on acquisition history, including tracts and improvements, requested in section III (e) under Format. This section has been revised to indicate that an overview with estimates is to be provided instead of individual listings and comprehensive historical data. Costly or time consuming data collection is not required or encouraged.

References to the coordinating procedures with the Advisory Council on Historic Preservation have been revised to allow for more flexibility under the terms of the Programmatic Memorandum of Agreement.

The proposed instructions indicated that plans would be prepared for each unit containing non-Federal land or interests in land. In response to questions about the scope of "non-Federal interests", the instructions have been revised to clarify that plans will be prepared only for those areas containing non-Federal lands within the authorized boundary. This includes approximately 195 units of the national park system. However, the plans for these units will consider protection requirements for all land or interests in land within the boundary, considering cooperative arrangements with other Federal agencies as well as privately owned interests in land.

The proposed instructions indicated that external conditions having a direct impact on land protection within the unit boundary should be assessed in the plan. This remains in the final instructions, which require a careful evaluation of external conditions and activities that have a direct bearing on the protection of land within unit boundaries and an assessment of their impact on protection efforts. The primary focus of the current planning effort is necessarily on lands within the authorized unit boundary. However, conditions outside of the boundary will be considered, and future updates to these land protection plans and other planning efforts may address a broader range of issues related to impacts on park resources from external activities.

Additional editorial changes have been made in the text to clarify several points where questions have been raised by field staff working on the draft plans. The recommended format has been revised to avoid repetition of information about acquisition history and protection alternatives in various sections. None of these changes will have a significant impact on the scope or content of the plans.

Pending completion of a land protection plan, discretionary acquisition actions in any individual unit of the National Park System are being reviewed on a case-by-case basis. These reviews are to assure that: (1) Acquisition proceeds in an orderly and timely manner as intended by Congress (2) appropriated funds are used to protect high priority tracts and address hardships, emergencies and sites needed for administrative use, and (3) the interests to be acquired are those necessary to achieve unit purposes as established in authorizing legislation. Case-by-case reviews will be conducted in a timely manner to avoid unnecessary delays in the obligation of appropriated funds. When a land protection plan has been approved, acquisitions will proceed consistent with priorities identified in the plan, subject to the availability of funds.

Land Protection Plan Instructions

Background

Under a policy and guideline adopted in 1979 (44 FR 24790) the National Park Service prepared land acquisition plans for approximately 120 areas. A new policy statement on land protection was adopted by the Department of the Interior on May 7, 1982 (47 FR 19784). Under this new policy, land acquisition plans will be revised or replaced by land protection plans by September 30, 1985.

Requirements

A Land Protection Plan will be prepared by the appropriate Superintendent for each unit in the National Park System that contains private or other non-Federal land within its authorized boundary. Priorities for preparing plans will be established considering available or possible funding for acquisition, the amount of non-Federal land within the authorized boundary, and the potential for impacts on unit resources. The scope of the planning effort generally should be commensurate with the potential impacts to resources, complexity of the problems, and the amount of land requiring protection.

Purposes of the Plan

The guiding principle of each land protection plan must be to ensure the protection of that unit of the National Park System consistent with the stated purposes for which it was created and administered. Each Superintendent has a duty to know the resources in question and to seek their protection consistent with those purposes. These instructions are designed to assist in meeting those objectives.

Land protection plans are prepared to:

1. Determine what land or interests in land need to be in public ownership, and what means of protection other than acquisition are available to achieve unit purposes as established by Congress.

2. Inform landowners about NPS intentions for buying or protecting land through other means within the unit.

3. Help managers identify priorities for making budget requests and allocating available funds to protect land and unit resources.

4. Find opportunities to help protect the unit by cooperating with state or local governments, landowners, and the private sector.

Coordination: Land protection plans are prepared as part of the unit's overall general management planning process and should be fully coordinated with other plans. The protection plan should be developed after a statement for management or general management plan has been prepared. If an approved GMP has not been completed, the land protection plan may be prepared concurrently with the general management planning effort.

Where the land protection plan is prepared as a separate document, it becomes an action element of the general management plan when approved. Land protection plans should focus on clearly defined issues and recommendations. Unnecessary repetition of details contained in other planning documents should be avoided.

Public Involvement: The land protection plan will be prepared with public involvement. Property owners, State and local governments, and interested parties must be provided notice (individual notice should be provided if feasible) that the planning effort is underway and given an opportunity to comment on the alternatives under consideration. The format for public involvement should include a general notice when planning is initiated, participation when the plan is being prepared, and public review of the draft after policy clearance by the Washington Office. Details will be specified in the task directive that is approved by the Regional Director.

Environmental Compliance: Land Protection plans will be prepared in compliance with applicable requirements of the National Environmental Policy Act (NEPA) and other laws or administrative directives. Specific compliance requirements for each area will depend upon the potential significance of environmental consequences. Some plans are expected to be categorically excluded from the NEPA process, others will require an environmental assessment, and some may require an environmental impact statement. Determinations about compliance requirements will usually be made at the regional level, in consultation with the Washington Office and Regional or Field Solicitor as necessary. Compliance documentation should include the extent of proposed changes in land use and potential impacts on unit resources or the surrounding community from the alternatives recommended by the land protection plan.

Compliance requirements for land protection plans being prepared as part of a General Management Plan effort should be covered in the GMP compliance. Where NEPA compliance is required for a land protection plan, an environmental assessment will be prepared as a separate, but attached document. The environmental assessment may reference the alternatives and proposal in the land protection plan, making it possible for the document to be essentially an analysis of environmental consequences and a list of persons consulted. National Park Service guidelines for environmental compliance are found in NPS–12 (National Park Service NEPA Compliance Guideline).

Endangered Species: The Regional Office should contact the U.S. Fish and

VOL 48 ISS 92 MAY 11 1983 UMI

Wildlife Service regional endangered species staff when planning begins for a specific area and arrange for any necessary consultation early in the planning process to determine if there are any potential effects on any endangered species. If a biological assessment is necessary, it will incorporated into the environmental document released with the plan for public review and arrangements will be made with the Fish and Wildlife Service for the preparation of a biological opinion.

Notification of Advisory Council on Historic Preservation and the State Historic Preservation Officer (SHPO): The Regional Director will be responsible for coordinating plan preparation with the Advisory Council and the SHPO in accordance with the Programmatic Memorandum of Agreement, as amended. That agreement establishes procedures for notice and coordination throughout the planning process.

Responsibilities: The Superintendent is responsible for the preparation and recommendation of the unit's land protection plan in accordance with these instructions. The Regional Director is responsible for scheduling and monitoring the preparation of land protection plans by interdisciplinary teams including planners and realty specialists, and for approving them. The Regional or Field Solicitor should be consulted as necessary throughout the planning process and should review the proposed plans for legal sufficiency.

Plans will be reviewed concurrently by the unit, region, and Washington Office. The memorandum from the Regional Director transmitting the draft plans should report on the status of review by the Regional Solicitor and others. Comments compiled during the Washington Office review will be forwarded to the Regional Director for consideration prior to his or her approval of a plan. The time allocated for WASO review will be 30 days from the date of receipt in the Division of Park Planning and Special Studies.

Task Directive: The scope of the planning effort should be defined as soon as possible in a task directive. This very brief internal working document should list major issues to be discussed, outlined alternatives to be considered, establish schedules for interim and final products allowing time for reviews, and assign responsibilities for completing the tasks.

The task directive also should identify the type of public involvement, environmental compliance, special expertise requirements, coordination with other plans, and any additional guidance needed from the Regional Director or Washington Office for the planning effort. The task directive will be prepared by the Superintendent and planning team and approved by the Regional Director.

Updates: The Superintendent will review the plan on a biennial basis, and revise it as necessary to reflect changes in conditions. Once approved, land protection plans may be amended or revised, generally following the processes for General Management Plans as outlined in NPS–2 (Planning Process Guideline)* * *. If the plan is to be amended, the extent of review and public participation may be adjusted to reflect the scope of the amendment. The Superintendent is responsible for determining if an update is required and for recommending the scheduling of necessary revisions.

Format: Formats for land protection plans may be adjusted to fit special circumstances, but should follow this outline as closely as possible and must address the following points:

I. Introduction

(a) Brief summary of Departmental and NPS policies for land protection and relevant legal authorities.

(b) Explanation of why the plan is being prepared and major issues to be addressed.

(c) Statement that the plan does not constitute an offer to purchase land or interests in land, that it will generally guide subsequent activities subject to availability of funds and other constraints, and that it does not diminish the rights of non-Federal landowners.

II. Purpose of the Unit and Resources To Be Protected

(a) A brief statement of the purpose of the unit as contained in the authorizing legislation, General Management Plan (GMP), or statement for management.

(b) A brief description of the significance of the area and the resources to be protected.

(c) Special legislative, administrative, or congressional directives or constraints on acquisition, appropriations ceiling, mandated acquisition periods, etc. and a history of the unit's growth including boundary changes, ceiling increases, other factors relevant to the protection of the unit's resources.

(d) A brief description of planned resource management and visitor use objectives and activities directly related to land protection requirements, by zone or subzone, as contained in the General Management Plan, resources management plan, etc.

III. Land Ownership and Uses

(a) Description of ownership and use of land and interests within unit boundaries, including total unit acreage, ownership broken down by appropriate categories such as type of owner (Federal, State, private) and type of resource (undeveloped or developed land, relationship to waterbodies, roads, communities; forested or open; wetlands, steep terrain etc.) Type of interests (fee, easements, mineral rights etc.) also should be described. This information should focus on land not under NPS jurisdiction and may be included on maps in the appendix showing regional location, relationship of the unit to adjacent lands and uses, tracts, acreage and ownership in the unit. If there is a large number of tracts, the maps and discussion may aggregate tracts by groups such as type of ownership or level of development.

(b) Description of existing and potential uses of non-Federal lands that would be compatible or incompatible with planned management actions.

(c) External conditions and activities that have a direct bearing on the protection of land within unit boundaries and an assessment of their impact on protection efforts.

(b) A brief overview of the history of protection including estimates of acreages and methods of acquisition, numbers of improvements acquired, types and terms of interests reserved by sellers (based on readily available data).

(e) Status or protection program including the current acquisition ceiling, expenditures and appropriations to date, appropriations available for expenditure, and status of pending condemnation actions.

(f) A general discussion of the relationship of landowners to social and cultural resources of the unit and of social, cultural, economic, and institutional relationships with nearby communities and political subdivisions; important folkways or activities that contribute to the creation, maintenance or protection of the unit's cultural resources; whether landowners are, for instance, corporations or individuals, long-term or short-term owners and known plans for changes in land use, if any.

IV. Protection Alternatives

(a) Identification and assessment of Federal, State, and local laws or authorities that currently provide some resource protection and allow for management or visitor use.

(b) Description of reasonsable alternative methods for protecting land

to carry out the purpose of the unit, (See "Protection Alternatives" below).

(c) Explanation of the circumstances, conditions and requirements affecting the application of each alternative.

(d) Analysis of the effectiveness of each alternative to protect unit resources.

(e) Assessment of the social and cultural impacts of each alternative on non-Federal landowners as well as social and economic impacts on community life (environmental impacts will be assessed in a separate but attached document).

V. Recommendations

(a) Describe the rationale and list priorities for protection by tract or other reasonable aggregated areas or categories, considering the importance of resource protection, visitor use, administrative purposes, etc.

(b) Identify categories of land and rationale for protection:

—By means other than acquisition.

—By acquisition of less-than-fee interests.

—By acquisition of fee.

(c) Discuss proposed methods of acquisition including donation, exchange, transfer, withdrawal, purchase, or condemnation.

(d) Identify land adequately protected under existing ownership (State, county, conservation organization etc.) and not requiring any NPS protection efforts at this time.

VI. Appendices

(a) Maps and black and white protographs should be used wherever necessary to improve understanding of the contents of the land protection plan. These may be included in the text (see III(a) above) or the Appendices. Maps should include a State map showing location of the unit, a regional map showing relationship to adjacent land uses, and a unit map showing tracts, acreages, and important facilities such as visitor centers, campgrounds, and outstanding physical features. Special photo or map portfolios (for review purposes only) may be provided at the unit, the Regional Office and other official review sites.

(b) Listing by priority ranking or grouping, where possible or feasible, of individual tracts showing tract number, name of owner, acreage, proposed protection method (cooperative agreement, zoning, fee or less-than-fee acquisition etc.) and specific reason for protection (i.e., an easement to "protect the historic scene and permit continued farm use" in an historical area).

(c) Copies of authorizing legislation and other Congressional directions such as excerpts from committee reports directly related to land protection requirements.

(d) Sample documents (Easement provisions, agreements, notices to local governments etc.)

(e) One page statistical summary of plan (acres, methods of protection, highlights of III(e) and V).

Although all plans should follow these analytical steps, some may be very brief and all should place primary emphasis on sections IV and V rather than repeating information already contained in the GMP or other plans.

Policy and Legislative Changes

The analysis of alternatives and recommendations should be developed on the basis of current authorities and policies. However, the land protection plan may reveal the need for changes in unit boundaries, protection authorities, or NPS management policies. The plan must recognize that changes in legislation or policy can only be accomplished through Service planning processes and Departmental or Congressional channels.

The analysis of alternatives may include various contingencies for what will be done if such new policies or authorities become available, but suggestions for major changes should be included in the Superintendent's memorandum to the Region and in the Regional Director's memorandum transmitting the plan to Washington and processed through amendment or revision to the General Management Plan or other appropriate procedures.

Land Protection Plans should be developed with special attention to the following issues relating to private ownership within unit boundaries and analysis of alternative methods for protecting land.

Private Ownership Within Unit Boundaries

Boundaries for units of the National Park System are not always drawn exclusively on the basis of natural or cultural features or clear determinations of resource significance. Consequently, not all of the land within a unit boundary may require the same type or level of protection to achieve the purpose of the unit, and land outside of the boundary may have a direct bearing on the well-being of the unit. Plans proposing the NPS assume management responsibility for lands currently in private or other ownership should be able to document that these lands are needed for resource protection and visitor use purposes that cannot be accomplished without Federal acquisition of these lands or interests in these lands. (See Format, Parts II, IV, V, and VI).

Short and Long Term Needs

In considering protection options, the plan should recognize the difference between needs for interim protection and long term objectives for the unit. Some areas have a long term objective of restoring natural systems to their condition prior to human settlement. However, with appropriate controls, it may be possible and, in fact, desirable to allow continued compatible private uses of the land for a specific period of time without adverse impacts on the long term mission of the unit.

In many areas, private uses of the land may contribute to the purposes of the unit by providing visitor services, reducing requirements for maintenance, reducing costs for management or continuing traditional activities that are part of the resource to be protected, particularly in areas of cultural value. The land protection plan should indicate what private uses need to be continued, controlled, or eliminated to meet long range goals of the unit. Interim private use may be provided by deferral of acquisition, right of first refusal, acquisition subject to reservation of use and occupancy, or by purchase followed by leaseback, or sellback with deed restrictions.

Protection Alternatives

Direct NPS acquisition and management of land may not be the only effective or desirable method of protecting unit resources in all cases. *Land protection plans must document that other approaches have been fully considered.* The plan must identify specific protection methods and assess the ability of various alternatives to achieve management objectives. This includes attention to the following types of methods:

Agreements

Agreements are legal instruments defining administrative arrangements between two or more parties. They can provide for exchange of services or other benefits. Within unit boundaries, agreements are most likely to be useful for land owned by:

State or local governments
Private non-profit organizations (scout troops, churches, land trusts or conservation groups)
Other federal agencies
Individuals or corporations who are supportive of unit purposes, in areas where such agreements are specifically authorized by law

VOL 48 ISS 92 MY 11 1983 UMI

The terms of an agreement can include provisions for:
Limited NPS access to manage natural or cultural resources
Shared responsibility for maintenance of structures or facilities
Public access for recreation or interpretation
Conditions for management of wildlife or other resources
Law enforcement

For example, land administered by the Coast Guard and Navy in Channel Islands National Park can be managed for unit purposes under an agreement that grants NPS access yet continues the defense and coastal security uses of the islands.

NPS directives and the Federal Grants and Cooperative Agreement Act of 1977 (Pub. L. 95–224) establish some important distinctions among contracts, cooperative agreements, and memoranda of understanding. The land projection plan should outline the specific requirements to meet NPS management needs and other types of provisions to be included in an agreement so that the appropriate legal instrument can be drawn up at a later date.

Zoning

Zoning is based on the power of State and local governments to protect public health, safety, and the welfare by regulating the use of land. Within a unit of the National Park System, local zoning regulations can be used to limit the density, type, location, and character of private development. Some authorizing legislation specifically provides for cooperation between NPS and local governments in developing zoning regulations. In other areas, zoning should be considered when:

—Local government has a zoning ordinance in place or appears to be willing to adopt one.

—There is evidence of State and local support for the protection objectives of the unit.

—Some reasonable private use of the land is consistent with unit purposes.

—Private land use needs to be controlled and managed rather than prohibited to meet unit objectives.

The land protection plan should be clear about what types of protection could be exercised through a zoning ordinance administered by the local government. This may include:

Restrictions on the type of use; residential, commercial, industrial, agricultural, etc.

Limits on the intensity of use; size of lots, height of buildings, number of units per acre.

Standards for design; requirements for set backs from property lines, number of parking spaces per unit, portion of lot to remain in open space.

The plan should take special care to consider what uses of land may be allowed under current zoning classifications which appear to meet NPS objectives as well as those which seem to conflict. For example, the zoning category of "recreation use" may allow for trailer parks, resort motels, and other development unlikely to be compatible with purposes of the unit. Land zoned for low density residential use may be more adequately protected in terms of unit objectives than land zoned for agricultural use where feed lots, timber operations, and other intense activities may be allowed automatically.

A few zoning ordinances allow for transfers of density or development rights from one tract to another. This tool is especially useful in jurisdictions where development can be concentrated in areas already served by public utilities while undeveloped land is retained in low density uses. The land protection plan should consider if development should be prohibited, controlled, or concentrated in other locations. Where the location of new development is of primary concern, zoning and related TDR (transferable development right) programs are likely to be worthy of consideration in the protection plan.

Cooperation with state or local governments may be necessary to revise or prepare zoning regulations. The land protection plan should advise local governments about the types of zoning provisions that would be consistent with unit objectives as well as local interests and concerns. At the same time, the plan should recognize that zoning changes are often controversial and the NPS role should be defined with sensitivity to the potential for criticism of federal involvement in local land use regulation. Special expertise may be required to advise unit managers on complex zoning questions.

Local zoning has been criticized as a long term protection tool because of the potential for changes in local governing bodies, political pressures on decisions, and problems in enforcement of regulations. Land protection plans may suggest what steps could be taken to overcome some of these problems or what contingency actions may be taken if zoning fails. Suggestions for NPS involvement in State or local zoning and other land use regulatory activities should be developed in close consultation with the Office of the Solicitor. In discussing zoning, the plan should give special attention to maintaining cooperative relationships with local governments rather than creating confrontations. In the absence of special legislative provisions for the particular unit, the National Park Service role in local zoning matters is advisory.

In limited instances where the state has ceded exclusive jurisdiction to the Federal Government within the boundaries of a National Park, or where otherwise authorized by law, the National Park Service may be able to exercise direct regulatory authority over private lands. In such cases, NPS would be acting like the local governing body in establishing limits on the type, density, and character of land use. This approach is most appropriate for developed areas within older established National Parks rather than a method of protecting new areas or undeveloped land.

Regulations

In addition to zoning, Federal agencies and state and local governments administer a variety of other laws that can help protect unit resources. The land protection plan will consider what regulatory authorities are available to control:
Air and water pollution
Dredging or filling of wetlands
Hunting and fishing
Tree cutting and forestry practices
Resource extraction and excavation
Construction in navigable waters
Subdivision of land
Development in flood hazard areas

Regulations cannot usually provide for public use, but they can prevent harm to natural or cultural resources. For example, Federal, state, and local regulations often impose strict limits on dredging or filling of wetlands that would destroy wildlife habitat or degrade water quality. Local subdivision and environmental regulations may restrict residential development that is not adequately served by roads, water, and sewage treatment facilities.

It is much more difficult for regulations to absolutely prohibit an activity than to simply limit the type, amount, or intensity of the activity. In units where the impact of development is already evident regulations are more likely to be effective in reducing adverse effects of major projects. In relatively pristine areas, regulations may be of little use in efforts to preserve natural systems from any intrusions of development. Regulations also are more likely to be effective where there is a good base of information about the impacts of certain activities on unit resources. For example, documentation (supported by adequate data) that water pollution is destroying specific fish and wildlife populations will be helpful in efforts to enforce state or local regulations on the source of the pollutants.

A land protection plan should discuss the role NPS can play in assuring that regulations are effectively implemented. This could include cooperation with local efforts to identify and prosecute violators as well as technical assistance or review of permit applications. Although regulations should not be considered as a substitute for acquisition of land or interests needed for resource management and public use, they can be an important element in the general plan for protecting the unit.

Easement Acquisitions

Property ownership should be envisioned as a bundle of rights. These include the right to farm, cut trees; build houses, or extract resources and exclude others from it. Easements convey only some of the rights in property from one person to another. They may be positive: giving a right of access, or negative: restricting specific activities on the land. Easements are most likely to be useful where:

—Some, but not all private uses are compatible with unit purposes.

—Current owners desire to continue current types of use and occupancy of the land under terms set by NPS.

—Scenic values need protection, or access by the public or NPS is needed only over a portion of the land.

Easements are extremely flexible and can be drafted to fit the specific characteristics of the land as well as concerns of the owner. The protection plan should identify the types of conditions imposed by or uses that will be limited by an easement. These could include restrictions on:
Tree cutting
Excavation or grading
Resource extraction
Hunting or fishing
Residential development
Farming practices that erode the soil
Grazing
Commercial or industrial activities

Restrictions may specify changes in use that will be allowed by the unit manager subject to clearly defined conditions on the timing, intensity, or amount of the use.

The easement also could include positive provisions for:
Public access along a river or trail
NPA access to manage natural or cultural resources
Utility rights of way

Negative easements are often likely to be appropriate on developed properties where single fainly residential uses can continue without adverse impacts on public use of the unit. Negative easements also are useful in protecting scenic values of agricultural or forest land. The type of reatrictions to be imposed can be as general or specific as necessary to meet protection needs. For example, an easement on a farm along a parkway or historic area could specify that no trees will be cut or structures be built in a legally defined area unless consistent with clear standards in the easement. An easement on an historic building might specify that it will be maintained and painted only a certain color to match the character of the neighborhood, or preserve historic values.

Positive easements are likely to be most useful where the planned use by NPS or the public will not substantially interfere with other private uses of the land. Public access through land managed for farming or timber production is one example of a likely application for a positive easement. While some landowners may be receptive to selling less than their entire interest in land, others may prefer to sell in fee. The plan should indicate what factors will be considered in making the choice between fee and easement. These may include: owner preference, relative costs, character of the site or the resource, and plans for public use or other management requirements. In general, plans should give special attention to defining what interests in land are required to achieve unit purposes rather than leave the choice between fee and easement entirely to the property owner. The plan also should identify what special efforts might be necessary to inform landowners about possible advantages of owner imposed deed restrictions, easement sales and requirements for monitoring and enforcement of easement conditions. Plans proposing substantial use of easements should discuss any special staff, funding, or training needs to assure that easement conditions can be adequately managed and enforced.

There is no rule of thumb for determining whether easements are "too expensive" in relation to fee acquisition. Costs for purchasing easements will vary widely depending on how much potential uses of the land are limited and the local trends in development. Proposed easement programs must be evaluated on a case-by-case basis. In discussing costs of an easement program, the plan should balance all revelant factors:

Easements: limited management control, purchase price, enforcement costs, benefits of continued private use, opportunities for public use, impact on local tax base.

Fee ownership: full control over management, purchase price, maintenance expenses, payments in lieu of taxes, NPS liability for damages, patrol and enforcement expenses, opportunities for public use, development costs.

Fee Acquisition

When all of the interests in land are acquired, it is owned in fee simple. Fee acquisition may be recommended when other methods of protection have been found to be inadequate, inefficient, or ineffective to meet management needs. Before recommending a protection strategy that relys entirely on fee purchases, *the plan should explain why other approaches are not adequate and why problems with these other approaches cannot be solved.* Fee acquisition is most often appropriate where the land:

—Is Needed for development of unit facilities or public use.

—Must be maintained in a natural condition that precludes reasonable private use.

—Requires active NPS management to preserve historic and archeological resources, eliminate exotic species, or conduct other activities that substantially conflict with private use.

—Is owned by individuals who do not wish to sell less-than-fee interests (sellback and lease back should be considered).

—Cannot be protected in accord with unit purposes by other methods, or alternatives would not be cost-effective.

Methods of Acquisition

NPS can acquire fee and less-than-fee interests through several different methods. These include:
Purchase with donated or appropriated funds
Withdrawal from the public domain
Transfer from other federal agencies
Donation
Bargain sale
Exchange
Condemnation

Plans for direct purchase should recognize the uncertainties about the level of annual appropriations by Congress. Transfers and withdrawals also usually require specific direction from Congress. Donations and exchanges depend upon a variety of factors not usually within the direct control of NPS. Consequently, the plan should discuss specific means of

VOL 48 ISS 92 MY 11 1983 UMI

acquisition (i.e., donation, purchase or exchange) in general terms without attempting to define which individual tracts will be acquired by specific methods, unless some agreement has already been reached or the methods are specified in the authorizing legislation.

Landowners who have substantial taxable incomes would most likely be interested in a full donation. A bargain sale (partial donation) may be attractive to individuals or corporations who need some cash and some deductions from taxable income. The plan provides an opportunity to determine what special assistance may be necessary to inform landowers about the tax advantages of donations. The plan should not, however, attempt to offer tax advice, but may indicate what steps can be taken to encourage landowners to consult with their attorneys and accountants.

Exchanges should be considered where:

NPS has identified potential trade lands under its own control (land outside of the current boundary acquired to avoid severance damages, for example).

Land is located in the same state under other Federal agency jurisdiction.

In cases, where the landowner wishes to sell fee but NPS needs a less-than-fee interest, a purchase and sell or lease-back arrangement should be considered. The land protection plan should identify those tracts where fee acquisition could be used initially to meet landowner objectives, and then the land could be leased, or resold with restrictions in the deed to meet NPS objectives. A discussion of timing for lease back or sell back and any necessary restrictions should be included in the plan.

Authorizing legislation for many areas provides that land also may be acquired subject to reservations or a right of use and occupancy. Reservations may be for a term of years or the life of the owner and must include restrictions to assure protection of unit resources. Rights to salvage structures or materials also may be reserved. The plan should specify what land or structures may be acquired subject to reservations as well as land that cannot be acquired with reservations, in accord with the area's legislation.

The plan should explain what circumstances may require the use of condemnation to acquire or less-than-fee interests in private property. These include simply resolving disagreements over fair market value and solving title problems, as well as preventing uses that would harm unit resources. The plan should note any specific legislative directions on condemnation, recognize the distinction between inholding areas authorized prior to 1959 and recently authorized areas, and explain to landowners that condemnation is a judicial process to assure them of just compensation when private land is taken for public purposes.

The land protection plan should identify any special concerns about the actual process of acquisition that should be taken into consideration to minimize adverse impacts on landowners.

Emergencies and Hardships

It is not possible to predict in advance when landowners may be subject to hardships that require them to dispose of land or improvements in land, or to know when action by landowners may cause significant or irreparable damage to unit resources. Accordingly, both emergencies and hardships will be revised on a case-by-case basis as they arise and will not affect the overall setting of priorities in the preparation of land protection plans. Where authorizing legislation provides for special consideration to be given to hardships, appropriate reference to the legislation should be included in the plan.

Appendix A

Areas where planning is scheduled to be underway by October 1, 1983. This list includes areas where plans are scheduled for completion during Fiscal Year 1983 and 1984.

Alaska Region: Roger Contor, Regional Director, National Park Service, 540 West 5th Avenue, Room 202, Anchorage, Alaska 99501 (907–271–4196)

POSTAL SERVICE

39 CFR Part 10

International Express Mail Service to Malaysia and Qatar

AGENCY: Postal Service.

ACTION: Final action on International Express Mail Service to Malaysia and Qatar.

SUMMARY: Pursuant to agreements with the postal administrations of Malaysia and Qatar, the Postal Service intends to begin International Express Mail Service with Malaysia and Qatar at postage rates indicated in the tables below. Service is scheduled to begin on June 10, 1983.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Leon W. Perlinn, (202) 245–4414.

SUPPLEMENTARY INFORMATION: By a notice published in the **Federal Register** on April 5, 1983 (48 FR 14660), the Postal Service announced that it was proposing to begin International Express Mail Service to Malaysia and Qatar on June 10, 1983. Comments were invited on published rate tables, which were proposed amendments to the International Mail Manual (incorporated by reference in the **Federal Register**, 39 CFR 10.1), and which were to become effective on the date service began. No comments were received.

Accordingly, the Postal Service is confirming that it intends to begin International Express Mail Service with Malaysia and Qatar on June 10, 1983 at the rates indicated in the tables below.

List of Subjects in 39 CFR Part 10

BILLING CODE 7710–12–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[PP 2E2739/R544; PH–FRL 2359–7]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Ametryn

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the herbicide ametryn in or on the raw agricultural commodity cassava roots. This regulation to establish a maximum permissible level for residues of ametryn in or on the commodity was requested in a petition submitted by the Interregional Research Project No. 4 (IR–4).

EFFECTIVE DATE: Effective on May 11, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Donald Stubbs, Emergency Response and Minor Use Section, Registration Division (TS–767C), Environmental Protection Agency, Rm. 716B, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1192).

SUPPLEMENTARY INFORMATION: EPA issued a proposed rule, published in the **Federal Register** of March 9, 1983 (48 FR 9887), which announced that the Interregional Research Project No. 4 (IR–4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, had submitted pesticide petition 2E2739 to EPA on behalf of the IR–4 Technical Committee and the Agricultural Experiment Station of Puerto Rico.

This petition requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act, propose the establishment of a tolerance for residues of the herbicide ametryn (2-(ethylamino)-4-(isopropylamino)-6-(methylthio)-*s*-triazine) in or on the raw

VOL 48 ISS 92 MY 11 1983 UMI

agricultural commodity cassava roots at 0.1 part per million (ppm).

There were no comments or requests for referral to an advisory committee received in response to the proposed rule.

The data submitted in the petition and other relevant material have been evaluated and discussed in the proposed rule. The pesticide is considered useful for the purpose for which the tolerance is sought. It is concluded that the tolerance would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e)))

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: April 27, 1983.

James M. Conlon,

Acting Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.258 is amended by adding and alphabetically inserting the raw agricultural commodity cassava roots to read as follows:

§ 180.258 Ametryn; tolerances for residues.

* * * * *

Commodities	Parts per million
* * * * *	
Cassava, roots	0.1
* * * * *	

[FR Doc. 83-12180 Filed 5-10-83; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 180

[PP 2F2713/R559; PH-FRL 2361-7]

Tolerances and Exemptions From Tolerances for Pesticide Chemical in or on Raw Agricultural Commodities; 1-Triacontanol

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes an exemption from the requirement of a tolerance for the plant growth regulator 1-triacontanol in or on all raw agricultural commodities. This regulation to eliminate the need to establish a maximum permissible level for residues of the plant growth regulator in or on all raw agricultural commodities was requested by the Biochemical Research Corporation.

EFFECTIVE DATE: Effective on May 11, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 245, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1800).

SUPPLEMENTARY INFORMATION: EPA issued a notice published in the **Federal Register** of April 6, 1983 (48 FR 14002), which announced that the Biochemical Research Corporation, 140 Little Falls St., Falls Church, VA 22046, had submitted pesticide petition 2F2713 to the EPA proposing to amend 40 CFR Part 180 by establishing an exemption from the requirement of a tolerance for residues of the plant growth regulator 1-triacontanol in or on all raw agricultural commodities.

There were no comments received in response to the notice of filing.

The data submitted in the petition and relevant material have been evaluated. The toxicological data considered in support of the exemption from the requirement of a tolerance included an acute oral lethal dose (LD_{50}) study (rat) with an LD_{50} greater than 5,000 milligrams (mg)/kilogram (kg); a primary dermal irritation study (rabbit), negative; an acute dermal toxicity study (rabbit with an LD_{50} greater than 2,000 mg/kg; a primary eye irritation study (rabbit), serve irritation; and an Ames Assay that did not demonstrate mutagenic activity. All other toxicology studies and requirements including long and short-term feeding studies and a 3-generation reproduction study, were waived in accordance with the provision of 40 CFR 162.451(c). These requirements were waived since 1-triacontanol is found to be ubiquitous in all plant life and insect waxes. Thus, animals that consume vegetation, including humans naturally ingest this compound as a diet constituent.

No residues are expected in any raw agricultural commodities resulting from the use of this plant growth regulator.

There are no regulatory actions pending against the product and no Rebuttable Presumption Against Registration (RPAR) criteria have been exceeded. The metabolism of 1-triacontanol is adequately delineated for the use. An analytical method, electron capture gas chromatography, is available for determining residues of 1-triacontanol. However regulatory action is not anticipated in the case of the exemption. Since no detectable residues are expected in any raw agricultural commodities from the use, residues are not expected in meat, milk, poultry, or eggs.

The pesticide is considered useful for the purpose for which the exemption is sought. It is concluded that the regulation would protect the public health and is established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities.

A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C. 346(a)(e))).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: May 4, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended by adding a new § 180.1081 to read as follows:

§ 180.1081 1-Triacontanol; exemption from the requirement of a tolerance.

1-Triacontanol is exempted from the requirement of a tolerance when used as a plant growth regulator in or on all raw agricultural commodities.

[FR Doc. 83-12004 Filed 5-10-83; 8:45 am]

40 CFR Part 180

[OPP-300073A; PH-FRL 2361-6]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; Polybutenes, Polyvinyl Chloride, and Butyl Benzyl Phthalate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: These rules exempt polybutenes, polyvinyl chloride, and butyl benzyl phthalate from the requirement of a tolerance when combined with each other and used as inert ingredients in multi-layered dispensers of pesticide formulations. These regulations were requested by the Health-Chem Corporation.

EFFECTIVE DATE: Effective on May 11, 1983.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A-110), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Arthur Donner, Registration Support and Emergency Response Branch (TS-767C), Registration Division, Environmental Protection Agency, Rm. 716 D, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-7700).

SUPPLEMENTARY INFORMATION: EPA issued proposed rules published in the **Federal Register** of March 23, 1983 (48 FR 12110) that announced that at the request of the Health-Chem Corporation, 1107 Broadway, New York, NY 10010 the Administrator proposed to amend 40 CFR Part 180 by establishing exemptions from the requirement of a tolerance for residues of polybutenes, polyvinyl chloride, and butyl benzyl phthalate, respectively, when combined with each other and used as inert ingredients in multi-layered dispensers of (Z)-11-hexadecenal to disrupt the mating of the artichoke plume moth.

There were no comments or requests for referral to an advisory committee received in response to the proposed rules.

The data and relevant information submitted in the request and the bases for approval of the exemptions were discussed in the notice of proposed rulemaking.

The pesticides are considered useful for the purpose for which the exemptions are sought. It is concluded that the exemptions would protect the public health and are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

(Sec. 408(e), 68 Stat. 514 (21 U.S.C 346(a)(e))).

List of Subjects in 40 CFR Part 180

Administrative practice and procedure, Agricultural commodities, Pesticides and pests.

Dated: May 3, 1983.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR Part 180 is amended as follows:

1. In § 180.1037, by designating the existing text as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 180.1037 Polybutenes; exemption from the requirement of a tolerance.

* * * * *

(b) Polybutenes are exempt from the requirement of a tolerance for residues in or on the raw agricultural commodity artichokes when used as a sticker agent in multi-layered laminated controlled-release dispensers of (Z)-11-hexadecenal to disrupt the mating of the artichoke plume moth.

2. In § 180.1060, by designating the existing text as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 180.1060 Polyvinyl chloride; exemption from the requirement of a tolerance.

* * * * *

(b) Polyvinyl chloride is exempt from the requirement of a tolerance for residues in or on the raw agricultural commodity artichokes when used as inert multi-layered laminated controlled-release dispensers of (Z)-11-hexadecenal to disrupt the mating of the artichoke plume moth.

3. In § 180.1062, by designating the existing text as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 180.1062 Butyl benzyl phthalate; exemption from the requirement of a tolerance

* * * * *

(b) Butyl benzyl phthalate is exempt from the requirement of a tolerance for residues in or on the raw agricultural commodity artichokes when used as an inert plasticizer in multi-layered laminated controlled-release dispensers of (Z)-11-hexadecenal to disrupt the mating of the artichoke plume moth.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

41 CFR Part 14-1

Interior Procurement Regulations

AGENCY: Office of the Secretary, Interior.

ACTION: Final rule.

SUMMARY: This final rule revises provisions of the Interior Procurement Regulations (IPR) concerning debarred, suspended and ineligible contractors. This revision is necessary in order to comply with the requirements of Office of Federal Procurement Policy (OFPP) Letter 82-1, dated June 24, 1982, and Federal Procurement Regulation Temporary Regulation 65, dated October 4, 1982.

EFFECTIVE DATE: This rule is to be effective May 11, 1983.

FOR FURTHER INFORMATION CONTACT: David Metz (202) 343-3345.

VOL 48 ISS 92 MAY 11 1983 UMI

SUPPLEMENTARY INFORMATION:

Primary Author

The primary author of this rule is David Metz, Office of Acquisition and Property Management, telephone (202) 343-3345.

Impact

The Director, Office of Management and Budget has exempted agency procurement regulations from the requirements of Executive Order 12291. This rule is the required implementation of a Government-wide policy, and as such will have no independent significant economic effect on a substantial number of small entities.

This rule is being published as a final rule as it is merely the internal implementation of a government-wide policy, making public comment both impracticable and unnecessary. For this same reason, the rule is being made effective upon publication in the **Federal Register.**

List of subjects in 41 CFR Chapter 14-1

Government procurement, administrative practices and procedures, environmental protection, Indian business and finance, Labor surplus area, Minority businesses, Small businesses.

Accordingly, 41 CFR subpart 14-1.6 is revised to read as set forth below, pursuant to 40 U.S.C. 486(c), and 5 U.S.C. 301.

Dated: May 4, 1983.

Richard R. Hite,

Assistant Secretary of the Interior.

PART 14-1—GENERAL

1. The Table of contents for subpart 14-1.6 is revised to read as follows:

Subpart 14-1.6—Debarment, Suspension and Ineligibility

Sec.

14-1.600 Scope of subpart.
14-1.603 Establishment and maintenance of a list of debarred, suspended, and ineligible contractors, and agency records.
14-1.603-1 Consolidated list of debarred, suspended, and ineligible contractors.
14-1.603-2 Agency records.
14-1.604 Treatment to be accorded listed contractors.
14-1.604-1 General.
14-1.604-2 Review procedures.
14-1.605 Debarment.
14-1.605-3 Procedures.
14-1.606 Suspension.
14-1.606-3 Procedures.

2. Subpart 14-1.6 is revised to read as follows:

Subpart 14-1.6—Debarment, Suspension and Ineligibility

§ 14-1.600 Scope of subpart.

This subpart prescribes Departmental procedures for debarring and suspending contractors, and the use and maintenance of a consolidated list of debarred, suspended or ineligible contractors.

§ 14-1.603 Establishment and maintenance of a list of debarred, suspended, and ineligible contractors, and agency records.

§ 14-1.603-1 Consolidated list of debarred, suspended, and ineligible contractors.

The Division of Acquisition and Grants, Office of Acquisition and Property Management shall be responsible for the actions described in FPR § 1-1.603-1(b), except that the heads of procuring activities are responsible for the internal distribution of the consolidated list to the appropriate procurement operation offices under their jurisdiction.

§ 14-1.603-2 Agency records.

The Division of Acquisition and Grants, Office of Acquisition and Property Management shall maintain the records required by FPR § 1-1.603-2.

§ 14-1.604 Treatment to be accorded listed contractors.

§ 14-1.604-1 General.

The Director, Office of Acquisition and Property Management shall make the determinations required by FPR §§ 1-1.604-1, 1-1.604-3 and 1-1.604-4. Requests for such determinations shall be forwarded by the contracting officer through the head of the procuring activity to the Director, Office of Acquisition and Property Management.

§ 14-1.604-2 Review procedures.

Contracting officers shall review the consolidated list of debarred, suspended, and ineligible contractors prior to issuing any solicitation, awarding any contract or contract modification, approving any subcontractor or initiating any pre-award survey.

§ 14-1.605 Debarment.

§ 14-1.605-3 Procedures.

(a) *Debarring official.* The Director, Office of Acquisition and Property Management is the official authorized to debar a contractor for any of the causes set forth in FPR § 1-1.605-2. In addition, the Director, Office of Acquisition and Property Management is authorized to take all of the actions described in FPR § 1-1.605-1, including the determination that compelling reasons exist justifying continued business dealings between the Department of the Interior and a contractor debarred by another agency. None of these authorities may be redelegated.

(b) *Referral.* Whenever cause for debarment becomes known to a contracting officer, the matter shall be referred through the head of the procuring activity to the Director, Office of Acquisition and Property Management, together with a recommended action.

(c) *Notice of proposed debarment.* The Director, Office of Acquisition and Property Management shall initiate a debarment action by providing the contractor and any specifically named affiliates with written notice of the proposed debarment. This notice shall, at a minimum, contain the information described in FPR § 1-1.605-3(c), and shall be sent by certified mail return receipt requested.

(d) *Factfinding.* In proposed debarment actions not based upon a conviction or judgment or debarment by another agency, if the contractor's submission raises a genuine dispute over material facts, the Director, Office of Acquisition and Property Management shall conduct factfinding as described in FPR § 1-1.605-3(b)(2). The bureau or office which referred the action, the Office of the Inspector General and the Office of the Solicitor shall assist the Director, Office of Acquisition and Property Management, as necessary, in conducting factfinding.

(e) *Hearing.* If a hearing is requested, it shall be conducted by the Director, Office of Acquisition and Property Management, or his designee. The hearing will be held at a location convenient to the parties concerned as determined by the Director, Office of Acquisition and Property Management, and on a date and at a time stated. Subject to the provisions of 43 CFR Part 1, the firm or individual against whom the debarment action is taken may be represented by a duly authorized representative. Witnesses may be called to testify by either party. The hearing shall be conducted expeditiously and in such a manner that each party will have a full opportunity to present all information considered pertinent to the hearing. A transcript of the hearing will be made available at cost to the party sought to be debarred.

(f) *Decision and notice.* The Director, Office of Acquisition and Property Management shall make the decision regarding debarment in accordance with FPR § 1-1.605-3(d), and provide notice to the contractor in accordance with FPR § 1-1.605-3(e).

§ 14-1.606 Suspension.

§ 14-1.606-3 Procedures.

(a) *Suspending official.* The Director, Office of Acquisition and Property Management is the official authorized to suspend contractors for the causes set forth in FPR § 1-1.606-2. In addition, the Director, Office of Acquisition and Property Management is authorized to take the actions described in FPR § 1-1.606-1, including the determination that compelling reasons exist justifying continued business dealings between the Department of the Interior and a contractor suspended by another agency. None of these authorities may be redelegated.

(b) *Referral.* Whenever cause for suspension becomes known to a contracting officer, the matter shall be referred through the head of the procuring activity to the Director, Office of Acquisition and Property Management together with a recommended action.

(c) *Notice of suspension.* The Director, Office of Acquisition and Property Management shall provide the affected contractor and any specifically named affiliates with a notice of suspension, in accordance with FPR § 1-1.606-3(c).

(d) *Factfinding.* In cases involving a genuine dispute over material facts, the Director, Office of Acquisition and Property Management shall conduct factfinding to the extent necessary to resolve the dispute; except that factfinding shall not be conducted in the circumstances described in FPR § 1-1.606-3(c)(6).

(e) *Decision and notice.* The Director, Office of Acquisition and Property Management shall make the suspension decision and provide written notice thereof in accordance with FPR § 1-1.606-3(d).

(f) *Period of suspension.* The Director, Office of Acquisition and Property Management is authorized to take the actions described in FPR § 1-1.606-4 concerning the period of suspension. This authority is not redelegable.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

[Docket No. 30429-72

Ocean Salmon Fisheries Off the Coasts of Washington, Oregon, and California

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Emergency interim rule and request for comment.

SUMMARY: The Secretary of Commerce issues emergency regulations for the ocean salmon fisheries off Washington, Oregon, and California. Although specific regulations vary by fishery and area, together they establish fishing seasons, legal gear, quotas, inseason management procedures, daily catch limits for recreational fisheries, and minimum size limits for salmon taken in the fishery, conservation zone off Washington, Oregon, and California. The regulations are intended to prevent overfishing, to apportion equitably the ocean harvest between commercial and recreational fisheries, and to allow salmon to escape the ocean fisheries thereby providing fish for various inside fisheries, meeting U.S. obligations to treaty Indian fishermen, and achieving spawning escapement goals.

DATE: Interim rule is effective on May 23, 1983, and will remain effective until August 21, 1983. Comments are invited until May 23, 1983.

ADDRESSES: Interested parties are invited to submit comments on this emergency interim rule to Director, Northwest Region, National Marine Fisheries Service (NMFS), 7600 Sand Point Way NE, BIN C15700, Seattle, Washington 98115.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, (Northwest Regional Director, NMFS), 206-527-6150; or Alan W. Ford (Southwest Regional Director, NMFS), 213-548-2575.

SUPPLEMENTARY INFORMATION:

Background

Under the Magnuson Fishery Conservation and Management Act (Magnuson Act), the fishery management plan (FNP) for the Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon, and California, was prepared by the Pacific Fishery Management Council (Council), and was approved for the Secretary of Commerce (Secretary) by the Assistant Administrator for Fisheries (Assistant Administrator), NOAA, on March 2, 1978. Regulations to implement the FMP were first published on April 14, 1978 (43 FR 15629), as emergency regulations. Regulations to implement the 1982 Council amendment to the FMP as well as certain changes occasioned by a Secretarial amendment, were issued as final rules on August 16, 1982 (47 FR 35489) and on September 1, 1982 (47 FR 38545). Both 1982 final rules are superseded by these emergency rules. NOAA expects to have final rules in place before these emergency rules expire.

An amendment for 1983 has been prepared by the Council and is undergoing review by the Secretary of Commerce. A draft supplement to the environmental impact statement (DSEIS) for the 1983 amendment was filed with the Environmental Protection Agency, and a notice of availability of this DSEIS was published on February 4, 1983 (48 FR 5308). The Council held six public hearings on the draft of this amendment during the period February 15-17, 1983.

The 1983 amendment is intended to provide adequate escapements from the ocean salmon fisheries for treaty Indian fisheries, for various water fisheries, and for spawning. In addition, the amendment is intended to maintain existing ocean fisheries and to allocate equitably the salmon resources between the ocean commercial and recreational fisheries. The amendment will be accompanied by a final EIS, and a regulatory impact review/regulatory flexibility analysis.

Proposed regulations will be published for a separate review and public comment period as required by the Magnuson Act. If the amendment is approved by the Secretary as submitted by the Council, the proposed rule will be identical to this emergency interim rule; and comments received on this emergency rule will be considered in developing the final rule to implement the 1983 FMP amendment.

These interim regulations are necessary immediately to address an emergency in the ocean salmon fishery until the amendment is reviewed, appropriately approved, and implemented by final regulations. Section 305(e) of the Magnuson Act authorizes the Secretary to promulgate emergency regulations with or without an approved FMP or amendment when a Council finds that an emergency exists involving a fishery under its jurisdiction. The Council requested by majority vote and the Assistant Administrator agreed that until the 1983 amendment was approved and implemented, emergency

11
1983
UMI

regulations should be promulgated immediately to protect some depressed salmon stocks from overfishing and to meet Federal obligations to achieve treaty Indian fishing allocation requirements and spawning escapement goals.

This emergency rulemaking remains in effect for 90 days and may be extended, by agreement of the Secretary of Commerce and the Council, for a second 90-day period.

Status of the Salmon Resource in 1983

Current information on the abundance of the major stocks of chinook and coho salmon that are available to the ocean fisheries in 1983 indicates that (1) some stocks continue to be depressed to such an extent that ocean harvest must be regulated to assure adequate escapement to inside fisheries and spawning grounds, and (2) other stocks continue to be at or near optimum levels of abundance. The status of stocks is presented in detail in Chapter IV of the report accompanying the 1983 FMP amendment.

Council Proposals for 1983

The Council and its advisors considered the status-of-stocks information included in the report along with other factors, including public comments, during their deliberations on the 1983 amendment. Since none of the management options contained in the draft amendment would have met the Council's management goals, none was adopted by the Council; however, the draft document did discuss components of the Council-adopted management measures, which were included within the range of options chosen and are presented here as emergency regulations.

In January 1983, the Council adopted the draft 1983 FMP amendment for public review; it contained four regulatory options for managing the commercial fishery and four options for the recreational fishery. The options ranged from more restrictive to less restrictive than the 1982 management measures. That document, including the draft supplemental environmental impact statement and draft regulatory impact review, was widely distributed and was the subject of discussion at six public hearings in Washington, Oregon, California, and Idaho. As a result of comments received during the public comment period and of the analyses of the impacts of the options that were drafted by the Council's Salmon Plan Development Team, the Council adopted the management measures contained in the 1983 amendment. Further public comments were heard by the Council in Portland, Oregon, on May 16–17 and 23, 1983, before it adopted the 1983 management measures.

1983 Management Measures

The 1983 management measures adopted by the Council for commercial and recreational fishing along the entire coast are intended to achieve spawning escapement, treaty Indian and inside allocation goals, distribute the regulatory burden equitably, and minimize unpredictable shifts in fishing effort along the coast. The measures adopted contain ocean fishing seasons, area, gear, and bag limit requirements, and place quotas on some coho and chinook harvests. Minimum harvest lengths for salmon in all ocean fisheries are unchanged from 1982.

North of Cape Falcon, Oregon, area openings and conservation closures for 1983 maximize season length and harvest by concentrating fishing effort on healthy salmon stocks while minimizing harvest of depressed stocks. Openings of limited areas (e.g., inside 3 miles or inside 6 miles) in the recreational fishery focus effort on healthy stocks of Columbia River hatchery, Washington hatchery, and Oregon costal chinook near the shore until such time as depressed, natural stocks of upper Columbia River chinook appear. The fishing area then expands seaward and the fishery is directed toward healthy hatchery coho stocks further offshore. The result of limited area openings should be a longer recreational season than that of 1982.

Enforcement of these limited area restrictions will be carefully coordinated among U.S. Coast Guard, National Marine Fisheries Service, and state agency personnel to determine compliance with this type of management measure. Consideration of such area openings in the future may be dependent upon the degree of compliance in 1983.

Because directed chinook fisheries might increase the ocean harvest of some depressed natural stocks an disrupt the normal relationship between the ocean and in-river harvests fall chinook stocks returning to Columbia River hatcheries, the level of ocean harvest north of Cape Falcon, Oregon, is directly limited for the first time by chinook quotas. Conservation closures around the mouth of the Columbia River protect the immature chinook and coho feeding in this area as well as the mature upriver spring, summer, and fall chinook returning to that river.

Columbia River and Oregon coastal coho stocks are important to ocean fisheries off the southern Washington coast as well as the fisheries off the coasts of northern California and Oregon. These stocks are the primary component of the Oregon Production Index (OPI), which is an index of the annual abundance of California, Oregon coastal, and Columbia River coho stocks from Leadbetter Point, Washington, south through California. The OPI uses the number of two-year old jack (precocious male) coho that return to selected locations during the previous spawning run to predict season abundance of three-year-old adult coho off northern California, Oregon and southern Washington.

During the period 1979–82, actual stock sizes exceeded pre-season predictions for the OPI. The greatest error, 22 percent or 321,000 fish, occurred in 1982. Following the 1982 season, a thorough review of the stock abundance estimation procedure was undertaken to improve the accuracy of the stock size forecast for 1983. As a result of this review, the Council adopted a revised data base for predicting OPI coho abundance. Changes in the abundance predictor include upward adjustments in: (1) Lewis River hatchery jack counts that reflect the increased production at that facility, and (2) Columbia River jack counts that reflect a lower jack-to-adult ratio and a higher survival rate because release of young salmon from the hatcheries has been delayed until later in the spring. A more recent data base (1977–82) was used, reflecting a changed jack-to-adult relationship due to variations in hatchery production, stock utilization, and harvest patterns, and reduction in the proportion of wild fish in the total stock. Using this revised base data, the preseason estimate of coho stock size in the OPI area in 1983 is 1,654,000 coho, including private hatchery contributions. This estimate compares to 1,090,800 coho predicted for 1982. Without this revision, the pre-season estimate of stocks for 1983 would have been approximately 1,777,000 coho.

Although the Council initially adopted a harvest ceiling of 501,000 coho for the area north of Cape Falcon, allocations to user groups necessitated a technical adjustment to 494,000 coho to allow for an increased coho catch in the July troll fishery and for shaker mortality in the pink-and-sockeye-only troll fishery. The 494,000 harvest ceiling was adjusted to account for shaker mortality in the late chinook-only fisheries, resulting in an ocean quota of 482,000 coho north of Cape Falcon for fishermen who are not treaty Indians.

Despite the relative abundance of coho in 1983 as indicated by the OPI estimate, serious conservation concerns

with regard to natural stocks of Washington coastal, Puget Sound, and Oregon coastal coho caused the Council to adopt measures shifting a significant portion of the northern Washington and southern Oregon troll harvest to the area off central and northern Oregon and the Columbia River mouth. This shift will maximize harvest opportunity on healthy Columbia River hatchery coho stocks and reduce the harvest of wild coastal coho.

North of Cape Falcon, the unlimited all-species troll season is restricted to the area south of the Columbia River and seaward to 10 miles, from August 10–September 8. This restriction is designed to allow trollers to harvest surplus hatchery coho while protecting upriver bright chinooks returning to the Columbia River as well as weak runs of Washington coastal coho returning to rivers fished by treaty Indians. The available information indicates that the trollers have a greater impact on the upriver bright chinook and Washington coastal coho than does the ocean recreational fishery.

Management measures for the area north of Cape Falcon in 1982 were designed to allocate 58 percent of the coho to the troll fishery and 42 percent to the recreational fishery (47 percent troll and 53 percent recreational allocation from Cape Falcon to Leadbetter Point and 64 percent troll, 36 percent recreational allocation north of Leadbetter Point). The 1983 coho quotas, however, allocate 34 percent to the troll fishery and 66 percent to the recreational fishery north of Cape Falcon. This shift in Washington coho allocations is offset by: (1) A special troll fishery for pink and sockeye salmon, (2) a troll fishery for all-species-except-coho with special gear in the area north of Cape Falcon, and (3) a sizeable troll coho quota south of the Columbia River designed to attract Washington trollers away from weak runs of Washington coastal coho and Columbia River chinook.

The Directors of the Washington Department of Fisheries and the Oregon Department of Fish and Wildlife have agreed to make the necessary arrangements for Washington trollers to participate in the all-species fishery south of the Columbia River by allowing them to land in Washington ports even though ocean areas off Washington may be closed at the time. Under state regulations, a Washington troller may not land in Oregon unless he qualifies for a permit under that state's moratorium or unless he is forced into an Oregon port due to bad weather or mechanical problems.

The two-week troll fishery for pink and sockeye salmon, beginning August 7 north of Carroll Island, will harvest predominantly Fraser-River-origin stocks of pink salmon, which are expected to be at recent record high abundance. Gear is limited to bare blued hooks and flashers.

During July, the troll fishery north of Cape Falcon will target on chinook using only plugs at least 6 inches long. This troll gear is known to be highly selective for legal-sized chinook. The incidental catch of coho in this fishery is limited to 33 percent of the combined catch of chinook and coho, but not to exceed 20,000 coho.

The impacts of the troll and the recreational fisheries on coho from northern Washington are vastly different. To meet spawning escapements and treaty Indian harvest entitlements, the Council either had to reduce the total coho harvest of both fisheries (allowing an over-escapement of stronger runs) or allow only the fishery which would have the least impact on weaker runs (the recreational fishery) to increase.

The Council-adopted management measures, which include some modified fishing areas and generally later open periods, are expected to minimize the impacts of fishing pressure on natural coho stocks, particularly the coastal Oregon and Washington coho stocks. The decision to concentrate ocean fishing on hatchery stocks also should help pass several wild salmon stocks to the inside treaty Indian fisheries in Washington. The Council's reprogramming effort to shift more of the allowable troll harvest of coho off central and northern Oregon and the Columbia River mouth will serve to allow the ocean fisheries an opportunity to increase the allowable catch, thus minimizing the potential adverse economic consequences that result when the fisheries are closed early because the quotas are reached.

The area from Cape Falcon to Cape Blanco, Oregon, includes a 66-mile long subarea from Heceta Head to Cape Kiwanda which is managed by two overlapping troll quotas, the first beginning on July 1 and the second beginning August 1. The overlap area includes Newport, the State's second largest port for commercial landings. Troll landings at Newport count toward the quota from Cape Kiwanda south to the Oregon-California border until that quota is reached. Then, beginning when the southern quota is reached, but not before August 1, Newport landings will apply to the quota from Heceta Head north to Cape Falcon. As a result, the fishing effort for coho will be shifted northward later in the season onto Columbia River hatchery stocks and away from Oregon coastal wild coho stocks.

The recreational fishery from Cape Falcon to Cape Blanco opens on June 16, almost a week later than in 1982.

From Cape Blanco, Oregon, to Cape Vizcaino, California, a multiyear rebuilding schedule for Klamath River chinook is established with the goal of increasing in-river runs by an average of 20 percent over the previous four years. Unexpected changes in the fisheries, resource, or environment would be accommodated, but, otherwise, management measures would not change for four years. If the average increase in in-river run size over four years is higher than 20 percent over the previous four years, the goal for the following four years would be 20 percent greater than the increased average; however, if the average increase in escapement is lower than 20 percent, the goal for the following four years would remain at 20 percent above the goal for the previous four years.

The southern boundary of this area has been moved 46 miles northward, from Point Arena to Cape Vizcaino, in view of new information from coded wire tags which indicates that most of the chinook landed at Fort Bragg (just south of Cape Vizcaino) with current stock sizes, are of Sacramento not Klamath River origin.

Escapement from the ocean to the Klamath River was 62,700 chinook in 1982. The 1983 management measures are expected to result in 70,100 chinook returning to the Klamath, an 11.8 percent increase over 1982. The Council's 1983 ocean escapement goal is 68,900 chinook. The full benefit of the regulations will be realized in 1984 when a 20.5 percent increase over 1982 is expected to escape the ocean fisheries. These estimates should be considered as maximum, since undoubtedly there will be some shifts in fishing effort precipitated by those regulations, the impacts of which cannot be evaluated until they occur.

Although the recreational season in this area is essentially the same as in 1982, the troll season is reduced from 1982. Changes in troll regulations off California include use of barbless hooks in all troll fisheries, a limitation of six trolling wires per vessel to minimize shaker losses, a May 16 (instead of May 1) opening of the chinook fishery, a June 1 (instead of May 25) opening of the all-species season, a 12-mile square ocean closure at the Klamath River mouth during August, and a month shorter all-

VOL

1983
UMI

species season (closing August 31 instead of September 30).

In addition, a coho quota has been imposed on the troll fishery off California for the first time. In previous seasons, the catch of coho off California was counted toward the OPI quota south of Cape Falcon, but the fishery off California did not close when that quota was reached. In 1983, the all-species troll fishery between the Oregon-California border and Cape Vizcaino will close when 71,000 coho are projected to have been caught and an all-species-except-coho season subsequently will continue in that area.

The troll season from Cape Blanco to the Oregon-California border is shortened from 1982. The May all-species season opens two weeks later than in 1982 (May 16 instead of May 1) and the September all-species-except-coho season is limited to two weeks (September 1–15) in a 12x24-mile rectangular area at the mouth of the Rogue River.

As a result of changes made in management measures from 1982 to 1983, but without considering potential effort shifts, the recreational catch from Cape Blanco to Cape Vizcaino is expected to increase by almost 3 percent over 1982, while the troll catch is expected to be nearly 12 percent less than in 1982.

South of Cape Vizcaino, California, a similar rebuilding schedule for Sacramento chinook was adopted. The 1983 Sacramento River escapement goals are for 65,800 upper and 82,000 (71,000 natural and 11,000 hatchery) lower river spawners. The 1983 emergency regulations provide for an opening of the troll chinook season later than in 1982 (May 1 instead of April 22). However, the 1983 regulations will not be in effect until after May 1 and the fishery will open under existing regulations. It is projected that the overall escapement goal to the Sacramento River will be reached in 1983; however, the upper river goal may not be reached.

Inseason adjustments to management measures in 1983 could include the following:

—The recreational daily catch limit may be reduced from two fish to one fish to extend the recreational season through Labor Day off Oregon and Washington.
—The area restrictions north of Cape Falcon may be modified to permit the recreational fishery to move offshore earlier, to reduce effort on chinook and to increase the likelihood of achieving the coho quota.
—If either recreational chinook quota north or south of Klipsan Beach is projected to be uncaught, a portion of the unused balance may be reallocated to the other subarea during the season.
—The estimated abundance of private hatchery coho in the Oregon Production Index (OPI) will be reassessed to determine if coho quotas need adjustment.
—The troll coho quota for the August fishery from the Columbia River to Cape Falcon may be increased by the amount of fish (if any) remaining in the quota for the July plugs-only season north of Cape Falcon. Likewise, the troll chinook quota for the August fishery from the Columbia River to Cape Falcon may be increased by the amount of fish (if any) remaining in the chinook quota for the May and July fisheries north of Cape Falcon.

Determinations necessary for inseason adjustments will be made by the NMFS Northwest Regional Director, in consultation with the Directors of the state fishery management agencies, and adjustments will be implemented by the Secretary.

Treaty Indian fisheries

Four northern Washington Indian tribes, the Makah, Quileute, Hoh, and Quinault tribes, have Indian treaty rights to fish for all salmon species in the ocean adjacent to the State of Washington. Between 1972 and 1981, the ocean treaty troll catch of chinook and coho increased two and three fold respectively. In 1982, the actual treaty Indian ocean troll catch totaled approximately 116,800 coho, almost four times the amount anticipated when the regulations for the all-citizen fisheries were established.

Northern Washington fisheries are managed to maximize the catch without causing the natural coho spawning escapements to the Hoh, Queets, or Quillayute rivers to fall below the lower end of the escapement range adopted by the United States District Court for 1982 in *Hoh et al. v. Baldrige.* The Queets natural run is the most depressed of the three systems. The lower end of the 1982 court-adopted spawning escapement range for the Queets River is 5,600 fish.

The timing and amount of salmon harvested by treaty Indians in the ocean directly influences the amount available to allocate to all-citizen ocean fishermen, and the amount of fish available for inside Indian and all-citizen fisheries and for spawning. Uncertainty regarding the size and timing of treaty-Indian troll harvest creates a situation where the impact of ocean fishing regulations upon individual salmon runs, which are of management concern, is nearly impossible to determine.

The Council urged the treaty tribes to agree upon the timing and specific catch level for 1983 ocean treaty Indian fisheries. The Makah Tribe has been unable to reach agreement with the Quileute, Hoh, and Quinault tribes on the number of salmon that will be harvested by treaty Indian fishermen in the ocean in 1983. However, tribal representatives agreed that it would be appropriate for the Council to establish management measures for the all-citizen fishery based on an allowable ocean harvest of 482,000 coho for them north of Cape Falcon. Negotiations among the tribes are continuing in an effort to reach agreement on the size and timing of the 1983 treaty Indian fishery in the ocean. Additional tribal restrictions for their ocean fisheries, including quotas, may be established by the tribes after the date of filing of these emergency regulations.

Federal treaty Indian fishing regulations in 1983 for persons authorized to exercise the Makah Indian treaty ocean fishing rights were adopted as submitted by the Tribe and provide for Makah Indian fishermen to fish in their adjudicated ocean area for all species from May 1 through October 31, and to retain chinook with a minimum length of 24 inches and coho with a minimum length of 16 inches. Either fixed or hand-held lines or poles may be used.

Federal treaty Indian fishing regulations in 1983, for persons authorized to exercise treaty ocean fishing rights of the Quileute, Hoh, and Quinault tribes, provide for fishing by these tribes in their respective adjudicated ocean areas for all species from May 1 through September 15. Treaty fishermen may not retain chinook smaller than 26 inches or coho smaller than 16 inches but a daily limit of 2 chinook between 24 and 26 inches may be kept for ceremonial and subsistence use. Either fixed or hand-held lines or poles may be used. These emergency regulations are less restrictive than those recommended by the three tribes to avoid impeding the process of on-going negotiations between the Makah Tribe and the other three tribes.

Except as noted in § 661.23(c), all other commercial salmon fishing regulations apply to persons exercising the Makah, Quileute, Quinault, and Hoh treaty right to fish in the ocean.

Related Litigation

Hoopa Valley Tribe v. Baldrige: In June of 1982, the Hoopa Valley Indian Tribe, whose reservation is on the Klamath River, brought suit against the Secretary. The tribes claimed that emergency regulations implementing a Secretarial FMP amendment approved on May 26, 1982, for the commercial troll fishery between Cape Blanco, Oregon, and Point Arena, California, were not designed to prevent overfishing of Klamath River fall chinook and did not adequately consider Indian fishing rights in that river. Because a decision has not yet been rendered by the Court, it is unknown at this time what impact, if any, a judicial determination would have on these 1983 emergency regulations. The Secretary believes that the emergency regulations implementing the 1982 Secretarial amendment adequately prevented overfishing of Klamath River chinook and considered Indian fishing rights, consistent with applicable legal requirements. As indicated above, the 1983 emergency regulations are designed to increase the number of chinook entering the Klamath River in 1983 by approximately 12 percent over 1982.

Hoh v. Baldrige: This case was filed in U.S. District Court in 1981 and the Court maintains jurisdiction. The tribes, the State of Washington, and the Department of Commerce meet regularly to discuss and agree on appropriate spawning escapements for coho returning to those northern Washington coastal rivers on which the tribes fish. For 1983, the parties agreed to adopt spawning escapement goals, which were the same as those established by an order of the Court for 1982. The allowable ocean harvest quota of 482,000 coho north of Cape Falcon, Oregon, to the U.S.-Canada border is expected to allow attainment of these agreed-upon spawning escapements.

Confederated Tribes v. Baldrige: The U.S. District Court also maintains continuing jurisdiction in this action. In this litigation, originally filed in 1981, the Court directed the Secretary to evaluate possible management measures for the FCZ off Alaska, Washington, and Oregon which would return more fall chinook salmon to the upper reaches of the Columbia River (bright fall chinook destined for the river above Bonneville Dam, or upriver brights).

The Secretary's evaluation indicated that little could be done by way of restrictions to the ocean fishery off Oregon and Washington north of Cape Falcon to increase the return of upriver bright chinook to the Columbia. No action occurred in this case in 1982 and it is expected that the Secretary's imposition of a chinook harvest quota for the fisheries north of Cape Falcon by these emergency regulations (see discussion above) will be in the best interests of that resource and the tribes.

Classification

Recognizing the critical need for 1983 ocean salmon regulations, the Assistant Administrator agrees with the council's finding that an emergency exists. He has determined that this rule is consistent with the Magnuson Act and other applicable law and should be issued pursuant to section 305(e)(2) of the Magnuson act. He has determined that continuing the regulations now in force would jeopardize the resource, and, therefore, that it is necessary to promulgate these interim regulations immediately.

The Assistant Administrator finds for good cause that the reasons justifying promulgation of these rules on an emergency basis make it impracticable and contrary to the public interest to delay the effective date of these emergency regulations for the full 30-day comment period under the provisions of section 553(d) of the Administrative Procedure Act. To ensure that the public has a reasonable opportunity to comment before these regulations become effective, public comments are invited until May 23.

Because it responds to an emergency, this rule is exempt from the procedures of E.O. 12291 under section 8 (a)(1) of that order. The rule is being reported to the Director, Office of Management and Budget, with an explanation of why it is impracticable to follow the procedures of the order. This rule does not contain a request for collection of information for purposes of the Paperwork Reduction Act.

This rule is exempt from the procedures of the Regulatory Flexibility Act because it is an interim emergency, rather than a proposed or final, rule.

As the final agency action approving a 1983 salmon FMP amendment and proposed implementing regulations has not yet occurred, a final supplemental environmental impact statement has not yet been prepared. A notice of availability of the draft supplemental environmental impact statement for the 1983 amendment was published on February 4, 1983 (48 FR 5308). Letters certifying consistency of the emergency regulations with approved State coastal zone management program were mailed to Oregon, California, Washington, and the San Francisco Bay Area coastal zone agencies on April 6, 1983.

List of Subjects in 50 CFR Part 661

Fish, Fisheries, Fishing, Indians.

Dated: April 29, 1983.

William H. Stevenson,

Deputy Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR Part 661 is revised to read as follows:

PART 661—OCEAN SALMON FISHERIES OFF THE COASTS OF WASHINGTON, OREGON, AND CALIFORNIA

Subpart A—General Measures

Sec.

661.1 Purpose.
661.2 Relation to other laws.
661.3 Definitions.
661.4 [Reserved]
661.5 Reporting requirements.
661.6 [Reserved]
661.7 General restrictions.
661.8 Facilitation of enforcement.
661.9 Penalties.

Subpart B—Management Measures

661.20 Commercial fishing.
661.21 Recreational fishing.
661.22 Inseason adjustments.
661.23 Treaty Indian fishing.
661.24 Experimental fisheries.
661.25 Scientific research.

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General Measures

§ 661.1 Purpose.

The purpose of this part is to provide for the management of the salmon fisheries off the coasts of Washington, Oregon, and California in the fishery conservation zone (the FCZ, also known as the 3-to-200 mile zone) over which the United States exercises exclusive fishery management authority (i.e., the Pacific Fishery Management Council's Salmon Fishery Management Area) under the Magnuson Fishery Conservation and Management Act.

§ 661.2 Relation to other laws.

(a) This part does not apply to fishing for pink and sockeye salmon conducted under the Convention for the Protection, Preservation, and Extension of the Sockeye Salmon Fishery of the Fraser River System, as amended by the Pink Salmon Protocol, in U.S. Convention Waters between 48° N. latitude and the provisional international boundary between the United States and Canada.

(b) This part recognizes that any State law which pertains to vessels registered under the laws of that State while in the fishery management area, and which is consistent with this part or any applicable Fishery Management Plan for the Commercial and Recreational Salmon Fisheries off the coasts of Washington, Oregon and California (Fishery Management Plan), including

VOL 48 ISS 92 MAY 11 1983 UMI

any State landing law, will continue to have force and effect with respect to fishing activities addressed herein.

(c) Any person fishing subject to this part shall be bound by the international boundaries of the management subareas described in § 661.3, notwithstanding any dispute or negotiation between the United States and any neighboring country regarding their respective jurisdictions, until such time as new boundaries are published by the United States.

§ 661.3 Definitions.

Authorized officer means:

(a) Any commissioned, warrant, or petty officer of the Coast Guard;

(b) Any special agent of the National Marine Fisheries Service or other officer authorized by the Secretary;

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Secretary of Transportation to enforce the provisions of the Magnuson Act; and

(d) Any Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (a) of this definition.

Barbless hook means a hook with a single shank and point, with no secondary point or barb curving or projecting in any other direction.

Commercial fishing means fishing with troll fishing gear as defined in this section, or fishing for the purpose of sale or barter of the catch.

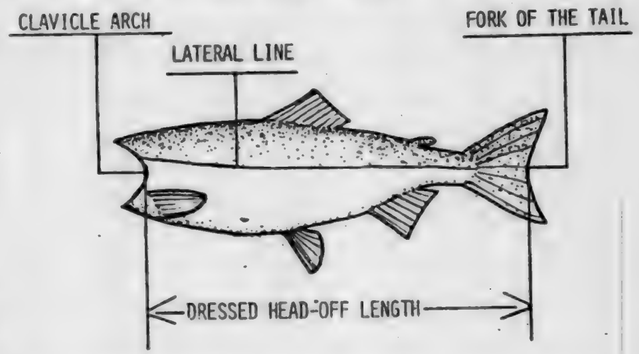
Conservation zone (CZ) means one of two conservation zones as follows:

(a) *Conservation zone 1:* The ocean area surrounding the Columbia River mouth bounded by a line extending for 6 nautical miles due west from North Head along 46°18'00" N. latitude to 124°13'18" W. longitude, then southerly along a line of 167° True to 46°11'06" N. latitude and 124°11'00" W. longitude (lightship buoy), then due east to shore along 46°11'06" N. latitude.

(b) *Conservation zone 2:* The ocean area surrounding the Klamath River mouth bounded on the north by 41°38'48" N. latitude (approximately 6 nautical miles north of the Klamath River mouth), on the west by 124°23'00" W. longitude, and on the south by 41°26'48" N. latitude (approximately 6 nautical miles south of the Klamath River mouth).

Council means the Pacific Fishery Management Council.

Dressed, head-off length of salmon means the shortest distance between the midpoint of the clavicle arch (see illustration) and the fork of the tail, measured along the lateral line while the fish is lying on its side, without resort to any force or mutilation of the fish other than removal of the head, gills, and entrails.



Dressed, head-off salmon means salmon that have been beheaded, gilled, and gutted without further separation of vertebrae, and are either being prepared for on-board freezing, or are frozen and will remain frozen until landed.

Fishery management area means the fishery conservation zone (FCZ) off the coasts of Washington, Oregon, and California between 3 and 200 miles offshore, and bounded on the north by the Provisional International Boundary between the U.S. and Canada, and bounded on the south by the International Boundary between the U.S. and Mexico. The inner boundary of the FCZ is a line coterminous with the seaward boundaries of the States of Washington, Oregon, and California (the "3-mile limit"). The outer boundary of the FCZ is a line drawn in such a manner that each point on it is 200 nautical miles from the baseline from which the territorial sea is measured, or is a provisional or permanent international boundary between the United States and Canada or Mexico.

(a) The northeastern, northern, and northwestern boundaries of the fishery management area are as follows:

(1) Northeastern boundary—that part of a line connecting the light on Tatoosh Island, Washington, with the light on Bonilla Point on Vancouver Island, British Columbia, southerly of the International Boundary between the U.S. and Canada (at 48°29'37" N. latitude, 124°43'33"W. longitude), and northerly of the point where that line intersects with the boundary of the U.S. territorial sea.

(2) Northern and northwestern boundary is a line [1] connecting the following coordinates:

48°29'37.19" N. lat., 124°43'33.19" W. long.;
48°30'11" N. lat., 124°47'13" W. long.;
48°30'22" N. lat., 124°50'21" W. long.;
48°30'14" N. lat., 124°52'52" W. long.;
48°29'57" N. lat., 124°59'14" W. long.;
48°29'44" N. lat., 125°00'06" W. long.;
48°28'09" N. lat., 125°05'47" W. long.;
48°27'10" N. lat., 125°08'25" W. long.;
48°26'47" N. lat., 125°09'12" W. long.;
48°20'16" N. lat., 125°22'48" W. long.;
48°18'22" N. lat., 125°29'56" W. long.;
48°11'05" N. lat., 125°53'48" W. long.;
47°49'15" N. lat., 126°40'57" W. long.;
47°36'47" N. lat., 127°11'58" W. long.;
47°22'00" N. lat., 127°41'23" W. long.;
46°42'05" N. lat., 128°51'56" W. long.;
46°31'47" N. lat., 129°07'39" W. long.

(3) The southern boundary of the fishery management area is the U.S.-Mexico International Boundary, which is a line connecting the following coordinates:

32°35'22" N. lat., 117°27'49" W. long.;
32°37'37" N. lat., 117°40'31" W. long.;
31°07'58" N. lat., 118°36'18" W. long.;
30°32'31" N. lat., 121°51'58" W. long.

(b) Geographical landmarks referenced in this part are located at the following latitudes:

Carroll Island, 48°00'18" N. lat.
Queets River, 47°31'42" N. lat.
Point Brown, 46°55'42" N. lat.
Leadbetter Point, 46°38'10" N. lat.
Klipsan Beach, 46°28'12" N. lat.
North Head, 46°18'00" N. lat.
Columbia River, 46°14'24" N. lat.
South Jetty, 46°14'06" N. lat.
Columbia River Lightship Buoy, 46°11'06" N. lat.
Cape Falcon, 45°46'00" N. lat.
Cape Kiwanda, 45°13'12" N. lat.
Cape Perpetua, 44°18'00" N. lat.
Heceta Head, 44°08'18" N. lat.
Cape Blanco, 42°50'20" N. lat.
Rogue River, 42°25'16" N. lat.
OR/CA Border, 42°00'00" N. lat.
Klamath River, 41°32'48" N. lat.
Cape Vizcaino, 39°43'30" N. lat.
Point Arena, 39°00'00" N. lat.

[1] The line joining these coordinates is the provisional international boundary of the U.S. FCZ as shown on NOAA/NOS Charts #18480 and #18002.

Fishing means—

(a) The catching, taking, or harvesting of fish;

(b) The attempted catching, taking, or harvesting of fish;

(c) Any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish; or

(d) Any operations at sea in support of, or in preparation for, any activity described in paragraphs (a) through (c) of this definition.

Fishing vessel means any boat, ship, or other craft which is used for, equipped to be used for, or of a type that is normally used for fishing.

Freezer trolling vessel means a fishing vessel, equipped with troll fishing gear, which has a present capability for (a) on-board freezing of the catch, *and* (b) storage of the fish in a frozen condition until they are landed.

Land or *landing* means to begin offloading fish, to arrive in port with the intention of offloading fish or to cause fish to be offloaded.

Magnuson Act means the Magnuson Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.*

Plugs means artificial fishing lure made of wood or plastic with one or more hooks attached.

Recreational fishing means fishing with recreational fishing gear as defined in this section and not for the purpose of sale or barter.

Recreation fishing gear means conventional angling tackle consisting of a rod, reel, line, and hooks with bait or lure attached.

Regional Director means the Northwest Regional Director, National Marine Fisheries Service (7600 Sand Point Way, N.E., BIN C15700, Seattle, Washington 98115) or his designee.

Salmon means any anadromous species of the family Salmonidae and genus *Oncorhynchus*, commonly known as Pacific salmon, including but not limited to:

Chinook (king) salmon—*Oncorhynchus tshawytscha*
Coho (silver) salmon—*Oncorhynchus kisutch*
Pink (humpback) salmon—*Oncorhynchus gorbuscha*
Chum (dog) salmon—*Oncorhynchus keta*
Sockeye (red) salmon—*Oncorhynchus nerka*

Secretary means the Secretary of commerce, or a designee.

Special fishery zone means one of two special fishery zones as follows:

(a) *Special fishery zone 1:* The ocean area south of the Columbia River mouth bounded by a line extending from the tip of the South Jetty (46°14'06" N. latitude and 124°04'00" W. longitude), then southwesterly along a line of 239° True to the lightship buoy (46°11'06" N. latitude and 124°11'00" W. longitude), then due west along 46°11'06" N. latitude to 124°13'24" W. longitude (approximately 10 nautical miles offshore), then south along a line of 180° True (approximately 10 miles offshore from the baseline from which the territorial sea is measured), and then due east to Cape Falcon along 45°46'00" N. latitude.

(b) *Special fishery zone 2:* The ocean area surrounding the Rogue River mouth bounded on the north by 42°37'18" N. latitude (approximately 12 nautical miles north of the rogue River mouth), on the west by 124°42'00" W. longitude (approximately 12 nautical miles offshore), and on the south by 42°13'18" N. latitude (approximately 12 nautical miles south of the Rogue River mouth).

Total length of salmon means the shortest distance between the tip of the snout or jaw (whichever extends furthest while the mouth is closed) and the tip of the longest lobe of the tail, without resort to any force or mutilation of the salmon other than fanning or swinging the tail.

Troll fishing gear mean fishing gear that consists of one or more lines that drag hooks with bait or lures behind a moving fishing vessel, *and* which lines are affixed to the vessel and are not disengaged from the vessel at any time during the fishing operation.

Whole bait means a hook or hooks baited with a whole natural bait.

§ 661.4 [Reserved]

§ 661.5 Reporting requirements.

This part recognizes that catch and effort data necessary for implementation of any applicable Fishery Management Plan is collected by the States of Washington, Oregon, and California under existing State data-collection provisions. No additional catch reports will be required of fishermen or processors as long as the data collection and reporting systems operated by State agencies continue to provide the Secretary with statistical information adequate for management.

§ 661.6 [Reserved]

§ 661.7 General restrictions.

(a) The fishery management area is closed to salmon fishing except as opened by this part or superseding regulations. All open fishing periods begin at 0001 hours and end at 2400 hours local time on the dates specified. Except as otherwise provided by or pursuant to this part, the following restrictions apply to all salmon fishing in the fishery management area.

(b) It is unlawful for any person to—

(1) Take and retain, or land salmon caught with a net in the fishery management area, except that a hand-held net may be used to bring hooked salmon on board a vessel.

(2) Fish for, or take and retain, any species of salmon:

(i) During closed seasons or in closed areas;

(ii) Once any catch limit is attained;

(iii) By means of gear or methods other than recreational fishing gear or troll fishing gear; or

(iv) In violation of any notice issued under § 661.22.

(3) Take and retain or possess aboard a fishing vessel any species of salmon which is less than the applicable minimum total length specified in §§ 661.20(c), 661.21(c), 661.23(a), or 661.23(b)(4).

(4) Possess aboard a fishing vessel a salmon, for which a minimum total length is set by this part, in such a condition that its minimum total length is extended, or cannot be determined, except that "dressed, head-off salmon" may be possessed aboard a "freezer trolling vessel" (unless the adipose fin of such salmon has been removed—see paragraph(b)(6) of this section).

(5) Fail to return to the water immediately and with the least possible injury any salmon the retention of which is prohibited by this part.

(6) Remove the head of any salmon caught in the fishery management area, or possess a salmon with the head removed, if that salmon has been marked by removal of the adipose fin to indicate that a coded wire tag has been implanted in the head of the fish.

(7) Possess, have custody or control of, ship, transport, offer for sale, sell, purchase, import, export, or land, any species of salmon or salmon part which was taken and retained in violation of the Magnuson Act, this part, or any regulation issued under the Magnuson Act.

(8) Refuse to permit an authorized officer to board a fishing vessel subject to such person's control for purposes of conducting any search or inspection in

VOL 48 ISS 92 MAY 11 1983

connection with the enforcement of the Magnuson Act, this part, or any other regulation issued under the Magnuson Act;

(9) Forcibly assault, resist, oppose, impede, intimidate, or interfere with any authorized officer in the conduct of any search or inspection described in paragraph (h)(1) of this section;

(10) Resist a lawful arrest for any act prohibited by this part; or

(11) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person knowing that such other person has committed any act prohibited by this part.

§ 661.8 Facilitation of enforcement.

(a) *General.* Each person aboard a fishing vessel subject to this part shall immediately comply with instructions issued by an authorized officer to facilitate safe boarding and inspection of the vessel, its gear, equipment, and catch for purposes of enforcing the Magnuson Act and this part.

(b) *Signals.* Upon being approached by U.S. Coast Guard cutter or aircraft, or other vessel or aircraft authorized to enforce the Magnuson Act, the operator of the fishing vessel shall be alert for signals conveying enforcement instructions. The VHF–FM radiotelephone is the normal method of communicating between vessels. Listen to VHF–FM channel 16 (emergency channel) for instructions to shift to another VHF–FM channel and receive boarding instructions. Visual methods or loudhailer may be used if the radio does not work. The following signals, extracted from U.S. Hydrographic Office publication H.O. 102 International Code of Signals, may be communicated by flashing light or signal flags:

(1) "L", meaning "You should stop your vessel instantly."

(2) "SQ3", meaning "you should stop or heave to; I am going to board you."

(3) "AA AA AA etc.," meaning "Call for unknown station or general call." The operator should respond by identifying his vessel by radio, visual signals or illuminating the vessel name or number.

(4) "RY–CY", meaning "You should proceed at slow speed. A boat is coming to you."

(c) *Boarding.* The operator of a vessel signaled to stop or heave to for boarding shall—

(1) Stop immediately and lay to or maneuver in such a way as to permit the boarding party to come aboard; and

(2) Take such other actions as necessary to ensure the safety of the boarding party.

§ 661.9 Penalties.

Any person or fishing vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forfeiture provisions prescribed in the Magnuson Act.

Subpart B—Management Measures

§ 661.20 Commerical fishing.

(a) Areas, open seasons, species, and zone and gear restrictions are set forth in Table 1.

TABLE 1.

Areas and open seasons [1]	Species	Zone restrictions [2]	Gear restrictions
United States-Canada border to Cape Falcon:			
May 1–May 31	All except coho	Conservation zone 1 (Columbia River mouth) is closed.	Barbless hooks, whole bait, or plugs not less than 5" only.
July 1—earliest of (1) coho quota, or (2) chinook quota, or (3) July 31.	All except that sockeye and pink salmon may not be retained north of Carroll Island. No more than 1 coho may be retained for each 2 chinook retained.	do	Plugs not less than 6" only.
United States-Canada border to Carroll Island:			
Aug. 7–Aug. 20	Sockeye and pink salmon only		Bare blued hooks and flashers only.
Columbia River to Cape Falcon:			
Aug. 10—earliest of (1) coho quota, or (2) chinook quota, or (3) Sept. 8.	All	Waters *outside* special fishery zone 1 (south of Columbia River mouth) are closed.	
Cape Falcon to Cape Blanco:			
May 1–May 31	All except coho		Barbless hooks, whole bait, or plugs not less than 5" only.
June 1–June 15	All except coho		Plugs not less than 5" or whole bait only.
Sept. 5–Oct. 31	All except coho		
Cape Falcon to Cape Kiwanda:			
Aug 1—coho quota	All		Plugs not less than 5" or whole bait only.
Coho quota—Sept 4	All except coho		
Cape Kiwanda to Heceta Head:			
July1—coho quota	All		Plugs not less than 5" or whole bait only.
Aug. 1—earlier of (1) coho quota, or (2) Sept. 4.	All		
If a coho quota closure occurs prior to Sept. 4, from the time of closure until Sept. 4.	All except coho		
Heceta Head to Cape Blanco:			
July 1—coho quota	All	If a coho quota closure occurs prior to Aug. 1, waters north of Heceta Head to Cape Perpetua are open until Aug. 1.	Plugs not less than 5" or whole bait only.
Coho quota—Sept. 4	All except coho		
Cape Blanco to Oregon-California Border:			
May 16–May 31	All except coho		Barbless hooks only, and no more than 6 troll lines.
June 1–June 15	All except coho		Plugs not less than 5" or whole bait only.
July 1–coho quota	All		
Coho quota—Aug. 31	All except coho		Plugs not less than 5" or whole bait only.
Sept. 1—Sept. 15	All except coho	Only waters *inside* special fishery zone 2 (Rogue River mouth) are open.	
Oct. 1–Oct. 31	All except coho		
Oregon-California Border to Cape Vizcaino			
May 16–May 31	All except coho		Barbless hooks only, and no more than 6 troll lines.
June 1–June 15	All until coho quota is reached, then all except coho.		Barbless hooks only, and no more than 6 troll lines.
July 1–Aug. 31	All until coho quota is reached, then all except coho.	Conservation zone 2 (Klamath River mouth) is closed Aug. 1–Aug. 31.	Barbless hooks only, and no more than 6 troll lines.
Cape Vizcaino to United States-Mexico Borders:			
May 1–May 31	All except coho		Barbless hooks only, and no more than 6 troll lines.

TABLE 1.—Continued

Areas and open seasons [1]	Species	Zone restrictions [2]	Gear restrictions
June 1–June 15	All		Barbless hooks only, and no more than 6 troll lines.
July 1–Sept. 30	All		Barbless hooks only, and no more than 6 troll lines.

[1] Quotas referenced in this column are set forth in the quota table at § 661.22(a).
[2] Conservation zone and special fishery zone are defined in § 661.3.

(b) *Gear restrictions.*—(1) *Troll gear.* No person shall engage in commercial salmon fishing using other than troll fishing gear (as defined in § 661.3) in the fishery management area; however, between the Oregon-California border and the U.S.-Mexico border, troll fishing gear need not be affixed to the fishing vessel as specified in § 661.3.

(2) Lures commonly known as "spoons," "wobblers," "dodgers," and flexible plastic lures are not considered plugs, and may not be used where "plugs only" are specified. *Plugs* are defined in § 661.3.

(3) Where *barbless hooks* are specified, hooks manufactured with barbs can be made "barbless" by forcing the point of the barb flat against the main part of the point. Where "barbless hooks only" are specified south of Cape Blanco, Oregon, to the U.S.-Mexico border, barbless hooks must be used with all types of gear including whole bait and plugs. Where "barbless hooks" are specified north of Cape Blanco, Oregon, to the U.S.-Canada border, barbless hooks must be used with all types of gear *except* whole bait, plugs, and the bare blued hooks used during the special pink—and sockeye—only fishery. *Barbless hook* is defined in § 661.3.

(4) Where *whole bait* is specified, no attraction other than a flasher may be used with the whole bait. *Whole bait* is defined in § 661.3.

(c) *Length restrictions.* Minimum total lengths of salmon and minimum dressed, head-off lengths of salmon are as follows:

Areas	Species	Minimum total lengths (inches)	Minimum lengths for dressed, head-off salmon (inches)
United States-Canada border—Cape Falcon.	Chinook	28	21½
	Coho	16	12
Cape Falcon—Oregon-California border.	Chinook	26	19½
	Coho	16	12
Oregon-California border—United States-Mexico border.	Chinook	26	19½
	Coho	22	16½
All areas	Species other than chinook and coho.	None	None

(d) *Steelhead.* No person engaged in commercial salmon fishing shall take and retain, or possess any steelhead (*Salmo gairdneri*) within the fishery management area.

(e) *Restriction on use of commercial troll fishing gear for recreational fishing.* No person while on a fishing vessel with troll fishing gear on board shall use any part of that troll fishing gear to engage in recreational fishing for salmon.

§ 661.21 Recreational fishing.

(a) Areas, open seasons, species, and zone and gear restrictions are set forth in Table 2:

TABLE 2

Areas and open seasons [1]	Species	Zones [2] [3] 0 to 3 miles	3 to 6 miles	6 to 200 miles	Daily bag and length limits [4] [5]
United States-Canada border to Queets River:					
July 1–July 29	All	Open	Closed	Closed	2 fish legal size.
July 30–Sept. 11	All	Open	Open	Open	2 fish legal size.
Queets River to Pt. Brown:					
May 28–June 17	All except coho	Open	Open	Closed	2 fish legal size.
June 18–July 29	All	Open	Open	Closed	2 fish legal size.
Pt. Brown to Klipsan Beach:					
May 28–June 17	All except coho	Open	Open	Closed	2 fish legal size.
June 18–July 29	All	Open	Open	Closed	2 fish legal size.
July 30–Sept. 11	All	Open	Open	Op3n	2 fish legal size.
Klipsan Beach to North Head:					
June 18–July 29	All	Open	Open	Closed	2 fish legal size.
July 30–Aug 15	All	Open	Open	Open	2 fish legal size.
North Head to South Jetty:					
July 30–Aug. 15	All	Open	Open	Open	2 fish legal size
South Jetty to Cape Falcon:					
June 18–July 29:					
1. From South Jetty south to 46°08'00" N. lat. (approximately 6 miles south of the Columbia Lighthouse Buoy).	All	Open	Closed	Closed	2 fish legal size.
2. South of 46°08'00" to Cape Falcon	All	Open	Open	Closed	2 fish legal size.
July 30–Aug. 15	All	Open	Open	Open	2 fish legal size.
Aug. 16–Sept. 11	All	(6)	(6)	(6)	2 fish legal size.
Cape Falcon to Cape Blanco:					
June 18–Sept. 18	All	Open	Open	Open	2 fish; first 2 salmon taken must be retained regardless of size or species.
Cape Blanco to Oregon-California border:					
May 28–coho quota	All	Open	Open	Open	2 fish; first 2 salmon taken must be retained regardless of size or species.

VOL 48 ISS 92 MAY 11 1983 UMI

TABLE 2—Continued

Areas and open seasons [1]	Species	Zones [2] [3] 0 to 3 miles	3 to 6 miles	6 to 200 miles	Daily bag and length limits [4] [5]
Coho quota–Oct. 31	All except coho	Open	Open	Open	2 fish; first 2 non-coho salmon taken must be retained regardless of size.
Oregon-California border to United States-Mexico border: Saturday nearest Feb. 15 (1983: Feb. 12) to Sunday nearest Nov. 15 (1983: Nov. 13).	All	Open	Open	Open	2 fish legal size.

[1] Seasons are subject to automatic quota closures. *See*, § 661.22(a)(2).
[2] Distances shown are in nautical miles and are measured from "0", the nearest point on the shore from which the baseline used to measure the width of the territorial sea is measured. "0–3" denotes ocean waters within the boundary of the adjacent State which are subject to State and not Federal regulation unless Federal regulations are in effect under section 306(b) of the Magnuson Act. Ocean salmon seasons in State waters shown in Table 2 are seasons adopted by the States in April, 1983 and may be subject to change.
[3] Areas between the U.S./Canada border and Cape Falcon are subject to inseason quota and zone adjustments. *See*, § 661.22(c).
[4] The daily bag limit may be reduced to 1 fish in one or more areas between the U.S/Canada border and the OR/CA border during the season. *See*, § 661.22(d).
[5] Length limits are set forth in the table at § 661.21(c).
[6] Special fishery zone 1 is defined in § 661.3.
[7] Only waters *inside* special fishery zone 1 [6] (south of Columbia River mouth) are open.

(b) *Gear restrictions.* (1) No person shall engage in recreational salmon fishing in the fishery management area using other than recreational fishing gear (as defined in section 661.3), to which may be attached not more than one artificial lure or natural bait, with no more than four single or multiple hooks.

(2) No person shall use more than one rod and line for recreational salmon fishing from the U.S.-Canada border to the Oregon-California border; however, there is no limit to the number of rods or lines used for recreational salmon fishing from the Oregon-California border to the U.S.-Mexico border.

(3) No person engaged in recreational fishing for salmon from the Oregon-California border to the U.S.-Mexico border may use weights of more than four (4) pounds attached directly to the line.

(4) Recreational fishing gear (as defined in section 661.3) must be held by hand while playing a hooked fish and reducing it to possession.

(c) *Length restrictions.* Minimum total lengths of salmon are as follows:

Areas	Minimum total lengths (inches) Chinook	Coho	Other Salmon
United States-Canada border—Cape Falcon.	24	16	None.
Cape Falcon—Oregon-California border.	None	None	None.
Oregon-California border—United States-Mexico border.	22 [1]	22 [1]	None.

[1] Except that one chinook or coho salmon per day may be less than 22 inches but not less than 20 inches.

(d) *Daily bag limits.* No person shall fish for, or take and retain, or possess more than two salmon per day (or one salmon if the daily bag limit is reduced under 661.22(d)) while recreationally salmon fishing in the fishery management area.

§ 661.22 Inseason adjustments.

(a) *Automatic season closures based on quotas.* (1) Salmon harvest quotas, which include fish caught in the territorial sea (0–3 nautical miles) seaward of Washington, Oregon, and California, are as follows:

Areas	Coho quotas [1] Recreational	Coho quotas [1] Commercial	Chinook quotas Recreational	Chinook quotas Commercial
United States-Canada border—Cape Falcon		20,000 in July plug-only season (incidental to chinook fishery) [2] [3].		95,000 in May and July seasons Combined. [4]
United States-Canada border—Leadbetter Point.	129,000 (0)			
United States-Canada border—Klipsan Beach.			59,000 [5]	
Klipsan Beach—Cape Falcon			[5] 29,000	
Leadbetter Point—Cape Falcon	[6] 189,000 (7)			
Special Fishery—Zone 1		[3] [8] 144,00 (8)		[9] 19,000
Cape Falcon—Heceta Head		[3] [8] 254,000 (32)		
Cape Falcon—United States-Mexico border	[3] [7] 196,000 (21)			
Cape Kiwanda—Oregon-California border		[3] [8] 297,000 (32)		
Oregon-California border—Cape Vizcaino		[3] [8] 71,000 (8)		

[1] Numbers in parentheses represent expected private hatchery coho contributions in thousands of fish by area, and are included in the quotas.
[2] These are quotas subject to adjustments based on inseason evaluations of private hatchery contributions, to be made on or before August 1. *See*, Section 661.22(b).
[3] Coho salmon caught between Cape Kiwanda and Heceta head will count first toward the coho quota established for Cape Kiwanda-OR/CA border, and when that quota is reached, then toward the coho quota established for Cape Falcon-Heceta Head.
[4] If the 95,000 chinook commercial quota is not reached during the May and July seasons, the balance will be added to the 19,000 chinook commercial quota for the August season in special fishery zone 1.
[5] If the 20,000 coho commercial quota is exceeded in the July season, the excess will be deducted from the 144,000 commercial troll quota for the August season in special fishery zone2. If the coho quota for the July season is not reached, the remainder will be added to the coho quota for the August season.
[6] This quota includes landings at Fort Bragg, California.
[7] Coho taken in the recreational fishery between the OR/CA border and the U.S./Mexico border are included in this quota, but if the quota is reached, only the area between Cape Falcon and the OR/CA border will close.
[8] These quotas are subject to reallocation under Section 661.22(c)(ii).

(2) When a quota for the commercial or the recreational fishery, or both, if any portion of the fishery management area is projected by the Regional Director to be reached on or by a certain date, the Secretary shall, by publishing a notice in the **Federal Register**, close the commercial or recreational fishery, or both, as of the date the quota will be reached.

(b) *Adjustment of quotas.* (1) The estimated contributions of private hatchery coho to coho quotas are shown in parentheses in the quota table in section 661.22(a)(1).

(2) On or before August 1, the Regional Director will review the estimated contributions of private hatchery coho, taking into account coded wire tag and/or scale analysis data gathered during the season. If the contribution of private hatchery coho varies from the preseason estimates, the Secretary may modify the coho quotas accordingly by publishing a notice in the **Federal Register.**

(c) *Area adjustments.* The total recreational quotas between the U.S. Canada border and Cape Falcon are 88,000 chinook (59,000 between the U.S. Canada border and Klipsan Beach, and 29,000 between Klipsan Beach and Cape Falcon) and 318,000 coho (129,000 between the U.S.-Canada border and Leadbetter Point, and 189,000 between Leadbetter Point and Cape Falcon). During the season, the Regional Director will monitor catches applicable to these quotas. The Secretary may, by publishing a notice in the **Federal Register**—

(1) If the Regional Director determines that a chinook quota will be reached before the corresponding coho quota, extend seaward one or more of the areas open to recreational coho fishing in order to increase the likelihood that the chinook and coho quotas will be filled at or near the same time; and

(2) If the Regional Director determines that any portion of the total 88,000 recreational chinook quota may not be taken, reallocate a part of the quota to the area (U.S.-Canada border to Klipsan Beach, or Klipsan Beach to Cape Falcon) which is projected to reach its area allocation first.

(d) *Reduction in daily bag limit.* When 50 percent of any recreational quota between the U.S.-Canada border and the Oregon-California border is projected to be reached, the Regional Director will determine whether a reduction in the daily bag limit from two fish to one fish will avoid an automatic quota closure prior to Labor Day (September 5, 1983). If the Regional Director determines that a reduction to one fish is necessary to extend the season until Labor Day, the Secretary may, by publishing a notice in the **Federal Register,** reduce the daily bag limit to one fish.

(e) *Availability of Data.* The Regional Director will compile in aggregate form all data and other information relevant to the actions described in this section and shall make them available for public review during normal office hours at the Northwest Regional Office, National Marine Fisheries Service, 7600 Sand Point Way N.E., Seattle, Washington 98115.

(f) *Effective dates.* (1) Any notice issued under this section is effective on the date specified in the notice or on the date the notice is filed for public inspection with the Office of the Federal Register, whichever is later.

(2) Any notice issued under this section will remain in effect until the expiration date stated in the notice, or until rescinded or superseded; *provided that,* no such notice has any effect beyond the end of the calendar year in which issued, at which time provisions of this part that were superseded by such notice again become effective until subsequently modified or superseded.

(g) Nothing contained in this part limits the authority of the Secretary to issue emergency regulations under section 305(e) of the Magnuson Act, if the Secretary determines that an emergency involving the salmon fishery exists. Such emergency regulations are effective upon filing for public inspection with the Office of the Federal Register.

§ 661.23 Treaty Indian fishing.

(a) *Makah Tribe.* Persons authorized by the Makah Tribe to exercise fishing rights under the Treaty with the Makah may fish for all salmon species only in that portion of the fishery management area north of 48°02'15" N. latitude (Norwegian Memorial) and east of 125°44'00" W. longitude, and such other areas as may hereafter be authorized for that tribe's treaty fishery by a Federal court, from May 1 through October 31. Minimum legal size limits are 24 inches for chinook salmon and 16 inches for coho salmon.

(b) *Quileute, Hoh, and Quinault Tribes.*—(1) *Quileute Tribe.* Persons authorized by the Quileute Tribe to exercise fishing rights under the Treaty of Olympia may fish for all salmon species only in that portion of the fishery management area between 48°07'36" N. latitude (Sand Point) and 47°31'42" N. latitude (Queets River), and such other areas as may hereafter be authorized for that tribe's treaty fishery by a Federal court, from May 1 through September 15.

(2) *Hoh Tribe.* Persons authorized by the Hoh Tribe to exercise fishing rights under the Treaty of Olympia may fish for all salmon species only in that portion of the fishery management area between 47°54'18" N. latitude (Quillayute River) and 47°21'00" N. latitude (Quinault River), and such other areas as may hereafter be authorized for that tribe's treaty fishery by a Federal court, from May 1 through September 15.

(3) *Quinault Tribe.* Persons authorized by the Quinault Tribe to exercise fishing rights under the Treaty of Olympia may fish for all salmon species only in that portion of the fishery management area between 47°40'06" N. latitude (Destruction Island) and 46°53'03" N. latitude (Point Chehalis), and such other areas as may hereafter be authorized for that tribe's treaty fishery by a Federal court, from May 1 through September 15.

(4) *Minimum size limits.* Minimum legal size limits are 26 inches for chinook salmon and 16 inches for coho salmon, except that a daily limit of two chinook salmon between 24 inches and 26 inches may be retained for ceremonial and subsistence purposes.

(c) *Exceptions.* Unless otherwise provided by this section, persons specified in paragraphs (a) and (b) of this section are subject to the provisions of this part, the Magnuson Act, and any other regulations issued under the Magnuson Act, except that the restrictions contained in section 661.20(b) (1), (d) and (e) and section 661.21 (b) and (d) do not apply.

(d) The Secretary will give due consideration in promulgating emergency regulations to the treaty fishing rights of Indian Tribes with federally-adjudicated usual and accustomed fishing grounds in the area affected by such regulations.

§ 661.24 Experimental fisheries.

(a) Upon the recommendation of the Council, the Regional Director may allow such experimental fisheries for research purposes in the fishery management area, as may be proposed by the Council, the Federal Government, State Governments, and treaty Indian tribes having usual and accustomed fishing grounds in the fishery management area.

(b) The Regional Director shall not allow any experimental fishery recommended by the Council unless he determines that the purpose, design, and administration of the experimental fishery are consistent with the goals and objectives of the council's fishery management plan, the national standards (section 301(a) of the

VOL 48 ISS 92 MY 11 1983 UMI

Magnuson Act), and other applicable law.

(c) Each vessel participating in any experimental fishery recommended by the Council and allowed by the Regional Director is subject to all provisions of this part, except those portions necessarily relating to the purpose and nature of the experimental fishery. These exceptions will be specified in a letter issued by the Regional Director to each vessel participating in the experimental fishery and that letter must be carried aboard each participating vessel.

§ 661.25 Scientific research.

Nothing in this part is intended to inhibit or prevent any scientific or oceanographic research in the fishery management area by a scientific research vessel. The Regional Director shall acknowledge any notification he might receive of any scientific or oceanographic research with respect to salmon being conducted by a scientific research vessel, by issuing to the operator or master of that vessel a letter or acknowledgement, containing information on the purpose and scope (locations and schedules) of the activities. The Regional Director shall transmit copies of such letter to the Council, and to State and Federal administrative and enforcement agencies, to ensure that all concerned parties are aware of the research activities.

Proposed Rules

Federal Register
Vol. 48, No. 92
Wednesday, May, 11, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

Raisins Produced From Grapes Grown in California: Decision and Referendum Order on Proposed Further Amendment of the Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision proposes an amendment of the California raisin marketing agreement and order program. The proposed amendment would: Change the method of establishing marketing policy and volume regulation to permit more timely responses to changing marketing conditions; change committee composition and nomination procedures; abolish the Executive Operations Committee and transfer its compliance responsibility to the Raisin Administrative Committee; add provisions for export merchandising programs; provide authority for advertising and promotion programs; provide authority for crediting a handler's assessments for certain kinds of advertising and promotion; and provide authority to charge interest fees on delinquent assessments. The intent of the proposed changes is to improve the effectiveness and operation of the program. Raisin producers will vote in a referendum to determine whether they favor issuance of the proposed changes.

DATE: The representative period for purposes of the referendum herein ordered is August 1, 1981, to July 31, 1982.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, (202) 447-5053.

SUPPLEMENTARY INFORMATION: Prior documents in the proceeding: Notice of Hearing—Issued August 5, 1982, and published August 11, 1982 (47 FR 34790).

Notice of Recommended Decision—Issued March 29, 1983, and published April 6, 1983 (48 FR 14911).

This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code, and therefore is not subject to the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 7 CFR Part 989

Marketing agreements and orders, Grapes, Raisins, California.

Preliminary Statement

This proposed amendment was formulated on the record of a public hearing held in Fresno, California, on August 19, 1982. The hearing notice was published in the August 11, 1982, issue of the **Federal Register** (47 FR 34790). The notice contained the proposals submitted by the Raisin Administrative Committee. The Committee works with USDA in administering the marketing order program.

This hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900).

On the basis of the evidence introduced at the hearing and the record thereof, Deputy Administrator Manley, on March 29, 1983, filed with the Hearing Clerk, U.S. Department of Agriculture, a recommended decision which contained notice of the opportunity to file written exceptions by April 19, 1983.

Findings and Conclusions

The material issues, findings and conclusions, rulings, general findings, and regulatory provisions of the recommended decision published in the April 6, 1983, issue of the **Federal Register** (48 FR 14911) are hereby incorporated herein and made a part hereof subject to the following corrections:

Page	Column	Paragraph	Line	Correction
14912	1	7	6	Change "tings" to "tends"
14914	1	2	7	Insert "based" before "upon"
14915	1	2	2	Change "porposed" to "proposed"
14916	1	1	16	Insert "plus" before "3"
14916	1	2	2	Change "nor" to "now"
14921	2	3	7–23	Remove lines 7 through 23 starting with the word "guidelines" and ending with the word "Secretary".
14921	2	4	1–7	Remove lines 1 through 7 starting with the word "At" and ending with the word "the".
14921	3		1–16	Remove lines 1 through 16 starting with the word "proposal" and ending with the word "§ 989.53".
14921	3	1	1–9	Remove lines 1 through 9 starting with the word "Consistent" and ending with the word "handler".
14923	3	1	14 and 16	Change "associations" to "association(s)"
14924	1	1	11	Change "failing" to "falling".
14924	1	2	6	Insert "each" after "at".

14926	2	1	15	Change "not" to "no"
14926	2	5	2	Change "redesignation" to "redesignating".

VOL 48 ISS 92 MY 11 1983 UMI

Rulings on exceptions

One comment was filed by the Raisin Administrative Committee in support of the proposals.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents entitled, respectively, "Marketing Agreement, as Further Amended, Regulating the Handling of Raisins Produced from Grapes Grown in California", and "Order Amending the Order, as amended, Regulating the Handling of Raisins Produced from Grapes Grown in California", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the annexed marketing agreement, be published in the **Federal Register.** The regulatory provisions of the marketing agreement, are identical with those contained in the order as hereby proposed to be amended by the annexed order which is published with the decision.

Referendum Order

It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*), to determine whether the issuance of the annexed order as amended and as hereby proposed to be further amended, regulating the handling of raisins produced from grapes grown in California is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production of the regulated commodity for market.

The representative period for the conduct of such referendum is hereby determined to be August 1, 1981, to July 31, 1982.

The agent of the Secretary to conduct such referendum is hereby designated to be Richard Van Diest and Frank M. Grasberger, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture.

Signed at Washington, D.C, on May 6, 1983.

C. W. McMillan,

Assistant Secretary, Marketing and Inspection Services.

Order [1] amending the order, as amended, regulating the handling of raisins produced from grapes grown in California.

Findings and determinations. The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto. Except the findings as to the base period for parity computation, and except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon proposed amendment of the marketing agreement, as amended, and Order No. 989, as amended (7 CFR Part 989), regulating the handling of raisins produced from grapes grown in California.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of raisins produced from grapes grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) There are no differences in the production and marketing of raisins produced from grapes grown in the production area which make necessary different terms and provisions applicable to different parts of such area; and

(5) All handling of raisins produced from grapes grown in the production area is in the current of interstate or foreign commerce directly burdens, obstructs, or affects such commerce.

Order Relative to Handling

It is therefore ordered, that on and after the effective date hereof the handling of raisins produced from grapes grown in California, shall be in conformity to and in compliance with the terms and conditions of the order, as hereby amended, as follows:

Except for the previously noted corrections, the provisions of the recommended amendment of the marketing agreement and order, as amended, contained in the recommended decision issued by the Deputy Administrator on March 29,1983, and published in the April 6, 1983 **Federal Register** (48 FR 14911), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein.

PART 989—[AMENDED]

1. Section 989.10 is revised to read as follows:

§ 989.10 Varietal types.

"Varietal types" means raisins generally recognized as possessing characteristics differing from other raisins in a degree sufficient to make necessary or desirable separate idenfitication and classification. Varietal types are the following: Natural (sun-dried) Seedless, Dipped Seedless, Golden Seedless, Muscats (including other raisins with seeds), Sultana, Zante Currant, Monukka, and Oleate and Related Seedless: *Provided,* That the Committee may, subject to approval of the Secretary, change this list of varietal types.

§ 989.19 [Removed]

2. Section 989.19 is removed.

3. Section 989.22 is revised to read as follows:

§ 989.22 District.

"District" means any one of the geographical areas referred to in § 989.26, and designated in the rules and regulations.

4. Section 989.26 is revised to read as follows:

§ 989.26 Establishment and membership.

A Raisin Administrative Committee is hereby established consisting of 47 members of whom 35 shall represent producers, 10 shall represent handlers, 1 shall represent the cooperative bargaining association(s) and 1 shall be a public member. The producer members shall be selected as follows:

(a) Producer members representing the cooperative marketing association(s) shall be members of such association(s) engaged in the handling of raisins, each of which acquired not less than 10 percent of the total raisin acquisitions during the preceding crop year, and those members shall be equal to the product, rounded to the nearest whole number, obtained by multiplying 35 by the ratio the cooperative marketing association(s) raisin acquisitions are to the acquisitions of all handlers during the preceding crop year.

(b) Producer members representing cooperative bargaining association(s) shall be members of such associations, and the number of those members shall be equal to the product, rounded to the nearest whole number, obtained by multiplying 35 by the ratio the raisins acquired by handlers from bargaining association members are to the total acquisitions of all handlers during the preceding crop year.

(c) All other producer members who shall not be members of a cooperative bargaining association(s), cooperative marketing association(s) engaged in the handling of raisins which acquired 10 percent or more of the total acquisitions during the preceding crop year, nor sold for cash to cooperative marketing association(s), shall represent all producers not defined in paragraph (a) or (b) of this section and shall be selected in the number and, when appropriate, for the districts as designated in the rules and regulations.

(d) The handler members shall be divided into two groups and include the following:

(1) Handler members shall be selected from and represent cooperative marketing association(s) engaged in the handling of raisins each of which acquired not less than 10 percent of the total raisin acquisitions during the preceding crop year, and the number of those members shall be equal to the product, rounded to the nearest whole number, obtained by multiplying 10 by the ratio of the cooperative marketing association(s) raisin acquisitions are to the total acquisitions of all handlers during the preceding crop year.

(2) The remaining handler members shall be selected from and represent all other handlers, which would include all independent handlers and small cooperative marketing association(s) who acquired less than 10 percent of the total raisin acquisitions during the preceding crop year. Handler nominees for this group shall be nominated by all handlers in the group in a manner determined by the Committee, with the approval of the Secretary, and specified in the rules and regulations.

(e) The bargaining association'(s) member shall be selected from the cooperative bargaining association(s). The public member shall be nominated by the Committee and selected by the Secretary as public member.

(f) For each member of the Committee there shall be an alternate member who shall have the same qualifications as the member for whom he is an alternate.

§ 989.26a [Removed]

5. Section 989.26a is removed.

§ 989.26b [Removed]

6. Section 989.26b is removed.

§ 989.26c [Removed]

7. Section 989.26c is removed.

8. Section 989.27 is revised to read as follows:

§ 989.27 Eligibility.

No person shall be selected or continue to serve as a member or alternate member of the Committee who is not actively engaged in the business of the group which he represents either in his own behalf, or as an officer, agent, or employee of a business unit engaged in such business: *Provided,* That only producers, as defined in § 989.11, engaged as such with respect to the most recent grape crop, are eligible to serve on the Committee. Only handlers who packed or processed raisins during the then current crop year shall be eligible to represent handlers on the Committee. Any handler eligible to represent a particular group shall continue to represent handlers for the entire term for which he was selected.

9. Section § 989.28 is revised to read as follows:

§ 989.28 Term of office.

The term of office of all representatives serving on the Committee shall be for two years and shall end on April 30 of even numbered calendar years, but each such member and alternate member shall continue to serve until their successor is selected and has qualified.

10. Section 989.29 is revised to read as follows:

§989.29 Initial members and nomination of successor members.

(a) *Initial members.* Members and alternate members of the Committee serving immediately prior to the effective date of this amended subpart shall, if thereafter they are eligible, serve on the Committee until April 30, 1984, and until their respective successors have been selected and qualified.

(b) *Nominations for successor members.* Nominations for successor members and alternate members of the Committee shall be made as follows:

(1) The Committee shall notify the cooperative marketing association(s) engaged in handling not less than 10 percent of the total raisin acquisitions during the preceding crop year, and cooperative bargaining association(s), of the date by which nominations to fill member and alternate member positions shall be made. The Committee shall give reasonable publicity of a meeting of meetings of producers who are not members of cooperative bargaining association(s), or cooperative marketing association(s) which handled 10 percent or more of the total raisin acquisitions during the preceding crop year, and of independent handlers and cooperative marketing association(s) who handled less than 10 percent of the total raisin acquisitions during the preceding crop year, for the purpose of making nominations to fill the member and alternate member positions prescribed in § 989.26 (c) and (d): *Provided,* That member and alternate member nominations by independent handlers and cooperative marketing association(s) who acquired less than 10 percent of the total raisin acquisitions during the preceding crop year may be made to the Committee by mail in lieu of meetings.

(2) Any producer representing independent producers and producers who are affiliated with cooperative marketing association(s) handling less than 10 percent of the total raisin acquisitions during the preceding crop year must have produced grapes which were made into raisins in the particular district for which he is nominated, to represent said district as a producer member or alternate producer member on the Committee. In the event any such nominees are engaged as producers in more than one district, they may be a nominee for only one district. One or more producers or producers affiliated with cooperative marketing association(s) handling less than 10 percent of the total raisin acquisitions during the preceding crop year may be nominated for each such producer member or alternate member position. Each independent producer and producer affiliated with cooperative marketing association(s) handling less than 10 percent of the total raisin acquisitions during the preceding crop year shall cast only one vote with respect to each position for which nominations are to be made. The person receiving the majority of the votes with respect to each such position to be filled shall be the person to be certified to the Secretary as the nominee. In the event

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

VOL 48 ISS 92 MY 11 1983 UMI

no person receives a majority there shall be a run off vote between the two persons receiving the largest number of votes. The eligibility of each producer voting in a producer nomination meeting shall be certified by the Committee during or after the meeting, and in the event one or more producers who voted were not eligible and this may have affected the result of any nomination vote, another meeting with respect to such producer nominations shall be held.

(3) One or more eligible handlers for each handler position to be filled may be proposed for nomination to represent independent handlers and cooperative marketing association(s) which acquired less than 10 percent of the total raisin acquisitions during the preceding crop year on the Committee. Nominations shall be made by and from handlers, or employees, representatives or agents of handlers falling within such groups. Each handler shall cast only one vote with respect to each position for which nomination is to be made. The person receiving the most votes with respect to each handler member of handler alternate member position shall be the person to be certified to the Secretary as the nominee for each such position.

(4) Each vote cast shall be on behalf of the person voting, his agent, subsidiaries, affiliates, and representatives. Voting at each meeting shall be in person. The results of each ballot at each handler meeting shall be announced at that meeting. Voting at each meeting of producers shall be by secret ballot. The results of the voting at producer meetings shall be announced by the Committee following the verifications of eligibility of those participating at such meetings.

(5) Each nomination shall be certified by the Committee to the Secretary on or before April 5 immediately preceding the commencement of the term of office of the member or alternate member position for which the nomination is certified.

11. Section 989.30 is revised to read as follows:

§ 989.30 Selection.

The Secretary shall select producer, handler, cooperative bargaining association(s), and public members and alternate members in the number specified in 989.26, as applicable, and with the qualifications specified in § 989.27. Such selections may be made from nominations certified pursuant to § 989.29 or from other eligible producers, handlers, or cooperative bargaining association(s) officers or employees.

12. Section 989.32 is revised to read as follows:

§ 989.32 Acceptance.

Each person to be selected by the Secretary as a member or as an alternate member of the Committee shall, prior to such selection, qualify by advising the Secretary that he/she agrees to serve in the position for which nominated for selection.

13. Section 989.35 is amended by adding a new paragraph (d) reading as follows:

§ 989.35 Powers.

* * * * *

(d) To receive, investigate, and report to the Secretary complaints of violations of this part.

14. Section 989.36 is amended by redesignating seriatim current paragraphs (b) through (k) as paragraphs (c) through (l), and adding a new paragraph (b) reading as follows:

§ 989.36 Duties.

* * * * *

(b) To investigate compliance and to use means available to it to prevent violations of this part.

* * * * *

15. Section 989.36(j), redesignated as § 989.36(k) is amended by removing the words "and the making of nominations to the Secretary for member and alternate member positions on the Executive Operations Committee".

16. Section 989.38 is amended by removing the phrase "Except as otherwise provided in § 989.45," from the second sentence, and by removing the fifth sentence. As amended, § 989.38 reads as follows:

§ 989.38 Procedure.

The Committee shall meet at the call of the chairman, or vice-chairman when acting as chairman, or at the call of any three members. All decisions of the Committee reached shall be by majority vote of the members present. All votes shall be cast in person and a quorum must be present. The presence of 25 members shall be required to constitute a quorum. The Committee shall give to the Secretary the same notice of meetings of the Committee as it gives to its members.

§ 989.39 [Amended]

17. Section 989.39 is amended by removing the words "and the Executive Operations Committee," from the first sentence.

§ 989.43 through 989.52 [Removed]

18. Sections 989.43 through 989.52 and the center heading "Executive Operations Committee" preceding § 989.43 are removed:

19. Section 989.53 is revised to read as follows:

§ 989.53 Research and development.

(a) *General.* The Committee, with the approval of the Secretary, may establish or provide for the establishment of projects involving marketing research and development and marketing promotion including paid advertising, designed to assist, improve, or promote the marketing, distribution, and consumption of raisins in domestic and foreign markets. These projects may include, but need not be limited to those designed to:

(1) Improve through research the accuracy of raisin production estimates;

(2) Improve through research the preparation for market, sanitation, quality, condition, storability, processing, or packaging of raisins;

(3) Ascertain through research the factors affecting acceptance of raisins by manufacturers or consumers;

(4) Promote the marketing, distribution, or consumption of raisins in domestic and foreign markets by collecting data thereon, consulting with members of the trade, and making the information available to producers, handlers, and exporters; and

(5) Promote the marketing, distribution, or consumption of raisins in foreign markets through the use of merchandisirlg programs.

The expense of any such project relating solely to free tonnage raisins shall be paid from funds collected pursuant to §989.80. The expense of any such project relating solely to reserve tonnage raisins shall be paid from the sale proceeds of such raisins. If any such project encompasses both free tonnage and reserve tonnage raisins, such as one which is designed to promote the consumption in export outlets of raisins generally on a long-term basis, the expense of the project may be allocated between the assessment fund and the pool fund.

(b) *Creditable expenditures.* The Committee, with the approval of the Secretary, may provide for crediting all or any portion of a handler's direct expenditures for marketing promotion, including paid advertising, that promotes the sale of raisins, raisin products, or their use. No handler shall receive credit for any allowable direct expenditures that would exceed the total of his assessment obligation which is attributable to that portion of his assessment designated for marketing promotion including paid advertising.

(c) *Criteria.* Before any project involving marketing promotion, including paid advertising, and the crediting of the handler's pro rata expense assessment obligation of handlers is undertaken pursuant to this section, the Secretary after recommendation by the Committee, shall approve appropriate criteria to effectively regulate such activity.

20. Section 989.54 is revised to read as follows:

§ 989.54 Marketing policy.

(a) *Trade demand.* On or before August 15 of each crop year, the Committee shall hold a meeting to review shipment data, inventory data, and other matters relating to the quantity of raisins of all varietal types. For any varietal type for which a free tonnage percentage may be recommended, the Committee shall compute a trade demand. The trade demand shall be 90 percent of the prior crop year's shipments (converted to a natural condition weight) of free tonnage and reserve tonnage sold for free use for that varietal type, into all market outlets, adjusted by the carryin on August 1 of the current crop year and the desirable carryout for the varietal type at the end of that crop year. If the prior year's shipments were limited because of crop conditions, the Committee may select the shipments of one of the three years preceding the prior crop year. The desirable carryout shall be increased from 35,000 to 50,000 tons for Natural (sun-dried) Seedless raisins at a rate of 5,000 tons per year for three crop years, following the effective date of this amended subpart. The desirable carryout for Dipped Seedless raisins shall be 1,500 tons, and for Oleate and Related Seedless raisins, 1,500 tons. The trade demand computed by the Committee shall be announced by the Committee in accordance with paragraph (h) of this section.

(b) *Preliminary percentages.* On or before October 5 of each crop year (except that the Committee may extend this date not more than five business days if warranted by a late crop), the Committee shall estimate the production of any varietal type of raisins for which it has computed a trade demand. If the Committee determines that volume regulation is desirable during the crop year for that varietal type, it shall compute and announce preliminary free and reserve percentages for that varietal type. The Committee shall compute a preliminary free percentage to release 85 percent of the computed trade demand, if it determines that a field price has been established for that varietal type, or 65 percent of the trade demand if no field price has been established. The preliminary free percentage shall be computed by multiplying the trade demand by either 85 percent or 65 percent (as the case may be) and dividing the product by the estimated production of that varietal type and rounding the resulting percentage to the nearest full percent. The difference between 100 percent and the preliminary free percentage shall be the preliminary reserve percentage.

(c) *Interim percentages.* Prior to February 15, the Committee may modify the preliminary free and reserve percentages to release less than the trade demand.

(d) *Final percentages.* No later than February 15, the Committee shall recommend, to the Secretary, final free and reserve percentages which will tend to release the full trade demand for any varietal type for which preliminary or interim percentages have been computed and announced. The difference between any final free percentage designated by the Secretary and 100 percent shall be the final reserve percentage. With its recommendation, the Committee shall report on its consideration of the factors in paragraph (e) of this section.

(e) *Factors.* When computing preliminary and interim percentages, or determining final percentages for recommendation to the Secretary, the Committee shall give consideration to the following factors:

(1) The estimated tonnage held by producers, handlers, and for the account of the Committee at the beginning of the crop year;

(2) The expected general quality and any modifications of the minimum grade standards;

(3) The estimated tonnage of standard and off-grade raisins which will be produced;

(4) If different than the computed trade demand, the estimated trade demand for raisins in free tonnage outlets;

(5) If not estimated as provided in paragraph (a) of this section, an estimated desirable carryout at the end of the crop year for free tonnage and, if applicable, for reserve tonnage;

(6) The estimated market requirements for raisins outside free tonnage outlets, considering the estimated world raisin supply and demand situation;

(7) Current prices being received and the probable general level of prices to be received for raisins by producers and handlers;

(8) The trend and level of consumer income;

(9) Any prohibition of trade practices, pursuant to § 989.62, intended for the crop year, and

(10) Any other pertinent factors bearing on the marketing of raisins including the estimated supply of and demand for other varietal types and regulations applicable thereto.

(f) *Modification.* In the event the Committee subsequently deems it advisable to modify its marketing policy on any crop, because of national emergency, crop failure, or other major change in economic conditions, it shall hold a meeting for that purpose, and file a report thereof with the Secretary within 5 days (exclusive of Saturdays, Sundays, and holidays) after the holding of such meeting, which report shall show such modification and the basis therefor.

(g) *Reserve tonnage to sell as free tonnage.* On or before November 15 of the crop year, the Committee shall make two simultaneous offers to reserve tonnage to handlers to sell as free tonnage for each varietal type for which preliminary percentages have been computed and announced. One offer shall consist of a quantity equal to 10 percent of the prior year's (or the alternative year selected by the Committee pursuant to paragraph (a) of this section) shipments of free tonnage and reserve tonnage sold for free use into all market outlets to equate the current year's supply with the prior year's shipments. This offer shall be allocated to handlers on the basis of their prior year's acquisitions. The second offer, to provide for market expansion, shall consist of a quantity equal to 10 percent of the prior year's (or the alternative year selected by the Committee pursuant to paragraph (a) of this section) shipments of free tonnage and reserve tonnage sold for free use. This offer shall be allocated to handlers on the basis of their prior year's shipments of free tonnage and reserve tonnage sold for free use. Each offer shall be open to handlers not more than five business days, and subsequently, two offers of any tonnage unsold in the original offers open not more than two business days each, may be made. The reoffer tonnage shall be allocated to handlers who purchase 100 percent of their allocation in preceding offers, and shall be on the basis of the quantity each handler purchased, as a percentage of the total quantity purchased by all handlers eligible to participate. At the close of the second reoffer, any remaining tonnage may be offered to handlers who purchased all of their allocations from previous offers on a first-come first-served basis and such offer shall be open to handlers for one business day. Any handler who had no shipments or acquisitions of raisins

VOL 48 ISS 92 MAY 11 1983 UMI

during the prior crop year will be allocated raisins under these offers on the basis of his acquisition (up to the time the original offer is made) of raisins in the current crop year. If field prices are not established, the offer shall be made not more than fifteen days following such establishment. The price of reserve tonnage raisins offered to handlers to sell as free tonnage, pursuant to this paragraph, shall be the established field price for free tonnage raisins of that varietal type, plus 3 percent of the established field price, plus the estimated costs incurred by the Committee for equity holders.

(h) *Publicity.* The Committee shall promptly give reasonable publicity to producers, dehydrators, handlers, and the cooperative bargaining association(s) of each meeting to consider a marketing policy or any modification thereof, and each such meeting shall be open to them. Similar publicity shall be given to producers, dehydrators, handlers, and the cooperative bargaining association(s) of each marketing policy report or modification thereof, filed with the Secretary and of the Secretary's action thereon. Copies of all marketing policy reports shall be maintained in the office of the Committee, where they shall be made available for examination by any producer, dehydrator, handler, or cooperative bargaining association representative. The Committee shall notify handlers, dehydrators and the cooperative bargaining association(s), and give reasonable publicity to producers of its computation of the trade demand, preliminary percentages, and interim percentages and shall notify handlers, dehydrators, and the cooperative bargaining association(s) of the Secretary's action on percentages by registered or certified mail.

21. Section 989.55 is revised to read as follows:

§ 989.55 Regulation by the Secretary.

Whenever the Secretary finds, from the recommendation and supporting information supplied by the Committee or from other available information, that to designate final free and reserve percentages for any varietal type of standard raisins acquired by handlers, during the crop year will tend to effectuate the declared policy of the Act, the Secretary shall designate such percentages. In the event the Secretary finds that suspension or termination of any percentages computed by the Committee or designated by the Secretary tend to effectuate the declared policy of the Act, the Secretary shall suspend or terminate such percentages.

22. Section 989.65 is revised to read as follows:

§ 989.65 Free and reserve tonnage.

The standard raisins acquired by handlers which are free tonnage, and any reserve tonnage purchased for free use, may be disposed of by him in any marketing channel, subject to the applicable provisions of this part. A handler's free tonnage of a varietal type of raisin shall be either the free percentage of the standard raisins of the varietal type acquired by him or all of the standard raisins of the varietal type acquired by him no free percentage is established by the Committee or designated by the Secretary for that varietal type. A handler's reserve tonnage of a varietal type shall be the reserve percentage of the standard raisins of that varietal type acquired by him.

§ 989.66 [Amended]

23. Section 989.66 is amended by removing the proviso in paragraph (b)(1) and changing the punctuation after the word "control" from a colon (:) to a period (.).

§ 989.67 [Amended]

24. Section 989.67(j) is amended by changing the reference from "§ 989.54(d)" to "§ 989.54(g)".

§ 989.69 [Removed]

25. Section 989.69 is removed.

26. Secton 989.73 is amended by redesignating current paragraph (c) as (d), and adding a new paragraph (c) reading as follows:

§ 989.73 Reports

* * * * *

(c) Each handler shall file such reports of creditable promotion including paid advertising as recommended by the Committee and approved by the Secretary.

* * * * *

§ 989.76 [Amended]

27. Section 989.76 is amended by adding the following sentence at the end of that section reading as follows: The Committee, with the approval of the Secretary, may prescribe rules and regulations to include under this section handler records that detail promotion and advertising activities which the Committee may need to perform its functions under § 989.53.

§ 989.77 [Amended]

28. Section 989.77 is amended by adding at the end of the first sentences the phrase "and promotion and advertising activities conducted by handlers under § 989.53".

29. The first sentence of § 989.80(a) is amended by adding at the end of the sentence the words, "less any amounts credited pursuant to § 989.53".

30. Section § 989.80 is revised by adding paragraph (d) to read as follows:

§ 989.80 Assessments

* * * * *

(d) Each handler shall, with respect to administrative assessments not paid within 30 calendar days of the date o. the Committee's invoice, pay to the Committee interest on the unpaid assessment at the rate of the prime rate established by the bank in which the Committee has its administrative assessment funds deposited, on the day that the administrative assessment becomes delinquent plus 2 percent; and further, that such rate of interest be added to the bill monthly until the delinquent handler's assessment plus applicable interest has been paid: *Provided,* That the Committee may, with the approval of the Secretary, modify the interest rate applicable to delinquent handler's assessment through the establishment of applicable rules and regulations.

§ 989.85 [Amended]

31. Section § 989.85 is amended by removing the words "and no member or alternate member of the Executive Operations Committee".

§ 989.95 [Amended]

32. Section § 989.95 is amended by removing the words: "and the Executive Operations Committee" from the first sentence; "or of the Executive Operations Committee" from the second sentence, and "or the Executive Operations Committee" from the third sentence.

BILLING CODE 3410-02-M

Commodity Credit Corporation

7 CFR Part 1446

Proposed Determination of Price Support Differentials for the 1983-Crop Peanut Loan and Purchase Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed determination.

SUMMARY: The Commodity Credit Corporation (CCC) proposes to make determinations with respect to the 1983-crop of peanuts for the purpose of adjusting loan and purchase rates for quota and additional peanuts for differences in type, quality, location and other factors. This notice invites written comments regarding these matters.

DATE: Comments must be received on or before June 10, 1983 in order to be assured of consideration.

ADDRESS: Interested persons are invited to send comments to Director, Tobacco and Peanuts Division, ASCS, U.S. Department of Agriculture, Room 5750 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Solomon J. Whitfield, Program Specialist, Tobacco and Peanuts Division (202) 447-5754.

SUPPLEMENTARY INFORMATION: This notice of proposed determination has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512-1, and has been classified "not major." It has been determined that this proposed determination will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographical regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation or the ability of United States based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the federal assistance program that this proposed determination applies to are: Commodity Loans and Purchases, 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice of proposed determination since CCC is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this determination.

The 1983-Crop Peanut Loan and Purchase Program is authorized by the Agricultural Act of 1949, as amended (hereinafter referred to as the "Act"), and the Commodity Credit Corporation Charter Act, as amended. The program is intended to stabilize market prices and to protect producers, handlers, processors and consumers. Section 403 of the Act provides that appropriate adjustments may be made in the support price for any commodity for differences in grade, type, staple quality, location, and other factors. Section 403 also provides that such adjustments shall, insofar as practicable, be made in such manner that the average support price for such commodity will, on the basis of the anticipated incidence of such factors, be equal to the level of support determined for the applicable crop year. A ton of farmers stock peanuts is likely to include a large, but variable, proportion of high quality edible peanuts referred to as sound mature kernels (SMK) and sound splits (SS), as well as smaller quantities of lower quality loose shelled kernels (LSK), other kernels (OK), and damaged kernels (DK). The value of any ton farmers stock of peanuts, therefore, is determined on the basis of the quantity and mix of these kernel values, plus a premium for extra large kernels (ELK) in the case of Virginia type peanuts, and discounts for such factors as foreign material, excess moisture, damage, and the possible presence of Aspergillus flavus mold. The current differentials—i.e., those which applied to the 1982 crop—carry the following price adjustments by peanut types for sound mature kernels: (1) The sound mature kernel. (SMK) value of Virginia type peanuts is 2 percent above the SMK value of the Runner type peanuts, and (2) the SMK value of Spanish type peanuts is one-half percent above the SMK value of Runner type peanuts. Under current practice, the method of calculating support prices for farm-stored loans is the same as that for warehouse storage loans so that all producers will be treated fairly. Accordingly, unless otherwise indicated, the basic rates and discounts applicable to warehouse storage loans also apply to farm-stored loans. The full 1982 schedule of adjustments is set out below. The support value of additional peanuts was computed for the 1982-crop by multiplying what would otherwise have been the value of such peanuts, based upon the 1982 differentials had they been quota peanuts, by .3636. This factor represents the ratio between the 1982 national average support price per ton for additional peanuts established by the Secretary and the 1982 national average support price per ton for quota peanuts established by the Secretary. For the 1983-crop, that factor is .3364.

1982 Crop Peanut Price Support Differentials for Warehouse and Farm-Stored Loan Program

(a) *Average 1982 support values by type per average grade ton of peanuts.—(1) Support value for warehouse-stored loans:*

Type:	Per average grade tons
Virginia	$544.39
Runner	553.82
Spanish	536.43
Valencia:	
Southwest area—suitable for cleaning and roasting	$544.39
Southwest area—not suitable for cleaning and roasting	535.43
Areas other than Southwest	535.43

(2) *Support value for farm-stored loans:*

Type:	Per average grade tons
Virginia	$544
Runner	564
Spanish	536
Valencia: Southwest area	544
Areas other than Southwest	535

(b) *Calculation of support values for quota peanuts.* The support price per ton for 1982-crop quota peanuts of a particular type, and quality is calculated on the basis of the following rates, premiums, and discounts (with no value assigned to damaged kernels), except that the minimum support value for any lot of eligible peanuts of any type is 8 cents per pound of kernels in the lot:

(1) *Kernel value per ton excluding loose shelled kernels.* (i) The price per ton for each percent of sound mature and sound split kernels is:

Type:	Per percent
Virginia	$7.976
Runner	7.820
Spanish	7.859
Valencia:	
Southwest area—suitable for cleaning and roasting	8.209
Southwest area—not suitable for cleaning and roasting	7.859
Areas other than Southwest	7.859

(ii) The price per ton for each percent of other kernels is:

Type:	Per percent
All types	$1.40

(iii) The premium per ton for each percent of extra large kernels in Virginia is:

Type:	Per percent
Virginia extra large kernels	$0.45

However, no premium for extra large kernels is applicable to any lot of such peanuts containing more than 4 percent damaged kernels.

(2) *Value of loose shelled kernels per pound.* The price for each pound of loose shelled kernels is:

VOL 48 ISS 92 MAY 11 1983 UMI

	Per pound
All types	$0.07

(3) *Foreign material discount.* For all types of peanuts, the discount per ton for foreign material is as follows:

Percent:	Discount
0 through 4	$0
5	1.00
6	2.00
7	3.00
8	4.00
9	5.00
10	6.00
11	7.00
12	8.50
13	10.00
14	11.50
15	13.00
16 and over	(1)

[1] For each full percent in excess of 15 pct deduct an additional $2.

(4) *Sound split kernel discount.* For all types of peanuts, the discount per ton for sound split kernels is as follows:

Percent:	Discount
1 through 4	$0
5	1.00
6	1.80
7 and over	(1)

[1] For each full percent in excess of 6 pct deduct an additional $0.80.

(5) *Damaged kernel discount.* (i) For all types of peanuts, the discount per ton for damaged kernels is as follows:

Percent:	Discount
1	$0
2	3.40
3	7.00
4	11.00
5	25.00
6	40.00
7	60.00
8 to 9	80.00
10 and over	100.00

(ii) Notwithstanding the above discount schedule, the damaged kernel discount for Segregation 2 peanuts transferred from additional to quota loan pools shall not exceed $25 per ton.

(6) *Price adjustment for peanuts sampled with other than a pneumatic sampler.* The support price per ton for Virginia type peanuts sampled with other than a pneumatic sampler is reduced by $0.10 per every percentage point of sound mature and sound split kernels.

(7) *Mixed type discount.* Individual lots of farmer stock peanuts containing mixtures of two or more types in which there is less than 90 percent of any one type are supported at a rate which is $10 per ton less than the support price available to the type in the mixture having the lowest support price.

(8) *Location adjustments.* (i) Farmers stock peanuts delivered to the associations for a warehouse stored loan for price support advances in the States specified, where peanuts are not customarily shelled or crushed, are discounted as follows:

State:	Per ton
Arizona	$25.00
Arkansas	10.00
California	33.00
Louisiana	7.00
Mississippi	10.00
Missouri	10.00
Tennessee	25.00

(ii) Farmers stock peanuts placed under farm stored loan for price support advances in the States specified, where peanuts are not customarily shelled or crushed, are discounted as follows:

(a) In States specified in paragraph (8)(i), the peanuts are discounted as specified therein.

(b) In Puerto Rico and all other States (excluding those specified in paragraph (8)(i) and Alabama, Florida, Georgia, New Mexico, North Carolina, Oklahoma, South Carolina, Texas, and Virginia), the peanuts are discounted at $40.00 per ton.

(9) *Virginia Type Peanuts.* Virginia type peanuts, in order to be eligible for price support as Virginia type peanuts, must contain 40 percent or more "fancy" size peanuts as determined by a presizer with the rollers set at 31/64 inch space. Virginia type peanuts which are determined to contain less that 40 percent "fancy" size peanuts are supported (but not classed) as though they were Runner type.

(10) *Discount for Aspergillus flavus mold* (segregation 3 peanuts). There is no discount applied to segregation 3 peanuts for Aspergillus flavus mold when such peanuts are pledged as loan collateral at the loan rate applicable to additional peanuts. Should such peanuts later be transferred to quota loan pool in accordance with 7 CFR 1446.66, they are discounted at the rate of $25 per net ton from the quota price support loan rate.

(c) *Calculation of support values for additional peanuts.* The support price per ton for 1982-crop additional peanuts of a particular type and quality shall be calculated on the basis of 36.36 percent of the same rates, premiums, and discounts which are applicable to quota peanuts. This percentage was computed by dividing the national average support rate per ton for additional peanuts by the national average support rate per ton for quota peanuts.

Proposed Determination

CCC hereby proposes to make determinations with regard to price support differentials for the 1983-Crop Peanut Loan and Purchase Program on the basis of the same factors used in establishing differentials for the 1982-crop. The determination will be used to adjust the loan and purchase rates for quota and additional peanuts for differences in type, quality, location and other factors.

Before making a final determination, with respect to these matters, consideration will be given to any relevant data, views, recommendations or other comments which are submitted in writing within the comment period to the Director, Tobacco and Peanuts Division, ASCS–USDA. All written submissions made pursuant to this notice will be made available for inspection from 8:15 a.m. to 4:45 p.m., Monday through Friday, in Room 5750–South Building.

BILLING CODE 3410-05-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 981

Licensing of Ocean Thermal Energy Conversion Facilities and Plantships

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Review of existing rules with request for comments.

SUMMARY: The Ocean Thermal Energy Conversion (OTEC) Act of 1980, 42 U.S.C. 9127, (Pub. L. 96–320), hereinafter referred to as the Act, requires that the National Oceanic and Atmospheric Administration (NOAA) periodically review the regulations applying to the licensing of OTEC facilities and plantships, at intervals of not more than every three years. The purpose of this review of existing rules with a request for comments is to determine the impact of the existing OTEC licensing regulations on the development, evolution, and commercialization of OTEC technology. The OTEC licensing final rules, which are the subject of this review, are published at 15 CFR Part 981 *et seq.* The Act authorizes NOAA to promulgate revisions to the final rule which are necessary and appropriate based on this review. This notice provides interested persons with an opportunity to contribute to the review of the existing OTEC licensing regulations. Interested persons are invited to submit written or oral data, views, and comments concerning the issues identified in this notice and any other aspect to the existing OTEC licensing regulations. A public hearing may be held in Washington, D.C. if NOAA determines it is warranted. Persons who wish NOAA to conduct a public hearing should include that request in their comments.

DATE: Comments must be received by NOAA on or before Friday, July 1, 1983.

ADDRESS: Submit comments to Richard D. Norling, OTEC Program Manager, Ocean Minerals and Energy Division, Office of Ocean and Coastal Resource Management, National Ocean Service, National Oceanic and Atmospheric Administration, Page 1 Building, Room 105, 2001 Wisconsin Avenue, NW., Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT: James B. Rucker, Ocean Minerals and Energy Division, NOAA at the above address. Telephone: (202) 254–3483.

SUPPLEMENTARY INFORMATION:

I. Prior Actions

NOAA's final rules for the licensing, ownership and construction of OTEC facilities and plantships are published in the **Federal Register** July 31, 1981 (46 FR 39388–39340). The final rules were supported by a programmatic environmental impact statement (EIS) and a combined Regulatory Impact Analysis and Regulatory Flexibility Analysis (RIA) both dated July 1981.

II. Availability of Comments

All comments received in response to this review of existing rules will be available for public examination and copying during normal business hours in Room 105, Page 1 Building, 2001 Wisconsin Avenue, NW., Washington, D.C.

III. Results of Review

The Act directs NOAA to promulgate any revisions to the effective regulations as are necessary and appropriate based on the review, to ensure that the regulations do not impede the development, evolution, and commercialization of OTEC. Should this review result in a proposed significant change in the regulations, NOAA will categorize the proposed change as "major" under Executive Order 12044. In that event, NOAA will retain the approach and language of the original EIS and RIA documents to the extent they are appropriate, and supplement them as necessary to address any alterations suggested by this review. NOAA will include the results of this review. NOAA will include the results of this review in the Annual Report to Congress describing its OTEC activities during fiscal year 1983.

IV. General Background

OTEC facilities and plantships (a plantship is basically an OTEC vessel that floats on or moves through the water) will produce electric power, or energy-intensive products, by using the temperature difference between warm ocean surface waters and cold, deep (approximately 500 to 1,000 meters) waters. The OTEC principle can be applied most economically in areas where the temperature difference between surface and deep waters is at least 20°C. The electricity generated could be transmitted to shore by cable and then distributed via normal electric distribution grids. The energy also could be used at sea to produce methanol, ammonia, or other products which would be transported to shore by conventional marine transportation methods.

The OTEC industry remains in a formative stage but progress has been made since the time of NOAA's original rulemaking. The basic principles of OTEC power generation have been tested, but the hardware, engineering, the operational requirements of commercial scale OTEC operations have not been fully developed. Construction of an operating commercial OTEC plant will require a capital investment of a hundred million or more dollars. Efforts are underway by private industry to develop OTEC technology and acquire the necessary capital to build plants in Hawaii, Guam and the U.S. Virgin Islands. Four companies have requested pre-application consultation with NOAA under 15 CFR 981.70 of the NOAA OTEC licensing program regulations, but no application for an OTEC license has yet been filed.

V. Issues

NOAA invites comments on the existing regulations for the licensing of OTEC facilities and plantships. Specifically, NOAA seeks to determine whether or not any aspect of NOAA's OTEC licensing regulations has contributed to the delay in filing of license applications by industry. NOAA seeks comments on the issues identified in this notice and on any aspect of the OTEC licensing regulations.

The Amount of License Application Fee. Under existing regulations the applicant must submit a non-refundable application fee of $250,000 with the OTEC license application (15 CFR 981.130). Section 102(h) of the OTEC Act (Pub. L. 96–320) states that the amount of the fee shall reflect the reasonable administrative costs incurred in reviewing and processing the application. NOAA developed the overall cost estimate used in the regulations on the basis of the level of effort required within the NOAA program office to process a single application, including costs to prepare the site-specific consolidated environmental impact statement required by Section 107(e) of the OTEC Act. That consolidated statement must fulfill the requirements of all Federal agencies in carrying out their permitting and authorizing responsibilities on the license application. The estimate also includes costs of holding the required public hearings on the application in the District of Columbia and in adjacent coastal states, as well as support costs for environmental analysis and technical review of the application. The processing cost estimate does not include general administrative overhead in costs associated with other Federal agency actions on the application.

- Is the $250,000 license fee a reasonable estimate? Should other factors be considered by NOAA? Should present factors be reevaluated? Should the fee be subject to revision if two OTEC applications are submitted for the same or very similar location, resulting in fewer administrative costs?
- Should NOAA consider including in its criteria for setting the fee the quality of preapplication environmental work performed by the applicant?
- Should NOAA regulations include a provision to charge OTEC applicants for actual licensing-related costs as they are incurred, even if the costs exceed the present fee level?
- Should a different fee installment schedule be devised to reduce the large initial costs of OTEC projects?

The Duration of the OTEC License Procedure. By the terms of the OTEC Act, NOAA must complete processing of the licensing application within 356 days after its receipt. By most standards, the present application processing schedule is quite short. NOAA welcomes

VOL

1983
UMI

suggestions on procedures to future streamline the process.

Information to be Submitted with an OTEC Application. Subpart B of the NOAA OTEC regulations (15 CFR (981.169–280) outlines the information that must be submitted with an application. During the original rulemaking many comments were received on Subpart B. NOAA attempted to reduce regulatory burdens by avoiding long lists of required information. However, certain information on the proposed OTEC facility must be made available at the start of the review for NOAA to meet the stringent statutory deadlines and properly coordinate the activities of other State and Federal government agencies.

- Do the NOAA information requirements, especially in Subpart B, allow enough flexibility for the developing industry? What changes, if any, could make this section more useful and meaningful to those who plan OTEC development?
- Are the information requirements pertaining to the environment reasonable?

Other Issues. NOAA invites public comment on any other issues which should be considered in reviewing the OTEC regulations.

VI. Authority

This notice to conduct a review of final regulations for the licensing of OTEC facilities and plantships is issued under authority of section 117 of the Act (42 U.S.C. 9127).

FEDERAL TRADE COMMISSION

16 CFR Part 13

[File No. 771 0055]

Great Dane Trailers, Inc. and Great Dane Distributor Council; Proposed Consent Agreements With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreements.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, these consent agreements, accepted subject to final Commission approval, would, among other things, prohibit the manufacturer and seller of Great Dane truck trailers, an unincorporated dealer's association, and its individual members, from taking any action which frustrates or eliminates competition in the sale of new Great Dane truck trailers. The dealer's association would be required to distribute a copy of the order to all current and furute members and to ensure that members' sales personnel would also be provided with a copy of the order. Great Dane Trailers, Inc. would be barred from entering into any agreement with the dealer's association or its members to restrict sales to certain territories or customers; and from formulating or utilizing exclusive territories until Dec. 1, 1984. The manufacturer would be further required to make available to dealers and customers a brochure listing all independent dealers and advising that any dealers may be contacted regarding the purchase of a new Great Dane truck trailer.

DATE: Comments must be received on or before July 11, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Harold E. Kirtz, Director, 1R, Atlanta, Regional Office Federal Trade Commission, 1718 Peachtree St., NW., Room 1000, Atlana, GA. 30367. (404) 881–4836.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46, and § 2.34 of the Commission's Rules of Practice (16 CFR 2.34), notice is hereby given that the following consent agreements containing consent orders to cease and desist and explanations thereof, having been filed with and accepted, subject to final approval, by the Commission, have been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with Section 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Trade practices, Truck trailers.

In the matter of Great Dane Trailers, Inc., a corporation, and Great Dane Distributor Council, an unincorporated association, and its members, File No. 771 0055. Agreement containing consent order to cease and desist.

The Federal Trade Commission having initiated an investigation of certain acts and practices of Great Dane Trailers, Inc., a corporation, and it now appearing that Great Dane Trailers, Inc., a corporation, hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated,

It is hereby agreed by and between Great Dane Trailers, Inc., and its attorneys and counsel for the Federal Trade Commission that:

1. Proposed respondent Great Dane Trailers, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of Georgia with its main office and principal place of business located on East Lathorp Avenue in Savannah, Georgia 31402.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint attached hereto.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60)) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed repondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute either an admission by proposed respondent that the law has been violated as alleged in the draft of compliant here attached or an admission of any of the facts or conclusions alleged in said complaint, except those relating to jurisdiction found in paragraphs one through six.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public

in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed to order to proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construcing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purpose of this order, the following definitions shall apply:

A. "Truck trailer" is a property-carrying vehicle, or chassis thereof, drawn by a truck or truck tractor and having one or more axles with a rating of 10,000 pounds or more per axle.

B. "Dealer" is any proprietorship, partnership, firm, or corporation authorized by Great Dane Trailers, Inc., to sell its new truck trailers but which is not owned or controlled by Great Dane Trailers, Inc. Provided, however, that two or more dealers that are majority-owned subsidiaries of a common parent shall not be regarded as separate dealers for the purposes of this order.

C. "Factory branch" is any corporation which is controlled by, or a division of, Great Dane Trailers, Inc., and which sells new Great Dane truck trailers.

D. "Area of primary responsibility" is a geographic area or customer or customers assigned to a dealer on a nonexclusive basis for which the dealer is responsible for sales penetration.

E. "Exclusive territory" is any agreement restricting or prohibiting a dealer from making sales outside of its territory, area of primary responsibility, or historic trading area.

F. "Profit-pass-over" is any agreement which provides compensation to a dealer by a second dealer directly or indirectly for sales made within the first dealer's area of primary responsibility or historic trading area by the second dealer, except for services actualy performed in preparing new Great Dane truck trailers for delivery, including but not limited to clean up costs, repairs, demurrage, transportation, or any other costs related to the handling of such trailers.

I

It is ordered that respondent, Great Dane Trailers, Inc., (hereinafter referred to as "Great Dane"), a corporation, its successors and assigns, and respondent's officers, agents, representatives and employees, directly or indirectly, through any corporation, subsidiary, division or other device used in connection with the manufacture, advertisement, offer for sale, sale or distribution of any new Great Dane truck trailers in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, forthwith cease and desist from:

1. Entering into a contract, combination or conspiracy among any of its dealers or with any dealer association, or aiding and abetting any such contract, combination or conspiracy, which has the purpose or effect of limiting, allocating or restricting the territory, customer or class of customers in which or to whom a dealer may solicit or sell new Great Dane truck trailers. The foregoing shall not be deemed to limit or prohibit Great Dane's ability to take any unilateral action that is otherwise lawful, with respect to the marketing or distribution of its products, even though it has been suggested or encouraged by one of more dealers.

2. From the date this order is served upon respondent until December 1, 1984, imposing or attempting to impose any limitation or restriction (including but not limited to exclusive territories and profit-pass-over restrictions) respecting the geographic area, customer, or class of customers in which or to whom a dealer may solicit or sell new Great Dane trucks trailers.

3. From the date this order is served upon respondent until December 1, 1984, entering into, attempting to enter into, continuing, maintaining or enforcing any contract, understanding, or agreement to limit, allocate, or restrict the territory, customer, or class of customers in which or to whom a dealer may solicit or sell new Great Dane truck trailers (including but not limit to exclusive territories and profit-pass-over restrictions).

Provided, however, that nothing in this order shall prohibit Great Dane Trailers, Inc., from utilizing areas of primary responsibility.

Provided further, however, that nothing in this order shall prohibit Great Dane from terminating any dealer, or deciding not to renew any dealer's contract, for failure to achieve adequate levels of sales performance, to pay accounts promptly, to provide adequate services and warranty repair, or any other legal business reason, provided that paragraphs I(1), I(2), or I(3) of this order has not been violated as to such dealer by such termination.

Provided further, however, that nothing in this order shall prohibit Great Dane from agreeing with any dealer that it will not authorize a new dealer or establish a factory branch within a distance of up to 150 miles of that dealer.

II

A. It is further ordered that respondent shall distribute a copy of this order to all operating divisions of said corporation and to present and future personnel, agents or representatives having sales, advertising, or policy responsibilities with respect to the subject matter of this order and that respondent shall secure from each such person a signed statement acknowledging receipt of said order. The signed acknowledgement must be obtained within sixty (60) days of the service upon them of this order or thirty (30) days after the employment of new personnel.

B. It is further ordered that respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignement, or sale resulting in the emergency of a successor corporation, or any change in the corporation which may affect compliance obligations arising out of the order.

C. It is further ordered that respondent shall send a copy of this order to all present dealers within sixty (60) days after the date of service of this order and that an additional copy be sent attached to contract renewals until January 1, 1984. All new dealers must also be given copies of this agreement prior to entering into a distribution sales agreement with Great Dane Trailers, Inc.

D. It is further ordered that respondent shall, within sixty days of this order being served upon it, make available to all dealers and customers a brochure identifying all independent dealers and stating that a customer may contact any dealer regarding the purchase of a new Great Dane truck trailer. All Great Dane advertisements in trade publications shall disclose the availability of that brochure from the service date of this order until December 1, 1984.

E. It is further ordered that respondent herein shall, within ninety (90) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order. An additional report shall be filed within sixty (60) days after Great Dane Trailers, Inc., begins to utilize, if it so choose, additional territorial or customers restrictions. That latter report shall include a copy of all new Distribution Sales Agreements, as well as a list of all Great Dane's distributors who have been terminated or not renewed for any reason since January 1, 1982.

In the matter of Great Dane Trailers, Inc., a corporation, and Great Dane Distributor Council, and unincorporated association, and its members. File No. 771 0055. Agreement Containing Consent Order to Cease and Desist

The Federal Trade Commission having initiated an investigation of certain acts and practices of Great Dane Distributor Council, and unincorporated association, and its members, and it now appearing that Great Dane Distributor Council and its members, sometimes referred to collectively as proposed respondent, are willing to enter into an agreement containing an order to cease and desist from certain of the acts and practices being investigated,

It is hereby agreed by and between Great Dane Distributor Council, its members and its attorney and counsel for the Federal Trade Commission that:

1. Proposed respondent Great Dane Distributor Council (also known as the Great Dane Dealer's Association) is an unincorporated association comprised of

VOL 48 ISS 92 MY 11 1983 UMI

authorized dealers of Great Dane Trailers, Inc., and organized for the mutual benefit of its members.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint attached hereto.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

4. This agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the proposed respondent, in which event it will take such action as it may consider appropriate, or issue and serve its complaint (in such form as the circumstances may require) and decision, in disposition of the proceeding.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached, and proposed respondent specifically denies it committed the acts complained of.

6. This agreement contemplates, that if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's Rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the complaint and decision containing the agreed to order to proposed respondent's address shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby. It understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order. Proposed respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

For the purpose of this order, the following definitions shall apply:

A. "Truck trailer" is a property-carrying vehicle, or chassis thereof, drawn by a truck or truck tractor and having one or more axles with a rating of 10,000 pounds or more per axle.

B. "Dealer" is any proprietorship, partnership, firm, or corporation authorized by Great Dane Trailers, Inc., to sell its new truck trailers but which is not owned or controlled by Great Dane Trailers, Inc. Provided, however, that two or more dealers that are majority-owned subsidiaries of a common parent shall not be regarded as separate dealers for the purposes of this order.

C. "Area of primary responsibility" is a geographic area or customer or customers assigned to a dealer on a nonexclusive basis for which the dealer is responsible for sales penetration.

D. "Historic trading area" is a geographic area or specific customer for which primary responsibility has been assigned at some time in the past.

E. "Exclusive territory" is a geographic area or customer(s) designated by any agreement restricting or prohibiting a dealer from making sales outside of its territory, area of primary responsibility, or historic trading area.

I

It is ordered that respondent, Great Dane Distributor Council, an unincorporated association, its successors, subatitutes, and assigns, and its individual members, officers, agents, representatives, and employees, in connection with the sale or distribution of any new Great Dane truck trailer in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, forthwith cease and desist from:

1. Entering into any agreement with a dealer not to make or solicit sales of new Great Dane truck trailers outside any specific area of primary responsibility, historic trading area or exclusive territory.

2. Entering into any agreement with a dealer not to make or solicit sales of new Great Dane truck trailers to or from any specific customer of class of customers.

3. Encouraging or suggesting to a dealer that a dealer not solicit or make sales of new Great Dane truck trailers outside of its area of primary responsibility, historic trading area, or exclusive territory, or not solicit or make sales of new Great Dane truck trailers to or from any customer or class of customers.

4. Encouraging or suggesting to Great Dane Trailers, Inc., that it take any action or impose and restriction for the purpose of having extra-territorial sales or sales to a specific customer or class of customers stopped or inhibited, directly or indirectly.

Provided, however, that nothing in paragraph 4 of part I of this order shall prohibit any individual dealer, not in concert with any other dealer, from unilaterally suggesting or encouraging Great Dane Trailers, Inc., to take any action, otherwise lawful, with respect to the marketing or distribution of new Great Dane truck trailers.

II

A. It is further ordered that responden shall distribute a copy of this order to all of its members and that those members shall distribute copies of this order to all truck trailer salesmen employed by them. Respondent shall secure from each dealer a signed statement acknowledging receipt of this order and the distribution of this order to their salesmen within sixty (60) days after service upon them of this order. All new members must be given a copy of this order within sixty (60) days of affiliation.

B. It is further ordered that respondent shall notify the Commission at least thirty (30) days prior to the disbanding or incorporation of the Great Dane Distributor Council or the formation of a successor or substitute or any other changes in the Great Dane Distributor Council which may affect compliance obligations under this order.

C. It is further ordered that respondent herein shall within ninety (90) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

III

A. Each dealer signing this order agrees to be individually bound by this order for any act it commits or for any act committed by an employee, agent, or representative of such dealer. No dealer signing this agreement shall be jointly and severally liable for civil penalties for the actions of the association unless it ratified or participated in the encouragement, institution, or carrying out of those actions.

B. This agreement may be executed in two or more counterparts and when so executed shall have the same force and effect as though all signatures appeared on one document.

Analysis of Proposed Consent Orders To Aid Public Comment

The Federal Trade Commission has accepted agreements to proposed consent orders from Great Dane Trailers, Inc., Great Dane Distributor Council, an unincorporated association of Great Dane dealers, and 27 of the Council's members. The dealer members are:

Ace-Chicago Great Dane Corporation

The proposed consent orders have been placed on the public record for sixty (60) days for reception of comment by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreements and comments received and will decide whether it should withdraw from the agreements or make final the agreements' proposed orders.

The complaint charges violation of the Federal Trade Commission Act by horizonal allocation of markets by Great Dane dealers and the Distributor Council and the facilitation of that division of markets by the manufacturer, Great Dane Trailers, Inc. These activities, according to the complaint, have hindered, frustrated, restrained and tended to eliminate competition among dealers and befween Great Dane Dealers and factory-owned branches in sales of new Great Dane truck trailers.

The complaint alleges that Great Dane Distributor Council and some or all of its members agreed that no member would solicit or make sales of new truck trailers outside of its area or primary responsibility or to customers with which another dealer had an established relationship. It is further alleged that the Distributor Council encouraged or requested Great Dane Trailers, Inc., to prohibit or discourage sales of new truck trailers by a dealer outside of its assigned area or to a customer with which another dealer had an established relationship. The complaint also alleges that Great Dane Trailers, Inc., aided efforts of the dealers and the Great Dane Distributor Council to limit competition among Great Dane dealers.

The proposed orders require that all of the allegedly anticompetitive practices described above be permanently discontinued. The manufacturer is prohibited from aiding and abetting efforts of the Great Dane Distributor Council or its members to limit competition by agreements to restrict sales to certain territories or customers. The manufacturer is also prohibited from formulating or utilizing exclusive territories until December 1, 1984. The proposed order against Great Dane Trailers, Inc., requires that for a limited period of time, it must make available to dealers and customers a brochure identifying all Great Dane independent dealers and stating that a customer may contact anyone of them regarding purchase of a new truck trailer.

The Great Dane Distributor Council order prohibits the council or its members from agreeing among themselves to restrict sales of new Great Dane truck trailers to certain territories or customers.

The effect of the orders should be to increase price competition among sellers of new Great Dane truck trailers and, thereby, increasing price competition for all truck trailers.

The purpose of this analysis is to facilitate public comment on the proposed orders, and it is not intended to constitute an official interpretation of the agreements and proposed orders or to modify in any way their terms.

Emily H. Rock,
Secretary.

Dissenting Statement of Chairman Miller In Great Dane Trailers, Inc.*

The Commission has voted to accept provisionally proposed consent agreements with Great Dane Trailers, Inc., and the Great Dane Distributor Council and its members. The proposed orders prohibit the Council or its members from agreeing among themselves to restrict sales of Great Dane's truck trailers to certain territories or customers, and prohibits the manufacturer from aiding and abetting any such efforts. The manufacturer is also prohibited from formulating or utilizing exclusive territories on its own initiative until December 1, 1984. In my view, these consent agreements are likely to lessen competition by inhibiting Great Dane from effectively marketing its product. This may well disadvantage Great Dane vis-a-vis its larger competitors, resulting in harm to consumers of truck trailers.

The complaint in this case charges that respondents "unreasonably hindered, restricted, and restrained competition" by agreeing to a division of territories among retail outlets.[1] (Complaint, para. 11). The purported basis for this conclusion is that the dealers agreed among themselves to treat their manufacturer-granted "areas of primary responsibility" as exclusive territories. Great Dane's liability arises because it allegedly "encouraged" its dealers to do so, and "facilitated" the policy of the agreement.

The complaint suggests, on the basis of these allegations—and a majority of the members of the Commission apparently agrees—that the agreement is properly characterized as "horizontal." However, the complaint noticeably ignores the effect of the agreement on interbrand competition,[2] failing to come to grips with the possibility that any adverse impact on intrabrand competition may, in this case, be more than outweighed by the enhancement of interbrand competition.

It is a convenient rule of thumb to assume that if a territorial restraint is unilaterally imposed *by* the manufacturer it is likely to be vertical in its effect, while if it is initiated by the dealers, it is likely to have a horizontal effect. Nevertheless, it is a serious error to permit a generally helpful rule of thumb to become an immutable rule of law. It must be recognized that the first part of the proposition—that manufacturer-imposed territorial restraints are likely to have a vertical effect—is based upon a much sounder empirical footing [3] than the second part, which relegates all dealer-initiated territorial restraints—regardless of their competitive effects—to the harsh per se analysis.[4] Moreover, where, as here, the restraint is imposed by mutual agreement between exclusive dealers and their manufacturer and affects only intrabrand sales, it is a disservice to the public to subetitute shopworn platitudes for a reasoned analysis of the economic realities.

The most common reason for manufacturer-imposed territorial restraints is to encourage dealers to perform costly services that the manufacturer deems necessary to market its product. The restraints encourage the dealers to offer such services by eliminating the danger that some dealers will free ride on the sales or service efforts of others. However, it should come as no surprise that dealers often support or even encourage this type of market allocation, since they too have "a legitimate, nonmonopolistic interest in seeking to overcome through joint action serious free-rider problems." R. Posner, *Antitrust Law* 185 (1976). Thus, rather than deciding distribution cases "simply by identifying the source of the restriction, * * * it is necessary in every case to determine whether the objective of the challenged restriction is to increase the provision of presale services or to generate monopoly profits." *Id.* at 185–6. This the Commission has failed to do.

The sale of truck trailers of the type manufactured by Great Dane requires unusually costly sales efforts. Great Dane prides itself on providing trailers of high quality that are often customized. Accordingly, dealers must spend considerable resources educating their customers about the quality of the product, providing expert sales assistance and advice on customization, and assuring that post-sale

---

* Commissioner George W. Douglas joins this dissenting statement.

[1] Since Great Dane's distribution is approximately 50 percent integrated, retail outlets would include both independent dealers and factory branches. There is no allegation in the complaint that Great Dane's system of dual distributios is in any way anticompetitive.

[2] Since few, if any, Great Dane distributors sell competing brands, there is very little chance of any adverse effect on interbrand competition. The complaint cites no evidence of any anticompetitive effect on the overall product market or that the Great Dane dealers collectively possess any significant degree of retail market power. If supracompetitive profits were being earned by existing resellers of Great Dane products, there should be a queue of other trailer dealers demanding to get into the business. Yet we have uncovered no such evidence. On the contrary, the evidence appears to show that Great Dane is actively seeking to sign up new dealers—an observation also inconsistent with any monopsony power of the dealers.

[3] The justification is that if a restraint is manufacturer-imposed, it is likely to reflect the manufacturer's judgment that this is the most cost-efficient method for maximizing sales. *See generally* R. Bork, *The Antitrust Paradox* 290 (1978).

[4] As demonstrated below, dealer-initiated territorial restraints can serve many of the benign purposes of unilateral manufacturer-imposed restraints.

VOL 48 ISS 92 MY 11 1983 UMI

service is prompt and reliable. Such customer service efforts, however, are expensive, and give rise to the risk of free-riding by other Great Dane distributors. It is this risk which the allocation of exclusive territories can help to minimize, thereby preserving product quality.[5]

This is precisely the type of situation that the Supreme Court had in mind in *Continental T.V., Inc. v. GTE Sylvania Inc.*, 433 U.S. 36 (1977), when it held that non-price vertical restrictions should be analyzed under the rule of reason.

"Service and repair are vital for many products, such as automobiles and major household appliances. The availability and quality of such services affect a manufacturer's goodwill and the competitiveness of his product. Because of market imperfections such as the so-called 'free rider' effect, these services might not be provided by retailers in a purely competitive situation, despite the fact that each retailer's benefit would be greater if all provided the services than if none did." *Id.* at 55.

Unfortunately, the Commission here has decided to place greater emphasis on the application of a rule than on the analysis that underlies it. I firmly believe that truly horizontal restraints among competitors should be harshly judged under the *per se* rule of liability. However, where the alleged market division is among distributors of a single brand with no discernible degree of market power and has the sanction of the manufacturer, such shorthand "analysis" is inadequate.

As enforcers of the law, it is particularly important that we not fall into the trap of making prosecutorial decisions on the basis of legal distinctions unrelated to the purposes or policies of the statute we are charged wtih enforcing. Our responsibility is to ferret out and take action against activities that unreasonably hinder, restrict or restrain trade. We cannot do so it we mechanically plug facts into the most convenient legal formula we can find. Such myopic law enforcement policy is bound to result in outcomes inconsistent with our greater responsibility to the public interest. I fear that the action of the Commission in approving these consent agreements will have just such an effect.

Great Dane is far from dominant in this industry. Fruehauf, the largest manufacturer of truck trailers, has virtually no dealers at all since it is almost 100 percent integrated. As the adminstrative law judge noted in *Fruehauf Corp.*, in the truck trailer industry, "[m]anufacturers sometimes have difficulty in supervising sales efforts and in getting the independents to devote the necessary time and attention to the products." *Fruehauf Corp.*, 91 F.T.C. 132, 166 (1977) (Initial Decision), *aff'd*, 91 F.T.C. 217 (1978), *rev'd on other grounds*, 603 F.2d 345 (2d Cir. 1979); *accord, The Budd Co.*, 86 F.T.C. 518, 554 (1974) (Initial Decision), *rev'd on other grounds*, 86 F.T.C. 569 (1975). Direct manufacturer distribution is costly, however, and may not always be cost-effective for smaller competitors such as Great Dane.[6] The use of exclusive territories may sometimes be a less expensive method of accomplishing the same result. Under the consent order, however, Great Dane will be precluded from making use of this alternative. Not only does the Commission action invalidate the current, dealer-sanctioned, territorial restraints, but—inexplicably—precludes Great Dane from imposing such restraints unilaterally until the end of 1984.[7] By restricting its marketing practices in this fashion, the Commission may well undermine Great Dane's ability to meet the sales strategy of its larger competitors.

Moreover, this consent agreement may function to encourage Great Dane, and similarly-situated mannfacturers in other industries, to accept the greater costs of vertical integration and eliminate their use of independent dealers in order to avoid future liability. Such a decision would certainly be unfortunate from the perspective of the small business distributor who would be terminated.

In short, this order can be expected to reduce service to the public, lessen interbrand competition, give larger manufacturers in the industry a competitive advantage, and probably reduce the number of small dealerships by creating pressure for vertical integration. Why the Commission finds it in the public interest to enter such an order is entirely beyond me. Today's muzzling of Great Dane will be noted throughout our economy, causing others to alter their behavior to avoid similar consequences. Because I cannot sanction today's action I must, respectfully, dissent.

Concurring Statement of Commissioner David A. Clanton in Great Dane Trailers, Inc.

In his dissenting statement, Chairman Miller suggests that the Commission's acceptance of this consent reflects a "myopic law enforcement policy" designed to "mechanically plug facts into the most convenient legal formula we can find" (Miller Statement at p. 2). I respect Chairman Miller's right to disagree with the conclusion reached by the majority of the Commission. However, I cannot accept his characterization of the analysis on which the majority decision was based.

This case involved a system of restrictions preventing Great Dane dealers from selling into each other's territories. The record shows that the restrictions were adopted and enforced largely at the behest of the dealers. As a matter of theory, Chairman Miller is quite correct that even restrictions which are not anticompetitive—*e.g.*, those designed to overcome free-rider problems—will also be supported by dealers. Thus, the fact that dealers supported the restraints does not in and of itself indicate that the restrictions were anticompetitive. As far as I know, no one at the Commission even seriously considered condemning the restrictions for this reason alone.

The difficulty, of course, is that dealers also have incentives to support restrictions that prevent legitimate dealer competition—restrictions that go beyond what is necessary to prevent free-riding. All would agree (Chairman Miller included) that these restrictions ought to be prohibited. The difficulty lies in determining, in any given case, whether a restriction goes only so far as is necessary to prevent free-riding, or whether it is instead designed to insulate dealers from legitimate price competition.

Although the evidence is necessarily incomplete (as the case has not had the benefit of a full trial), I believe that the restraints here fall into the latter category. While Great Dane does not have market power in the traditional dominant-firm sense, the record suggests that its product is sufficiently differentiated to create the *opportunity* for dealers to raise retail margins above competitive levels without losing all of their customers to competing brands. The importance of dealers to Great Dane's distribution strategy, and Great Dane's continual attempts to expand its dealer base, suggest that the existing dealers had sufficient bargaining power vis-a-vis Great Dane to enable them to insist on territorial restrictions which weakened dealer competition.[8] Indeed, the documentary evidence suggests that Great Dane was at most a reluctant participant in the restrictions, enforcing them not for any reasons of its own but rather as a way of alleviating the pressure of dealer complaints. If these restraints were vital to Great Dane's marketing efficiency, it is hard to see why it was so reluctant to enforce them.

One can, of course disagree about the proper interpretation of these facts. My main point, though, is that these facts *were considered:* in no way were they ignored for the sake of a mechanical legal rule. The interpretation question was discussed extensively before accepting this consent, both in the staff memoranda and at the Commission table. Indeed, it was concerns about not interfering with legitimate marketing efforts that led us to modify an earlier settlement proposal. For example, we directed staff to include a provision explicitly permitting Grean Dane to continue to use "areas of primary responsibility" for its dealers. We also shortened the transitional period during which Great Dane would not enforce more rigid territorial restraints—a period which will now expire at the end of next year. Finally, we also added language making it clear that the order did not "limit or prohibit Great Dane's ability to take any unilateral action that is otherwise lawful . . . even though it has been suggested or encouraged by one or more dealers." Great Dane Order ¶ I (1).

In short, this case involved a good deal more than simply the invocation of the most convenient legal formula we could find. The Commission carefully considered each of the factors that make cases like this so difficult, and arrived at what I believe to be a correct assessment of the likely competitive effects. I therefore support the acceptance of this consent.

Concurring Statement by Commissioner Pertschuk in Great Dane Trailers, Inc.

April 29, 1983.

The original consent agreement proposed by staff in this matter permanently barred horizontal and vertical agreements concerning dealer territories. In September, 1981, however, the Commission directed the staff to renegotiate this consent agreement to bar permanently only horizontal territorial allocation and to bar temporarily "airtight" vertical restrictions to serve as a transitional device to insure the effects of the horizontal collusion had disappeared. In doing so, the Commission clearly recognized that territorial restrictions may not be competitively harmful when they are necessary to promote dealer services. The staff renegotiated the consent agreement precisely in the way the Commission had directed and forwarded it in relatively short order to the Commission. The Bureau submitted it to the Commission in September 1982 and I moved its acceptance ten days later. Within a short time, a majority had recorded their votes in favor of the agreement.

Six months passed, however, and the agreement was not provisionally accepted because two Commissioners had not voted. Finally, after I asked for a meeting in March, Chairman Miller indicated he would vote against the agreement and issue a dissent. Today, April 29, that dissent is finished and the Commission can publish the agreement for comment.

Chairman Miller's dissent is replete with arguments about the value of vertical restrictions for the health of the truck trailer industry and in fact suggests our order may do severe damage throughout the economy (see p. 7). I confess I find it hard to understand how a temporary ban on certain territorial restrictions which expires on December 1, 1984 (and will be effective for about a year and a half when this order is finalized) does damage to America's industrial heartland. The record is liberally sprinkled with evidence of dealer collusion as to territorial allocation and with dealer pleas to the manufacturer to enforce territorial restrictions. This is precisely the kind of situation—pressure from a dealer cartel to limit competition among dealers—where even conservative economists say antitrust intervention is warranted. It is an entirely sensible remedy to ban for a short period all airtight territorial restrictions, leaving Great Dane free to impose less restrictive territorial limitations (the kind it says it wanted all along). Such an order allows Great Dane substantial marketing freedom while insuring the effect of the dealers' territorial allocation scheme is dissipated.

[FR Doc. 83-12809 Filed 5-10-83; 8:45 am]
BILLING CODE 6570-01-M

[5] "In the case of a very expensive item such as a truck . . . where consumers will invest significant travel time in making their purchase, a manufacturer can reach the consuming public through relatively few, relatively dispersed dealers, whom he can induce to provide the level of services he wants by assigning them exclusive territories." R. Posner, *supra*, at 160.

[6] Indeed, at the time of the *Fruehauf* decision, Fruehauf operated approximately 100 factory-owned branches nationwide. By contrast, Great Dane operated only ten such branches. The large capital investments required may limit its ability—as it did that of other smaller manufacturers—to establish additional branches. *See Fruehauf*, 91 F.T.C. at 165–66 and note 13 (Initial Decision).

[7] Because of an ancillary provision barring restrictions on dealers in a prior consent agreement between Great Dane and the Department of Justice, it is possible that Great Dane feels constrained not to impose such restraints in any case. *See United States v. American Body and Trailer Inc.*, CCH Trade Reg. Rep. [1958 Trade Cases] ¶69,063 (W.D. OK. 1958).

[8] The fact that Great Dane was seeking additional distributors, and had also intergrated forward into the dealer level, is hardly inconsistent with a manufacturer attempting to contereact the effects of collusion at the dealer level. While it is true that dealers should have flocked to join the system *if they could be assured of a place in the cartel (i.e.*, if they would be given an exclusive territory of their own sufficiently large to yield supracompetitive profits), this is presumably not the kind of dealer Great Dane was trying to attract.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 35

[Docket No. RM83-62-000]

Treatment of Purchased Power in the Fuel Cost Adjustment Clause for Electric Utilities

May 3, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is proposing to amend its regulations concerning the treatment of purchased power expenses in the fuel cost adjustment clause used by electric utilities in jurisdictional rate schedules. The proposed rule would allow demand or capacity charges associated with energy purchases to be recovered through the fuel clause if two conditions are met. First, the total cost of the purchase must be less than the buyer's total avoided variable cost. And second, the purpose of the purchase must be solely to displace higher cost generation. The proposed rule will not allow capacity charges incurred for a reliability purchase—i.e., to purchase reserves or otherwise cure a capacity deficiency—to be flowed through the fuel clause.

The proposed rule would broaden the standard for determining whether the energy charges of a purchase may be recovered through fuel clause adjustments. It would permit fuel clause recovery of purchased energy charges as long as they are less than the total avoided variable cost during the purchase period. This would be a change from the present "economic dispatch" criterion that requires purchased energy to be less costly than the purchaser's own generation in each hour in order to be included in the fuel cost adjustment clause. The fuel cost component of all other energy purchases would continue to be accorded fuel clause treatment.

The proposed rule would also require electric utilities that intend to recover the capacity charges associated with economic purchases through a fuel adjustment clause to file a statement that explains the system reserve capacity criteria used by system operators to determine when a reliability purchase must be made.

DATES: Initial comments must be submitted to the Secretary of the Commission by June 10, 1983. Reply comments must be submitted to the Secretary of the Commission by July 11, 1983.

ADDRESSES: All comments should refer to Docket No. RM83-62-000 and should be addressed to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT:

Wilbur Earley, Office of Regulatory Analysis, Federal Energy Regulatory Commission—Room 3000, 825 North Capitol Street, NE., Washington, D.C. 20426 (202) 357-6158;

Robert S. Angyal, Office of the General Counsel—Room 3100, 941 North Capitol Street, NE., Washington, D.C. 20426 (202) 357-5621.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Federal Energy Regulatory Commission (Commission) proposes to amend its regulations concerning the treatment of purchased power expenses in the fuel cost adjustment clause used by electric utilities in jurisdictional rate schedules. Under the present regulations, only the fuel cost component of purchased power expenses may generally be recovered through fuel clause adjustments to base rates. The one exception is purchases made on an economic dispatch basis. For these purchases, the net energy charges may be recovered through the fuel clause. At present, our regulations do not allow demand or capacity charges associated with any purchases to be passed through the fuel clause. Those costs must be recovered in base rates.

The proposed rule would allow demand or capacity charges associated with energy purchases to be recovered through the fuel clause if two conditions are met. First, the total cost of the purchase must be less than the buyer's

VOL 48 ISS 92 MY 11 1983 UMI

total avoided variable cost. And second, the purpose of the purchase must be solely to displace higher cost generation. The proposed rule will not allow capacity charges incurred to purchase reserves or otherwise cure a capacity deficiency to be flowed through the fuel clause.

The proposed rule would also broaden the standard for determining whether the energy charges of a purchase may be recovered through fuel clause adjustments.[1] It would permit fuel clause recovery of purchased energy charges as long as they are less than the total avoided variable cost during the purchase period. This would be a change from the present "economic dispatch" criterion that requires purchased energy to be less costly than the purchaser's own generation in each hour in order to be included in the fuel cost adjustment clause. The fuel cost component of all other energy purchases would continue to be accorded fuel clause treatment.

II. Background

A. The Present Treatment of Purchased Power Expenses in Wholesale Electric Rates

The fixed or base rates for wholesale electric service are typically derived from the estimated cost of service for a future test year.[2] Included in the cost of service are estimates of purchased power expenses. The estimates include both demand and energy charges. Thus, base rates are set so that they will recover forecasted purchased power costs.

Our present fuel clause regulations allow utilities to make adjustment to base rates if certain components of actually incurred purchased power expenses differ from the projections used to set base rates. Utilities can recover the actual expense of the fuel portion of all purchased power and, in addition, the energy charges for energy purchased on an economic dispatch basis.[3] If the actual expenses are less than those forecasted, a negative adjustment (reduction) is made to base rates; if greater, a positive adjustment (increase) is made. The effect of fuel clause adjustments is that actual fuel and (in some cases) energy charges associated with purchased power are recovered, regardless of the accuracy of the estimates embedded in the base rates. However, the present regulations do not allow adjustment if the capacity charges incurred for purchased power are different from the base rate estimates for such charges. The utility can recover only the amount estimated in base rate.

B. Problems With the Present Treatment of Purchased Power Expenses

The inclusion of non-fuel energy (but not capacity) charges in fuel clause adjustments was permitted to "provide an incentive to the utilities to purchase energy, in other than conventional firm power transactions, when the total charge is less than the purchaser's own generation."[4] While the limited inclusion of energy charges may provide an incentive to purchase economic power, the exclusion of capacity charges can provide a disincentive to making the least-cost purchase available.

Economic power can be purchased on either a firm or interruptible basis.[5] Unconditionally interruptible purchases, such as economy energy, typically carry only an energy charge.[6] Firm and conditionally interruptible purchases usually carry a capacity or reservation charge as well as an energy charge.[7] In many instances, the purchase of firm or conditionally interruptible power may be more economic than economy energy for several reasons. First, where there are significant differences in fuel costs between utilities, the split-savings adder for economy energy can be quite large. The reservation or capacity charges associated with firm or conditionally interruptible power may be less than the charges produced by a split-savings adder.

Second, the rate for energy associated with a firm or conditionally interruptible purchase is usually cheaper than that for economy energy due to the practice of "prioritizing" services. A utility may make different types of bulk power sales simultaneously. It is industry practice to impute different incremental costs to different types of sales. A selling utility will usually have an established hierarchy governing the assignment of dispatch priority and associated incremental costs to the various types of transactions for accounting and service termination purposes. The general practice is to assign higher dispatch priority to the firmer transactions and to assign incremental costs in inverse order of priority. Thus, a firm or conditionally interruptible power sale will have a lower incremental energy cost assigned to it than an economy energy sale.

And third, a firm purchase may permit the buyer to reduce the level of spinning reserves. Spinning reserves are typically maintained by operating one or more of the buyer's plants at less than full rating. By making a firm economic purchase rather than an interruptible one, the buyer may realize additional fuel cost savings because of a reduced spinning reserve requirement.

A related consideration is that a firm transaction can help both the seller and the buyer better plan their system operation (for example, unit commitment schedules) for more efficient resource use. This can result in cost savings to both parties.

For the above reasons, a firm or conditionally interruptible economic purchase can, in some instances, be the lower-cost option when compared to an economy energy purchase.

The purchase of some types of economic power may be discouraged by the present exclusion of the associated demand charges from fuel clause adjustments. Demand charges that were not forecasted and included in base rates cannot be recovered by the purchasing utility. They must be absorbed by the utility's stockholders, thereby lowering earned return. In contrast, all energy charges for economic purchases, whether forecasted or not, can be recovered either in base rates (if forecasted) or in fuel clause adjustments to base rates (if not forecasted).[8]

Such treatment may discourage utilities from taking advantage of unforeseen opportunities for substituting unforecasted firm or conditionally interruptible economic purchases for forecasted economy energy purchases, even though the result would be lower costs. Such treatment may also perversely affect utility behavior in cases where a large total level of economic purchases than forecasted can be made. A utility is encouraged to buy economy rather than firm or conditionally interruptible energy even though the latter would produce greater savings.

Consider the following example.[9] Suppose a utility with a decremental energy cost of $35/mwh has an opportunity to make an economic purchase of 6,000 Mwh that was not forecasted in the base rate cost of service. The energy can be purchased under either a short-term power rate or an economy energy rate with a split-savings adder. The resulting costs of and revenues from each option are shown on Table I. Either purchase saves the buyer money, but the short-term power option is the cheaper even if the fuel cost savings that might result from a reduced spinning reserve requirement is ignored. However, the purchasing utility would not be able to recover the demand charges incurred with the firm purchase and would thus not recover the entire cost of the purchase. The exclusion of demand charges from fuel clause adjustments could encourage the utility to buy the economy energy rather than the cheaper short-term power. As a result, the utility's wholesale rates might be higher than necessary and fuel resources would not be used as efficiently as possible.

The numbers from this example may also be used to illustrate the disincentive created by the present regulation against a utility's substituting an unforecasted, yet cheaper, purchase with capacity charges for a forecasted purchase without capacity charges. While the mechanics are somewhat different, the magnitude of the effects is the same as in the first example. Table II shows the resulting costs and revenues if a buying utility were to substitute an unforecasted short-term purchase for a forecasted economy energy purchase. Rates would be adjusted downward by the fuel clause to reflect the lower actual energy charges for the short-term power. However, the utility would not be able to recover the unforecasted demand charges incurred.

TABLE I

Buyer's avoided costs $210,000 (=6000 mwh × $35/mwh)	
Economy energy option:	
Energy rate (megawatt=hours	$28
Seller's incremental cost (megawatt=hours) equals	21
Buyer's decremental cost (megawatt=hours) equals	35
Purchase cost	168,000
Recoverable through fuel clause	168,000
Cost reduction: 6000 × ($35 − $28)	42,000
Rate reduction: 6000 × ($35 − $28)	42,000
Short-term power option:	
Energy rate (megawatt=hours)	19
Demand rate ($700/mw/week at 100% load factor (megawatt=hours)	4
Total rate (megawatt=hours	23
Purchase cost:	
Energy	114,000
Demand	24,000
	138,000
Recoverable through fuel clause	114,000
Unrecoverable	24,000
Cost reduction: 6000 × ($35 − $23)	72,000
Rate reduction: 6000 × ($35 − $19)	96,000
Increased cost if short-term power option not taken: $168,000 × $138,000 equals	30,000

TABLE II

Economy energy forecasted in cost of service study:	
Purchase cost	$168,000
Recoverable through base rates	168,000
Unforecasted short-term power option substituted for forecasted economy energy:	
Purchase cost:	
Energy	114,000
Demand	24,000
	138,000
Actual energy charges incurred	114,000
Energy charges in base rates	168,000
Fuel clause adjustment	(54,000)
Recoverable charges	114,000
Unrecoverable charges	24,000

There remain two final points concerning the present fuel clause if a utility makes an economic purchase with a demand charge tha was not forecasted. First, an inequity is created. The damand charges incurred are borne by the company's stockholders. However, since the fuel savings are directly reflected in fuel clause adjustments, the benefits of the purchase are flowed to the ratepayers. In fact, since the ratepayers would not pay the demand charges incurred, rates are reduced by an amount greater than the cost savings.[10] And second, since the incurred demand charges are not paid by ratepayers, the ratepayers receive incorrect price signals for electricity.

III. The Proposed Rule

It is the policy of this Commission to encourage, wherever possible, the adoption of a least-cost energy strategy for electric utilities.[11] If any of our regulations interfere with the attainment of the goal, then we will consider changing those regulations. Such is the case with the present fuel clause regulations which exclude capacity charges.[12] This exclusion can act as a disincentive to a utility's adopting the least cost option when making energy purhase decisions. The rule proposed here would remove that disincentive by allowing electric utilities to include the total costs of economic power purchases, including capacity charges, in the periodic fuel clause adjustments to base rates. As we have stated before, "a passthrough of capacity costs, incurred solely to reduce energy costs * * * is in the public interest."[13]

The Commission's fuel cost adjustment clause regulation is intended to permit a utility to make adjustments to its base rates for those costs that are volatile and difficult to predict.[14] Fuel costs and the net energy costs of economic purchases fall into this category. This is also the case with the demand charges incurred for economic

---

[1] An energy charge is any rate or rate component expressed on a per kilowatt-hour or per megawatt-hour basis.

[2] Base rates are rates that are fixed at a certain level. They can be changed only upon the filing of a new rate case. They are in contrast to rates determined by a formula. Such rates change as the cost components of the formula change without the filing of a new are case. The fuel adjustment clause is the most common use of a rate adjustment formula.

[3] *See* 18 CFR 35.14(a)(2)(ii) and (iii) (1982).

[4] Order No. 517, 52 F.P.C. 1304, 1305 (1974), 39 FR 40562 (1974). This order, issued by the Commission's predecessor, the Federal Power Commission, promulgated the present fuel cost adjustment clause regulation, codified at 18 CFR 35.14 (1982). The Department of Energy Organization Act, in terminating the Federal Power Commission and creating the Federal Energy Regulatory Commission, continued this regulation in effect until modified by the new Commission. Department of Energy Organization Act, section 705(a), 42 U.S.C. 7295(a) (Supp. IV 1980).

[5] The term "economic power" should not be confused with what is commonly known as economy energy. Economy energy is typically transacted on an hourly basis, is priced using the split-savings formula, and may be interrupted. Economy energy is not the only purchase made for reasons of economy, *i.e.*, to displace higher cost generation. Electric utilities regularly purchase other types of power (*e.g.*, short-term power, unit power and dump energy) to lower the cost of supplying electricity to their customers. All purchases made to lower the buying utility's cost of production will be referred to here as economic power.

[6] For example, economy energy has only an energy charge that is based on the seller's incremental running cost plus an adder based on an equal split of the savings. The resulting price is the average of the buyer's decremental cost and the seller's incremental cost.

[7] For example, the price for short- and limited-term power usually involves a capacity or reservation charge based on the fixed cost of some of the seller's generating units and an energy charge based on the seller's system incremental running cost plus a percentage adder. Unit power carries capacity and energy charges tied to the costs of a specific unit.

[8] Purchases must be on an economic dispatch basis for the energy charges to receive fuel clause treatment.

[9] This numerical example was presented in ICF Incorporated, The Federal Energy Regulatory Commission Fuel Adjustment Clause and Utility Incentives to Engage in Electric Power Interchange Transactions Under Emergency and Normal Conditions: Final Report. Submitted to the Office of Energy Contingency Planning, U.S. Department of Energy, February 1982, at 31–33. The numbers are based upon data observed by DOE's Electric Power Monitoring Center during 1980.

[10] Note the difference between the rate reduction and the cost reduction in the short-term power option on Table I.

[11] The term "least cost energy strategy" is often associated with what is known as the "soft path" to energy supply—small scale, decentralized electricity technologies and renewable fuel resources. Here the term is used in a literal sense—the supply of electricity to consumers in the short- and long-run at the lowest possible cost (in the economic sense) without any predetermination as to whether the energy is produced by "soft" technologies, "hard" technologies or some combination of the two. As a regulatory agency, we are concerned with removing any hindrances that might prevent utilities from moving along the path of providing their customers with a reliable supply of electricity at lowest possible cost.

[12] We recently noted that "those regulations were established in a very different economic environment in which capacity costs were rarely incurred for reasons other than meeting reserve requirements. It was therefore found to be appropriate to deny automatic passthrough of capacity costs in the fuel clause." We then went on a grant a waiver of the existing regulations in order to permit inclusion of capacity costs in a fuel adjustment clause where those costs were incurred solely to reduce the overall energy cost. Gulf States Utilities Company, 20 F.E.R.C. ¶ 61,030 at 61,072 (1982).

[13] *Id. Gulf States* was followed in Delmarva Power & Light Company 21 R.E.R.C. ¶ 61,050 (1982) *See also* Florida Power & Light Company, 16 F.E.R.C. ¶ 61,168 at 61,375 (1981).

[14] Order 517, 52 F.P.C. at 1305.

VOL 48 ISS 92 MY 11 1983 UMI

purchases. The volume and prices of economic purchases, whether firm or interruptible, are dependent on a number of factors that are not readily predictable, such as the availability of capacity and the relative hourly incremental operating costs of sellers and buyers at the time transactions are made. It is therefore appropriate to include the demand or capacity charge component of economic purchases among the items for which base rates may be periodically adjusted.

Flowing the demand component of economic purchase charges through the fuel clause will eliminate the estimation error problem and the subsequent potential for over- or underrecovery of estimated expenses. An overrecovery occurs if forecasted demand charges are greater than those actually incurred. All other things being equal, the result is rates higher than necessary to produce the return the Commission determined to be just and reasonable. An underrecovery occurs if a utility incurs more demand charges than were forecasted for economic purchases. The result is an inequity: the variable cost savings made possible by economic purchases are flowed to ratepayers, but the demand costs are borne by the company's investors. Incorrect price signals are given to consumers in either case.

The proposed rule would also eliminate any bias in favor of services that carry only energy charges. It is our intent to encourage utilities to make the lowest-cost economic power purchases without regard to the manner in which it is priced. As the discussion in the previous section makes clear, a purchase of energy and associated capacity may result in lower rates and more efficient fuel resource use than a purchase of only energy. If a utility is assured that it will recover the total cost of any economic purchase, there is no regulation-induced bias in favor of one type over another.

The intent of the proposed rule is to allow automatic recovery of all costs only for an economic power purchase. Charges for reliability purchases will still have to be recovered through base rates. The proposal therefore sets out two criteria that a purchase must satisfy in order for capacity or reservation charges to receive fuel clause treatment.

The first criterion is that the total cost of the purchase must be less than the buyer's total avoided variable cost. This is somewhat different than the "economic dispatch basis" criterion used in the present fuel clause regulation.[15] The economic dispatch standard requires that purchased energy be economic on an hourly basis in order for the net energy charges to be accorded fuel clause treatment.[16] However, the inclusion of capacity charges in fuel clause treatment requires a broader standard. The focus would no longer be hourly energy economies, but rather the overall savings produced by a purchase that may run longer than one hour. The proposed standard therefore considers whether a particular transaction produces overall net savings, *i.e.*, whether total avoided variable costs are greater than the total cost of the purchase.

The second criterion that a purchase would have to satisfy under the proposed rule in order to recover capacity charges in fuel clause adjustments is that the buyer must have adequate reserve capacity net of all purchases where capacity charges are included in the fuel clause, *i.e.*, independent of all economic purchases. If the buyer has adequate available reserve capacity either from its own system or other firm purchase contracts, then the transaction proposed for fuel clause treatment of capacity charges can be presumed to be for economy and not reliability reasons. The capacity charges for reliability purchases belong in base rates, not in fuel clause adjustments.

A utility's base rates include a return of and on the firm's investment in generating capacity, including reserves, as well as an estimate of expenses for reliability purchases. The estimate for reliability purchased power expenses should be set at a level that reflects planned capacity purchases and an amount of unplanned capacity purchases that assumes the reasonable performance of the utility's generating units. Limiting the recovery of reliability purchase capacity charges to the estimate in base rates provides a utility with an incentive to properly maintain its generating units and to expeditiously restore them to service in the event of a forced outage. Allowing an automatic dollar-for-dollar recovery of those expenses may weaken that incentive.

Furthermore, ratepayers are already paying in base rates for the capacity determined to be required to serve them. Automatic recovery of additional capacity charges would shift the risk of poor plant performance to consumers. We therefore propose to continue to exclude the capacity charges of all reliability purchases from the fuel clause.

In order for the Commission to enforce the proposed regulation's exclusion of capacity charges for reliability purchases from fuel clause adjustments, our auditors must have some guidance on how to distinguish a reliability from an economic purchase. This is not an easy task because the criteria used to determine the capacity required to meet system peak load and provide adequate reserves vary among utilities. There is no one "right" level of reliability. It would be presumptuous to establish a single targeted reliability level that would apply to all utilities under our jurisdiction to distinguish reliability from economic purchases.

We are therefore proposing that electric utilities that intend to recover capacity costs in fuel clause adjustments be required to file a statemet that sets out the system reserve capacity criteria used for planning and operational purposes. The statments should be designed to enable the Commission's auditors to determine the capacity threshold at which the system operator will make a reliability purchase. Subsequent filings are required only if the capacity criteria change.

Where such a capacity criteria statement is required by a state or local regulatory body, including a plant site licensing board, the statement filed with the Commission must be identical in relevent part to the one filed with that authority.

Electric utilities that recover the capacity cost portion of purchased power expenses through fuel clause adjustments would have the burden of retaining sufficient reserve capacity data to demonstrate that a questionable purchase was solely for economy reasons.

We propose to continue the present policy of permitting the energy charges of any purchase to be recovered through fuel clause adjstments if such energy displaces the buyer's higher cost generation. However, the present economic dispatch criterion would no longer be applicable. Instead, the energy charges of a purchase may be recovered through fuel clause adjustments to base rates if the total energy charges incurred are less than the buyer's total avoided variable costs during the purchase period. We propose to continue fuel clause treatment for these energy charges because it encourages buyers to minimize energy costs and keeps customer rates down.

[15] 18 CFR 35.14(a)(2)(iii)(1982).

[16] For example, an intersystem capacity purchase in which the maximum amount of associated energy is continuously scheduled into the buyer's system, *i.e.*, block-loaded, would not presently qualify for fuel clause treatment because such a purchase would not have been made with respect to hourly economies. *See, e.g., Report of Designated Officer, Investigation into Wholesale Power Transactions During Time of Fuel Inadequacies*, Docket No. ER78-307 (March 19, 1979), Appendix I, at 15-16.

IV. Regulatory Flexibility Act Certification.

The Regulatory Flexibility Act ("RFA")[17] requires an agency to prepare certain statements, descriptions, and analyses of a proposed rule which, if promulgated, would have a significant economic impact on a substantial number of small entities. The Commission is not required to make such analyses if a proposed rule would not have such an impact.

"Small entity" is defined by section 601(6) of the RFA. One element of the definition, the term "small business," as defined by reference to Section 3 of the Small Business Act,[18] is limited to an entity "which is independently owned and operated and which is not dominant in its field of operation."[19] There are approximately 217 electric utilities in the United States within the jurisdiction of the Commission. Only about 20 of these could possibly be classified as small entities in terms of their size.[20] In addition, because an electic utility typically is the exclusive supplier of electricity in its retail service territory, a utility of this size could not be described as "not dominant in its field of operation." Thus, there is not a substantial number of entities which would be subject to this rule which could be classified as "small"under the RFA.

As explained in Parts II and III of this preamble, the proposed rule would remove a disincentive against utilities' entering into economically advantageous purchases of electric power. Any economic impact of this rule on any utility which may be a small entity can therefore only be beneficial. And since the rule would allow capacity charges to be flowed through the fuel clause only if a purchase results in a net reduction in rates, the customers of all utilities to whom the proposed rule applies should also benefit by it. Thus, the economic impact on utilities and their customers will not be significant in terms of the overall purposes of the FRA.

The proposed rule would also impose a one-time filing requirement (described in Part III of this preamble) on utilities which wish to take advantage of the money-saving opportunities the rule would offer them. (The rule would also require a utility to make a filing if it changes its reserve criteria. We expect that such filings will be infrequent since reserve criteria do not change often). This requirement of the proposed rule, which appears not to duplicate, overlap or conflict with other relevant Federal rules, would involve minimal expense. The Commission therefore certifies, pursuant to Section 605(b) of the RFA, that this rule, if promulgated, will not have a significant economic impact on a substantial number of small entities.

V. Public Comment Procedures

Interested parties are invited to submit written comments on the proposed rule to the Office of the Secretary, Federal Energy Regulatory Commission, 825, North Capitol Street, NE., Washington, D.C. 20426, on or before June 10, 1983. Comments should refer to Docket No. RM83-62-000 on the outside of the envelope and on all documents submitted to the Commission. The Commission intends that those participating in this proceeding should be able to examine and reply to initial comments made in response to this notice. Such reply comments must be submitted on or before July 11, 1983.

Each party submitting comments should include his or her name and address and also the name, mailing address and telephone number to whom communications concerning the proposal may be addressed. Fourteen conformed copies should be submitted along with the original. Written Comments will be placed in the Commission's public files and will be available for public inspection at the Commission's Division of Public Information, Room 1000, 825 North Capitol Street NE., Washington, 20426 (202/357-8055) during regular business hours.

VI. Additional Questions

The Commission wishes to solicit comments on the following question related to the proposed rule. Persons addressing these questions are requested, in their comments, to refer to these by number.

1. Is the proposed filing procedue adequate to insure that the capacity charges for only economic purchased power are passed through the fuel clause? Are there practical alternatives? Is the information requested already filed with the Department of Energy?

2. Is there a readily calculable specific measure of reserve capacity adequacy that could be used to guide the Commission's auditors in lieu of the filing requirement? For example, a purchase whose total costs are less than the total avoided variable costs could be presumed to be for economy purposes if the buyer had a least a 15% reserve margin at the time the purchase began.

3. Should the focus of the reserve criteria be available reserves or operating reserves?

4. Is the information necessary to determine the generating capacity reserve status during a purchase period readily available? Where is such information available? How long is it retained?

5. In determining whether to include the capacity cost of a purchase in the fuel clause, is the proper focus of reserve adequacy the time the purchase is initiated or the entire period of a purchase?

6. Are there alternative tests to enable the Commission's auditors to distinguish between economy and reliablility purchases?

7. Is a distinction between economy and reliability purchases necessary, or should the demand charges for any purchase that lowers variable costs be recovered through the fuel clause?

8. What are the positive and negative considerations of allowing all purchased power expenses to be recovered through automatic adjustments to base rates? Specifically:

a. How would such a policy affect an electric utility's incentive to build and properly maintain efficient generating capacity?

b. If all purchased power expenses are recovered through the fuel clause, should all intersystem sales revenue the be credited to base rates through the fuel clasuse?

9. Is system lambda a suitable measure of avoided variable costs? Are there other measures that are suitable? If so, what are they?

10. Should the capacity charges associated with long-term economic purchases, say 12 months duration, be excluded from fuel clause treatment?

List of Subjects in 18 CFR Part 35

Electric power rates, Electric utilities, Reporting and Recordkeeping Requirements.

In consideration of the foregoing, the Commission proposes to amend Chapter I, Title 18, Code of Federal Regulation, as set forth below.

(Federal Power Act, 16 U.S.C. 824d, 824e and 825h (1976 & Supp. IV 1980); Department of Energy Organization Act, 42 U.S.C. 7171, 7172

[17] 5 U.S.C. 601-612 (Supp. IV 1980).

[18] 15 U.S.C. 632 (West Supp. 1982). *See also* the Small Business Administration's Small Business Sizes Standards, 13 C.F.R. Part 212 (1982).

[19] 15 U.S.C.A. 632(a) (West Supp. 1982).

[20] For the purposes of this certification, we treat as small entities Class C and Class D utilities; that is, those utilities with operating revenues of $25,000 or more per year, but less than $1,000,000. *See* 18 C.F.R. Part 104 (1982), Uniform System of Accounts Prescribed bor Public Utilities and Licensees Subject to the Provisions of the Federal Powar Act (Class C and Class D). For the types of electric utilities that the Commission regulates, this treatment seems more consistent with the purposes of the RFA than use of the standards set out in 13 CFR 121.3-10(d) (1982).

VOL 48 ISS 92 MY 11 1983 UMI

and 7173(c) (Supp. IV 1980); Executive Order 12009, 3 CFR 142 (1978); 5 U.S.C. 553 (1976)

By direction of the Commission

Kenneth F. Plumb,

Secretary.

1. In Part 35, the Table of Contents is amended by revising the title of § 35.14 to read as follows:

PART 35—FILING OF RATE SCHEDULES

Sec.

* * * * * *

35.14 Fuel cost and economic purchased power adjustment clauses.

2. In § 35.14, the title of § 35.14 and paragraphs (a)(1), the introductory text of (a)(2), are revised and a new paragraph (a)(11) is added, to read as follows:

Subpart C—Other Filing Requirements

§ 35.14 Fuel cost and economic purchased power adjustment clauses.

(a) * * *

(1) The fuel clause shall be of the form that provides for periodic adjustments per kWh of sales equal to the difference between the fuel cost per kWh of sales in the base period and in the current period:

Adjustment Factor = *Fm/Sm—Fb/Sb*

Where: *F* is the expense of fossil and nuclear fuel and economic purchased power in the base (*b*) and current (*m*) periods; and *S* is the kWh sales in the base and current periods, all as defined below.

(2) Fuel and economic purchased power costs (*F*) shall be the cost of:

* * * * *

(iii) The charges associated with economic purchased power. Economic purchased power is energy purchased to substitute for energy that would have otherwise been generated at a higher total variable cost by the buyer. Capacity charges for economic purchased power may be included in fuel and economic purchased power costs (*F*) if the toatal cost of the purchase is less than the buyer's total avoided variable cost for the duration of the purchase, and if the available reserve capacity of the buyer is adequate independent of all other purchases where the demand charges are included in *F. Energy charges may be included if the total amount of energy charges incurred for a purchase is less than the buyer's total avoided variable costs for the duration of the purchase; and less*

* * * * *

(11) A utility proposing to include capacity charges in fuel and economic purchased power costs (*F*) under paragraph (a)(2)(iii) of this section shall amend its fuel cost adjustment clause so that it is consistent with paragraphs (a)(1) and (a)(2)(iii) of this section. Such amendment shall include a statement which explains the system reserve capacity criteria used by the utility for planning and operational purposes. The statement shall be designed to enable the Commission's auditors to determine the capacity threshold at which the system operator will make a reliability purchase. Where the utility filing the statement is required by a State or local regulatory body (including a plant site licensing board) to file a capacity criteria statement with that body, the system reserve capacity criteria in the statement filed with the Commission shall be identical to those contained in the statement filed with the State or local regulatory body. Any utility that changes its reserve capacity criteria shall, within 45 days of such change, file an amended fuel cost and economic purchased power adjustment clause to incorporate the new criteria.

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR-221-82]

Public Approval and Information Reporting Requirements: Cross Reference to Temporary Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations portion of this **Federal Register**, the Internal Revenue service is issuing temporary regulations that relate to public approval and information reporting requirements applicable to certain issues of State and local government obligations. The text of those temporary regulations also serves as the basis for comments solicited by this proposed rulemaking.

DATES: Written comments and requests to speak at the public hearing must be delivered by July 11, 1983. The regulations are proposed to be effective, in general, after December 31, 1982.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-221-82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: George T. Magnatta of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3288).

SUPPLEMENTARY INFORMATION:

Background

The temporary regulations in the Rules and Regulations portion of this issue of the **Federal Register** amend Part 5f of Title 26 of the Code of Federal Regulations. The proposed regulations incorporate the temporary regulations. The proposed regulations, if adopted, would be added to Part 1 of Title 26 of the Code of Federal Regulations. Section 5f.103-2 of the Temporary regulations would become § 1.103-17, and §5f.103-3 would become § 1.103-18, and §§ 5f.103-2 and 5f.103-3 would be deleted.

The proposed regulations relate to the public approval and information reporting requirements under new Code section 103 (k) and (l), which are applicable to certain issues of State and local government obligations. These provisions were added to the Internal Revenue Code of 1954 by Section 215 of the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248; 96 stat. 324, 468). The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A State. 917; 26 U.S.C. 7805). For the text of the temporary regulations, see FR Doc. 83-12659 (T.D. 7892) published in the Rules and Regulations portion of this issue of the **Federal Register.** The preamble to the temporary regulations providles a substantive description.

Non-Application of Executive Order 12291

The Commissioner has determined that this proposed regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of the Order dated April 28, 1982.

Regulatory Flexibility Act

Although this document is a notice of proposed rulemaking, which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations consideration will be given to any written comments that are submitted (preferable seven copies to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying.

A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public helaring is held, notice of the time and place will be published in the **Federal Register** .

Drafting Information

The principal author of these proposed regulations is George T. Magnatta of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

26 CFR Parts 20 and 301

[LR-209-76]

Special Lien for Estate Taxes Deferred Under Section 6166 or 6166A

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to special liens for deferred estate taxes. Changes to the applicable law were made by the Tax Reform Act of 1976, the Revenue Act of 1978, and the Economic Recovery Tax Act of 1981. The regulations would provide the public with the guidance needed to comply with the law and would affect those estates electing a special lien in favor of the United States on property as security for deferred payments of estate tax.

DATES: Written comments and requests for a public hearing must be delivered or mailed by July 11, 1983. The amendments are generally proposed to be effective for estates of decedents dying after December 31, 1976. The amendments necessitated by the Economic Recovery Tax Act of 1981 are proposed to be effective for estates of decedents dying after December 31, 1981.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T (LR-209-76), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Neil W. Zyskind of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224, Attention: CC:LR:T, (202) 566-4336, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Estate Tax Regulations (26 CFR Part 20) and to the Procedure and Administration Regulations (26 CFR Part 301) under section 6324A of the Internal Revenue Code of 1954 (Code). These amendments are proposed to reflect the amendments made to the Code by section 2004(d) of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1868); section 702(e) of the Revenue Act of 1978 (Pub. L. 95-600, 92 Stat. 2929); and section 422 of the Economic Recovery Tax Act of 1981 (Pub. L. 97-34, 95 Stat. 316). These regulations are to be issued under the authority contained in Code sections 6324A(a) (90 Stat. 1868; 26 U.S.C. 6324a(a)) and 7805 (68A Stat. 917; 26 U.S.C. 7805).

Explanation of Provisions

The purpose of section 6324A is to permit the executor of a decedent's estate to elect a lien on section 6166 property in favor of the United States in lieu of a bond or personal liability if an election under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981) was made. The election under section 6324A will not be effective unless all parties having an interest in the property subject to the lien sign an agreement in which they consent to the creation of the lien. The agreement is to be attached to the notice in which the lien under section 6324A is elected. The election may be filed at anytime prior to payment of the full amount of the estate tax and interest due. Regulations concerning the election of and agreement to the special lien under section 6324A are found in § 301.6324A-1. The amendments contained in these proposed regulations complete the task of clarifying the provisions contained in section 6324A.

Proposed §§ 20.6324A-1(b) (1) and (2) define the term "section 6166 lien property" and determine the maximum value of the property which the district director may require as section 6166 lien property. Proposed § 20.6324A-1 (b)(3) indicates when the district director may require additional property to be subject to the lien under section 6324A. Proposed § 20.6324A-1(c) discusses the period and priorities of a section 6324A lien.

Regulatory Flexibility Act and Executive Order 12291

The Commissioner of Internal Revenue has determined that this proposed rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis is therefore not required. Although this document is a notice of proposed rulemaking which solicits public comment, the Internal Revenue Service has concluded that the regulations proposed herein are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, these proposed regulations do not constitute regulations subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Comments and Requests for a Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably seven copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. If a public hearing is held, notice of the time and place will be published in the **Federal Register.**

Drafting Information

The principal author of these proposed regulations is Neil W. Zyskind of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

Proposed Amendments to the Regulations

PART 20—[AMENDED]

The proposed amendments to 26 CFR Parts 20 and 301 are as follows:

§ 20.2204—1 [Amended]

Paragraph 1. Section 20.2204–1 is amended as follows:

(a) Paragraph (a) is amended by removing the phrases "(1 year with respect to the estate of a decedent dying before January 1, 1974)" and "(1 year if applicable)" wherever they appear.

(b) Paragraph (b) is amended by removing the phrases "(1 year with respect to the estate of a decedent dying before January 1, 1974)" and "(or 1 year period if applicable)" wherever they appear.

Par. 2. A new § 20.2204–3 is added immediately following § 20.2204–2 to read as set forth below.

§ 20.2204–3 Special rules for estates of decedents dying after December 31, 1976; special lien under section 6324A.

For purposes of § 20.2204–1(b) and § 20.2204–2(b), in the case of a decedent dying after December 31, 1976, if the executor elects a special lien in favor of the United States under section 6324A, relating to special lien for estate tax deferred under section 6166, such lien shall be treated as the furnishing of a bond with respect to the amount for which the time for payment has been extended under section 6166. If an election has been made under section 6324A, the executor may not substitute a bond pursuant to section 2204 in lieu of that lien. If a bond has been supplied under section 2204, however, the executor may, by filing a proper notice of election and agreement, substitute a lien under section 6324A for any part or all of such bond. See §§ 20.6324A–1 and 301.6324A–1 for rules relating to special liens under section 6324A.

Par. 3. Section 20.6324A–1 is revised to read as set forth below.

§ 20.6324A–1 Special lien for estate tax deferred under section 6166 or 6166A.

(a) *In general.* If the executor of an estate of a decedent dying after December 31, 1976, makes an election under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981) to defer the payment of estate tax, the executor may make an election under section 6324A. An election under section 6324A will cause a lien in favor of the United States to attach to the estate's section 6166 lien property, as defined in paragraph (b)(1) of this section. This lien is in lieu of the bonds required by sections 2204 and 6165 and in lieu of any lien under section 6324 on the same property with respect to the same estate. The value of the property which the district director may require under section 6324A as section 6166 lien property may not exceed the sum of the deferred amount (as defined in paragraph (e)(1) of this section) and the required interest amount (as defined in paragraph (e)(2) of this section). The unpaid portion of the deferred amount (plus any unpaid interest, additional amount, addition to tax, assessable penalty, and cost attributable to the deferred amount) shall be a lien in favor of the United States on the section 6166 lien property. See § 301.6324A–1 of this chapter (Regulations on Procedure and Administration) for provisions relating to the election of an agreement to the special lien for estate tax deferred under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981).

(b) *Section 6166 lien property.*—(1) *In general.* Section 6166 lien property consists of those interests in real personal property designated in the agreement referred to in section 6324A (c) (see paragraph (b) of § 301.6324A–1 of this chapter). An interest in property may be designated as section 6166 lien property only to the extent such interest can be expected to survive the deferral period (as defined in paragraph (e) (3) of this section). Property designated, however, need not be property included in the decedent's estate.

(2) *Maximum value of required property.* The fair market value of the property required by the district director to be designated as section 6166 lien property with respect to any estate shall not be greater than the sum of the deferred amount and the required interest amount, as these terms are defined in paragraphs (e) (1) and (2) of this section. However, the parties to the agreement referred to in section 6324A (c) may voluntarily designate property having a fair market value in excess of that sum. The fair market value of the section 6166 lien property shall be determined as of the date prescribed in section 6151(a) (without regard to any extension) for payment of the estate tax. Such value must take into account any encumbrance onthe property (such as a mortgage or a lien under section 6324B).

(3) *Additional lien property may be required.* If, at any time, the unpaid portion of the deferred amount and the required interest amount exceeds the fair market value of the section 6166 lien property, the district director may require the addition of property to the agreement in an amount up to such excess. When additional property is required, the district director shall make notice and demand upon the agent designated in the agreement setting forth the amount of additional property required. Property having the required value (or other security equal to the required value) must be added to the agreement within 90 days after notice and demand from the district director. Failure to comply with the demand within the 90-day period shall be treated as an act accelerating payment of installments under section 6166(g) or 6166(h) (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981).

(4) *Partial substitution of bond.* See paragraph (c) of § 301.6324A–1 of this chapter for rules relating to the partial substitution of a bond for the lien where the value of property designated as section 6166 lien property is less than the amount of unpaid estate tax plus interest.

(c) *Special rules.*—(1) *Period of lien.* The lien under section 6324A arises at the earlier of the date—

(i) The executor is discharged from liability under section 2204; or

(ii) Notice of lien is filed in accordance with § 301.6323 (f)–1 of this chapter.

The section 6324A lien continues until the liability for the deferred amount is satisfied or becomes unenforceable by reason of lapse of time. The provisions of § 301.6325–1 (c), relating to release of lien or discharge of property, shall apply to this paragraph (c)(1).

(2) *Requirement that lien be filed.* The lien imposed by section 6324A is not valid against a purchaser (as defined in paragraph (f) of § 301.6323 (h)–1, holder of a security interest (as defined in paragraph (a) of § 301.6323 (h)–1), mechanic's lienor (as defined in paragraph (b) of § 301.6323 (h)–1), or judgment lien creditor (as defined in paragraph (g) of § 301.6323 (h)–1) until notice of the lien is filed. Once filed, the notice of lien remains effective without being refiled.

(3) *Priorities.* Although a notice of lien under section 6324A has been properly filed, that lien is not valid—

(i) To the extent provided in section 6323(b)(6), relating to real property tax and special assessment liens, regardless of whether such liens came into existence before or after the filing of the notice of Federal tax lien;

(ii) In the case of any real property subject to a lien for repair or improvement, as against a mechanic's lienor, provided that such lien came into existence before the notice of tax lien was filed; and

(iii) As against any security interest set forth in section 6323(c)(3), relating to real property construction or improvement financing agreements, regardless whether such security interest came into existence before or after the filing of the notice of tax lien.

However, paragraphs (c) (3) (ii) and (iii) of this section shall not apply to any security interest that came into existence after the date of filing of notice (in a manner similar to a notice filed under section 6323(f)) that payment of the deferred amount has been accelerated under section 6166(g) or 6166A(h) (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981).

(d) *Release or discharge of lien.* For rules relating to release of the lien imposed by section 6324A or discharge of the section 6166 lien property, see section 6325 and § 301.6325–1 of this chapter.

(e) *Definitions.* For purposes of section 6324A of this section—

(1) *Deferred amount.* The deferred amount is the aggregate amount of estate tax deferred under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981) (determined as of the date prescribed by section 6151(a) for payment of the estate tax).

(2) *Required interest amount.* The required interest amount is the aggegate amount of interest payable over the first four years of the deferral period. For purposes of computing the required interest amount, the interest rate prescribed by section 6621 in effect on the date prescribed by section 6151(a) for payment of the estate tax shall be used for computing the interest for the first four years of the deferral period. The 4-percent interest rate prescribed by section 6601(j) shall apply to the extent provided in that section. For purposes of computing interest during deferral periods beginning after December 31, 1982, interest shall be compounded daily.

(3) *Deferral period.* The deferral period is the period for which the payment of tax is deferred pursuant to the election under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981).

(4) *Application of definitions.* In the case of a deficiency, a separate deferred amount, required interest amount, and deferral period shall be determined as of the due date of the first installment after the deficiency is prorated to installments under section 6166 or 6166A (as in effect prior to its repeal by the Economic Recovery Tax Act of 1981).

PART 301—[AMENDED]

§ 301.6324A–1 [Amended]

Par. 4. Paragraphs (a), (b)(1)(iv), (b)(4), and (f) of § 301.6324A–1 are amended by adding the phrase "(as in effect prior to its repeal by Economic Recovery Tax Act of 1981)" after each time the phrase "6166A" appears.

Roscoe L. Egger, Jr.,

Commissioner of Internal Revenue.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposal To Delist Kangaroos; Public Hearing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of public hearing.

SUMMARY: At the request of the Animal Protection Institute of America, the Service is holding a public hearing on its April 8, 1983, proposed rule (48 FR 15426) to remove the red (*Macropus rufus*), eastern gray (*Macropus giganteus*), and the western gray (*Macropus fuliginosus*) kangaroos from any classification pursuant to the Endangered Species Act of 1973.

DATE: The public hearing will be held on Monday, June 6, 1983, commencing at 9:00 AM.

ADDRESS: The public hearing will be held in Room 8068, Main Interior Department Building, 18th and C Streets NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION: Section 4(b)(5)(E) of the Endangered Species Act, as amended, calls for the holding of a public hearing when it is requested by any person, provided that such person files for the hearing within 45 days of the publication of a proposed rule to list, delist, or reclassify a species, or to designate or revise Critical Habitat. On April 15, 1983, the Animal Protection Institute of America formally notified the Service by letter that it requested a public hearing for the purpose of reviewing the Service's proposed rule of April 8, 1983, to remove the red, eastern gray, and western gray kangaroos from any classification pursuant to the Endangered Species Act. In compliance with this request, and with Section 4(b)(5)(E) of the Act, the Service hereby notifies all interested individuals and parties that it will hold a public hearing on this issue at the time and place set forth above. All comments and statements presented at this hearing will be made part of the public record and will be considered before any final decision is made concerning the proposed rule.

Dated: May 5, 1983.

C. F. Layton,

Acting Assistant Secretary for Fish and Wildlife Parks.

Notices

Federal Register
Vol. 48, No. 92
Wednesday, May 11, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS

Board of Certification; Meeting

AGENCY: Board of Certification, United States Courts of Appeals, Circuit Executive.

ACTION: Notice of meeting of Board of Certification in Washington, D.C. on May 27, 1983, to interview applicants who are interested in being certified for the positions of circuit executive.

Individuals who wish to serve as circuit executives in the United States judicial system must be certified as qualified by the statutorily created Board of Certification (28 U.S.C. Section 332(f)). While certification is a prerequisite for appointment as circuit executive, it does not ensure employment.

A personal interview with the Board is necessary for certification, and the Board cannot reimburse candidates for attendant travel expenses.

Details on how to apply may be had by writing to: Board of Certification, Administrative Office of the U.S. Courts, Washington, D.C. 20544.

The next meeting of the Board will be held in Washington, D.C. on May 27. Applications must be received well in advance in order to be considered for a possible appointment on this date.

William R. Foley,

Secretary of the Board of Certification and Director, Administrative Office of the U.S. Courts.

BILLING CODE 2210-01-M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

Commodity Credit Corporation Crops, 1983 Wheat Program; Determinations Regarding the Proclamation of 1983 Crop Program Provisions for Wheat

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Notice of Determination of the 1983 wheat loan and purchase rate, established (target) price, acreage reduction program, paid diversion program, and special grazing and haying program.

SUMMARY: The purpose of this notice is to affirm the following determinations which have been made by the Secretatry of Agriculture on August 27, 1982 with respect to the 1983 crop of wheat: (1) The loan and purchase rate will be $3.65 per bushel; (2) the established (target) price will be $4.30 per bushel; (3) an acreage reduction program for wheat will be in effect with a uniform reduction of 15 percent; (4) a cash land diversion program requiring a 5 percent reduction in addition to the 15 percent acreage reduction program with a payment of $2.70 per bushel; and (5) no set-aside or special haying and grazing program will be in effect. These determinations are made in accordance with Sections 107B, 107C, 109, and 110 of the Agricultural Act of 1949, as amended (hereinafter referred to as the "1949 Act").

EFFECTIVE DATE: August 27, 1982.

ADDRESS: Dr. Howard C. Williams, Director, Analysis Division, USDA–ASCS, Room 3741, South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Bruce R. Weber, Agricultural Marketing Specialist, Analysis Division, USDA–ASCS, P.O. Box 2415, Washington, D.C. 20013 or call (202) 447–4146. The Final Regulatory Impact Analysis describing the options considered in developing this Notice of Determination is available on request from the above-named individual.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been designated as "major". It has been determined that these program provisions will result in an annual effect on the economy of $100 million or more.

The title and number of the federal assistance program that this notice applies to are: TITLE—Wheat Production Stabilization: Number 10.058 and TITLE–Commodity Loans and Purchases: Number 10.051, as found in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since there is no requirement that a notice of proposed rulemaking be published in accordance with 5 U.S.C. 553 or any other provision of law with respect to the subject matter of these determinations.

This notice sets forth determinations with respect to the following issues which are briefly described:

1. *Loan and Purchase Level.* Section 107B(a) of the 1949 Act provides that the Secretary shall make available to producers loans and purchases for the 1983 crop of wheat at such level, not less than $3.65 per bushel, as the Secretary determines will maintain the competitive relationship of wheat to other grains in domestic and export markets after taking into consideration the cost of producing wheat, supply and demand conditions, and world prices for wheat.

2. *Established (Target) Price.* Section 107B(b)(1)(C) of the 1949 Act provides that the 1983 crop established (target) price shall not be less than $4.30 per bushel. The Secretary may adjust this established price to reflect any change in (i) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (ii) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the determination is made.

3. *Acreage Reduction Program (ARP).* Sections 107B(e) (1) and (2) of the 1949 Act require that the Secretary provide for a combination of an acreage reduction program and a land diversion program under which the acreage planted to wheat for harvest on the farm would be limited to the acreage base for the farm reduced by a total of 20 percent, consisting of a reduction of 15 percent under the acreage reduction program and a reduction of 5 percent under the land diversion program. As a condition of eligibility for loans, purchases, and payments on the 1983 crop of wheat, the producers on a farm must comply with the terms and conditions of the combined acreage reduction and land diversion program. The acreage base to be used for a farm under the program for the 1983 crop of wheat shall be the same as the acreage base which was applicable to the farm under the acreage reduction program for the 1982 crop, adjusted to reflect established crop-rotation practices and to reflect such other factors as the Secretary determines should be considered in determining a fair and equitable base. If an acreage reduction program is in effect for any crop, the national program acreage, program allocation factor and the voluntary acreage reduction provisions are not applicable to such crop. The individual farm program acreage shall be the acreage planted on the farm to wheat for harvest within the permitted wheat acreage for the farm.

4. *Set-Aside Program.* Sections 107B(e) (1) and (3) of the 1949 Act provide that the Secretary may provide for a set-aside program if it is determined that the total supply of wheat, in the absence of such a program, will be excessive, taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices to meet a national emergency.

5. *Land Diversion Program.* Section 107B(e)(5) of the 1949 Act requires that the Secretary implement a land diversion program for the 1983 crop of wheat under which the Secretary shall make crop retirement and conservation payments to any producer of the 1983 crop of wheat whose acreage planted to wheat for harvest on the farm is reduced so that to the extent that such acreage does not exceed wheat acreage base for the farm less an amount equivalent to 5 percent of the wheat acreage base. This reduction in acreage is in addition to the 15 percent reduction in wheat acreage based which is required under the acreage reduction program. Such cash land diversion payments shall be made in an amount which is computed by multiplying: (i) The diversion payment rate, by (ii) the farm program yield for the crop by (iii) the additional acreage diverted under the land diversion program. The diversion payment rate shall be established by the Secretary at not less than $3.00 per bushel, except that the rate may be reduced up to 10 percent if the Secretary determines that the same program objective could be achieved with the lower rate. The Secretary shall make not less than 50 per centum of any payments under this paragraph to producers of the 1983 crop as soon as practicable after a producer enters into a land diversion contract with the Secretary and in advance of any determination of performance, but in no case prior to October 1, 1982. If a producer fails to comply with a land diversion contract after obtaining an advance payment under this paragraph, the producer shall repay the advance immediately and, in accordance with regulations issued by the Secretary, pay interest on the advance.

6. *The National Program Acreage (NPA).* Section 107B(c)(1) of the 1949 Act provides that the Secretary shall proclaim an NPA for the 1983 crop of wheat not later than August 15, 1982. The NPA shall be the number of harvested acres of wheat the Secretary determines (on the basis of the weighted national average of the farm program payment yields for the 1983 crop) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for exports during the 1983/84 marketing year. The NPA provisions do not apply if an acreage reduction program is implemented for the 1983 crop of wheat.

7. *Voluntary Reduction Percentage.* Section 107B(c)(3) of the 1949 Act provides that the 1983 individual farm program acreage of wheat which is eligible for payments shall not be reduced by application of an allocation factor (not less than 80 percent nor more than 100 percent) if the producer reduces the acreage of wheat planted for harvest on the farm from the 1983-crop established wheat acreage base by at least the percentage recommended by the Secretary in the proclamation of the NPA for the 1983 crop. If an acreage reduction program is implemented for the 1983 crop of wheat, the voluntary reduction percentage shall not be applicable to such crop.

8. *Grazing and Haying of Designated ARP Acreage.* Section 107B(e)(4) of the 1949 Act provides the Secretary may permit all or any part of the conservation use acreage to be devoted to sweet sorghum, hay and grazing or the production of quar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, rye, or any other commodity, if it is determined that such crop production is needed to provide an adequate supply of such commodities, is not likely to increase the cost of price support program, and will not affect farm income adversely.

9. *Special Grazing and Haying Program.* Section 109 of the 1949 Act provides that the Secretary is authorized to administer a special wheat acreage grazing and haying program. If a special grazing and haying program is implemented, a producer shall be permitted to designate a portion of the acreage on the farm which the producer intends to plant to wheat, feed grains, or upland cotton for harvest, but not in excess of 40 percent thereof, or 50 acres whichever is greater. Such designated acreage shall be planted to wheat (or some other commodity other than corn or grain sorghum) and must be used by the producer for grazing purposes or hay rather than for commercial grain production. The Secretary shall pay the producer participating in this special program an amount determined by multiplying the farm program payment yield for wheat established for the farm, by the number of acres included in the special program, by a rate of payment determined by the Secretary to be fair and reasonable. Acreage which is included in the special program shall be in addition to any acreage which is included in any set-aside, reduced acreage or land diversion program.

10. *Offsetting Compliance.* Section 107B of the 1949 Act provides that the Secretary may implement offsetting compliance requirements as a condition of eligibility for program benefits. If offsetting compliance is required, operators and owners of farms would have to assure that all of farms in which they have an interest were in compliance with program requirements which are specified with respect to the wheat program, such as planting within the established wheat acreage bases or the normal crop acreage established for such farms, in order to be eligible for program benefits.

11. *Advance Payments.* Section 107C of the 1949 Act requires that the Secretary shall make advance deficiency payments available to producers who participate in the acreage reduction programs, if the Secretary determines that deficiency payments will likely be made.

If the Secretary establishes an acreage limitation or acreage set-aside program for the 1983 crop of wheat in accordance will section 107B(e) and determines that deficiency payments will likely be made for such commodity for such crop, the Secretary shall make available advance deficiency payments to producers who agree to participate in such program.

In any case in which the deficiency payment payable to a producer for a crop, as finally determined by the Secretary under section 107B(b)(1), is less than the amount paid to the producer as an advance deficiency payment for the crop under this section, the producer shall refund an amount

VOL 48 ISS 92 MY 11 1983 UMI

equal to the difference between the amount advanced and the amount finally determined by the Secretary to be payable to the producers as a deficiency by the Secretary to be payable to the producers as a deficiency payment for the crop concerned. If the Secretary determines under section 107B(b)(1), that deficiency payments will not be made available to producers on a crop with respect to which advance deficiency payments already have been made under this section, the producers who received such advance payments shall refund such payments. Any refund required shall be due at the end of the marketing year for the crop with respect to which such payments were made. If a producer fails to comply with the requirements under the acreage reduction of set-aside program involved (and, in the case of the 1983 crop of wheat, the requirements of the land diversion program involved) after obtaining an advance deficiency payment under this section, the producer shall repay immediately the amount of the advance, plus interest thereon in such amount as the Secretary shall prescribe by regulations.

A notice that the Secretary was preparing to make determinations with respect to the 1983 crop of wheat was published in the **Federal Register** on May 25, 1982, (47 FR 22573) and provided for a 30-day comment period. The comment period was limited to 30 days to allow the Secretary sufficient time to properly consider the comments received before the final program determinations are made. A total of 360 comments were received from 36 states. Included in this total were comments from a national farm organization, 2 national agribusinesses, and 6 members of Congress. A majority of the comments centered around the following eight issues: (1) The loan and purchase level; (2) the established (target) price; (3) an acreage reduction program (ARP); (4) a set-aside program; (5) a land diversion program (LDP); (6) permitting haying and grazing of conservation use agreage if an ARP is established; (7) the method used to establish acreage bases; and (8) whether to require offsetting compliance if an ARP is established.

1. *Loan and Purchase Level:* With respect to the loan and purchase level, 83% favored raising the level from the minimum statutory level, 16% favored the minimum level and 10% favored a lower level. Many of those commenting favored a price support level in a range of $3.60 to $7.30 per bushel. However, most of those commenting favored a loan and purchase level of $3.80 per bushel.

2. *Established "Target" Price:* With respect to the established (target) price, 62% favored raising the target price above the statutory minimum of $4.30 per bushel, while 11% favored no target price at all and 2% favored a lower target price. Most comments favored the $4.50 to $5.00 per bushel range for the target price.

3. *Acreage Reduction; Land Diversion or Set-Aside Program:* Approximately 85% of the comments favored an ARP, A LDP or a set-aside program. A majority (70%) favored an ARP, LDP, or some combination of the two. For the ARP, a majority favored either a 15 or 20 percent reduction while the majority of those in favor of an LDP favored either a 10 or 15 percent reduction. Approximately 25 percent favored APR/LDP combinations with the majority of those favoring either a 10%/10% or 15%/10% program.

4. *Haying and Grazing of Conservation Use Acreage:* Approximately 87% of those commenting favored the haying and grazing of the conservation acreage if an ARP is established.

5. *Establishing Acreage Bases:* With respect to establishing the wheat acreage bases, 21% favored using the total acreage cultivated on a farm, 17% favored using the 1982 base for both participants and non-participants in the program, 11% favored using as the base the normal crop acreage which has been established under prior programs, and the remainder of the comments specified other methods for establishing bases. However, all comments favored using some type of historical planted acreage as the base.

6. *Offsetting Compliance:* With respect to offsetting compliance as a program requirements if an ARP is established, 53% opposed requiring it and 47% were in favor of offsetting compliance.

A number of the determinations with respect to the wheat program are required to be made by Section 107B(e)(1) of the 1949 Act not later than August 15 prior to the calendar year in which the crop is harvested. On July 14, 1982, the Secretary announced by press release the various program determinations for the 1983 crop of wheat. However, the Omnibus Budget Reconciliation Act of 1982 amended the 1949 Act which required that the Secretary change some of the previously announced program provisions. Therefore, on August 27, 1982, the Secretary announced by press release the new program provisions. The purpose of this notice is to affirm the program determinations which have previously been announced on August 27, 1982. Thus, it has been determined that no further public rulemaking is required which respect to the following determinations:

Determinations

1. *Loan and Purchase Level:* In accordance with Section 107B(a) of the 1949 Act, it has ben determined that the loan and purchase rate for 1983-crop wheat is $3.65 per bushel since this level will best maintain the competitive relationship of wheat to other grains in domestic and foreign markets after taking into consideration the cost of producing wheat, supply and demand conditions, the world prices for wheat.

2. *Established "Target" Price:* In accordance with Section 107B(1)(C) of the 1949 Act, it has been determined that the established (target) price for wheat is $4.30 per bushel, which is the minumun statutory level.

3. *Acreage Reduction Program (ARP).* In accordance with Section 107B(e)(2) of the 1949 Act, it has been determined that a 20 percent reduction shall be applicable to the acreage planted to wheat in 1983. Producers will be required to reduce their acreage bases by 15 percent for the acreage reduction program and 5 percent for the land diversion program for a total of a 20 percent reduction. Producers will be required to reduce their acreage by the combined total of the acreage reduction and the land diversion program in order to be eligible for loans, purchases, and payments for the 1983 crop of wheat. The Secretary has determined that the total supply of wheat, in the absence of such limitations, will be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. This option was selected because it provides the best balance between the multiple objectives of providing adequate wheat supplies for domestic and foreign utilization, while maintaining adequate carryover stocks, supporting farm income, combating inflation, holding down Treasury costs and conserving natural resources.

Land designated for conservation use must be cropland that was devoted to row crops or small grains in two of the last three years, except that for land to be designated that is in a summer fallow rotation, the requirement is one of the last two years.

Eligible land on which permanent conservation practices were established in 1982 or a subsequent year will be eligible for designation as conservation use acreage under any acreage reduction, set-aside, or diversion program authorized by the 1949 Act as long as the practice is maintained. These conservation practices will be eligible for cost-sharing payment under the Agricultural Conservation Program.

4. *Set-Aside Program.* In accordance with Sections 107B(e) (1) and (3) of the 1949 Act, it has been determined that there will be no set-aside program for the 1983 crop of wheat.

5. *Land Diversion Program (LDP).* In accordance with Section 107B(e)(5) of the 1949 Act, it has been determined that land diversion payments are necessary to assist in adjusting the total national acreage of wheat to desirable goals. Therefore, such payments will be made for the 1983 crop of wheat at $2.70 per bushel times the program yield times the acreage diverted for the 5 percent land diversion program.

6. *National Program Acreage.* In accordance with Section 107B(c)(1) of the 1949 Act, it has been determined that the NPA will not be applicable for the 1983 crop of wheat since an acreage reduction program has been announced.

7. *Voluntary Reduction Percentage.* In accordance with Section 107B(c)(3) of the 1949 Act, it has been determined that the voluntary reduction percentage will not be applicable for the 1983 crop of wheat since an acreage reduction program has been announced.

8. *Grazing and Haying of Designated APR Acreage.* In accordance with Section 107B(e)(4) of the Act, it has been determined that wheat producers shall not be permitted to hay or plant alternate crops on the designated ARP acreage. Grazing of the conservation use acreage will be authorized during the six principal non-growing months as determined by the State ASC committees.

9. *Special Haying and Grazing Program.* In accordance with Section 109 of the 1949 Act, it has been determined that there will be no special haying and grazing program for the 1983 crop of wheat.

10. *Offsetting Compliance.* Offsetting compliance will not be required as a condition of eligibility in order for a wheat producer to participate in the 1983 acreage reduction and land diversion programs.

11. *Advance Payments.* Producers, at the time they sign up for the program, may request an advance of 50 percent of the diversion payment and of any projected deficiency payment. The rate of the advance payment for the deficiency payment portion will be 32.5 cents per bushel, which is 50 percent of the estimated 1983 deficiency payment rate. A producer accepting an advance payment, but who later does not comply with program provisions, must refund the amount of the advance payment with interest. Interest charged will be the rate in effect for commodity loans on the date of the advance payment, plus five percentage points.

(Secs. 107B, 107C, 109, 1001; 95 Stat. 1221, as amended 96 Stat. 966, 91 Stat. 950, as amended, (7 U.S.C. 1445b–1, 1445d. and 1309)).

Signed in Washington, D.C., May 5, 1983.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

DEPARTMENT OF COMMERCE

Economic Development Administration

Applications For Loan Guarantees

AGENCY: Economic Development Administration (EDA), Commerce.

ACTION: Notice.

SUMMARY: The Economic Development Administration (EDA) announces that applications by private lending institutions are now being accepted, and EDA may approve the guarantee of up to 90% of the principal and interest of loans to be made to private borrowers for the purchase of fixed assets and/or for working capital purposes.

DATE: Effective date: May 11, 1983.

FOR FURTHER INFORMATION CONTACT:

For Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Pureto Rico, Rhode Island, Vermont, Virginia, Virgin Islands, and West Virginia: Edward J. Morris, Chief, Business Loans Division, Philadelphia Regional Office, Federal Reserve Bank Building, 105 North 7th Street, Room 600, Philadelphia, Pennsylvania 19106 (215) 597–7538.

For Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee: M. Fred Coon, Chief, Business Loans Division, Atlanta Regional Office, 1365 Peachtree Street, NE., Suite 700, Atlanta, Georgia 30309 (404) 881–2841.

For Illinois, Indiana, Michigan, Minnesota, Ohio, and Wisconsin: Donald Goostrey, Chief, Business Loans Division, Chicago Regional Office, 175 West Jackson Boulevard, Suite A–1630; Chicago, Illinois 60604, (312) 353–8569.

For Arkansas, Louisiana, New Mexico, Oklahoma, and Texas: Henry N. Troell, Chief, Business Loans Division, Austin Regional Office, American Bank Tower, Suite 600, 221 West Sixth Street, Austin, Texas 78701, (512) 482–5217.

For Colorado, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming: Chief, Business Loans Division, Denver Regional Office, Tremont Center, 333 West Colfax Avenue, Denver, Colorado 80206 (303) 837–4403.

For Alaska, America Samoa, Arizona, California, Guam, Hawaii, Idaho, Nevada, Oregon, and Washington: Allan Kozu, Chief, Business Loans Division, Seattle Regional Office, Lake Union Building, 1700 Westlake Avenue North, Seattle, Washington 98109 (206) 442–4730.

SUPPLEMENTARY INFORMATION:

A. Amount of Funding Available

Total commitments to guarantee loans not to exceed $150 million of contingent liability for loan principal; total commitments to guarantee loans to steel companies not to exceed $20 million of contingent liability for loan principal are available in fiscal year 1983, which ends September 30, 1983.

B. Type of Financial Assistance

The Economic Development Administration will entertain applications for the guarantee of financial assistance to aid in financing, within an eligible area, the purchase or development of land and facilities (including machinery and equipment) for industrial or commercial usage, including the construction of new buildings, the rehabilitation of abandoned or unoccupied buildings, and the alteration, conversion or enlargement of existing buildings by guaranteeing loans made to private borrowers by private lending institutions, for any of the purposes referred to in this paragraph or for working capital purposes upon application of such institution and upon such terms and conditions as the Secretary of Commerce may prescribe, except that no such guarantee shall at any time exceed 90 per centum of the amount of the outstanding unpaid balance of such loan.

C. Conditions of Assistance

1. Applications shall be submitted only by private lending institutions ("the applicant") for the guarantee of loans to private borrowers. EDA will work with the applicant in the preparation and submission of an application. Borrowers and other third parties shall work with the applicant in the origination,

VOL
48
ISS
92
MY
11
1983
UMI

preparation and submision of an application.

2. The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of employment or underemployment within the eligible area wherein it is or will be located. Moreover, assistance will normally be limited to projects entaining Federal Government investment exposure of $10,000 or less per job created or saved.

3. No loan shall be guaranteed unless it is determined that there is reasonable assurance of repayment, and that there is adequate collateral to support the loan. The applicant must explain why it is reasonably sure that the borrower will be able to repay the loan, and provide such documentation as EDA may require to support that conclusion.

4. Subject to section 701(5) of the Public Works and Economic Development Act of 1965, as amended, ("the Act"), no guarantee, including renewals or extensions thereof, can exceed a period of twenty-five years. But ordinarily a fixed asset guaranteed loan cannot exceed the weighted average useful life of the project fixed assets. Further, the term of the guaranteed working capital loan generally cannot exceed five years, and the loan should be amortized in full during its term.

5. No guarantee shall be extended when EDA determines that the interest rate is excessive. Although EDA will not establish administrative ceilings on interest rates for guaranteed loans, it may require the applicant to submit information to support the rate charged.

6. The applicant must include forms: (a) signed by the borrower assuring that the financial assistance will not be used to relocate from one labor area to another; (b) evidencing approval of the application by an agency or instrumentality of the State or political subdivision in which the project is located; and (c) evidencing specific findings by the local authority that the project is consistent with an Overall Economic Development Program approved by EDA.

7. The portion of the loan that is not guaranteed by EDA must be at risk throughout the life of the loan. This precludes the applicant from obtaining a guarantee on the unguaranteed portion of the loan either directly or indirectly, including but not limited to compensating balances.

8. EDA will ordinarily not provide over $10 million of face value loan guarantee assistance to a single firm. EDA will ordinarily not accept applications for guarantees of loans with a face value of $550,000 or less.

9. Pursuant to the authority of Office of Management and Budget Circular A-70, EDA will charge a guaranty fee of one half of one percent per annum of the outstanding EDA contingent liability, payable on a quarterly basis.

10. For guaranteed fixed assets loans, EDA requires an equity contribution of at least fifteen percent (15%) of the aggregate project cost. This requirement may be satisfied through the contribution of equity capital, or the contribution of the proceeds of a standby loan which would ordinarily be repayable only after the loan guaranteed by EDA has been paid in full, and if such standby loan is secured, the security shall be subordinate and inferior to the lien or liens securing the loan guaranteed by EDA.

For guaranteed working capital loans, in addition to the requirements contained in 13 CFR 306.14 (c), EDA requires the firm to have a minimum equity position of at least 20% of the firm's total debt (including all debt associated with the proposed project), or contribute at least 15% of working capital requirements through new equity contributions.

11. Fees and charges levied for services provided by a party with no interest in the applicant in conjunction with the origination or preparation of a loan are an allowable project cost, if the amount of the levy is found to be reasonable and appropriate. These levies are generally related to accounting, legal, engineering, appraisal, or packaging services. "Finder's fees" will not be considered appropriate and are not an allowable project cost. Payment of fees and charges may not be contingent upon loan approval. EDA will require full disclosure of all fees and charges.

12. EDA may guarantee up to 90% of the face value of a loan. However, the applicant shall submit to EDA justification for the percent guarantee requested, including why a lesser guarantee percent would not be acceptable. EDA shall give priority consideration to those projects which propose an EDA guarantee of 75% or less.

13. Ordinarily, EDA will not accept an applicant for a loan guarantee from an applicant who has existing financing extended to the borrower. Such relationships could create conflicts of interest inconsistent with EDA's interests in the applicant's servicing of the loan for which a guarantee is sought.

14. An independent technical and economic feasibility report will be required for applications for new ventures involving a total project cost of $1 million or more; an independent economic feasibility report will be required for applications for projects involving tourism or recreational facilities.

D. Information To Be Submitted by the Applicant

Appropriate evidence obtained from private borrowers shall be submitted by the private lending institution with the application to show compliance with the following conditions:

1. No guarantees shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or from other Federal agencies on terms which in the opinion of EDA will permit the accomplishment of the project.

2. Name Check forms CD-346 for each officer, the chief financial officer, and for each individual owning or controlling at least 20% of the enterprise.

3. Other statutory requirements such as loan guarantees are subject to include:

a. Davis-Bacon Act, as amended, 40 U.S.C. 276a—276(a) (5).

b. The Architectural Barriers Act of 1964, as amended, 42 U.S.C. 4151—4156; See 13 CFR 309.14.

c. The Flood Disaster Protection Act of 1973, as amended, 42 U.S.C. 40001 *et seq.*

E. Program Priorities

EDA shall give priority consideration to otherwise acceptable applications that exhibit all of the following characteristics:

1. EDA guarantee liability is 75% or less.

2. The financing is for the purchase of fixed assets for business expansion or export development.

3. The project does not involve real estate development.

4. The job/cost ratio is $7,500 or less.

F. Ongoing Applicant Reponsibilities

Upon approval of a guaranteed loan, applicant responsibilities shall include but are not limited to:

1. Executing such care and diligence in the disbursement, servicing, collection and liquidation of the guaranteed loan as would be exercised by a reasonable and prudent commercial bank in dealing with a loan of its funds without guarantee.

2. In the event of the subsequent failure of the project, unless EDA elects otherwise, conducting the liquidation of the failed project prior to making demand on EDA for payment under the EDA guarantee.

G. Application Materials

In addition to a completed application form, the application materials submitted to EDA shall include, but are not limited to, the following:

1. Documentation and accompanying analysis of the basis used to determine reasonable assurance of repayment and adequate collateral coverage. Such documentation shall include:

(a) at least three (3) years historical financial and operating statements of the borrower, as well as pro forma financial and operating statements on a month by month basis for the first year and quarterly basis for the next two (2) years;

(b) current appraisal or estimate of value of the collateral to support the loan.

2. One copy each of the proposed loan agreement between the applicant and the borrower and of the proposed Note evidencing the indebtedness.

3. Audited current financial statements of the borrower prepared in accordance with generally accepted accounting principles.

4. Documentation, statisfactory to EDA, that the guaranteed loan will not create unfair competition within the meaning of section 702 of the Act.

H. Date for Application Submission

Completed applications should be submitted as soon as possible but not later than July 29, 1983. Applications submitted after July 29, 1983 cannot be assured of processing.

I. Approvals of Applications

Approval or disapproval of applications will be announced on or before September 30, 1983.

J. In the event there are any inconsistencies between the material contained in this notice and the Economic Development Administration Directives System, the material in this notice shall prevail.

K. In addition, all EDA loan guarantees are subject to pertinent statutory and regulatory requirements contained in Pub. L. 89-136, 42 U.S.C. 3142-3246(h) and 13 CFR Parts 306 and 309.

Dated: April 25, 1983.

Carlos C. Campbell,

Assistant Secretary for Economic Development.

BILLING CODE 3510-24-M

Foreign-Trade Zones Board

[Docket No. 13-83]

Proposed Foreign-Trade Zone—Birmingham, Alabama; Application and Public Hearing

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Birmingham, Alabama, requesting authority to establish a general-purpose foreign-trade zone in Birmingham, within the Birmingham Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zone Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on May 2, 1983. The applicant is authorized to make this proposal under Act No. 498, House Bill 1158, Bound Acts of Alabama, 1977.

The proposed zone will be located at the City's Airport Industrial Park, which covers 116 acres on Lake Boulevard and Birmingham Street, adjoining the 1600-acre Birmingham Municipal Airport complex. A general-purpose building is planned to accommodate initial zone activity. Space is also available for firms requiring separate facilities.

The application contains evidence of the need for zone procedures in the Birmingham area. Several firms have indicated an interest in using the zone for warehousing/distribution of such products as steel bars, fabricated steel products, filtration systems and components, industrial valves, controls, auto service equipment and components, furniture, alcohol, and games. No approvals are being requested for manufacturing at this time. Such requests would be made to the Board on a case-by-case basis.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: John J. Da Ponte, Jr. (Chairman), Director, Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, D.C. 20230; Garnet Fee, District Director, U.S. Customs Service, South Central Region, 250 N. Water Street, P.O. Box 2748, Mobile, AL 36601; and Colonel Patrick J. Kelly, District Engineer, U.S. Army Engineer District Mobile, P.O. Box 2288, Mobile, AL 36628.

As part of its investigation, the examiners committee will hold a public hearing on June 3, beginning at 9:00 a.m., in the City Council Chambers, City Hall, 710 20th Street North, Birmingham.

Interested parties are invited to present their views at the hearing. Persons wishing to testify should notify the Board's Executive Secretary in writing at the address below or by phone (202/377-2862) by May 27. Instead of an oral presentation, written statements may be submitted in accordance with the Board's regulations to the examiners committee, care of the Executive Secretary, at any time from the date of this notice through July 5, 1983.

A copy of the application and accompanying exhibits will be available during this time for public inspection at each of the following locations:

U.S. Dept. of Commerce District Office, Suite 200-201, 408 S. 20th Street, Birmingham, AL 35205

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 1872, 14th and Pennsylvania, NW., Washington, D.C. 20230

Dated: May 5, 1983.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 83-12011 Filed 5-10-83; 8:45 am]

BILLING CODE 3510-25-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: International Trade Administration.

Title: Computer System Parameters.

Form Numbers: Agency—ITA 6031P, 6031A-P, EAR 376.10 OMB-0625-0038.

Type of Request: Revision.

Burden: 2,020 respondents; 1,535 reporting hours.

Needs and Uses: The information required by these forms is used by the Office of Export Administration to determine whether an application for a validated license to export a computer or related equipment to the Soviet Union, Eastern Europe, or the People's Republic of China should be approved or denied.

Affected Public: Commercial exporters.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395-3785.

Agency: International Trade Administration.

Title: International Import Certificate.

Form Numbers: Agency—ITA-64645P; OMB—0625-0064.

Type of Request: Extension.

Burden: 500 respondents; 2,500 reporting hours.

Needs and Uses: By using this form, a U.S. importer certifies to the government of an

VOL 48 ISS 92 MY 11 1983 UMI

exporting country that he will import certain specific commodities, and that he will not re-export such commidities except in accordance with the export control regulations of the importing country. This procedure was developed as a result of the efforts of the U.S. and other countries to increase effectiveness of their controls over international trade in strategic commodities.

Affected Public: Commercial exporters.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Reports on General License Exports of U.S. Origin Commodities Imported for Servicing.

Form Numbers: Agency—EAR 371.17(a)(4); OMB—0625.0066.

Type of Request: Extension.

Burden: 50 respondents; 83 reporting hours.

Needs and Uses: This procedure permits exporters to return commodities to communist countries without a validated license, after such commodities have been repaired or serviced in the U.S. The goods were originally shipped to the communist country under a validated license and then returned to the U.S. for repair or servicing.

Affected Public: Commercial exporters.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Report on Destruction or Proof of Return to U.S. or to Foreign Service Facility.

Form Numbers: Agency—EAR 371.17(f)(3)(IV) and (V); OMB—0625–0068.

Type of Request: Extension.

Burden: 100 respondents; 400 reporting hours.

Needs and Uses: This procedure permits commodities to be exported to communist destinations under a general license authorization to replace defective or unacceptable U.S. parts or equipment that were previously exported from the U.S. under a validated export license. The commodity to be replaced must either be destroyed abroad or returned to the U.S. or to a foreign firm owned or controlled by the U.S. exporter that is providing the replacement part or equipment.

Affected Public: Commercial exporters.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Agency: International Trade Administration.

Title: Monthly Report on Exports of Parts to Service Equipment Shipped Against a Validated License.

Form Numbers: Agency—EAR 376.4(d); OMB—0625–0067.

Type of Request: Extension.

Burden: 100 respondents; 200 reporting hours.

Needs and Uses: This procedure permits an exporter to ship parts needed to service equipment previously sent to consignees in communist destinations where export controls are imposed for national security reasons.

Affected Public: Commercial exporters.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefit.

OMB Desk Officer: Ken Allen, 395–3785.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals (202) 377–4217, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Ken Allen, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Edward Michals,

Departmental Clearance Officer.

[FR Doc. 83–12808 Filed 5–10–83; 8:45 am]

BILLING CODE 3510–CW–M

Committee for the Implementation of Textile Agreements

Request for Public Comment on Bilateral Textile Consultations With the Government of Malaysia To Review Trade in Category 341

May 6, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: On April 27, 1983 the Government of the United States requested consultations with the Government of the Malaysia with respect to Category 341 (women's girls', and infants' woven cotton blouses). This request was made on the basis of the Agreement of May 17 and June 8, 1978, as amended, between the Governments of the United States and the Malaysia relating to trade in cotton, wool, and man-made fiber textiles and textile products.

The purpose of this notice is to advise the public that if no solution is agreed upon in consultations between the two governments within 60 days of the request for consultations, the Committee for the Implementation of Textiles Agreements may establish a specific limit of 216,865 dozen for the entry and withdrawal from warehouse for consumption of cotton textile products in Category 341, produced or manufactured in Malaysia and exported to the United States during the twelve-month period with began on April 27, 1983 and extends through March 26, 1984.

The Government of the United States reserves the right under the Agreement to invoke import controls on this category during the 60-day consultation period (April 27, 1983–June 25, 1983) at a level of 54,216 dozen and during the twelve-month period beginning on April 27, 1983 at a level of 216,865 dozen.

Any party wishing to comment or provide data or information regarding the treatment of Category 341 under the bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement with the Government of Malaysia, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in Category 341, is invited to submit such comments or information in ten copies to Walter C. Lenahan, Chairman Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Since the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C., and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitue "a foreign affairs function of the United States."

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83–12810 Filed 5–10–83; 8:45 am]

BILLING CODE 3510–25–M

DEPARTMENT OF EDUCATION

Applications for Fellowships for Fiscal Year 1983

AGENCY: National Institute of Handicapped Research, ED.

ACTION: Application Notice for Transmittal of Applications for Fellowships for Fiscal Year 1983.

Applications are invited for Fellowships in Handicapped Research under the National Institute of Handicapped Research (NIHR).

Authority for this program is contained in Section 202(d) of the Rehabilitation Act of 1973, as amended by Pub. L. 95–602 (29 U.S.C. 761a(d)).

Closing Date for Transmittal of Applications: Applications for fellowships must be mailed or hand delivered by July 1, 1983.

Applications delivered by mail: An application sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: 84.133F, 400 Maryland Avenue, SW., Washington, D.C. 20202.

An applicant must show proof of mailing, consisting of one of the following:

(1) A legibly dated U.S. Postal Service postmark.

(2) A legible mail receipt with the date of mailing stamped by the U.S. Postal Service.

(3) A dated shipping label, invoice, or receipt from a commercial carrier.

(4) Any other proof of mailing acceptable to the U.S. Secretary of Education.

If an application is sent through the U.S. Postal Service, the Secretary does not accept either of the following as proof of mailing: (1) a private metered postmark, or (2) a mail receipt that is not dated by the U.S. Postal Service.

An applicant should note that the U.S. Postal Service does not uniformly provide a dated postmark. Before relying on this method, an applicant should check with its local post office.

An applicant is encouraged to use registered or at least first class mail. Each late applicant will be notified that its application will not be considered. Amendments received after the closing date also will not be considered in the review of the application.

Applications Delivered by Hand: An application that is hand delivered must be taken to the U.S. Department of Education, Application Control Center, Room 5673, Regional Office Building #3, 7th and D Streets, SW., Washington, D.C. 20202.

The Application Control Center will accept hand-delivered applications between the hours of 8:00 a.m. and 4:30 p.m. (Washington, D.C., time), daily except Saturdays, Sundays, and Federal holidays. An application that is hand delivered will not be accepted after 4:30 p.m. on the closing date.

Program Information: The National Institute of Handicapped Research was established to provide for a comprehensive and coordinated approach to the conduct of research and related activities for the rehabilitation of handicapped individuals. The Institute's major responsibilities include administering research programs, disseminating information acquired through research, participating in international rehabilitation programs, and chairing an Interagency Committee to promote coordination of all Federal policies and priorities for research related to rehabilitation of handicapped individuals.

The Institute is also authorized to establish and maintain fellowships to procure the assistance of highly qualified research fellows to perform research activities in rehabilitation.

Fellows may conduct research in any areas included in Section 204 of Title II of the Rehabilitation Act of 1973, as amended.

Under this program fellowship awards will be made to highly qualified individuals whose training and experience indicate a potential for engaging in scientific research related to the solution of rehabilitation problems of handicapped persons. (See 34 CFR 356.2) Fellows may work at any setting which is appropriate to the conduct of the research.

Individuals applying for research fellowships will be evaluated on the basis of: Quality and level of formal education; work experience; recommendations of former or present supervisors or colleagues; and on the basis of other independent evidence of an ability to work creatively in a field selected by the applicant, which must include a research proposal submitted to NIHR. (See 34 CFR 356.30) Fellowship applications will be reviewed in accordance with the peer review requirements governing NIHR's research fellowship program. (See 34 CFR 356.21)

Fellows are required to submit a final report which contains, as a minimum, an analysis of the significance of the project and an assessment of the degree to which the objectives of the project have been achieved. (See 34 CFR 356.51) Publication, distribution, and disposition of all manuscripts and other materials resulting from the fellowship awarded must acknowledge assistance received from the Department and the Institute. Three copies of these publications or other materials must be furnished to NIHR. (See 34 CFR 356.42)

Available Funds: NIHR has reserved funds to award up to ten fellowships which will include stipends of $25,000 to $30,000 per year plus an allowance of $1,500 to be used by the Fellow for expenses connected with the fellowship including travel and transportation, tuition, fees, supplies, attendance at meetings required to carry out the purpose of the fellowship, and other related expenses. (See 34 CFR 356.50) The amount of the fellowship stipend will be determined by the education and experience levels of the fellow. Senior Fellowships, at $30,000, will be awarded to professionals at mid-career or later; Junior Fellowships of $25,000 will be awarded to scholars with less professional experience.

These estimates, however, do not bind the U.S. Department of Education to a specific number of fellowships or to the amount of any fellowship unless that number is specified in statute or regulations.

The fellowships will be for a one-year period, beginning September 30, 1983. (See 34 CFR 356.40) Fellows will be required to devote full-time to the fellowship activity.

Application Procedures: Application forms and further information may be obtained by writing to or calling the National Institute of Handicapped Research, U.S. Department of Education, Mary E. Switzer Building, Room 3511, 330 C Street, SW., Washington, D.C. 20202 (Attention: Fellowship Unit), Telephone: 202–245–0517.

Applications must be prepared and submitted in accordance with the regulations, instructions, and forms included in the application package. However, the program information is only intended to aid applicants in applying for assistance. Nothing in the program information package is intended to impose any paperwork, application content, reporting, or other performance requirements beyond those imposed under the statute and regulations.

In addition to the research proposal, applicants must also submit evidence of quality and level of formal education, work experience, and recommendations of former or present supervisors or colleagues, and other independent evidence that indicates an ability to work creatively in scientific research, as specified in the Regulations governing the NIHR fellowship program (34 CFR Part 356.3).

Applicable Regulations: Regulations governing the program are: The National Institute of Handicapped Research Regulations (34 CFR Part 356).

Candidates for fiscal year 1983 fellowships should base their applications on Section 202(d) of the Act, applicable NIHR regulations in 34 CFR Part 356, and this Notice.

FOR FURTHER INFORMATION CONTACT: Ms. Rheable Edwards, National Institute of Handicapped Research, U.S. Department of Education, Switzer Office Building, Room 3511, 330 C Street, SW., Washington, D.C. 20202, Telephone: 202/245–0517, TTY for deaf individuals 202/473–4217.

BILLING CODE 4000-01-M

National Advisory Committee on Accreditation and Institutional Eligibility; Meeting

AGENCY: Department of Education.

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a public meeting of the National Advisory Committee on Accreditation and Institutional eligibility. It also describes the functions of the Committee. Notice of this meeting is required under the Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of its opportunity to attend and to participate.

DATES: June 14, 1983, 9:00 a.m. to 5:00 p.m., local time; June 15, 8:30 a.m. to 5:30 p.m.; and June 16, 9:00 a.m. to 3:00 p.m. Requests for oral presentations before the Committee must be received on or before May 31, 1983. Written comments may be submitted at any time prior to the meeting and will be considered by the Advisory Committee.

ADDRESS: Sheraton National Hotel, Columbia Pike and Washington Boulevard, Arlington Virginia.

FOR FURTHER INFORMATION CONTACT: Richard J. Rowe, Director, Eligibility and Agency Evaluation Staff, Office of Postsecondary Education, 400 Maryland Avenue, SW. (Room 3030 ROB-3), U.S. Department of Education, Washington, D.C. 20202 (202-245-9873).

SUPPLEMENTARY INFORMATION: The National Advisory Committee on Accreditation and Institutional Eligibility is authorized by Section 1205 of the Higher Education Act as amended by Pub. L. 96-374 (20 U.S.C. 1145). The Committee advises the Secretary of Education regarding his responsibility to publish a list of nationally recognized accrediting agencies and associations, State agencies recognized for the approval of public postsecondary vocational education, and State agencies recognized for the approval of nurse education.

The Committee also advises the Secretary of Education regarding policy affecting both recognition of accrediting and approval bodies, and institutional eligibility for participation in Federal funding programs. The meeting on June 14-16 will be open to the public. The meeting will be held at the Sheraton National Hotel, Columbia Pike and Washington Boulevard, Arlington, Virginia. On June 14, the Advisory Committee's Ad Hoc Committee will review comments and hear oral presentations from the public regarding the essay published by the Carnegie Foundation for the Advancement of Teaching, *Control of the Campus*. The oral input from the public regarding the essay will be scheduled from 1:30 p.m. to 3:00 p.m. On June 15, the Committee will review petitions by the following accrediting and State approval agencies relative to initial or continued recognition by the Secretary of Education. The Committee will also hear presentations by representatives of the petitioning agencies and interested third parties. The agencies having petitions pending before the Committee are:

Petitions for Recognition as Nationally Recognized Accrediting Agencies and Associations.

A. *Petitions for Initial Recognition.* National Association of Private Nontraditional Schools and Colleges.

U.S. Catholic Conference, Board of Examiners.

B. *Petitions for Continuation of Recognition.* Accrediting Council on Education in Journalism and Mass Communication, Accrediting Committee.

American Bar Association, Council of the Section of Legal Education and Admissions to the Bar.

C. Petition for Expansion of Scope of Recognition. American Optometric Association, Council on Optometric Education.

Petitions for Recognition as State Agencies for the Approval of Public Postsecondary Vocational Education

A. *Petition for Initial Recognition.* Delaware State Agency for the Approval of Postsecondary Vocational/Technical Educational Institutions and Programs.

B. *Petition for Continuation of Recognition.* Oklahoma State Board of Vocational and Technical Education.

A portion of this meeting will be used by the Advisory Committee to make final recommendations to the Secretary on agencies reviewed under a special procedure. The list of agencies and a description of the procedure were published in the **Federal Register** on May 5, 1983.

On June 16, the Ad Hoc Committee will present its recommendations regarding the essay, *Control of the Campus*, to the full Advisory Committee for review and the Committee will also discuss other policy items.

Request for oral presentations before the Committee should be submitted in writing to Richard J. Rowe (address as above). Requests should include the names of all persons seeking an appearance, the organization they represent, and the purpose for which the presentation is requested. Requests must be received on or before May 31, 1983. Time constraints may limit oral presentations. However, all written material will be considered by the Advisory Committee.

A record will be made of the proceedings of the meeting and will be available for public inspection at the office of the Eligibility and Agency Evaluation Staff, Office of Postsecondary Education, 400 Maryland Avenue, SW. (Room 3030 ROB-3), U.S. Department of Education, Washington, D.C. 20202 (202-245-9873) from the hours of 8:00 a.m. to 4:30 p.m.

Dated: May 6, 1983.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000-01-M

National Advisory Council on Vocational Education; Meeting Change

AGENCY: National Advisory Council on Vocational Education.

ACTION: Amendment of notice.

SUMMARY: This document is intended to notify the general public of changes in date and time of a meeting in FR Doc. 83-11577 in the issue of Monday, May 2, 1983, on Page 19771, second column. The **DATE** line should read "May 12, 1983, 8:30 A.M. to 4:30 P.M."

Signed at Washington, DC on May 9, 1983.

James W. Griffith,

Executive Director.

DEPARTMENT OF ENERGY

Canada; International Atomic Energy Agreement on Civil Uses; Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Agreement for Cooperation Between the Government of the United States of America and the Government of Canada Concerning Civil Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following sale:

Contract Number S-CA-336, to Atomic Energy of Canada, Ltd., 50 milligrams of thorium-230, for use in the mass spectrometic analysis of thorium-uranium oxide and of thorium-plutonium oxide fuels from CANDU and research reactor fuels.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: May 5, 1983.

George Bradley,

Principal Deputy Assistant Secretary for International Affairs.

BILLING CODE 6450-01-M

Solicitation for Cooperative Agreement Proposals for Licensed In-Basin Rod Consolidation Storage Demonstration Program

AGENCY: Richland Operations Office, Commercial Spent Fuel Management Program Office, DOE.

ACTION: Notice of solicitation and preproposal conference.

SUMMARY: In accordance with the Nuclear Waste Policy Act of 1982, the Department of Energy (DOE), Richland Operations Office (RL) is issuing a Solicitation for Cooperative Agreement Proposals (SCAP), No. DE-SC06-83RL10433, for licensed in-basin rod consolidation storage demonstrations. The proposed cooperative agreements will be limited to domestic utilities currently operating civilian nuclear power reactors in the United States. A one-day preproposal conference will be held at the U.S. Department of Energy, Richland Operations Office, Federal Building Auditorium, 825 Jadwin Avenue, Richland, Washington in early June 1983.

It is anticipated that the Government will share the cost of one or two cooperative agreements by providing in-kind services.

ADDRESSES: Single copies of the solicitation document and further information on the preproposal conference can be obtained from: U.S. Department of Energy, Richland Operations Office, Attn: Connie S.

VOL 48 ISS 92 MAY 11 1983 UMI

Martin, P.O. Box 550, Richland, WA 99352, (509) 376–6633.

SUPPLEMENTARY INFORMATION: The date and time of the preproposal conference will be announced in the solicitation package. Interested parties will be given an opportunity to submit written questions, comments, and suggestions to DOE at the scheduled conference. Attendance at the preproposal conference is encouraged. However, attendance is neither required nor is it a prerequisite for receiving the solicitation or for making application for award.

Issued in Washington, D.C. on May 5, 1983.

Hilary J. Rauch,

Director, Procurement and Assistance Management Directorate.

BILLING CODE 6450–01–M

Solicitation for Cooperative Agreement Proposals for Licensed At-Reactor Spent Nuclear Fuel Dry Storage Demonstration Program

AGENCY: Richland Operations Office, Commercial Spent Fuel Management Program Office, DOE.

ACTION: Notice of solicitation and preproposal conference.

SUMMARY: In accordance with the Nuclear Waste Policy Act of 1982, the Department of Energy (DOE), Richland Operations Office (RL) is issuing a Solicitation for Cooperative Agreement Proposals (SCAP) No. DE–SC06–83RL10432, for licensed at-reactor spent nuclear fuel dry storage demonstrations, including unlicensed testing at Federal facilities if required. The proposed cooperative agreements will be limited to domestic utilities currently operating civilian nuclear power reactors in the United States. A one-day preproposal conference will be held at the U.S. Department of Energy, Richland Operations Office, Federal Building Auditorium, 825 Jadwin Avenue, Richland, Washington in early June 1983.

It is anticipated that the Government will share the cost up to a maximum of 25 percent of the total program cost.

ADDRESSES: Single copies of the solicitation document and further information on the preproposal conference can be obtained from: U.S. Department of Energy, Richland Operations Office, Attn: Richard B. Wallace, P.O. Box 550, Richland, WA 99352, (509) 376–8501.

SUPPLEMENTARY INFORMATION: The date and time of the preproposal conference will be announced in the solicitation package. Interested parties will be given an opportunity to submit written questions, comments, and suggestions to DOE at the sheduled conference. Attendance at the preproposal conference is encouraged. However, attendance is neither required nor is it a prerequisite for receiving the solicitation or for making application for award.

Issued in Washington, D.C. on May 5, 1983.

Hilary J. Rauch,

Director, Procurement and Assistance Management Directorate.

Energy Information Administration

National Petroleum Council, Coordinating Subcommittee on Petroleum Inventories and Storage Capacity; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Coordinating Subcommittee of the Committee on Petroleum Inventories and Storage Capacity.

Date and time: Wednesday, June 15, 1983—8:30 a.m.

Place: The Marathon Oil Company Research Center, In the Auditorium, 7400 South Broadway, Littleton, Colorado.

Contact: Jimmie L. Petersen, Director, Office of Oil and Gas, Energy Information Administration, U.S. Department of Energy, Forrestal Building—Room 2H–058, Washington, D.C. 20585, Telephone: 202–252–6401.

Purpose of Committee: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to petroleum inventories and petroleum product storage capacities.

Tentative Agenda:

- Review the Coordinating Subcommittee assignment from the NPC Committee on Petroleum Inventories and Storage Capacity.
- Discussion of individual Subcommittee member assignments for the next meeting.
- Discussion of any other matters pertinent to the overall assignment of the Coordinating Subcommittee.
- Public Comment.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Jimmie L. Petersen at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes of Meeting: As a working subcommittee, verbatim transcripts are not required. Minutes of subcommittee meetings are prepared and are available for review and copying at the Freedom of Information Public Reading Room 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on May 3, 1983.

J. Erich Evered,

Administrator, Energy Information Administration.

BILLING CODE 6450–01–M

Secondary and Tertiary Storage Task Group of the Coordinating Subcommittee of the National Petroleum Council's Committee on Petroleum Inventories and Storage Capacity; Open Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following advisory committee meeting:

Name: Secondary and Tertiary Storage Task Group of the Coordinating Subcommittee of the National Petroleum Council's Committee on Petroleum Inventories and Storage Capacity.

Date and time: Tuesday, June 14, 1983—1:00 p.m.

Place: The Marathon Oil Company Research Center; in the auditorium, 7400 South Broadway, Littleton, Colorado.

Contact: Jimmie L. Petersen, Director, Office of Oil and Gas, Energy Information Adminstration, U.S. Department of Energy, Forrestal Building—Room 2H–058, Washington, D.C. 20585, telephone: 202–252–6401.

Purpose of Committee: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to petroleum inventories and petroleum product storage capacities.

Tentative Agenda:

- Review proposed scope, methdology, and timetable of the task Group's assignment.
- Discussion of individual Task Group member assignments for the next meeting.
- Discussion of any other matters pertinent to the overall assignment of the Task Group.
- Public Comment.

Public Participation: The meeting is open to the public. Written statements may be filed with the Committee either before or after the meeting. Members of the public who wish to make oral statements pertaining to agency items should contact Jimmie L. Petersen at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Committee is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes of Meeting: As a working subcommittee, verbatim transcripts are not required. Minutes of subcommittee meetings are prepared and are available for review and copying at the Freedom of Information Public Reading Room 1E–190, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C., between 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on May 3, 1983.

J. Erich Evered,

Administrator, Energy Information Administration

BILLING CODE 6450–01–M

Federal Energy Regulatory Commisssion

[Docket No. ER83–369–000]

Alabama Power Co.; Order Accepting for Filing and Suspending Rates, Denying Summary Disposition, Noting Interventions, and Establishing Hearing Procedures

Issued: May 5, 1983.

On March 7, 1983, Alabama Power Company (APC) tendered for filing revised rates for its municipal and cooperative wholesale customers.[1] The proposed rates would increase revenues from the wholesale customers by approximately $6,814,000 (6.13 percent) based on a calendar 1983 test year.[2] APC proposes an effective date for the rates of May 6, 1983, but, pursuant to the terms of a settlement agreement between APC and its wholesale customers in Docket No. ER82–229–000,[3] APC requests that the Commission suspend the effectiveness of the rates until August 1, 1983.

Notice of APC's filing was published in the **Federal Register**, with responses due on or before March 28, 1983. On March 28, 1983, motions to intervene and protests were filed by the Alabama Municipal Electric Authority and APC's municipal customers (Municipal Customers) [4] and by the Alabama Electric Cooperative, Inc. (AEC) and eleven APC cooperative Customers (Cooperatives).[5] The intervenors have requested a five month suspension and investigation of the proposed rates.[6]

The Municipal Customers seek an investigation of APC's fuel adjustment clause charges. Specifically, the customers allege that APC's fuel clause provides for the recovery of the entire energy cost, as contrasted with only the fuel component of the cost, of energy purchases on an "economic dispatch basis." The Municipal Customers request an investigation to determine whether such energy purchases by APC from its affiliates through the Southern Company central dispatching qualify as economic dispatch purchases under the Commission's regulations. Further, they suggest a departure from the Commission's regulations to allow the credit of the total cost of economy sales in the fuel adjustment calculation rather than only the fuel component of such sales. To support this request, they state that the present situation results in an "undue burden" to them as ratepayers. Also, the Municipal Customers claim that APC's proposed rates will result in a price squeeze.

In addition to the issues raised by the Municipal Customers, the Cooperatives allege that APC's charges for spent nuclear fuel disposal, in both the proposed and past rates, are excessive in light of disposal fees established in the Nuclear Waste Policy Act of 1982 (NWPA), Pub. L. 97–425, 96 Stat. 2201 (1983).[7] The Cooperatives specifically request that APC be required to amend its filing and immediately to make refunds to reflect lower spent nuclear fuel disposal costs for prior periods.

On April 12, 1983, APC filed an answer questioning the scope of the intervenors' request for an investigation of its fuel clause practices. APC states that such an investigation must be only prospective in application. In addition, the company indicates that it has provided in its filing for compliance with the NWPA as soon as appropriate fees and procedures under the Act are determined.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motions to intervene serve to make the Municipal Customers and the Cooperatives parties to this proceeding.

The Commission will deny the Cooperatives' request to require an amended filing by APC and immediate refunds to reflect spent nuclear fuel disposal costs as provided in the NWPA. Because utilities continue to have the responsibility for interim storage of spent fuel, a determination must be made as to whether the utility's current estimate for disposal of spent nuclear fuel is reasonable. In addition, significant issues exist as to an appropriate mechanism for adjusting permanent disposal cost recoveries if warranted based on agreements with DOE under the NWPA. Accordingly, we find that APC's treatment of spent nuclear fuel disposal must be evaluated during the course of an evidentiary hearing. In addition, we note that with respect to the permanent disposal of spent nuclear fuel, APC proposes to continue the procedures approved in the settlement agreement in Docket No. ER82–229–000 until an agreement is reached with DOE concerning the timing

[1] *See* Attachment A for list of customers; rate schedule designations for these customers are shown on Attachment B.

[2] Alabama states that the requested rate increase is principally due to increased expenses and plant investment associated with the completion of the R. L. Harris Hydro-electric Project.

[3] The settlement was approved by order dated december 30, 1982.

[4] The municipal customer include the cities of Alexander City, Dothan, fairhope, Lafayette, Lanett, Opelika, Piedmont, and Troy, Alabama, and the Utilities Boards of the Cities of Foley, Luverne, Sylacauga, and tuskegee.

[5] The eleven Cooperatives include Baldwin County Electric Membership Corporation.; Central Alabama Electic Cooperative, Clarke-Washington Electric Membership Corporation, Coosa Valley Electric Cooperative, Dixie Electric Cooperative, Pea River Electric Cooperative, Pioneer Electric Cooperative, Tallapoosa River Electric Cooperative, Wiregrass Electric Cooperative, Black Warrior Electric Membership Corporation, Tombigbee Electric Cooperative. The cooperatives other than Black Warrior and Tombigbee are members of AEC. Baldwin County and Poineer are former wholesale customers who have requested intervention claiming that they are entitled to refunds with respect to APC's alleged past overcollections associated with spent nuclear fuel disposal costs.

[6] The intervenors have raised a number of cost of service and rate design issues including, *inter alia*, rate of return; the inclusion of non-cash items and other errors in cash working capital computations; excessive depreciation accruals, including fuel stocks; treatment of investment tax credits; unsupported projections; plant held for future use amounts; consistency between cost allocation and rate design; assignment of retail-related expenses; classification of O&M expenses; and treatment of transactions between APC and the Southeastern Power Administration.

[7] Under the Nuclear Waste Policy Act of 1982, utilities are required to pay to the Department of Energy a fee of 1.0 mill per kWh of electricity generated by a civilian nuclear reactor and sold on or after April 7, 1983. For spent nuclear fuel which was used to generate electricity in a civilian nuclear reactor prior to April 7, 1983, the utilities are required to pay a one time fee per kilogram of heavy metal. Such fee will be in an amount equivalent to an average charge of one mill per kWh for electricity generated by such spent nuclear fuel. The permanent disposal sites are expected to be ready by 1998. With respect to the interim storage of spent fuel, the NWPA continues to leave this responsibility to utilities. In the event that a utility cannot provide for nterim storage, then DOE is to provide a limited capacity for such interim storage of spent fuel. Also, the Act provides for the annual revision of fees determined under its terms.

VOL 48 ISS 92 MY 11 1983 UMI

of payment and the amount of fees for permanent disposal of spent fuel. Further, APC has offered to amend its filing to reflect any revised charges resulting from such an agreement. We believe that the company's proposal is reasonable. However, APC is advised that the revised filing shall be made within thirty days of the date of execution of the contract with DOE. Also, APC will be instructed to calculate the effect of the revised charges in a manner consistent with APC's calendar year 1983 test period.

Our preliminary review of APC's filing and the pleadings indicates that the proposed rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82–23–000, 18 FERC ¶ 61,189 (1982), the Commission noted that rate filings would ordinarily be suspended for five months where preliminary review indicates that the proposed rates may be unjust and unreasonable and may generate substantially excessive revenues, as defined in *West Texas*. Our review of the instant filing indicates that the proposed rates may produce substantially excessive revenues. Under these circumstances, we shall suspend the rates for five months from the proposed effective date, to become effective, subject to refund, on October 6, 1983.

With regard to APC's fuel adjustment clause, the Commission notes that issues identical to those now raised by the intervenors were previously identified by the customers in Docket No. ER82–229–000 which involved essentially the same fuel clause. Because the proceeding in that docket was settled without an examination of the factual or legal merits of the customers' allegations, these questions, along with the other matters raised by the customers, should be considered during the evidentiary proceeding ordered below. Finally, we agree with APC's contention that any relief resulting from an investigation into its fuel clause provisions should only be ordered from the effective date of the proposed rate increase.[*]

[*] We previously resolved this issue in Docket No. ER81–95–000 (14 FERC ¶ 61,001 at p. 61,002), based on the same settlement provision as that included in the settlement agreement in Docket No. ER82–229–000.

In light of the Municipal Customers' price squeeze allegations, we shall institute price squeeze procedures and phase those procedures in accordance with the Commission's policy and practice established in *Arkansas Power and Light Company*, Docket No. ER79–339–000, 8 FERC ¶ 61,131 (1979).

The Commission orders:

(A) The Cooperatives' request for summary disposition with respect to spent nuclear fuel disposal costs is hereby denied.

(B) APC's submittal is hereby accepted for filing and suspended for five months from the proposed effective date, to become effective, subject to refund, on October 6, 1983.

(C) APC is hereby required to make its revised filing which reflects the charges for permanent disposal of spent nuclear fuel within thirty (30) days of the execution of an agreement with DOE pursuant to the NWPA. Such charges shall be calculated in a manner consistent with APC's calendar year 1983 test period.

(D) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of APC's rates.

(E) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(F) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service to top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(G) The Commission hereby orders the initiation of price squeeze proceedings and further orders that this docket be phased so that the price squeeze proceedings begin after issuance of a Commission opinion establishing the rate which, but for consideration of price squeeze, would be just and reasonable. The presiding administrative law judge may order a departure from this schedule for good cause shown. The price squeeze claim shall be governed by § 2.17 of the Commission's regulations as it may be modified prior to the commencement of the price squeeze phase of the instant docket.

(H) The Secretary shall promptly publish this order in the **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

City of Ocean Shores, Washington; Surrender of Preliminary Permit

May 5, 1983.

Take notice that City of Ocean Shores, Washington, Permittee for the proposed West Fork Humptulips River Project No. 5908, has requested that its preliminary permit be terminated. The permit was issued on August 25, 1982, and would have expired on February 28, 1984. The project would have been located on West Fork Humptulips River, in Grays Harbor County, Washington.

The Permittee filed its request on March 1, 1983, and the surrender of the preliminary permit for Project No. 5908 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. TA83–2–33–001]

El Paso Natural Gas Co., Compliance Purchased Gas Cost Adjustment Filing

May 5, 1983.

Take notice that on April 29, 1983, El Paso Natural Gas Company ("El Paso") tendered for filing, pursuant to Part 154 of the Federal Energy Regulatory Commission ("Commission") Regulations Under the Natural Gas Act and in compliance with the Commission's order issued March 31, 1983 at Docket No. TA83–2–33–000, *et al.*, the following tariff sheets to its FERC Gas Tariff:

Tariff volume	Tariff sheet
Original Volume No. 1.	Third Substitute Thirty-third Revised Sheet No. 3–B. Eleventh Revised Sheet No. 67–D. Fifth Revised Sheet No. 67–D.1. Original Sheet No. 67–D.1a.
Third Revised Volume No. 2.	Third Substitute Twenty-fourth Revised Sheet No. 1–D.
Original Volume No. 2A.	Third Substitute Twenty-fifth Revised Sheet No. 1–C.

The Commission's March 31, 1983 order, among other things, conditionally accepted, effective April 1, 1983 subject to refund, certain revised tariff sheets included in El Paso's notice of rate change filed March 1, 1983 under the tab denominated "TA83–2–33 Tariff Sheets" which reflected a net increase of 2.93¢ per Mcf in rates for jurisdictional gas service rendered to customers under rate schedules affected by and subject to the Purchases Gas Cost Adjustment Provision ("PGA") in El Paso's Original Volume No. 1 Tariff. Ordering paragraphs (C), (E), (F) and (J), respectively, of said order directed El Paso to file, within thirty days of the date of issuance thereof, (i) actual purchase volume information covering the six-month period from July 1, 1982 through December 31, 1982; (ii) workpapers to support certain adjustments to Account 191 and certain amounts related to transportation, gas well royalties and production tax trackers; (iii) revised tariff sheets reflecting elimination of any interperiod tax effect related to transportation revenues and revenues associated with the special retroactive adjustment related to gas sales to Petroleos Mecicanos included in Account 191,; and (iv) revisions to its PGA with respect to the treatment of revenues related to the purchased gas cost component of minimum bills.

In compliance with ordering paragraph (F) of the Commission's March 31, 1983 order, El Paso states that it has recalculated the unrecovered purchased gas cost surcharge included in its March 1, 1983 PGA notice of rate change to eliminate any interperiod tax effect related to transportation revenues and revenues from sales to Petroleos Mexicanos. After such adjustment, El Paso states that the instant filing provides for a net adjustment in its rates of 2.92¢ per Mcf (equivalent to $.0277 per dth) as compared to the net adjustment of 2.93¢ per Mcf (equivalent to $.0278 per dth) initially proposed in the March 1, 1983 PGA filing which reduction is reflected in the rates set forth on tendered Sheet Nos. 3–B, 1–D and 1–C. Additionally, the rates set forth on said tariff sheets differ from those filed at Docket No. TA83–2–33–000 in that they have been adjusted to reflect (i) a decrease in Base Tariff Rates, (ii) conversion from a volumetric to a thermal basis for billing, (iii) implementation of a two-part rate for El Paso's California customers and three largest east-of-California customers, and (iv) cancellation of Rate Schedule G–X, which changes were effectuated April 1, 1983 pursuant to the provisions of the "Offer of Interim Settlement" filed March 15, 1983 and approved on an interim basis by Commission letter order dated March 31, 1983 at Docket No. RP82–33, *et al.* In compliance with ordering paragraph (J), El Paso tendered Eleventh Revised Sheet No. 67–D, Fifth Revised Sheet No. 6–D.1 and Original Sheet No. 67–D.1a reflecting revisions to its PGA clause to specify treatment of revenues associated with the gas cost component of minimum bill charges collected from its jurisdicational

VOL 48 ISS 92 MY 11 1983 UMI

customers. El Paso also included in the instant tender the information and supporting workpapers required by ordering paragraphs (C) and (E) of the Commission's March 31, 1983 order.

El Paso requests that tendered Sheet Nos. 3–B, 1–D, and 1–C be substituted for their respective counterparts filed March 1, 1983 at Docket No. TA83–2–33–000 and made effective April 1, 1983, subject to refund, as provided for in the Commission's March 31, 1983 order. El Paso further requests, pursuant to § 154.51 of the Commission's Regulations, that the Commission grant waiver of the notice requirements in § 154.22 of its Regulations so as to permit tendered Eleventh Revised Sheet No. 67–D, Fifth Revised Sheet No. 67–D.1 and Original Sheet No. 67–D.1a to become effective April 1, 1983.

El Paso states that copies of the instant filing, together with all enclosures, hae been served upon all parties of record in Docket No. TA83–2–23–000, *et al.*, and otherwise, upon all interstate pipeline system customers of El Paso and interested state regulatory commissions.

Any person desiring to be heart of to make any protest with reference to said tariff filing should, on or before May 16, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C., 20426, a motion to intervene or a protest in accordance with the requirements of Rule 214 or Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). Protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make any protestants parties to the proceeding. Any person wishing to become a party to a proceeding must file a motion to intervene in accordance with the Commission's Rules. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP83–71–001]

Granite State Gas Transmission Inc.; Filing Proposed Tariff Changes

May 5, 1983.

Take notice that on April 21, 1983, Granite State Gas Transmission, Inc. (Granite State) tendered for filing Fourth Revised Sheet No. 7 and First Revised Sheet No. 66 in its FERC Gas Tariff, First Revised Volume No. 1, containing proposed changes in rates for effectiveness on April 1, 1983. According to Granite State, the revised rates submitted with its filing restate its Base Tariff rates for its jurisdictional sales of natural gas in compliance with the requirements of § 154.38(4)(d)(vi)(a) of the Commission's Regulations under the Natural Gas Act.

Granite State further states that its restated Base Tariff rates are applicable to its wholesale sales to Bay State Gas Company and Northern Utilities, Inc. According to Granite State, copies of its filing were served on the foregoing customers and the regulatory comissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP83–79–000]

Michigan Wisconsin Pipe Line Co.; Proposed Changes in F.E.R.C. Gas Tariff

May 5, 1983.

Take notice that on April 29, 1983, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) tendered for filing proposed changes in its F.E.R.C. Gas Tariff, Original Volumn No. 1 and First Revised Volume No. 2 to become effective June 1, 1983. Michigan Wisconsin states that the proposed rate increase is designed to recover Michigan Wisconsin's overall cost of service, developed by utilizing a base period for the twelve months ended January 31, 1983, adjusted for known and measurable changes through the end of the test period, October 31, 1983. The filed cost of service is approximately $39 million higher, or 1.6%, than the cost of service underlying present rates related primarily to increased take-or-pay requirements and utility plant investment. The effect of such increase on Michigan Wisconsin's average resale rates, together with the restoration of the 6¢ per dekatherm (dth) interim rate reduction implemented in Docket No. RP82–80, is 12.2¢ per dth.

Michigan Wisconsin further states that the proposed rates are based on a sales level of 560 million dekatherms which reflects estimates of declining market requirements. The effect of market declines and the impact of a previously authorized MDQ reduction applicable to Rate Schedule MC–1 account for the balance of the 23.8¢ per dth increase in Michigan Wisconsin's presently effective average resale rates.

For purposes of this filing rates are based on Michigan Wisconsin's currently effective rate design, including classification of costs in accordance with the *Seaboard* decision pursuant to the Stipulation and Agreement approved by the Commission in Docket NO. RP81–61, et al.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rule 211 or 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceedings. Any party wishing to become a party to the proceeding must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12559 Filed 5–10–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. ER83–194–001]

Mississippi Power Co.; Compliance Filing

May 5, 1983.

The filing Company submits the following:

Take notice that on March 25, 1983, Mississippi Power Company submitted for filing revised rates pursuant to the Commission's order issued on February 10, 1983.

Any person desiring to be heard or to protest said filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before May 13, 1983. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12560 Filed 5–10–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP83–81–000]

Montana–Dakota Utilities Co.; Proposed Change in Rates

May 5, 1983.

Take notice that on April 29, 1983, the Montana-Dakota Utilities Co. ("MDU"), a Delaware corporation, whose mailing address is 400 North Fourth Street, Bismarck, North Dakota 58501, filed proposed changes in rates to its jurisdictional gas sales customers.

More specifically, MDU filed the following tariff sheets to its FERC Gas Tariff, which reflect an increase in jurisdictional rates:

Original Volume No. 4

Twenty-fourth Revised Sheet No. 3A

First Revised Volume No. 2

Nineteenth Revised Sheet No. 10

The proposed effective date is June 1, 1983.

Increased revenues from the rates as proposed by MDU would amount to $1,646,310 annually under MDU's Rate Schedules G–1, PR–1, X–1, I–1, X–3, X–5, and X–6.

The filing indicates that MDU has experienced increases in most areas of its cost of service and sharp decreases in its level of sales. Consequently, MDU states, it was required to file for an increase in its jurisdictional rates.

Any person desiring to be heard or to make any protest with reference to said filing should on or before May 16, 1983, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate in any hearing therein must file a petition to intervene in accordance with the Commission's Rules of Practice and Procedure.

BILLING CODE 6717–01–M

[Docket No. TA83–2–55–000 (PGA 83–2)]

Mountain Fuel Resources, Inc.; Change in Rates Pursuant to Purchased Gas Cost Adjustment Provision

May 5, 1983.

Take notice that Mountain Fuel Resources, Inc. (Resources), Apr,. 29, 1983, tendered for filing a proposed change in rate applicable to service rendered under its Rate Schedule No. 1 affected by and subject to Resources' *Purchased Gas Cost Adjustment Provision* contained in its FERC Gas Tariff, Original Volume No. 1. Resources filed Eighteenth Revised Sheet No. 7 and Seventh Revised Sheet No. 7–A of its FERC Gas Tariff, Original Volume No. 1.

The current adjustment to Resources' rates results in a net decrease of $0.1919/Mcf over the rate currently being collected. Resources proposes that the rate change be effective June 1, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12562 Filed 5–10–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP82–126–003]

Mountain Fuel Supply Co.; Tariff Filing

May 5, 1983.

Take notice that on April 25, 1983, Mountain Fuel Supply Company (Mountain Fuel) tendered for filing and acceptance First Revised Sheet No. 765 to its FERC Gas Tariff, Original Volume No. 1.

Mountain Fuel states that Rate Schedule X–32 is a Natural Gas Transportation and Exchange Agreement Between Colorado Interstate Gas Company and Mountain Fuel wherein the parties agree to transport and exchange up to 300,000 Mcf per day, on a thermally equivalent basis as approved by the Federal Energy Regulatory Commission on November 26, 1982.

Mountain Fuel states that volumes of natural gas transported and exchanged under Rate Schedule X–32 were estimated in calculating the unit cost-of-service per Mcf in the referenced docket.

Mountain Fuel seeks to supplement Docket No. RP82–126–000 to include Rate Schedule X–32, First Revised Sheet No. 765, and supply charges set forth on Mountain Fuel's currently effective Statement of Rates in its FERC Gas Tariff, Original Volume No. 1, for Mainline Transportation and Compression Redelivery, subject to refund with interest, pending the outcome of the proceeding.

Mountain Fuel has requested that the Commission waive any of its Rules or Regulations as may be necessary to allow the tariff sheet tendered to become effective on May 1, 1983, as proposed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 385.214 and 385.211 of 18 CFR. All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. ST79–21–002]

ONG Western, Inc.; Extension Reports

May 5, 1983.

The companies listed below have filed extension reports pursuant to Section 311 of the Natural Gas Policy Act of 1978 (NGPA) and Part 284 of the Commission's regulations giving notice oif their intention to continue transportation and sales of natural gas for an additional term of up to 2 years. These transactions commenced on a

VOL 48 ISS 92 MY 11 1983 UMI

self-implementing basis without case-by-case Commission authorization. The Commission's regulations provide that the transportation or sales may continue for an additional term if the Commission does not act to disapprove or modify the proposed extension during the 90 days preceding the effective date of the requested extension.

The table below lists the name and addresses of each company selling or transporting pursuant to Part 284; the party receiving the gas; the date that the extension report was filed; and the effective date of the extension. A letter "B" in the Part 284 column indicates a transportation by an interstate pipeline which is extended under § 284.105. A letter "C" indicates transportation by an intrastate pipeline extended under § 284.125. A "D" indicates a sale by an intrastate pipeline extended under § 2848.146. A "G" indicates a transportation by an interstate pipeline pursuant to § 284.221 which is extended under § 284.105. A "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to said extension report should on or before May 31, 1983 file with the Federal Energy Regulatory Commission, Washington D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214).

All protest filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding.

Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-80-000]

Ringwood Gatrhering Co.,Proposed Changes in FERC Gas Tariff

May 5, 1983

Take notice that Ringwood Gathering Company (formerly Oklahoma Natural Gas Gathering Corporation), on April 29, 1983, tendered for filing proposed changes in its FERC Tariff, Original Volume, No. 1, consisting of the following tariff sheets:

Thirtieth Revised Sheet PGA–1

Ninth Revised Sheet No. 4

Eighth Revised Sheet No. 59

The proposed changes would increase the level of its jurisdictional rates by 25,39 cents per Mcf, which would provide an increase in revenues from jurisdictional sales of $1,727,559 based on the 12-month period ending December 31, 1982, as adjusted. Ringwood Gathering Company states that this increase amounts to a 12.99 percent increase over revenues which would result from annualized effective rates that are in effect at this time.

Ringwood Gathering Company states that this filing is being made in compliance with § 154.63(b)(3) of the Commission's regulations. Ringwood Gathering Company states that declining sales volumes and increased cost of service (labor, supplies, expenses, and construction) have caused its earned rate of return to decline to a negative 5.99 percent after adjustments. Thus, the company requests waiver of the five-month suspension period because it only serves to further erode that return and increase the risk to the company's stockholders.

Ringwood Gathering Company proposes an effective date of June 1, 1983, and states that copies of this filing were served on each of its customers and affected state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protesants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12585 Filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-30-003]

Transcontinental Gas Pipe Line Corp.; Application

May 5, 1983

Take notice that on April 21, 1983, Transcontinental Gas Pipe Line Corporation (Transco) filed alternative proposed tariff sheets to make effective changes in rates applicable to transportation service performed by Transco in the production area of its system. Transco states that its preferred alternative tariff sheets, contained in Attachment A to its filing, not only reflect the revision to Transco's filed rates that were required by the Commission's January 14, 1983 suspension order in this proceeding but also reflect a reduced rate of return on equity agreed upon by the parties to Transco's rate proceedings in Docket No. RP83–11–000 and RP83–30–000 in a settlement agreement filed on April 13, 1983, and presently pending before the Commission. Transco also filed alternative tariff sheets which would reflect the revisions required in the Commission's suspension order but would otherwise implement the full rate increase sought by Transco in the event that the Commission rejects the aforementioned settlement.

Transco proposes an effective date of April 22, 1983, for the alternative tariff sheets contained in Attachment A and specifically requests the Commission to grant a waiver of the notice requirements as provided in § 154.51 of the Commission's regulations in order to make its proposed rates effective on April 22, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12586 Filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-29-001]

Transcontinental Gas Pipe Line Corp.; Tariff Filing

May 5, 1983

Take notice that Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing on April 29, 1983 Substitute Twenty-Sixth Revised Sheet No. 12, Substitute Twenty-Sixth Revised Sheet No. 15 and Substitute Ninth Revised Sheet No. 16 to Second Revised Volume No. 1, and Substitute Thirty-Second Revised Sheet No. 121 to Original Volume No. 2 of Transco's FERC Gas Tariff. These tariff sheets, which are proposed to be effective May 1, 1983, reflect a net decrease of 16.7¢ per dekatherm (dt) in the commodity or delivery charge of Transco's CD, G, OG, E, PS and S–2 rate schedules, a net decrease of 16.5¢ per dt in the commodity charge under the ACQ rate schedule, and a net decrease of 0.2¢ per dt in the delivery charge of the X–20 rate schedule.

Transco states that the instant filing is tendered pursuant to the terms of the "Settlement Agreement as to Rates of Transcontinental Gas Pipe Line Corporation" (Settlement Agreement) filed April 13, 1983 in Docket Nos. RP83–11–000 and RP83–30–000. In Part C of that Settlement Agreement, Transco has agreed to reflect reductions in its PGA filing to be effective May 1, 1983 "as a result of (a) the general proportionate cutback of gas supplies * * * and (b) the crediting to a separate subaccount of Account No. 191 of 20¢ per dt representing the estimated effect of the price differentials for supplies to be acquired under the ISP * * * " (ISP refers to the Industrial Sales Program discribed in Article B of the Settlement Agreement.) The rates contained in the instant revised PGA filing reflect the foregoing cost reductions in conformity with said Settlement Agreement. The rate decrease in the instant filing has been applied to the rates filed April 13, 1983 in the aforesaid Settlement Agreement which are intended to be made effective April 22, 1983. In this regard, the instant filing is intended to supersede in its entirety the PGA filing made by Transco in the captioned docket, contingent upon approval by the Commission of the aforesaid Settlement Agreement.

Transco further states that these changes have been computed in accordance with applicable tracking provisions contained in the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1. The instant tracking rate change amounts to a decrease of 16.5¢ per dt in the commodity or delivery charge in Transco's CD, G, OG, E, PS, S–2 and ACQ rate schedules. This decrease is comprised of: (a) an 8.3¢ per dt increase in the current gas cost adjustment; (b) a 4.8¢ per dt decrease in the Deferred Adjustment; and (c) the separate credit of 20.0¢ per dt referred to above. The 4.8¢ decrease in the Deferred Adjustment represents the difference between the currently effective positive Deferred Adjustment of 19.3¢ per dt and the proposed positive Deferred Adjustment of 14.5¢ per dt which is required to eliminate, over the six-month period commencing May 1, 1983, the debit balance of $53,009,565 accumulated in Transco Unrecovered Purchased Gas Cost Account (FERC Account No. 191) at February 28, 1983. Transco further states that its tracking rate change to reflect curtailment credits is a decrease of 0.2¢ per dt in the commodity or delivery charge under its CD, G, OG, E, PS, S–2 and X–20 rate schedules. This decrease represents the difference between the currently effective positive unit adjustment of 0.1¢ per dt and the proposed negative unit adjustment of 0.1¢ per dt, and is designed to eliminate, over the six-month period beginning May 1, 1983, the estimated credit balance in the deferred account relating to such curtailment credits as of April 30, 1983.

The Company states that copies of the filing are being mailed to each of its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest sail filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of the filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc 83-12587 Filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-368-000]

Upper Peninsula Power Co.; Order Accepting for Filing and Suspending Rates, Noting Interventions, and Establishing Hearing Procedures

Issued: May 5, 1983.

On March 7, 1983, Upper Peninsula Power Company (UPPCO) tendered for filing increased rates for firm service to its seven wholesale customers.[1] UPPCO seeks to implement the rate increase in two phases. The Phase I rates would increase revenues by approximately $586,000 (10.8%) for the calendar year 1983 test period. The Phase II rates represent an additional increase of

[1] *See* Attachment A for customers and rate schedule designations.

VOL
48
ISS
92
MY
11
1983
UMI

about $200,000, or a total increase of 14.5%. UPPCO requests that the Phase I rates become effective 60 days after filing, and that the Phase II rates take effect no later than 61 days after filing. If the Phase II rates are allowed to become effective following a one day suspension, UPPCO asks that the Phase I rates not become effective separately.

Notice of the filing was published in the **Federal Register** with comments due by March 28, 1983. On March 25, 1983, Wisconsin Electric Power Company (WEPCO) filed a timely motion to intervene. WEPCO raises no specific cost of service issues and states that it is not requesting a hearing. However, WEPCO requests that it be permitted to participate as a full party in any proceedings which may be ordered.

On March 28, 1983, the Alger Delta Cooperative Electric Association, the Ontonagon County Rural Electrification Association, and the Cities of Gladstone and Negaunee, Michigan (Intervenors) jointly filed a timely protest, motion to intervene, and request for a five month suspension. In support of their request for a maximum suspension, the Intervenors contend, *inter alia*, that: (1) UPPCO's requested rate of return is excessive; (2) UPPCO's expense projections are excessive; and (3) UPPCO's "separation methodology" for allocating transmission facilities is improper.

On April 11, 1983, UPPCO filed an answer to the Intervenors' protest and motion to intervene. In its answer, UPPCO disputes the allegations that its cost of service is excessive and that its "separate methodology" is improper. UPPCO does not, however, oppose the motions to intervene in this proceeding.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motions of WEPCO and the Intervenors serve to make them parties to this proceeding.

Our review of UPPCO's submittal and the pleadings indicates that the proposed rates have not been shown to be just and reasonable, and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. We shall therefore accept UPPCO's rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, Docket No. ER82-23-000, 18 FERC ¶ 61,189 (1982), we explained the Commission's suspension policy and noted that rate filings would ordinarily be suspended for one day where preliminary review indicates that the proposed rates may be unjust and unreasonable but may not produce substantially excessive revenues, as defined in *West Texas*. Because our review suggests that UPPCO's Phase II rates may not yield substantially excessive revenues, we shall suspend the Phase II rates for one day from 60 days after filing, to become effective, subject to refund, on May 8, 1983. As a result of this action and consistent with UPPCO's request, we shall deem the Phase I rates to have been withdrawn.

The Commission orders:

(A) UPPCO's proposed Phase I rates are deemed withdrawn.

(b) UPPCO's proposed Phase II rates are hereby accepted for filing and suspended for one day from 60 days after filing, to become effective, subject to refund, on May 8, 1983.

(C) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act [18 CFR, Chapter I], a public hearing shall be held concerning the justness and reasonableness of UPPCO's rates.

(D) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(E) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(F) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

Attachment—Upper Peninsula Power Company Rate Schedule Designations

Designations	Other party
Step I rates are deemed withdrawn Step II rates are designated as follows:	
(1) Supplement No. 26 to rate schedule FPC No. 2 (supersedes supplement Nos. 24 and 25).	Wisconsin Electric Power Co.
(2) Supplement No. 27 to rate schedule FPC No. 3 (supersedes supplement Nos. 25 and 26).	Do.
(3) Supplement No. 26 to rate schedule FPC No. 6 (supersedes supplement Nos. 24 and 25).	Village of Berage.
(4) Supplement No. 26 to rate schedule FPC No. 7 (supersedes supplement Nos. 24 and 25).	Village of L'Anse.
(5) Supplement No. 24 to rate schedule FPC No. 11 (supersedes supplement Nos. 22 and 23).	City of Negaunee.
(6) Supplement No. 26 to rate schedule FPC No. 14 (supersedes supplement Nos. 24 and 25).	Alger-Delta Coop.
(7) Supplement No. 27 to rate schedule FPC No. 15 (supersedes supplement Nos. 25 and 26).	Ontonagon County REA.
(8) Supplement No. 13 to rate schedule FERC No. 23 (supersedes supplement Nos. 11 and 12).	City of Gladstone.

BILLING CODE 6717-01-M

[Docket No. ER83-461-000]

Utah Power & Light Co.; Filing

May 5, 1983.

Take notice that on April 11, 1983, Utah Power & Light Company (UP&L) tendered for filing a supplemental revised Appendix 1 as required by Exhibit C for retail sales in its Idaho jurisdiction, together with the Bonneville Power Administration's Average System Cost Report in which Bonneville determined the Average System Cost for the Idaho residential jurisdiction in accordance with the provisions of the Residential Purchase and Sale Agreement (Agreement) between UP&L and the Bonneville Power Administration (BPA). UP&L also submitted comments and objections regarding certain adjustments made by BPA's Average System Cost determination. This filing is a supplement to the original filing of March 7, 1983 and is necessitated by the Idaho P.U.C. issuing an Order on Rehearing wherein it granted an additional revenue requirement increase to UP&L.

UP&L requests an effective date of November 10, 1982.

Copies of the filing were served upon BPA, and the Idaho Public Utilities Commission.

Any person desiring the be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 20, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12571 Filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-56-000]

Valero Interstate Transmission Co.; Purchased Gas Cost Adjustment Filing

May 5, 1983.

Take notice that on April 29, 1983, Valero Interstate Transmission Company ("Vitco") tendered the following filings containing purchased gas cost adjustments:

Original Supplement No. 40 to FERC Rate Schedule No. 1 for the Sale of Gas by Vitco to Natural Gas Pipeline Company of America,

Original supplement No. 119 to FERC Rate Schedule No. 2 for the Sale of Gas by Vitco to Transcontinental Gas Pipe Line Corporation,

Original Supplement No. 17 to FERC Rate Schedule No. 14 for the Sale of Gas by Vitco to El Paso Natural Gas Company, and

1st Revised Sheet No. 14, to FERC Rate Schedule No. T-1

Vitco states that the rates stated on Exhibit A to each of the rate schedule supplements and 1st Revised Sheet No. 14 to Rate Schedule T-1 reflects the change in purchased gas costs based on the six months ended February 28, 1983.

The change in rate provided in Exhibit A to Original Supplement No. 40 to Rate Schedule No. 1 includes an increase in purchased gas costs of 13.77 cents per Mcf and a surcharge of 40.38 cents per Mcf. The change in rate provided in Exhibit A to Orignial Supplement No. 119 to Rate Schedule No. 2 includes an increase in purchase gas costs of 50.94 cents per Mcf and a surcharge of 52.75 cents per Mcf. The change in rate provided in Exhibit A to Original Supplement No. 17 to Rate Schedule No. 14 includes an increase in purchased gas costs of 54.91 cents per Mcf and a surcharge of 24.47 cents per Mcf. The surcharge in each instance is designed to eliminate the balance in the deferred purchased gas cost account. The change in rate provided on 1st Revised Sheet No. 14 to Rate Schedule T-1 includes an increase in purchased gas cost of 2.65 cents per Mcf and a surcharge of 0.08 cents per Mcf.

Vitco states that these rates include no incremental pricing factor because Vitco was granted an exemption from certain filing and accounting requirements in Docket No. SA80-42.

The proposed effective date for the above filings is June 1, 1983. Vitco requests a waiver of any Commission regulations or order which would prohibit implementation by June 1, 1983.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb

Secretary.

[FR Doc. 83-12572 filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-82-000]

Valley Gas Transmission, Inc.; Proposed Changes in Rates

May 5, 1983.

Take notice that on April 29, 1983, Valley Gas Transmission, Inc. (Valley) filed proposed changes to its FERC Gas Tariff to become effective on June 1, 1983, consisting of Twenty-Fifth Revised Sheet No. 2A and Second Revised Sheet No. 176 of Original Volume No. 1.

Valley states that the proposed rates are an increase over those currently in effect. The primary reason for the proposed change in the rates is due to the significant decrease in Valley's sales volumes. Although the proposed rates reflect an increase from the currently effective rates of 21.43 cents per Mcf to 39.96 cents per Mcf, those rates reflect a decrease in jurisdictional revenues of $165,045 over those collected for the twelve months ending December 31, 1982.

Valley is requesting that if the Commission determines that the proposed rates should be suspended, that such suspension be for only one day, and that Valley be permitted to collect the increased rates subject to refund.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions of protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12573 Filed 5-10-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EL83-4-000]

Wabash Valley Power Association, Inc. v. Northern Indiana Public Service Co.; Order Denying Motion To Dismiss, Instituting Investigation, and Establishing Procedures

Issued: May 5, 1983.

On November 3, 1982, Wabash Valley Power Association, Inc. (WVPA) applied to the Commission under Sections 211 and 212 of the Federal Power Act for an order directing Northern Indiana Public Service Company (NIPSCO) to wheel power to twelve WVPA member cooperatives.[1] WVPA currently purchases firm power for the twelve cooperatives from NIPSCO under an electric tariff on file with this Commission.[2] However, WVPA states that it notified NIPSCO on July 19, 1982, of its intent to cancel the tariff service agreements as of August 1, 1983, pursuant to the one-year notice provisions contained in those agreements.

[1] The twelve rural electric membership corporations (REMCs) are Carroll Country REMC, Fulton County REMC, Jasper County REMC, Kankakee Valley REMC, Kosciusko County REMC, LaGrange County REMC, Marshall County REMC, Newton County REMC, Noble County REMC, Steuben County REMC, Warren County REMC, and White County REMC.

[2] FERC Electric Tariff, Third Revised Volume No. 1.

VOL 48 ISS 92 MY 11 1983 UMI

In support of its wheeling order request, WVPA alleges that NIPSCO has denied numerous requests and proposals by WVPA for "mutually advantageous power supply arrangements" during the past twelve years, has discriminated against WVPA in violation of the Sherman Act, and has used its monopoly over transmission in WVPA's service area to create and maintain anticompetitive control over WVPA. In addition, WVPA alleges that NIPSCO's projected cost of power precludes the company from continuing to supply adequate service to WVPA. For these reasons, WVPA seeks to replace NIPSCO power and energy with other adequate generating resources. WVPA states that its wheeling order request fulfills the requirements of Sections 211 and 212 in that the requested service (1) will not result in a reasonably ascertainable, uncompensated economic loss for NIPSCO, (2) will not place an undue burden on NIPSCO, (3) will not impair the ability of NIPSCO, WVPA, or any other electric utility to render adequate service to its customers, (4) will encourage conservation of energy and capital, (5) will significantly promote the efficient use of facilities and resources, and (6) will improve the reliability of the electric utility systems involved.

Notice of WVPA's application was published in the **Federal Register** with comments due by December 15, 1982. On December 15, 1982, NIPSCO filed an answer, urging that the Commission summarily dismiss WVPA's application. First, NIPSCO denies that it has refused to make mutually advantageous power supply arrangements with WVPA, and that it has used its position to maintain anticompetitive control over WVPA. NIPSCO claims that its February 27, 1978 agreement to purchase 9% of WVPA's share of Marble Hill nuclear output [3] completely refutes those allegations.

Second, NIPSCO denies that a single year's notice effects cancellation of the NIPSCO–WVPA service agreements. NIPSCO states that on February 27, 1978, the parties entered into an interconnection agreement under which NIPSCO agreed to supply WVPA's power needs to the extent that they exceed the output generated by WVPA's ownership in the Marble Hill Nuclear Unit No. 1.[4] Because that agreement requires WVPA to give eleven years' notice of intent to replace NIPSCO-supplied power with power generated by other resources, NIPSCO asserts that WVPA's notice could not cancel the existing power contracts, and that the wheeling order sought by WVPA would breach the interconnection agreement. Moreover, NIPSCO contends that such an order is barred by Section 211(c)(2) of the Federal Power Act, which prohibits the Commission from ordering a utility to wheel any amount of power which replaces an amount of power the utility is already required to supply pursuant to a contract or filed rate schedule.

In addition, NIPSCO challenges WVPA's assertion that loss of the WVPA load will cause NIPSCO no undue economic hardship. NIPSCO claims that, based upon WVPA's commitment to purchase supplemental requirements (beyond its share of Marble Hill output) from NIPSCO, the company has made substantial capital investments to ensure adequate service to all of its customers, including WVPA. NIPSCO contends that the company would have modified its construction plans for the Schahfer Unit Nos. 17 and 18 had it known that the WVPA load might be diverted.

Finally, NIPSCO challenges WVPA's assertion that NIPSCO's projected power costs constitute constructive notice that the company is unable to provide adequate service. NIPSCO contends that projected costs are not relevant to the decision whether to order NIPSCO to wheel energy.

On December 30, 1982, WVPA filed a motion to amend its application, in which it proposed alternate grounds for the requested wheeling order, *i.e.*, that NIPSCO's denial of transmission service constitutes undue discrimination in violation of Sections 205 and 206 of the Federal Power Act. In support of this claim, WVPA alleges that it competes with NIPSCO for industrial load, that reduced power costs would enable WVPA to compete more effectively with NIPSCO, that lower cost sources of bulk power supply are currently available to WVPA, but that NIPSCO has prevented WVPA's access to the lower cost power and precluded effective competition by exercising its monopoly power over transmission in the WVPA service area to deny wheeling service to WVPA. In addition, WVPA states that NIPSCO voluntarily agreed to provide another of its wholesale customers, the City of Rensselear, with the identical wheeling service that WVPA seeks to obtain in this proceeding. Finally, WVPA states that under ¶ 8.6 of the NIPSCO–WVPA inter-connection agreement, the agreement itself is not in effect, and therefore its eleven-year notice provision does not bar WVPA's instant application.

On January 28, 1983, NIPSCO answered WVPA's amended application. NIPSCO contends that it does not possess monopoly control over WVPA, that it lacks the ability to exclude competitors, that it has not foreclosed WVPA from competition with NIPSCO, that it has not discriminated against WVPA, and that it has not prevented WVPA from enteriong the bulk power suply business. NIPSCO additionally claims that its wheeling service to Rensselaer is distinguishable from the service sought by WVPA in that the Rensselaer wheeling arrangement, unlike that proposed by WVPA, affords NIPSCO time to plan system changes in the event that Rensselear diverts its load. Finally, NIPSCO notes that were it not for uncontrollable delays in the Marble Hill construction schedule, which prevented implementation of the interconnection agreement, NIPSCO would now be providing the service requested by WVPA's instant application. These delays contributed to NIPSCO's decision to build the Schahfer Unit Nos. 17 and 18. NIPSCO claims that if it now lost WVPA's load, it would have no market for the generation dedicated to WVPA, and would be forced to shift financial responsibility for the excess generating capacity to retail customers.

Discussion

Initially, we shall deny NIPSCO's request that WVPA's application be summarily dismissed. WVPA has advanced all of the requisite allegations to seek a mandatory wheeling order under Sections 211 and 212 of the Federal Power Act as well as the additional question of undue discrimination. We believe that WVPA's application raises questions of law and fact, including the matter of WVPA's contractual right to obtain power from other sources, which must be resolved on the basis of an evidentiary hearing.

However, we are not convinced that WVPA's allegations of undue discrimination, monopoly power, and anticompetitive behavior may be fully and fairly heard within the confines of a proceeding under Sections 211 and 212 of the Federal Power Act alone. At present, it is not entirely clear whether we may remedy undue discrimination by ordering wheeling. *See Florida Power & Light Co.* v. *FERC*, 600 F. 2d 668, 679 (5th Cir. 1981); *N.Y. State Elec. & Gas Corp.* v. *FERC*, 638 F.2d 388, 402–403, *cert. denied sub nom. Penn Yan* v. *N.Y. State Elec. & Gas Corp.*, 454 U.S. 821 (1981); *Richmond Power & Light Co.* v. *FERC*, 574 F.2d 610, 624 (D.C. Cir. 1978). However, we need not reach that issue at this time. No determination on the scope of potential remedies need be made unless and until specific findings of anticompetitive activities or undue discrimination are made. Because those matters may be best suited to proof under Section 206 of the Federal Power Act, we shall institute a hearing on WVPA's application pursuant to Section 206 as well as Sections 211 and 212 of the Federal Power Act. The burden of proving the present rates, terms or conditions of service unjust, unreasonable, unduly discriminatory or preferential rests with WVPA under Section 206, as does the burden of proving that WVPA is entitled to an order requiring wheeling under Sections 211 and 212.

In the interest of an effective utilization of resources, we shall require that the Section 211/212 portion of this hearing also consider the appropriate rates, terms, and conditions to be incorporated into a proposed wheeling order, if such an order is ultimately found to be appropriate. We believe that this approach will facilitate the negotiations contemplated by Section 212(c) in the event that wheeling is ordered. *See Southeastern Power Administration* v. *Kentucky Utilities Co.*, 11 FERC ¶61,191 (1980). However, in accordance with our past practice, we shall leave to the discretion of the presiding judge whether to phase the Section 211/212 proceeding to allow resolution of the compelled wheeling question prior to consideration of the rate issues. *Southeastern Power Administration* v. *Kentucky Utilities Co.*, 12 FERC ¶61,022 (1980). The Section 211/212 compelled wheeling question should be heard concurrently with the Section 206 discrimination issue.

The Commission orders:

(A) NIPSCO's motion to dismiss WVPA's application is hereby denied.

(B) Pursuant to the authority contained in and subject to the jurisdication conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly Sections 206, 211, and 212 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning WVPA's claims of undue discrimination and entitlement to a wheeling order.

(C) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after issuance of this order, in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, D.C. 20426. The presiding judge is authorized to phase this proceeding as set forth in the body of this order and to establish procedural dates and rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(D) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12574 Filed 5–10–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TA83–2–57–000 (RP72–41)]

Western Transmission Corp.; Proposed Changes

May 5, 1983.

Take notice that Western Transmission Corporation (Western), on April 29, 1983, tendered for filing as part of its FPC Gas Tariff, Original Volume No. 1, the following sheet: Twentieth Revised Sheet No. 3–A, superseding Nineteenth Revised Sheet No. 3–A.

The proposed effective date of the above tariff sheet is June 1, 1983.

Copies of this filing have been served upon Colorado Interstate Gas Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 16, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12575 Filed 5–10–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP80–72–009]

Algonquin Gas Transmission Co.; Rate Reductions and Refunds Made To Comply With Commission Order Issued March 3, 1983

May 6, 1983.

Take notice that on April 29, 1983 Algonquin Gas Transmission Company ("Algonquin Gas") filed three tariff sheets and a report showing computations of cost of service, reduced rates, and refunds to comply with the Commission Order issued March 3, 1983 in Algonquin Gas' rate proceeding, Docket Nos. RP80–72–000 and RP80–72–008. Such Commission Order affirmed the Intial Decision issued by Presiding Administrative Law Judge Murray on December 29, 1981 with some modifications.

Algonquin Gas states that the reduced rates will be applied to billings rendered for service rendered on and after April 1, 1983, and that refunds of excess charges apply to the period which commenced August 1, 1980, when increased rates filed in this proceeding were made effective, and extended to April 1, 1983.

Algonquin Gas' filing indicates that a copy of such filing was served upon parties to the proceeding, and that refunds of principal amounts together wtih related interest were made to its Customers on April 29, 1983.

Any person desiring to be heard or to protest filing should file a motion or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.21 and 385.214). All such motions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding.

Copies of Algonquin Gas' filing are on file with the Commission and are available for public inspection.

---

[3] This power supply agreement provides that NIPSCO's purchases of WVPA's Marble Hill entitlement will decrease by 1% in each successive year. Because the agreement is administered by the Rural Electrification Administration, it has not been filed as a jurisdictional rate schedule with the Commission.

[4] The interconnection agreement is not on file with the Commission. The service initiation date coincides with the Marble Hill Nuclear Unit No. 1 in-service date, which lies considerably beyond the 120-day notice requirement specified in 18 CFR 35.3.

VOL 48 ISS 92 MAY 11 1983 UMI

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. RP80-72-010]

Algonquin Gas Transmission Co.; Filing of Actual Cost of Service Reports and Refund Reports Related to Rate Schedule SNG-1

May 6, 1983.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on April 29, 1983 filed reports of its actual costs of service for Rate Schedule SNG-1 for the two delivery seasons of 1980-1981, and 1981-1982. Algonquin Gas states that such cost of service reports are required by the provisions of such filed rate schedule but that the filing of such reports within the time specified in such rate schedule was deferred, pursuant to Commission authorization, until the Commission decided upon rate-making methods for Algonquin Gas in a pending rate proceeding, Docket No. RP80-72. Algonquin Gas notes that the Commission issued its Order in such rate proceeding on March 3, 1983.

Algonquin Gas states that such cost of service reports contain a comparison of actual costs with revenues, and that the excess of revenues over actual costs was refunded to its customers under Rate Schedule SNG-1. Algonquin Gas asserts that the related refund reports identify the refunds, which include interest, and that such refunds were made to each customer on April 29, 1983.

Algonquin Gas notes that a copy of its filing, including the enclosed reports, was mailed to each affected party and to interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene.

Copies of Algonquin Gas' reports are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary

BILLING CODE 6717-01-M

[Docket No. G-3765-000, et al.]

ARCO Oil and Gas Company, Division of Atlantic Richfield Company, et al.; Applications for Certificates, Abandonment of Service and Petitions To amend Certificates [1]

May 6, 1983

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

Any person desiring to be heard or to make any protest with reference to said applications should on or before May 23, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Porcedure (18 CFR 385,211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which not petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[1] Applicant is filing for an additional delivery point.
[2] Deletion of acreage. ARCO no longer holds an interest in the properties involved.
[3] Applicant is filing to reflect change in the delivery points.
[4] ARCO has no remaining reserves or production in the acreage.
[5] Applicant is filing under, contract dated June 3, 1970, amended by Amendment dated March 29, 1983.
[6] Partial Release of Oil and Gas Lease executed September 9, 1959.
[7] ARCO, as operator of the unit, proposed the drilling of Well No. 2 and the other two owners declined to participate and elected to go "no-consent" pursuant to the sole risk provision of the unit operating agreement, therefore, ARCO is requesting his certificate be amended to cover its increased working interest during the payback period of the aforementioned sole risk venture, effective as of date of initial deliveries from such well.
[8] Applicant is filing under Contract dated April 17, 1968, amended by Amendment dated March 29, 1983.
[9] Applicant is filing under Contract dated May 1, 1972, amended by Amendment dated March 29, 1983.
[10] Shell assigned its interest in those certain leases described in the assignment to Enex Resources Corporation, effective November 1, 1982.
[11] Applicant is filing under Gas Sales and Purchase Agreement dated December 1, 1978, amended by Agreement dated April 18, 1983.
[12] Landowner's request for irrigation pumping fuel.
[13] All acreage committed to contract dated August 1, 1952, as amended, was assigned.
[14] Uneconomical to compress gas. Have an alternative interstate buyer with low pressure line in immediate vicinity.
[15] Applicant is filing under Gas Purchases Agreement dated February 1, 1982.
[16] Applicant is filing under Gas Purchase and Sales Agreement dated April 21, 1983.
[17] Applicant requests to continue the sale of gas to Texas Transmission Corporation under a contract dated March 2, 1977.
[18] Conoco has no gas production from the zones covered by Contract No. 4298 (RS 167).
[19] Well Producing water.
[20] Leases have been released because of non-production. Basic contract has terminated.
[21] The purchaser cannot physically take gas in contract quantity as provided under the contract and wishes to terminate the agreement. Abandonment is being requested so that another market may be appropriately sought.
[22] Applicant requests to continue the sale of gas to Texas Eastern Transmission under a contract dated October 1, 1981.

BILLING CODE 6717-01-M

[Docket No. ER83-460-000]

Cleveland Electric Illuminating Co.; Filing

May 6, 1983.

The filing Company submits the following:

Take notice that on April 14, 1983, the Cleveland Electric Illuminating Company (CEI) tendered for filing an executed Service Agreement and Exhibits A and B thereto, providing for transmission by CEI of approximately 40 MW of power from the 345 kv interconnection point on CEI's Juniper—Canton Line with the Ohio Power Company to the City of Cleveland, Ohio (City) in accordance with the terms and conditions of CEI's FERC Transmission Service Tariff.

CEI requests an effective date of April 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[Docket No. ER83-241-002]

Idaho Power Co.; Compliance Filing

May 6, 1983:

The filing Company submits the following:

Take notice that on April 7, 1983, Idaho Power Company (Idaho), tendered for filing a revised Appendix 1 as required by Exhibit C for retail sales in

VOL 48 ISS 92 MY 11 1983 UMI

the State of Idaho, prepared in accordance with the Commission's Order issued on March 11, 1983, in Docket No. ER83-241-000, and with the provisions of the Residential Purchase and Sale Agreement (Agreement) between Idaho and the Bonneville Power Administration (BPA).

The Agreement was entered into pursuant to the Pacific Northwest Electric Power Planning and Conservation Act, Pub. L. 96-501. The Agreement provides for the exchange of electric power from Idaho and BPA for the benefit of Idaho's residential and farm customers.

A copy of the filing was served upon BPA and all parties that made comment on Idaho's Appendix 1 Filings.

Any person desiring to be heard or to protest filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before May 18, 1983. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[PP 3G2796/T409; PH-FRL 2360-1]

American Cyanamid Co.; Establishment of Temporary Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has established temporary tolerances for residues of the pesticide (+) cyano (3-phenoxyphenyl)methyl(+)-4-(difluoromethoxy)-alpha-(1-methylethyl) benzeneacetate in or on certain raw agricultural commodities. These temporary tolerances were requested by American Cyanamid Company.

DATE: These temporary tolerances expire March 15, 1984.

FOR FURTHER INFORMATION CONTACT: Timothy Gardner, Product Manager (PM) 17, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm 207, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202 (703-557-2690).

SUPPLEMENTARY INFORMATION: American Cyanamid Company, Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540, has requested, in pesticide petition PP 3G2796 the establishment of temporary tolerances for residues of the pesticide (+) cyano (3-phenoxyphenyl)methyl(+)-4-(difluoromethoxy)-alpha-(1-methyl-ethyl) benzeneacetate, in or on the raw agricultural commodities milk, meat, fat and meat byproducts of cattle at 0.10 part per million (ppm).

These temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with the provisions of the experimental use permit 241-EUP-102 which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluted, and it was determined that establishment of the temporary tolerances will protect the public health. Therefore, the temporary tolerances have been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. American Cyanamid Co. must immediately notify the EPA of any

VOL 48 ISS 92 MY 11 1983 UMI

findings from the experimental use that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

Those tolerances expire March 15, 1984. Residues not in excess of these amounts remaining in or on the raw agricultural commodities after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary tolerance. These tolerances may be revoked if the experimental use permit is revoked or if any experience or scientific data with this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 610-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(j), 68 Stat. 516 (21 U.S.C. 346a(j)))
Dated: April 27, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[PF-315; PH-FRL 2361-4]

Food and Feed Additive Petitions; BASF Wyandotte Corp. et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received food and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities.

ADDRESS: Written comments to the product manager (PM) cited in each petition at the address below: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Written comments may be submitted while the petitions are pending befor the Agency. The comments are to be identified by the document control number (PF-325) and the petition number. All written comments filed in response to this notice will be available for public inspection in the product manager's office from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: The product manager cited in each petition at the telephone number provided.

SUPPLEMENTARY INFORMATION: EPA gives notice that the Agency has received the following food and feed additive petitions relating to the establishment and/or amendment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, and Drug, and Cosmetic Act.

I. Initial Filing

1. *FAP 3H5392.* BASF Wyandotte Corp., 100 Cherry Hill Rd., Parsippany, NJ 07054. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the herbicide 2-[1(ethoxyimino)butyl-5-(2-(ethylthio)propyl)-3-hydroxy-2-cyclohexen-1-one and its metabolites containing the 2-cyclohexene-1-one moiety (calculated as the herbicide) in or on the commodity cottonseed soapstock at 15 parts per million (ppm). (PM-25, Robert Taylor, 703-557-1800).

2. *FAP 3H5379.* Rhone-Poulenc Inc. Agrochemical Division, P.O. Box 125, Monmouth Junction, NJ 08852. Proposes amending 21 CFR Part 561 by establishing a regulation permitting the combined residues of the fungicide iprodione (3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide), its isomer [3-(1-methylethyl)-N-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide], and its metabolite [3-(3,5-dichlorophenyl)-2,4-dioxo-1-imidazolidinecarboxamide] in or on the commodities dry grape pomace at 600 ppm and raisin waste at 300 ppm, in connection with an experimental use program. (PM-21, Henry Jocaby, 703-557-1900).

II. Amended Petition

FAP 3H5379. Rhone-Poulenc Inc. EPA issued a notice purlished in the **Federal Register** of February 2, 1983 (47 FR 4717) that announced the Rhone-Poulenc, Inc. had submitted food additive petition FAP 3H5379 to the Agency proposing to amend 21 CFR Part 193 by establishing a regulation permitting the combined residues of the above fungicide iprodione in or on the commodity raisins at 180 ppm in connection with an experimental use program.

Rhone-Poulenc has amended the petition by: Increasing the level in raisins from 180 to 330 ppm. (PM-21, Henry Jacoby, 703-557-1900).

(Sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348))
Dated: May 2, 1983.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

[OPP-180621; PH-FRL 2361-5]

Pesticides; Emergency Exemptions Granted

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions to the U.S. Departments of the Interior and Agriculture and the States listed below for the control of various pests. Also listed are crisis exemptions initiated by the U.S. Department of Agriculture and three States.

DATES: See each specific and crisis exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific and crisis exemption for the name of the contact person. The following information applies to all contact people: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, Rm. 716, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703-557-1192).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Alabama Department of Agriculture and Industry for the use of anilazine on watercress to control leaf spot; March 22, 1983 to October 31, 1983. (Gene Asbury)

2. Alabama Department of Agriculture and Industry for the use of mevinphos on watercress to control aphids; April 6, 1983 to October 31, 1983. (Jim Tompkins)

3. Alabama Department of Agriculture and Industry for the use of cyromazine in poultry houses to control house flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

4. Arkansas State Plant Board for the use of cyromazine in poultry houses to control house flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

5. California Department of Food and Agriculture for the use of carbaryl on avocados to control gypsy moths; March 31, 1983 to March 31, 1984. (Jack E. Housenger)

6. Colorado Department of Agriculture for the use of propachlor on onions to control weeds; March 10, 1983 to May 15, 1983. (Donald R. Stubbs)

7. Florida Department of Agriculture and Consumer Services for the use of chlorpyrifos on citrus to control the citrus root weevil complex; March 14, 1983 to October 31, 1983. (Libby Welch)

8. Florida Department of Agriculture and Consumer Services for the use of permethrin on sweet corn grown for the fresh market to control fall armyworms in Alachua, Broward, Collier, Dade, Gadsden, Hendry, Lake, Lee, Marion, Martin, Orange, Palm Beach, Sarasota, and Seminole Counties; April 7, 1983 to December 31, 1983. (Jack E. Housenger)

9. Florida Department of Agriculture and Consumer Services for the use of cyromazine on lettuce and celery in Hendry, Lake, Orange, Palm Beach, Sarasota, and Seminole Counties to control leafminers; March 18, 1983 to June 30, 1983. Florida had initiated a crisis exemption for this use. (Jack E. Housenger)

10. Georgia Department of Agriculture for the use of fenvalerate on southern peas to control cowpea curculio; March 23, 1983 to October 31, 1983. (Gene Asbury)

11. Idaho Department of Agriculture for the use of cyromazine in poultry houses to control flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

12. Idaho Department of Agriculture for the use of propachlor on onions to control weeds; March 31, 1983 to May 30, 1983. (Libby Welch)

13. Illinois Department of Agriculture for the use of propachlor on onions to control weeds; March 31, 1983 to December 31, 1983. (Libby Welch)

14. Maine Department of Agriculture, Food and Rural Resources for the use of cyromazine in poultry houses to control house flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

15. Maryland Department of Agriculture for the use of fenamiphos on strawberry nursery stock plants to control nematodes (root-knot); April 6, 1983 to July 15, 1983. (Gene Asbury)

16. Maryland Department of Agriculture for the use of mevinphos on watercress to control aphids; April 6, 1983 to October 31, 1983. (Jim Tompkins)

17. Maryland Department of Agriculture for the use of azinphosmethyl on carrots to control carrot weevils; March 14, 1983 to August 31, 1983. (Gene Asbury)

18. Michigan Department of Agriculture for the use of propachlor on onions to control weeds; March 31, 1983 to July 15, 1983. (Libby Welch)

19. Montana Department of Agriculture for the use of chlorpyrifos on small grains (wheat, barley, oats) to control cutworms; March 22, 1983 to June 30, 1983. (Jim Tompkins)

20. Montana Department of Agriculture for the use of permethrin on small grains to control cutworms; March 25, 1983 to June 30, 1983. (Jim Tompkins)

21. Nevada Department of Agriculture for the use of oxyfluorfen on dry bulb onions to control broadleaf weeds; April 6, 1983 to July 1, 1983. (Jim Tompkins)

22. New Jersey Department of Environmental Protection for the use of propachlor on onions to control weeds; March 31, 1983 to December 31, 1983. (Libby Welch)

23. New Jersey Department of Environmental Protection for the use of methiocarb on grapes to repel birds; March 28, 1983 to November 30, 1983. (Jim Tompkins)

24. New Jersey Department of Environmental Protection for the use of fenamiphos on bearing peach trees to control nematodes; March 18, 1983 to December 31, 1983. (Gene Asbury)

25. New Jersey Department of Environmental Protection for the use of fenamiphos on bearing nectarine trees to control nematodes; March 18, 1983 to December 31, 1983. (Gene Asbury)

26. New Mexico Department of Agriculture for the use of oryzalin on alfalfa to control foxtail; March 10, 1983 to April 15, 1983. New Mexico had initiated a crisis exemption for this use. (Libby Welch)

27. New York Department of Environmental Conservation for the use of cyromazine in poultry houses to control flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

28. New York Department of Environmental Conservation for the use of methiocarb on grapes to repel birds; March 28, 1983 to November 30, 1983. (Jim Tompkins)

29. Oregon Department of Agriculture for the use of oxyfluorfen on dry bulb onions to control broadleaf weed; April 6, 1983 to July 1, 1983. (Jim Tompkins)

30. Oregon Department of Agriculture for the use of propachlor on onions to control weeds; March 31, 1983 to June 30, 1983. (Libby Welch)

31. South Carolina Division of Regulatory and Public Services for the use of cyromazine in poultry houses to control flies; March 23, 1983 to December 31, 1983. (Jim Tompkins)

32. Washington Department of Agriculture for the use of triadimefon on nectarines to control powdery mildew; March 28, 1983 to June 30, 1983. (Gene Asbury)

33. West Virginia Department of Agriculture for the use of mevinphos on watercress to control aphids; April 6, 1983 to October 31, 1983. (Jim Tompkins)

34. U.S. Department of Agriculture for the use of ethylene oxide on dead bees and used bee-keeping equipment as a sterilant at ports of entry; March 28, 1983 to March 28, 1984. EPA has not yet made its final determination to conclude the rebuttable presumption against registration (RPAR) of ethylene oxide. (Libby Welch)

35. U.S. Department of the Interior, for the use of sodium cyanide on the Aleution Islands of Amukta and Kiska in Alaska to control the Arctic fox; May 1, 1983 to May 1, 1984. (Jim Tompkins)

Crisis exemptions were initiated by the:

1. California Department of Food and Agriculture on March 23, 1983, for the use of metalaxyl on asparagus to control *Phytophthora megasperma* var. *sojea*. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. The need for this program is expected to last until March 23, 1984. (Jack E. Housenger)

2. California Department of Food and Agriculture on March 24, 1983, for the use of daminozide on cherries to control plant growth and the ripening of fruit. The need for this program has ended. (Libby Welch)

3. California Department of Food and Agriculture on March 11, 1983, for the use of iprodione on grapes to control bunch rot. Since it was anticipated that this program would be needed for more than 15 days, California has requested a specific exemption to continue it. The need for this program is expected to last until December 1, 1983. (Libby Welch)

4. Hawaii Department of Agriculture on March 5, 1983, for the use of fenvalerate on Chinese cabbage and mustard cabbage to control diamondback moths. Since it was anticipated that this program would be needed for more than 15 days, Hawaii has requested a specific exemption to continue it. The need for this program is expected to last until March 5, 1984. (Jack E. Housenger)

5. Maryland Department of Agriculture on March 29, 1983, for the use of cyromazine in layer poultry houses to control house flies. Since it was anticipated that this program would be needed for more than 15 days, Maryland has requested a specific

VOL 48 ISS 92 MY 11 1983 UMI

exemption to continue it. The need for this program is expected to last until December 31, 1983. (Jim Tomkins)

6. U.S. Department of Agriculture on March 15, 1983, for the use of methyl bromide on guar seeds to control the khapra beetle. The need for this program has ended. (Libby Welch)

(Sec. 18, as amended, 92 Stat. 819 (7 U.S.C. 136))

Dated: May 2, 1983.

James M. Conlon,

Acting Director, Office of Pesticide Programs.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies; Proposed de Novo Nonbank Activities; The Chase Manhattan Corp., et al.

The organizations identified in the notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank no later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *The Chase Manhattan Corporation*, New York, New York (mortgage banking and related lending and insurance activities; Florida): To engage through its subsidiary Chase Home Mortgage Corporation in the making or acquiring for its own account or for the account of others, loans and other extensions of credit secured by real estate including but not limited to, first and second mortgage loans secured by mortgages on one-to-four family residential properties, servicing loans and other extensions of credit for any person, selling mortgage loans in the secondary market, and offering mortgage term life insurance, accident and health insurance and disability insurance directly related to such lending and servicing activities. These activities will be conducted from an office located in West Palm Beach, Florida, serving the State of Florida. Comments on this application must be received not later than June 3, 1983.

B. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *BancOhio Corporation*, Columbus, Ohio (mortgage banking activities; United States): To engage, through its subsidiary, W. Lyman Case & Company, in making, acquiring, and servicing for its own account and for the account of others, mortgage loans and other extensions of credit (including issuing of letters of credit and accepting drafts) as would be made by a mortgage company, in arranging for equity financing on behalf of institutional investors for commercial and industrial income-producing real property, land in such other activities as are incidental thereto. These activities will be conducted from an office in Cleveland, Ohio, serving the entire United States. Comments on this application must be received not later than May 28, 1983.

C. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Security Pacific Corporation*, Los Angeles, California (mortgage and servicing activities; Utah): To engage through its subsidiary, Security Pacific Mortgage Corporation, in the origination and acquisition of mortgage loans, including development and construction loans on multi-family and commercial properties for Security Pacific Mortgage Corporation's own account or for sale to others; and the servicing of such loans for others. These activities would be conducted from an office of Security Pacific Mortgage Corporation in Salt Lake City, Utah, serving the State of Utah. Comments on this application must be received not later than June 3, 1983.

2. *Security Pacific Corporation*, Los Angeles, California (mortgage and servicing activities; Colorado): To engage through its subsidiary, Security Pacific Mortgage Corporation, in the origination and acquisition of mortgage loans, including development and construction loans on multi-family and commercial properties for Security Pacific Mortgage Corporation's own account or for sale to others; and the servicing of such loans for others. These activities would be conducted from an office of Security Pacific Mortgage Corporation in Aurora, Colorado, serving the State of Colorado. Comments on this application must be received not later than June, 3, 1983.

3. *Wells Fargo & Company*, San Francisco, California (finance, leasing and insurance activities; Texas, Arkansas, Louisiana, New Mexico and Oklahoma): Proposes to engage, through its subsidiary, Wells Fargo Credit Corporation, in making or acquiring loans and other extensions of credit, including consumer installment loans originated by others and commercial loans secured by a borrower's or guarantor's assets; servicing loans for the account of others; making full pay-out leases of personal property; and acting as agent for credit life or accident and health insurance related to its extensions of credit in accordance with the Board's Regulation Y and Title VI of the Garn-St Germain Depository Institutions Act of 1982. These activities would be conducted from an office in Houston, Texas, serving Texas, Arkansas, Louisiana, New Mexico, and Oklahoma. Comments on this application must be received not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 5, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-12551 Filed 5-10-83; 8:45 am]

BILLING CODE 6210-01-M

[Docket No. R-0464]

Federal Reserve Bank Check Collection Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Supplement to request for comments.

SUMMARY: The Board of Governors requested public comment on May 2, 1983, on proposed criteria for selecting depository institutions located outside Federal Reserve office cities for inclusion in a program to accelerate the collection of checks. This request for comments is being supplemented by adding the list of those depository institutions that receive daily average presentments from the Federal Reserve of $20 million or more.

EFFECTIVE DATE: May 5, 1983.

FOR FURTHER INFORMATION CONTACT: Elliott C. McEntee, Assistant Director (202/452-2231) of Florence M. Young, Program Manager (202/452-3955), Division of Federal Reserve Bank Operations; Daniel L. Rhoads, Attorney (202/452-3711), Robert G. Ballen, Attorney (202/452-3265), or Elaine M. Boutilier, Attorney (202/452-2418), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Board requested comment on May 2, 1983, on proposed criteria for selecting depository institutions located outside Federal Reserve office cities for inclusion in the program to accelerate the collection of checks. 48 FR 20283 (May 5, 1983). One of the criterion proposed by the Board as a basis for determining which non-city institutions would be included in this aspect of the program to accelerate the collection of checks, called the high-dollar group sort (HDGS), was the value of daily average presentments received from the Federal Reserve. The Board proposed that initially all institutions with average daily presentments amounting to $20 million or more would be included in the HDGS. The Board has been asked to provide a list of the 97 institutions that meet this proposed criterion.

To further assist commenters in their review of the proposed criteria for selecting institutions to be included in the HDGS, the Board's notice has been supplemented to include the names of the 97 institutions that receive daily average presentments from the Federal Reserve of $20 million or more. The publication of these names should not be regarded as a determination that all 97 institutions will be included in the HDGS. Analysis of comments received in response to the Board's proposal may result in the cutoff being raised or lowered, or may even result in the daily average presentments criterion not being adopted.

The 97 institutions that receive daily average presentments from the Federal Reserve of $20 million or more as of March 1983 are:

BILLING CODE 6210-01-M

Formation of Bank Holding Companies; HomeBanc Corp., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *HomeBanc Corporation,* Guntersville, Alabama; to become a bank holding company by acquiring 80 percent of the voting shares of The Home Bank Guntersville, Alabama. Comments on this application must be received not later than June 1, 1983.

B. **Federal Reserve Bank of St. Louis** (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Peoples First Corporation,* Paducah, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples First National Bank and Trust Company, Paducah, Kentucky. Comments on this application must be received not later than June 3, 1983.

C. **Federal Reserve Bank of Dallas** (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 75222:

1. *First Perryton Bancorp, Inc.,* Perryton, Texas; to become a bank holding company by acquiring 80 percent or more of the voting shares of The First National Bank of Perryton, Perryton, Texas. Comments on this application must be received not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 5, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-12547 Filed 5-10-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Company; the Home State Building, Inc.

The Home State Building, Inc., Lewis, Kansas, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Home State Bank, Lewis, Kansas. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The Home State Building, Inc., Lewis, Kansas, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Lewis Insurance Service, Inc., Lewis, Kansas.

Applicant states that the proposed subsidiary would continue to engage in general insurance agency activities in a community that has a population not exceeding 5,000 and in conformance with Section 601(C) of the Garn-St Germain Depository Institutions Act of 1982. These activities would be performed from offices of Applicant's subsidiary in Lewis, Kansas, and the geographic area to be served is Edwards County, Kansas. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be pesented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 5, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-12549 Filed 5-10-83; 8:45 am]

BILLING CODE 6210-01-M

Norwest Corporation

Norwest Corporation, Minneapolis, Minnesota, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage *de novo* in equity financing activities through its nonbank subsidiary, Norwest Mortgage, Inc., Minneapolis, Minnesota. These activities would be performed from offices of Applicant's subsidiary in Colorado, Illinois, Iowa, Kansas, Maryland, Minnesota, Montana, Nebraska, Texas and Wisconsin, and the geographic areas to be served are all of the United States, including the District of Columbia. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 5, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Whitewater Bancorp., Inc.

Whitewater Bancorp., Inc., Whitewater, Wisconsin, has applied pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage directly in general insurance agency activities. Applicant proposes to sell credit-related life insurance and general property, casualty, and health insurance. These activities would be conducted by Applicant, a bank holding with assets of $50 million or less, in a community with a population exceeding 5,000 and in conformance with the requirements of Section 601(F) of the Garn-St Germain Depository Institution Act of 1982. These activities would be performed from premises located at the two offices of Applicant's subsidiary, First Citizens State Bank, Whitewater, Wisconsin. The geographic area to be served is the State of Wisconsin. Such activities have been specified by the Board § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedure of facility 225.4(b).

Interested person may express their views on the question whether consummation of the proposal can "reasonably by expected to produce benefits to the public, such as greater convenience, increases competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or request for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 5, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

International Narcotics Control Under the Foreign Assistance Act of 1961; Delegation of Authority

Notice is hereby given that in furtherance of the delegation of January 24, 1983 (48 FR 6782), by the Secretary of Health and Human Services to the Assistant Secretary for Health, the Assistant Secretary for Health has delegated to the Director, Centers for Disease Control, with authority to redelegate, the authority delegated to the Assistant Secretary for Health under section 481(d)(2), of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2291(d)(2)), concerning the authority to monitor the impact on the health of persons who use marijuna sprayed with a herbicide to eradicate such marijuana.

The delegation to the Director, Centers for Disease Control, became effective on April 27, 1983

Dated: April 27, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

[FR Doc. 83-12656 Filed 5-10-83; 8:45 am]

BILLING CODE 4160-18-M

National Center for Health Services Research; Assessment of Medical Technology

The Public Health Service (PHS), through the Office of Health Tec' nology Assessment (OHTA), announces that it is seeking additional responses to an announcement of assessment in **Federal Register** Volume 46, number 226, p. 57649, of November 24, 1981 of the role of intraoperative ventricular and atrial mapping in the treatment of some tachyarrhythmias. Specifically, we are interested in the safety, clinical effectiveness, appropriateness and use of this technology as it applies to: (1) Localizing accessory pathways associated with the Wolff-Parkinson-White and other preexcitation syndromes. (2) Mapping the sequence of atrial and ventricular activation for drug resistant supraventricular tachycardias. (3) Delineating the anatomic course of the Bundle of His during open heart surgery. (4) Identifying the site(s) of origin of ventricular (and atrial) arrhythmias. (5) Identifying areas of myocardial ischemia or infarction for purposes of revascularization or for defining margins for surgical resection in the treatment of ischemic heart disease. This assessment seeks to evaluate intraoperative mapping in the management of certain high risk patients with recurrent refractory arrhythmias and compare the outcome of patient management based on electrophysiologic surveys (EPS) with that of other conventional approaches (i.e. empirical therapy).

For the purpose of this announcement, intraoperative ventricular and atrial mapping is defined as direct mapping of the heart's electrophysiologic signals during surgery. Cardiac mapping is a method by which potentials recorded directly from the heart are spatially depicted as a function of time in an intergrated manner. The recording sites are usually indentified from an anatomical grid and may consist of epicardial, endocardial, and even intramyocardial sites. A variety of important electrophysiologic variables can be identified from cardiac recordings including local activation times. Mapping Procedures performed in the cardiac catherization laboratory (preoperative) are not included in this assessment.

The PHS assessment consists of a synthesis of information obtained from appropriate organization in the private sector and from PHS agencies and others in the Federal Government. PHS assessments are based on the most current knowledge concerning the safety and clinical effectiveness of a technology. Based on this assessment, a PHS recommendation will be formulated to assist the Health Care Financing Administration (HCFA) in establishing Medicare coverage policy. Any person

VOL 48 ISS 92 MY 11 1983 UMI

or group wishing to provide OHTA with information relevant to this assessment should do so in writing no later than July 30, 1983, or within 90 days from the date of publication of this notice.

The information being sought is a review and assessment of past, current, and planned research related to this technology, a bibliography of published, controlled clinical trials and other well-designed clinical studies since 1975 and other information related to the characterization of the patient population most likely to benefit, the clinical acceptability, and the effectiveness of this technology. Proprietary information is not being sought, but published commercial information may be submitted.

Written material should be submitted to: Martin Erlichman, National Center for Health Services Research, Office of Health Technology Assessment, Park Building, Room 3-10, Stop No. 2, 5600 Fishers Lane, Rockville, Maryland 20857.

For further information contact Martin Erlichman, Health Science Analyst, at above address or by telephone (301) 443-4090.

Dated: May 4, 1983.

Harold Margulies,

Director, Office of Health Technology Assessment, National Center for Health Services, Research.

[FR Doc. 83-12355 Filed 5-10-83; 8:45 am]
BILLING CODE 4160-17-M

Social Security Administration

Income Maintenance Research and Demonstration; Availability of Grants

The Commissioner of Social Security announces the availability of fiscal year (FY) 1983 funds for income maintenance research and demonstration grants related to the Aid to Families with Dependent Children (AFDC) Program, title IV-A of the Social Security Act. The grants are authorized under sections 1110 and 1115 of the Social Security Act. The closing date for receipt of all applications is July 11, 1983.

Program Purpose

The research and demonstration activities are intended to add to existing knowledge and to improve methods and techniques for the management, administration and effectiveness of public assistance programs.

Program Goals

In general, the Social Security Administration (SSA) will support the following types of projects:

1. Those which develop and demonstrate new financing mechanisms, administrative procedures, and technological innovations for improving the effectiveness of public assistance programs at the State and local levels.

2. Those which increase knowledge of the characteristics and financial needs of a target group.

3. Those which develop and implement analytical models for comparing the relative merits of alternative methods for carrying out income maintenance.

Priority Projects

In particular, the following projects will be considered for funding:

Demonstration of Grant Diversion—SSA-83-01 (Section 1115 Grant)

One of the objectives of title IV-A of the Social Security Act is to promote self-support and personal independence to the maximum extent possible. Grant diversion is a technique whereby the recipient's AFDC cash grant is diverted to a public or private employer that employs the recipient. In other words, the grant is used to subsidize the wage paid to the employed recipient. In this period of severe fiscal constraints, techniques which maximize existing resources towards creating job opportunities are especially important.

This demonstration will test different models for implementing grant diversion to determine whether they are cost-effective techniques for promoting the self-support of AFDC recipients. Proposals for this demonstration must include a detailed description of the operational aspects of the project, including the amount and duration of the grant diversion, the types of jobs and employees anticipated; the mechanism for diverting the grant; the mechanism for shifting participants to unsubsidized employment; etc. The proposal application also must include an evaluation plan. A control or comparison group is required for the demonstration, and preference will be given to projects utilizing an experimental design with random assignment.

Five to seven grants funded for up to 3 years in duration are anticipated. For the first year, approximately $710,000 in special Federal project funds, matchable with $710,000 in regular Federal funds received under section 403 of the Act, will be available in support of this section 1115 activity. Two succesive 12-month grants will be awarded upon satisfactory performance and availability of fiscal year appropriations.

Demonstration of Front-End Fraud Detection Models SSA-83-02 (Section 1110 grant)

Recipient fraud continues to result in substantial misexpenditures, and when the fraud is identified, expensive and time-consuming court actions are often necessary for recoupmemt of these funds. Many current fraud detection efforts are unfocused, passive, and untimely. Fraud is often not identified until long after an individual has been receiving AFDC benefits.

This project would demonstrate innovative techniques in the early detection and prevention of fraud. Examples of such techniques include tax and bank records matching and special investigations of suspected fraud cases prior to application approval. Preference will be given to those projects employing techniques that would be applied either prior to application approval or shortly thereafter. Effects on participation rates and the costs and savings of the program would be measured. Although some States now practice a variety of front-end fraud detection techniques, hard cost/benefit data comparing their efficacy to less focused methods of verification is lacking. This project would provide for a careful measurement and evaluation of up to two fraud detection systems, with preference given to the use of control or comparison groups. Applicants must indicate the location(s) in which these techniques will be tested and describe the methods by which these techniques are tested and evaluated. Non-governmental applicants must also provide collateral agreements from authorized officials in the demonstration State(s).

Two projects funded for up to 2 years in duration are anticipated. For the first year, a total of $375,000 will be available in support of this section 1110 activity. An additional 12-month grant will be subsequently awarded upon satisfactory performance and availability of fiscal year appropriations.

Demonstration of CWEP-Operated Daycare for AFDC Recipients SSA-83-03 (Section 1115 grant)

States have used a variety of means to provide daycare, where necessary, for AFDC recipients who participate in CWEP, and other work programs, or who are employed. This section 1115 project will demonstrate the use of CWEP participants in the provisions of daycare services for other AFDC recipients. The grantee will demonstrate techniques, consistent with Federal matching requirements, for directly or indirectly using CWEP participants in meeting the childcare needs of other AFDC recipients and in providing to CWEP participants employment experience and skill development in the provision of daycare services. The grantee will evaluate administrative effectiveness; the primary objective is to test implementation processes and administrative procedures that constitute "best practices" for providing daycare through CWEP participants.

Two projects funded for up to 2 years in duration are anticipated. For the first year, $150,000 in special Federal project funds, matchable with $150,000 in regular Federal funds under section 403 of the Act, will be available in support of this section 1115 activity. An additional 12-month grant will be subsequently awarded upon satisfactory performance and availability of fiscal year appropriations.

Demonstrating a Model CWEP Management Information System SSA-83-04 (Section 1110 Grant)

The Community Work Experience Program (CWEP) allows States to require certain AFDC recipients to perform public service work each month for an amount of time no greater than the grant divided by the minimum wage. In order to be an effective, comprehensive program, States must quickly and accurately collect, update, process, and report data on available work sites, recipient/grant information, participant/program performance, etc. To accomplish this on a large scale, automated data processing could be especially useful.

This section 1110 demonstration project will involve the development of an automated system which can be used by caseworkers to match recipients to jobs as well as provide information on work sites, recipient work experience needs, employability characteristics, recipient history, and caseworker reports. The system should also monitor participation of recipients in CWEP at various stages, e.g., registration, referral, and actual on-site participation. Applicants must describe how and where this system will be tested, implemented, and evaluated. Non-governmental applicants must also provide collateral agreements form authorized officials in the demonstration state(s). Preference will be given to applicants that will demonstrate the system on a large scale, or State-wide, and to proposals which link this system to the demonstration State's AFDC Client Information System.

One grant funded for one year only is anticipated. Approximately $250,000 will be available in support of this activity.

Demonstrating Innovative Error Reduction Techniques SSA-83-05 (Section 1115 grant)

Although error rates have significantly declined over the past 10 years, erroneous payments still total about $1 billion annually. In light of current budgetary constraints in government, the development and documentation of innovative techniques that are cost beneficial for reducing erroneous payments are important areas for State demonstration.

This section 1115 projects will provide funds for up to four States to demonstrate and evaluate innovative techniques which significantly reduce erroneous payments. These techniques must be transferable to a large number of States. Two categories of techniques are of particular interest. The first category involves techniques employing the use of management consulting teams to identify problems and develop targeted corrective actions by conducting management and administrative analyses of welfare offices with high error rates. A second category involves techniques directed at the reduction of client error. Several States appear to have successfully employed techniques targeted toward reducing recipient-caused error. A clear demonstration of successful innovative techniques for reducing client error would encourage other States to adopt them. In addition to the above two areas, States may propose other techniques which show promise in reducing error rates.

Proposals must include a description of how project sites will be chosen and how costs and benefits will be measured. Projects must demonstrate probable transferability of techniques and preference will be given to projects that propose evaluations based on an experimental design.

Two to four grants awarded for up to 2 years in duration are anticipated. For the first year, $300,000 in special Federal project funds, matchable with $300,000 in regular Federal funds under section 403 of the Act, will be available in support of this activity. An additional 12-month grant will be subsequently awarded upon satisfactory performance and availability of fiscal year appropriations.

Grantee Share of the Project Costs

Section 1110 grants. Grantees receiving financial assistance to conduct projects must contribute at least 5 percent of the total projects costs for each year for which funding is requested.

Section 1115 grants. Special Federal project funds received under section 1115 grants are available to be used as the single State agency matching funds to obtain regular Federal funds under the AFDC State plan pursuant to section 403 of the Act. Section 1115 grant applications usually include a budget proposal of which 50% of the total cost of the activity will be funded from regular Federal funds under section 403 of the Act and the remaining 50% from special Federal project and State funds. States are expected to contribute at least 5% of the total cost of the activity.

No section 1110 or 1115 grant will be awarded which provides 100% Federal funding.

Unsolicited Projects

Applicants may also submit proposals for projects for funding in areas not specifically identified in this announcement but which are relevant to the goals and objectives of the AFDC program. These applications will be designated as nonpriority due to limitations on funds, but will also be subject to the panel review process. They will compete with other nonpriority projects, and a limited number may be approved pending available funds.

Grant Awards

Grant awards are expected to be made in September 1983.

Criteria for Review and Evaluation of Solicited and Unsolicited Applications

All applications will be judged primarily on the feasibility of their operational design, including their staffing plan, and the quality of their evaluation plan. Competing applications will be reviewed and evaluated against the following criteria:

1. Are the project's personnel qualified and suitable for the assigned tasks? (20 points)

2. Does the applicant have adequate facilities and resources to plan, conduct, and complete the project? (15 points)

3. Is the project's design and evaluation plan adequate and feasible as indicated by the technical approach, the use of scientifically valid methods and data, and the schedule of tasks and milestones? (30 points)

4. Is the budget detailed with explanations and, if necessary, justifications for the requested amounts? Are the costs reasonable and adequately described? Is the project planned in a cost-effective manner? (20 points)

VOL 48 ISS 92 MY 11 1983 UMI

5. How closely do the project objectives fit HHS priorities and goals? (15 points)

Section 1115 projects which require waivers of section 402 of the Social Security Act must list the required waivers by subsection of the Social Security Act, discuss the implications of granting the waivers and state the effect on recipients participating in the project.

In addition, waiver projects will receive budget reviews in order to assess the potential cost savings of granting the proposed waivers. Special attention must be given to fully stating the budget in accord with the requirements in the applications kit. Proposals with incomplete budgets will be required to provide complete information.

Eligible Applicants

Section 1110 Grants. Any State, public or nonprofit organization or agency may apply for a section 1110 grant under this announcement.

Section 1115 Grants. Under this announcement, only title IV–A State agencies may apply for grants under the section 1115 authority.

The Application Process

1. *Availability of application forms:* Application kits which contain the prescribed application forms and grant guides which provide supplemental descriptive information on the priority projects are available from: Social Security Administration, Division of Contracts and Grants Management, OMBP, Grants Management Branch, First Floor, Dogwood West, 1848 Gwynn Oak Avenue, Baltimore, Maryland 21207. Telephone: (301) 594–0284. Lawrence H. Pullen, Chief, Grants Management Branch.

When requesting an application kit, the applicant should specify the type of project intended to insure receipt of the proper application.

2. *Additional information:* For questions concerning project development, please contact Elizabeth Barnes, Office of Family Assistance, Social Security Administration, 2100 Second Street, SW., Washington, D.C. 20201. Telephone: (202) 245–3327 or (202) 245–3307.

3. *Application submission:* To be considered for section 1110 or section 1115 grants, all applications must be submitted on the standard forms provided by the Division of Contracts and Grants Management. The application shall be executed by an individual authorized to act for the applicant and to assume for the applicant the obligations imposed by the terms and conditions of the grant.

As part of the project title (page 1 of the application form, SSA–96, item 7) the applicant must clearly indicate whether the application submitted is in response to a priority project identified in this announcement and must reference the unique project identifier (SSA–83–01, SSA–83–02, etc.) for which the application is to compete. If the application is not submitted in response to a priority project, indicate "Unsolicited."

4. *Application consideration:* Applications are initially screened for relevance to the interests of SSA.

Irrelevant applications are returned to the applicants. Relevant applications are reviewed and evaluated by a review panel of not less than three experts. Written assessment of each relevant application is made by the review panel.

5. *Application approval:* Following approval by SSA of the applications selected for funding, financial assistance awards will be issued within the limits of available Federal funds. Grant awards are expected to be issued in September 1983. The official award document is the Notice of Grant Award. It provides the amount of funds awarded, the purpose of the award, the terms and conditions of the award, the budget period for which support is contemplated, and the total grantee financial participation.

Closing Dates and Times

The closing date for receipt of applicants in response to this announcement will be July 11, 1983.

Applications may be mailed or hand delivered to: Social Security Administration, Division of Contracts and Grants Managements, OMBP, Grants Management Branch, First Floor, Dogwood West, 1848 Gwynn Oak Avenue, Baltimore, Maryland 21207.

Applications must be received by the Division of Contracts and Grants Management, Grants Management Branch, by the above closing date. Hand delivered applications are accepted during normal working hours of 8:30 a.m. to 5:00 p.m. Monday through Friday. An application will be considered to be received on time if the application is sent by *first class mail* (registered, certified, or express mail) not later than the closing date, as evidenced by a legible U.S. Postal Service postmark.

Private metered postmarks *will not* be considered acceptable as proof of timely mailing. Applications submitted by any other means than *first class mail* through the U.S. Postal Service shall be considered as acceptable only if physically received at the above address before close of business on or before the deadline date. *Applications which are not received on time will not be considered for funding.*

A–95 Notification Process. These programs are not covered by the requirements of OMB Circular A–95 or Executive Order 12372 which takes effect April 30, 1983.

(Catalog of Federal Domestic Assistance Program No. 13.812—Assistance Payments—Research/Demonstrations)

Dated: May 5, 1983.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Burley District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 91–463, Pub. L. 94–579, Pub. L. 95–514, and 43 CFR Part 1780, that the Burley District Advisory Council will meet on the following days for the purposes stated:

Thursday, June 16, 1983; 10:00 a.m. The purpose of this meeting is to tour the Cassia RMP Area.

Friday, June 17, 1983; 9:00 a.m. The purpose of this meeting will be to discuss the Cassia RMP tour and items relating to the Cassia RMP. Committees will be established to review and report on the Cassia RMP Alternative and Environmental Consequences section of the draft document.

Wednesday, July 6, 1983; 9:00 a.m. The purpose of this meeting will be to hear the reports of committees established to review the Cassia RMP.

The meetings will be held in the Conference Room at the Burley District Office, 200 South Oakley Highway, Burley, Idaho 83318. The tour on June 16 will depart from the above address.

The meetings are open to the public. Interested persons may make oral statements to the Council between 3:30 p.m. and 4:00 p.m. on June 17, 1983, or July 6, 1983. Members of the public who wish to attend the tour on June 16 must provide their own transportation and lunch. Anyone wishing to make an oral statement must notify the District Manager at the Burley BLM District Office, 200 South Oakley Highway, Burley, Idaho 83318, by June 14, 1983. Depending on the number of persons wanting to make oral statements, a per-person time limit may be established.

Summary minutes of the meetings will be maintained in the District Office and will be available for public inspection and reproduction during business hours

(7:45 a.m. to 4:30 p.m.) 30 days after the meeting.

Dated: May 5, 1983.

Nick James Cozakos,

District Manager.

[FR Doc. 83-12536 Filed 5-10-83; 8:45 am]

BILLING CODE 4310-84-M

Utah; Realty Action; Sale of Public Lands in Box Elder County

[U–47292, U–47295]

AGENCY: Bureau of Land Management, Salt Lake District, Interior.

ACTION: Notice.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value shown:

	Legal Description	Acreage	Value
U–47292	T.10 N., R.18 W., SLM Sec. 21 SE¼	160.0	16,000
U–47295	T.11 N., R.18 W., SLM Sec. 20 NE¼, E½SE¼	240.0	24,000

The above described land will be sold in order to dispose of lands which because of location and other characteristics are difficult and uneconomical to manage. The sale is consistent with the Bureau's planning system and the public interest will be served by offering these lands for sale.

The sale will be held on Monday, July 11, 1983 at 10:00 A.M. at the BLM offices at 2370 S. 2300 W., Salt Lake City, Utah. Said lands will be sold at public auction subject to a preference right to the following adjoining landowners to meet the high bid:

U–47292—Merlin B. Tanner; Grouse Creek, Utah 84313

U–47295—Scott MacKay, representative for the Brangus Ranch; Rupert, Idaho 83350

Bids may be made by a principal or duly qualified agent. Qualified bidders include: Citizens of the United States 18 years of age or over; a corporation subject to the laws of any state or of the United States; a state, state instrumentality or political subdivision authorized to hold property; and any entities capable of holding lands or interests therein under the laws of the state within which the lands to be conveyed are located. Entities include but are not limited to associations, partnerships, and other legal entities. Sealed bids shall be considered only if received at the place of sale, BLM, 2370 South 2300 West, Salt Lake City, Utah 84119, prior to 9:00 A.M. the day of the sale and for at least the appraised value. Each bid shall be accompained by a certified check, postal money order, bank draft or cashier's check, made payable to the Bureau of Land Management for not less than one-fifth of the amount of bid and shall be enclosed in a sealed envelope clearly marked "Bid for Public Land Sale U–47292 or U–47295, Box Elder County." If two or more bids for the same amount are received, the apparent high bidder shall be determined by drawing pursuant to 43 CFR 2711.3–1(c). The sealed bids shall be opened and publicly declared at the beginning of the sale. Oral bids will then be entertained. The oral bids must be made in increments of $100 or more. A Maximum of two minutes will be allowed between oral bids for the submission of a higher bid. When the bidding has been completed, the individual holding a preference right on that tract will be given an opportunity to match the final high bid. If that individual agrees to match the final high bid, he then becomes the apparent high bidder on that tract. If he declines to match the final high bid, the person making the final high bid will be declared the apparent high bidder on that tract.

The person declared to have entered the apparent high qualifying oral bid shall submit payment by cash, personal check, bank draft, money order of any combination; thereof, any additional amount necessary to bring the amount tendered with their sealed bids up to one-fifth of the amount of the oral bid, immediately following the close of the sale. The acceptance or rejection of any offer to purchase shall be in writing no later than 30 days after receipt of such offer.

The terms and conditions applicable to the sale are:

(1) The apparent high bidder shall submit the remainder of the full bid price within 30 days from date of sale. Failure to submit the full bid price prior to, but not including the 30th day following the sale, shall result in cancellation of the sale of the above discribed lands and the deposit shall be forfeited.

(2) The authorized officer may reject the highest qualified bid and release the bidder from his obligation and withdraw the tract for sale, if he determines that consummation of the sale would be inconsistent with the provisions of any existing law or collusive or other activities have hindered or restrained free and open bidding or consummation of the sale would encourage or promote speculation in public lands

(3) The patent will contain a reservation for ditches and canals and be subject to all valid existing rights.

(4) All minerals will be reserved to the United States on parcel U–47295. (The mineral estate on U47292 is not held by the United States.)

(5) The United States does not, by the terms of this sale, guarantee to any party Physical or legal access to the tract of this sale, guarantee to any party physical or legal acess to the tract of land being sold. Tract U–47295 is completely surrounded by private land and is without physical or legal access.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, BLM, 2370 South 2300 West, Salt Lake City, Utah 84119. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of Interior.

Comprising 65,637.91 acres, more or less.

In exchange for this Federal mineral estate, the United States has selected 65,822.02 acres of State-owned minerals also within Mohave County, Arizona.

The purpose of the exchange is to unite State and Federal split estates, thereby eliminating surface management difficulties and providing for the consolidation of mineral ownerships.

The purpose of this Notice of Realty Action is two-fold. First, this action will provide a response period of forty-five (45) days during which Public comments will be accepted. Secondly, this action, as provided in 43 CFR 2201.1 (b), shall segregate the Federal minerals, as described in this Notice, to the extent that they will not be subject to appropriation under the mining laws, subject to any prior valid rights. The segregative effect shall terminate either upon publication in the **Federal Register** of a termination of the segregation or two years from the date of this publication, whichever occurs first. This action is necessary to avoid the occurrence of nuisance mining claims that could encumber the Federal minerals while the preparation of an environmental assessment and mineral report are ongoing.

Upon completion of the environmental assessment, a final Notice of Realty Action will be published. The Notice will provide a final description of the Federal and State minerals to be transferred, including reservations.

SUPPLEMENTARY INFORMATION: Detailed information concerning the exchange, including a listing of the selected State-owned minerals, may be obtained from the Area Manager, Kingman Resource Area, 2475 Beverly Avenue, Kingman, Arizona 86401.

For a period of forty-five (45) days, interested parties may submit comments to the District Manager, Phoenix District Office, 2929 West Clarendon Avenue, Phoenix, Arizona 85017.

Dated: May 3, 1983.

W. K. Barker,

District Manager.

BILLING CODE 4310-84-M

[OR 10152]

Oregon; Cancellation of Realty Action

1. By Notice of Realty which was published in the **Federal Register** on August 31, 1982 (47 FR 38428), the following described land was classified and determined suitable for sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869, et seq):

Willamette Meridian

T. 4 N., R. 28 E.,
Sec. 14, that portion of the S½SE¼SW¼ lying north of the centerline of Railroad Right-of-Way Oregon 01781, now assigned to the Union Pacific Railroad Company.

The area described contains approximately 7.47 acres in Umatilla County, Oregon.

2. The above-described land has been eliminated from proposed sale under the Recreation and Public Purposes Act; therefore, the Notice of Realty Action identified in paragraph 1, is hereby cancelled.

3. The classification for sale under the Recreation and Public Purposes Act, which was made by classification decision of March 6, 1973, and affirmed by the Notice of Realty Action identified in paragraph 1, is hereby terminated.

4. At 9:30 a.m., on June 17, 1983, the land will be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All valid applications received at or prior to 9:30 a.m., on June 17, 1983, will be considered as simultaneously filed at that time. Those received thereafter will be considered in the order of filing.

5. At 9:30 a.m., on June 17, 1983, the land will be open to location under the United States mining laws. Appropriation of lands under the general-mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. Sec. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

6. The land has been and remains open to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the District Manager, Bureau of Land Management, P.O. Box 700, Vale, Oregon 97918.

Dated: May 2, 1983.

Pearl M. Parker,

District Manager, Vale District Office.

BILLING CODE 4310-84-M

[AA-14015]

Alaska Native Claims Selection

In accordance with departmental regulation 43 CFR 2650. 7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976) (ANCSA)), will be issued to Sealaska Corporation for approximately 1,120 acres. The lands involved are within T. 77 S., R. 85 E., Copper River Meridian.

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the *Southeast Alaska Empire* (Juneau) upon issuance of the decison. For information on how to obtain copies, contact Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal Government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in Title 43 CODE OF FEDERAL REGULATIONS (CFR), Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until June 10, 1983. to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal is: Sealaska Corporation, One Sealaska Paza, Suite 400, Juneau, Alaska 99801.

Ruth Stockie,

Chief, Sealaska Section.

BILLING CODE 4310-55-M

Receipt of Application for Permit

Notice is hereby given that an applicant has applied in due form for a permit to import polar bear blood samples as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the regulations governing the taking and importing of Marine Mammals (50 CFR Part 18).

1. Applicant:
   a. Name: Dr. Kerry Foresman
   b. Address: Dept. of Zoology; Univ. of Rhode Island, Kingston, R.I. 02881
2. Type of permit: Marine Mammal Import
3. Name and number of animals: Polar bear (*Ursus maritimus*) 100 blood samples/yr.
4. Type of Activity: Import blood samples for scientific research
5. Location of Activity: Canada
6. Period of Activity: 3 years

The purpose of this application is to allow the import of blood samples taken from male and female polar bears to analyze blood protein levels in association with pregnancy in an attempt to develop a pregnancy testing procedure. This work will be conducted in conjunction with the Canadian Wildlife Service field project under the direction of Dr. Ian Sterling.

Concurrent with the publication of this notice in the **Federal Register** the Federal Wildlife Permit Office is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

The application has been assigned file number PRT 2-10362. Written data or views, requests for copies of the complete application, or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service (WPO), P.O. Box 3654, Arlington, VA 22203, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements contained in this notice are summaries of those of the applicant and do not necessarily reflect the views of the United States Fish and Wildlife Service.

Documents submitted in connection with the above application are available for review during normal business hours in Room 605, 1000 North Glebe Road, Arlington, Virginia.

Dated: May 5, 1983.

Larry LaRochelle,

Acting Chief, Branch of Permits, Federal Wildlife Permit Office.

Availability of Plan of Operations and Environmental Analysis for the Purpose of Conducting a Seismic Survey, ARCO Exploration Co., Big Thicket National Preserve; Texas

Notice is hereby given in accordance with Part 9 § 9.52(b), of Title 36 of the Code of Federal Regulations that the National Park Service has received from ARCO Exploration company a Plan of Operations for the purpose of conducting a seismic survey in the Neches Botton/Jack Gore Baygall Unit of Big Thicket National Preserve, Texas.

The Plan of Operations and Environmental Analysis are available for public review and comment for a period of 30 days from the publication date of this notice in the Office of the Superintendent, Big Thicket National Preserve, 8185 Eastex Freeway, Beaumont, Texas; the Jefferson County Courthouse, in Beaumont, Texas; and the Southwest Regional Office, National Park Service, 1100 Old Santa Fe Trail, Santa Fe, New Mexico. Copies of the documents are available from the Southwest Regional Office, National Park Service, Post Office Box 728, Santa Fe, New Mexico 87501, and will be sent upon request.

Dated: May 2, 1983.

Robert Kerr,

Regional Director, Southwest Region.

BILLING CODE 4310-70-M

Availability of Decision Statement for the Development Concept for the Upper Frijoles and Back Gate Areas; Bandelier National Monument, New Mexico

Pursuant to the national Environmental Policy Act of 1969, Title 40 of the Code of Federal Regulations, and part 516 of the Departmental Manual, the National Park Sevice has prepared a Decision Statement for the Development concept Plan for the Upper Frijoles and Back Gate areas of Bandelier National Monument, Santa Fe, Sandoval and los Alamos Counties, New Mexico.

A Draft Development Concept for the Upper Frijoles and Back Gate areas of Bandelier National Monument was prepared and distributed in June and July 1982. The Draft Development Concept Plan bridges the gap between Final Master Plan concepts and comprehensive design for facilities to fulfill those concepts. The proposals contained in the Development concept Plan conform to the general strategies of the master plan, and the impacts associated with their implementation are adequately described in the final Environmental Statement (FES) which accompanied the master plan. Replacing random use with controlled use and revegetating the burn area will reduce negative impacts and improve the aesthetics of the site. Impacts of developments at Upper Frijoles are described as minor and localized in the FES. Since the Development concept Plan proposes less development than was considered in the FES, impacts will be minimal. Therefore, the National Park Service has determined that actions proposed in the Development concept Plan are in compliance with the National Environmental Policy Act and prepared a Decision Statement.

The Decision Statement for the Draft Development concept Plan for the Upper Frijoles and Back Gate areas summarizes the decisions made for limited development and improvement of facilites at Upper Frijoles and Back Gate in Bandelier National Monument. These decisions were made following assessment of alternative strategies, public input, and discussion and consultation with other agencies.

The decision Statement for the Draft Development concept Plan for the Upper Frijoles and Back Gate areas is available in the Office of the Superintendent, Bandelier National Monument, Los Alamos, New mexico 87544; and the Southwest Regional Office, National Park Service, 1100 Old Santa Fe Trail, Santa Fe, New Mexico 87501, Copies of the document may be obtained, upon request.

The national Park Service will proceed with development of a Final Development Concept Plan. Proposals contained in the plan will be implemented as funds are available.

Dated: May 2, 1983.

Robert I. Kerr,

Regional Director, Southwest Region.

BILLING CODE 4310-70-M

Office of the Secretary

Utah; Amendment of Wilderness Inventory Decisions

AGENCY: Office of the Secretary, Interior.

ACTION: Amendment of Wilderness Inventory Decisions.

SUMMARY: This notice designates 4 areas totaling 6,677 acres for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976. This notice also amends previous wilderness inventory decisions by the Bureau of Land Management for lands in Utah, deleting parts of 4 wilderness study areas. The total area deleted from wilderness study area status under Scetion 603 of the Act is 805 acres.

EFFECTIVE DATE: May 11, 1983.

FOR FURTHER INFORMATION CONTACT: Utah State Director, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111, telephone (801) 524-4257.

Amendment of Wilderness Inventory Decisions

This notice completes the action necessary with respect to Bureau of Land Management wilderness study areas in Utah to bring the Bureau's wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the **Federal Register** on December 10, 1982 (47 FR 58372).

Section 1. Consideration for Protective Management

The 4 areas listed in Table 1, totaling 6,677 acres, have been designated for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976. These areas were formerly identified as wilderness study areas under Section 603 of the Act. They were deleted from that category on December 30, 1982.

Section 2. Split-Estate Lands

A. "Split-estate" lands are lands where the Federal Government owns the surface but where the subsurface mineral estate is nonfederally owned. Split-estate lands were improperly identified for wilderness study under Section 603 of the Federal Land Policy and Management Act of 1976; that error is corrected by this decision.

B. In the following wilderness study area, 2 tracts of split estate are deleted from wilderness study under Section 603 of the Federal Land Policy and Management Act of 1976, effective upon publication of this decision in the **Federal Register.** Only the indicated acreage of split-estate lands is deleted from wilderness study; the remainder of the wilderness study area remains under wilderness study, and the boundary of the wilderness study area has not been changed. The deletions do not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics.

Wilderness Study Area Name: Desolation Canyon
Number: UT-060-068A
Old Wilderness Study Area Acreage: 248,130
Acres Split Estate Deleted: 80
Revised Wilderness Study Area Acreage: 248,0509
County: Emery

C. The boundaries and acreages of the wilderness study areas listed in Table 2 are modified, effective upon publication of this decision in the **Federal Register,** to delete tracts of split estate located on the periphery of wilderness study areas. Only the inidicated acreage is deleted from wilderness study. The remainder of the wilderness study area remains under wilderness study, and the boundary change does not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics in the remaining wilderness study area.

Section 3. Management of Deleted Lands

All lands in Utah deleted from wilderness study status by this decicion in Table 2, in section 2(B) above, and by the decision issued on December 30, 1982, (47 FR 58372) and not designated for further wilderness consideration in Table 1 of this notice are hereby released from management restrictions to protect their wilderness suitability. Among the areas released are 9 areas previously listed by the Bureau of Land Management Utah State Director for wilderness consideration under sectio 202 ($7 FR 21623, May 19, 1982); these areas have been found not to warrant further wilderness consideration. The released lands, totaling 19,315 acres, will be managed for the full range of multiple uses other than wilderness and in conformance with existing land use plans and regulations for those areas.

This is a final decision of the Department of the Interior and is not subject to appear under 443 CFR Part 4.

Garrey E. Carruthers,

Assistant Secretary.

May 4, 1983.

TABLE 1.—AREAS BEING CONSIDERED FOR PROTECTIVE MANAGEMENT

Area Name	Number	Acreage	County	Category
Orderville Canyon	UT-040-145	1,750	Kane	Wilderness.[1]
Deep Creek	UT-040-146	3,320	Washington	Do.
North Fork Virgin River	UT-040-150	1,040	Kane	Do.
LaVerkin Creek Canyon	UT-040-153	567	Washington	Do.
Total (4 areas)		6,677		

[1] In this table "wilderness" denotes wilderness consideration under Section 202 of the Federal Land Policy and Management Act of 1976.

BILLING CODE 4310-84-M

INTERNATIONAL TRADE COMMISSION

[Investigations Nos. 731-TA-134 and 135 (Preliminary)]

Color Television Receivers From the Republic of Korea and Taiwan

AGENCY: International Trade Commission.

ACTION: Institution of preliminary antidumping investigations and scheduling of a conference to be held in connection with the investigations.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of preliminary antidumping investigations under section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from the Republic of Korea and Taiwan of color television receivers, complete or incomplete, provided for in items 685.11 and 685.14 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value.

EFFECTIVE DATE: May 2, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Eninger, Office of Investigations, U.S. International Trade Commission, 701 E St., NW., Washington, D.C. 20436, telephone 202-523-0312.

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted in response to petitions filed on May 2, 1983, by counsel on behalf of the Industrial Union Department, AFL-CIO; the International Brotherhood of Electrical Workers; the International Union of Electrical, Radio and Machine Workers; the Independent Radionic Workers of America; and the Committee to Preserve American Color Television. The Commission must make its determination in these investigations within 45 days after the date of the filing of the petition, or by June 16, 1983 (19 CFR 207.17).

Participation.—Persons wishing to participate in these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided for in section 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than seven (7) days after the publication of this notice in the **Federal Register.** Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of documents.—The Secretary will compile a service list from the entries of appearance filed in these investigations. Any party submitting a document in connection with the investigations shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of each such document on all other parties in the investigations. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 201.16(b), as amended by 47 FR 33682, Aug. 4. 1982).

In addition to the foregoing, each document filed with the Commission in the course of these investigations must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certificate of service will not be accepted by the Secretary.

Written submissions.—Any person may submit to the Commission on or before May 31, 1983, a written statement of information pertinent to the subject matter of these investigations (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6). All written submissions, except for confidential business data, will be available for public inspection.

Conference.—The Director of Operations of the Commission has scheduled a conference in connection with these investigations for 10 a.m. on May 26, 1983, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. Robert Eninger (202-523-0312), not later than May 24, 1983, to arrange for their appearance. Parties in support of the imposition of antidumping duties in these investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public inspection.—A copy of the petitions and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and B (19 CFR Part 207, as amended by 47 FR 33682, Aug. 4, 1982), and Part 201, sbuparts A thorugh E (19 CFR Part 201. as amended by 47 FR 33682, Aug. 4, 1982). Further information concerning the conduct of the conference will be provided by Mr. Eninger.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

Issued: May 5, 1983.

Kenneth F. Mason,
Secretary.

[332-162]

Foreign Industrial Targeting and Its Effects on U.S. Industries

AGENCY: International Trade Commission.

ACTION: In accordance with the provisions of section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b), the Commission has instituted, on its own motion at the request of the Subcommittee on Trade of the House Committee on Ways and Means, investigation No. 332-162 for the purpose of obtaining information on foreign industrial targeting so that it may advise the Committee on Ways and Means on the implications of these practices for U.S. industries.

EFFECTIVE DATE: May 3, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. John Suomela, Director, Office of Economics (202) 523-3771.

SUPPLEMENTARY INFORMATION: On March 25, 1982, the Subcommittee on Trade of the House Committee on Ways and Means requested the U.S. International Trade Commission to analyze the issue of foreign industrial targeting and its effects on the competitiveness of U.S. industries.

The Committee described industrial targeting as a "collection of concerted government policies to identify and promote particular industries for success in world markets. These policies are typified by a high degree of government involvement in planning, financing, directing and protecting certain industrial activities. They usually involve intra-company activities which could constitute violations of antitrust laws without government sponsorship and guidance."

The Committee listed the following specific policies or practices as having been frequently mentioned as elements of foreign industrial targeting: (1) Government financial suppport shared by a group of companies; (2) Government-sponsored or government-conducted research and development projects to assist a selected group of companies; (3) industry rationalization programs; (4) suspension of antitrust rules on industrial policy grounds; (5) manipulation of capital markets by government or government-backed entities to benefit certain sectors; (6) administrative guidance to divide markets or allocate products among competing domestic companies; (7) government control of technology transfer; (8) government restrictions on foreign investment in order to limit and control competition within certain sectors; (9) government procurement policies designed to assure demand for certain products; and (10) import protection policies.

The Commission has decided to divide this study into three separate phases. The first phase will consider Japanese industrial targeting. The report on this phase will be submitted to the Subcommittee on Trade no later, than September 30, 1983. Future phases will consider industrial targeting by the European Community and by other major U.S. trading partners.

The first phase will attempt to answer the following questions about Japanese industrial targeting: (1) Which industries has the Japanese government targeted? (2) What specific practices has the Japanese government used to further the international competitiveness of these industries? (3) What is the relationship between these practices and international trade agreements? (4) What is the relationship between these practices and U.S. trade law? (5) What have been the effects of these practices on the competitiveness of the targeted Japanese industries and their U.S. competitors?

Public Hearing

A public hearing in connection with the first phase of this investigation will be held in the Commission Hearing Room, 701 E Street NW., Washington, D.C., 20436, beginning at 10 a.m. on June 15, 1983, to be continued on June 16 if required. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW., Washington, D.C. 20436, no later than noon, June 8, 1983.

Written Submissions

In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit written statements concerning the investigation by June 8, 1983. Commercial or financial information which a submitter desires the Commissioin to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of § 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be ensured of consideration by the Commission, written statements should be submitted at the earliest possible date, but no later than June 30. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: May 4, 1983.

Kenneth R. Mason,
Secretary.

[Investigations Nos. 701-TA-201 and 731-TA-133 (Preliminary)]

Forged Undercarriage Components From Italy

AGENCY: International Trade Commission.

ACTION: Institution of preliminary countervailing duty and antidumping investigations and scheduling of a conference to be held in connection with the investigations.

SUMMARY: The United States International Trade Commission hereby gives notice of the institution of a preliminary countervailing duty investigation and a preliminary antidumping investigation under sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)) to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Italy of forged components for the undercarriage of crawler-type tractors, provided for in items 664.08, 692.34, or 692.35 of the Tariff Schedules of the United States, upon which bounties or grants are alleged to be paid and which are alleged to be sold in the United States at less than fair value.

EFFECTIVE DATE: April 29, 1983.

FOR FURTHER INFORMATION CONTACT: Ms. Mariam A. Bishop, Office of Investigations, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, telephone 202-523-0291.

SUPPLEMENTARY INFORMATION:

Background. These investigations are being instituted in response to a petition filed on April 29, 1983, on behalf of Jernberg Forgings Co., Lindell Drop Forge Co., Portec, Inc., Presrite Corp., Presrite of Jefferson, Inc., Walco Metal Forming Group, and Walker Forge, Inc., U.S. producers of forged undercarriage components. The Commission must make its determination in these investigations within 45 days after the date of the filing of the petition, or by June 13, 1983 (19 CFR 207.17).

Participation.—Persons wishing to participate in these investigations as parties must file an entry of appearance

VOL 48 ISS 92 MY 11 1983 UMI

with the Secretary to the Commission, as provided for in § 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than seven (7) days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the notice.

Service of documents.—The Secretary will compile a service list from the entries of appearance filed in the investigations. Any party submitting a document in connection with the investigations shall, in addition to complying with § 201.8 of the Commission's rules (19 CFR 201.8), serve a copy of the nonconfidential version of each such document on all other parties to the investigations. Such service shall conform with the requirements set forth in § 201.16(b) of the rules (19 CFR 201.16(b)), as amended by 47 FR 33682, Aug. 4, 1982).

In addition to the foregoing, each document filed with the Commission in the course of these investigations must include a certificate of service setting forth the manner and date of such service. This certificate will be deemed proof of service of the document. Documents not accompanied by a certification of service will not be accepted by the Secretary.

Written submissions.—Any person may submit to the Commission on or before May 26, 1983, a written statement of information pertinent to the subject matter of these investigations (19 CFR 207.15). A signed original and fourteen (14) copies of such statements must be submitted (19 CFR 201.8).

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately, and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submissions must conform with the requirements of § 201.6 of the Commission's rules (19 CFR 201.6). All written submissions, except for confidential business data, will be available for public inspection.

Conference.—The Director of Operations of the Commission has scheduled a conference in connection with these investigation for 9:30 a.m., on May 24, 1983, at the U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Ms. Miriam A. Bishop (202–523–0291), not later than May 19, 1983, to arrange for their appearance. Parties in support of the imposition of countervailing or antidumping duties in these investigations and parties in opposition to the imposition of such duties will each be collectively allocated one hour within which to make an oral presentation at the conference.

Public inspection.—A copy of the petition and all written submissions, except for confidential business data, will be available for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street, NW., Washington, D.C.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and B (19 CFR 207, as amended by 47 FR 33682, Aug. 4, 1982), and part 201, subparts A through E (19 CFR part 201, as amended by 47 FR 33682, Aug. 4, 1982). Further information concerning the conduct of the conference will be provided by Ms. Bishop.

This notice is published pursuant to § 207.12 of the Commission's rules (19 CFR 207.12).

BILLING CODE 7020–02–M

[Investigation No. 337–TA–132]

Hand-Operated, Gas-Operated, Welding, Cutting, and Heating Equipment and Component Parts Thereof; Commission Decision Not To Review Initial Determination

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined not to review the presiding officer's initial determination (Order No. 30) terminating the above-captioned investigation with respect to a claim of alleged copyright infringement.

AUTHORITY: The authority for the Commission's disposition of this matter is contained in sections 335 and 337 of the Tariff Act of 1930 (19 U.S.C. 1335, 1337) and in §§ 210.53(c) and 210.53(h) of the Commission's Rules of Practice and Procedure (47 FR 25134, June 10, 1982; to be codified at 19 CFR 210.53(c) and (h).

SUPPLEMENTARY INFORMATION: On March 25, 1983, complainant Victor Equipment Co. moved (Motion No. 132–33) to terminate the investigation with respect to a claim of alleged copyright infringement. The motion was unopposed. On April 6, 1983, the presiding officer issued an initial determination granting Motion No. 132–33. Under § 210.54(a) of the Commission's rules, the deadline for filing petitions for review of the initial determination expired on April 18, 1983. No petitions for review were filed.

Copies of the presiding officer's initial determination, and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–0161.

FOR FURTHER INFORMATION CONTACT: Warren H. Maruyama, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0359.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–132]

Hand Operated, Gas-Operated, Welding, Cutting, and Heating Equipment and Component Parts Thereof; Extension of Time for Commission Review of Initial Determination Regarding Temporary Relief

AGENCY: International Trade Commission.

ACTION: Extension of time for Commission review of initial determination denying temporary relief in the above-referenced investigation.

SUPPLEMENTARY INFORMATION: On February 7, 1983, the presiding officer issued an initial determination denying complainant Victor Equipment Co.'s request for temporary relief in the above-referenced investigation. On February 18, 1983, complainant Victor Equipment Co. and the Commission investigative attorney filed petitions for review of the initial determination. The Commission granted the petitions and ordered review on March 9, 1983 (48 FR 11189 (March 16, 1983)).

During the Commission's review of the initial determination regarding temporary relief, complainant moved to terminate the investigation as to respondent I Ling Industry Co. on the basis of a settlement agreement (Motion No. 132–38), and to terminate the investigation as to respondent Van Dreser & Hawkins, Co. without a determination of violation (Motion No. 132–39). If granted, these motions would terminate the investigation as to all of the remaining respondents.

Pursuant to § 201.14(b) of the Commission's Rules of Practice and Procedure, the Commission has extended the time for review of the initial determination regarding temporary relief until thirty (30) days after final Commission action on Motions Nos. 132–38 and 132–39 pursuant to §§ 210.53, 210.54 or 210.56 of the Commission's rules. See 47 FR 25134 (June 10, 1982), 48 FR 9242 (March 4, 1983) (to be codified at 19 CFR 210.53, 210.54, and 210.56).

Copies of the presiding officer's initial determination, and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours 8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–147]

Papermaking Machine Forming Sections for the Continuous Production of Paper and Components Thereof; Investigation

AGENCY: International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on April 5, 1983, under section 337 of the Traffic Act of 1930 (19 U.S.C. 1337), on behalf of beloit Corporation, 1 St. Lawrence Avenue, Beloit, Wisconsin 53511. The complaint alleges unfair methods of competition and unfair acts in the importation of certain papermaking machine forming sections for the continuous production of paper and components thereof into the United States, or in their sale, by reason of alleged (1) direct infringement, (2) contributory infringement, and (3) induced infringement of claims 1, 2, 3, 4, 7, 8, 10 ,11, and 12 of U.S. Letters Patent 3,726,758. The complaint further alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

The complainant requests the Commission to institute an investigation and, after a full investigation, to issue a permanent exclusion order.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930 and in § 210.12 of the Commission's Rules of Practice and Procedure (19 CFR 210.12).

Scope of Investigation

Having considered the compliant, the U.S. International Trade Commission, on April 27, 1983, *ordered that*—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, an investigation be instituted to determine whether there is a violation of subsection (a) of section 337 in the unlawful importation of certain papermaking machine forming sections for the continuous production of paper and components thereof, into the United States, or in their sale, by reason of alleged (1) direct infringement (2) contributory infringement, and (3) induced infringement of the claims 1, 2, 3, 4, 7, 8, 10, 11 and 12 of the U.S. Letters Patent 3,726,758, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Beloit Corporation, 1 St. Lawrence Avenue, Beloit, Wisconsin 53511.

(b) The respondents are the following companies, alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Valmet Oy, Pub. L. 155, SF–00131, Helsinki 13, Finland

TVW Paper Machines, Inc., 180 Interstate North, Atlanta, Georgia 30339

(c) Robert Budoff, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street NW., Room 124, Washington, D.C. 20436, shall be the Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure (19 CFR 210.21). Pursuant to §§ 201.16(d) and 210.21(a) of the rules, such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting a response will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the presiding officer and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings.

The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Room 156, Washington, D.C. 20436, telephone 202–523–0471.

FOR FURTHER INFORMATION CONTACT: Robert S. Budoff, Esq., Unfair Import Investigations Division, U.S. International Trade Commission, telephone 202–523–0113

By order of the Commission.

Issued: May 2, 1983.

Kenneth R. Mason,

Secretary.

[Investigations Nos. 731–TA–127, 128, and 129 (Preliminary)]

Thin Sheet Glass From Switzerland, Belgium, and the Federal Republic of Germany

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is no reasonable indication that an industry in

[1] The record is defined in § 207.2(i) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(i)).

1983
UMI

the United States is materially injured, or is threatened with material injury, or that the establishment of an industry in the United States is materially retarded, by reason of imports from Switzerland, Belgium, and the Federal Republic of Germany of thin sheet glass, provided for in items 542.11 and 542.13 of the Tariff Schedules of the United States, which are alleged to be sold in the United States at less than fair value (LTFV).[1]

Background

On March 16, 1983, counsel for Jeannette Sheet Glass Corp. filed a petition with the Commission and the Department of Commerce alleging that imports of thin sheet glass from Switzerland, Belgium, and the Federal Republic of Germany are being sold in the United States at LTFV, and that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise. Accordingly, effective March 16, 1983, the Commission instituted preliminary antidumping investigations under section 733(a) of the Act (19 U.S.C. 1673b(a)).

Notice of the institution of the Commission's investigations and of a conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on March 30, 1983 (48 FR 13280). The conference was held in Washington, D.C. on April 11, 1983, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigation to the Secretary of Commerce on May 2, 1983. A public version of the Commission's report, Thin Sheet Glass from Switzerland, Belgium, and The Federal Republic of Germany (investigations Nos. 731–TA–127, 128 and 129 (Preliminary), USITC Publication 1376, 1983) contains the views of the Commission and information developed during the investigation.

By Order of the Commission.

[1] The Commission made separate determinations concerning regular-quality and high-quality thin sheet glass in these investigations. Commissioner Stern dissented with respect to the regular-quality glass in all three cases, finding that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of that product which are alleged to be sold in the United States at LTFV.

Issued: May 2, 1983.

Kenneth R. Mason,

Secretary.

U.S. Trade-Related Employment

AGENCY: International Trade Commission.

ACTION: The Commission will hold a public hearing for the purpose of affording all interested parties an opportunity to present views on the effects of exports and imports on U.S. employment. The initial notice of the investigation indicating the scope of the study, contact persons, and other related information was published in the **Federal Register** of March 2, 1983 (48 FR 8677).

Public Hearing: A public hearing in connection with the investigation will be held in the Commission Hearing Room, 701 E Street, NW., Washington, D.C. 20436, beginning at 10 a.m., e.d.t., on June 30, 1983, to be continued on July 1, 1983, if required. All persons shall have the right to appear by counsel or in person, to present information, and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street, NW., Washington, D.C. 20436, not later than noon, June 23, 1983.

Written Submissions: In lieu of or in addition to appearances at the public hearing, interested persons are invited to submit written statements concerning the investigation. Commercial or financial information which a submitter desires the Commission to treat as confidential must be submitted on separate sheets of paper, each clearly marked "Confidential Business Information" at the top. All submissions requesting confidential treatment must conform with the requirements of section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All written submissions, except for confidential business information, will be made available for inspection by interested persons. To be ensured of consideration by the Commission, written statements should be submitted at the earliest practicable date, but no later than June 23, 1983. All submissions should be addressed to the Secretary at the Commission's office in Washington, D.C.

By order of the Commission.

Issued: May 2, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance Applications; Decision Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Please direct status inquiries about the following to Team 2, (202) 275–7030.

Volume No. OP 2–FC–209

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

MC–FC–81255. By decision of May 4, 1983, issued under 49 U.S.C. 10926 and

the transfer rules at 49 CFR Part 1181, Review Board No. 2 approved the transfer to EAGLE TRANSPORT, INC., of Sioux City, IA, of Certificate No. MC–136803 and Sub-Nos. 2, 3, 4, 8, 10, and 12, issued January 17, 1978, February 25, 1976, February 25, 1976, November 7, 1980, October 2, 1979, and April 8, 1981, respectively, to SIOUX CITY BULK FEED SERVICE, INC., of Souix City, IA, authorizing the transportation, as a common carrier, over irregular routes of feed, feed ingredients, pesticides, animal health aid products, poultry feed supplements, rodenticides (except petroleum products, in bulk, in tank vehicles), soybean meal, soybean mill run and soybean hulls, and sand, between specified points in IA, WY, ND, MN, SD, NE, IL, MO, WI, IL, and KS. Representive: Bradford E. Kistler, P.O. Box 82028, Lincoln, NE 68501, (402) 475–6761.

MC–FC–81433. By the decision of May 4, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to Pacific Art Services Limited, of Toronto, Ontario, Canada, of all of the authority issued to Deakin Fine Art Transport Limited, of Toronto, Ontario, Canada, in MC–144102 and Sub No. 1, issued March 15, 1979 and January 7, 1983, respectively, authorizing transportation of (1) fine art objects, paintings, sculpture and original works of art (except in armored vehicles), between ports of entry on the International Boundary line between the United States and Canada in New York and Michigan, on the one hand, and, on the other, points in Illinois, Maryland, Massachusetts, Michigan, New York, Ohio, Pennsylvania, and the District of Columbia, and (2) fine art objects and original works of art, between points in Connecticut, New Jersey, and New York., An application for temporary authority has been filed. Representative: Robert D. Gunderman, Can-Am Bldg., 101 Niagra St., Buffalo, NY 14202.

Pleased direct Status inquiries about the following to team 4 at (202) 275–7669.

BILLING CODE 7035-01M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982 at 47 FR 49583, which redesignated the regulations at 49 cFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rule of Practice. See 49 CFR Part 1160, subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted

VOL
48
ISS
92
MY
11
1983
UMI

problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. One this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.— All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries about the following to Team 1, (202) 275–7992.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

BILLING CODE 7035–01–M

Motor Carriers; Notice of Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of proposed exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handling Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982)

DATE: Comments must be received within 30 days after the date of publication in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Warren C. Wood (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the offices of the Interstate Commerce Commission during usual business hours.

Decided: April 25, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Volume No. OP5–F 212

Westside Transport, Inc.—Purchase Exemption—Spector Red Ball, Inc. (Debtor-in-Possession)

MC–F–15115, Westside Transport, Inc. (Westside) (MC–145661) and Spector Red Ball, Inc. (Spector) (MC–2229), seek an exemption from the requirement under section 11343 of prior regulatory approval for the purchase by Westside of a portion of Spector's operating rights authorizing the transportation of general commodities (with exceptions), over regular routes, between numerous points in California. Spector has been issued restriction removal authority in certificate No. MC–2229 (Sub-No. 280)X (served March 23, 1983), pertaining to the certificate involved here (MC–2229 (Sub-No. 205)). In addition, temporary authority is sought by Westside to lease a portion of Spector's operating rights pending disposition of the petition for exemption.

Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423; (2) Petitioner's representative: Marvin Handler, 100 Pine Street, Suite 2550, San Francisco, CA 94111; and (3) J. Raymond Chesney, P.O. Box 47407, Dallas, TX 75247. Comments should refer to No. MC–F–15115.

[FR Doc. 83–12596 Filed 5–10–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carrier Temporary Authority Application

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3 These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–260

The following applications were filed in Region 3. Send protests to: ICC, Regional Authority Center, Room 300, 1776 Peachtree Street, N.E., Atlanta, GA 30309.

MC 31389(Sub-3–23TA), filed April 29, 1983. Applicant: McLEAN TRUCKING COMPANY, 1920 West First Street, Winston-Salem, NC 27154. Representative: Daniel R. Simmons (same as applicant). *Contract Carrier: Irregular: General commodities (except Classes A and B explosives, household goods as defined by the Commission, and commodities in bulk)*, between Huntsville, AL; Mesa, Phoenix, Scottsdale and Tempe, AZ; Cupertino, Novato and Santa Clara, CA; Bethel, CT; Fort Lauderdale, FL; Schaumburg and Franklin Park, IL; Mount Pleasant, IA; Mansfield, MA; Joplin, MO; Albuquerque, NM; Arcade, NY; and Austin, Ft. Worth and Sequin, TX, on the one hand, and, on the other, points in the U.S., under continuing contract or contracts with Motorola, Inc., of Schaumburg, IL. Supporting shipper: Motorola, Inc., 1301 E. Algonquin, Schaumburg, IL 60195.

BILLING CODE 7035-01-M

[Docket No. AB-6 (Sub-140)]

Rail Carriers; Burlington Northern Railroad Company—Abandonment—In Otter Tail County, MN; Notice of Findings

The Commission has found that the public convenience and necessity permit the Burlington Northern Railroad Company to abandon a 16.05-mile line of railroad between milepost 47.47 near Hoot Lake, MN, and milepost 31.42 near Battle Lake, MN. A certificate will be issued authorizing this abandonment unless within 15 days after this publication the Commission also finds That: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this notice. Any offer previously made must be resubmitted within this 10 day period.

Information and procedures regarding financial assistance for continued rail services are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

Agatha L. Mergenovich,

Secretary.

[Docket No. AB-101 (Sub-5)]

Rail Carriers; Duluth, Missabe and Iron Range Railway Company—Abandonment—in Lake County, MN; Notice of Findings

The Commission has issued a certificate authorizing Duluth, Missabe and Iron Range Railway Company to abandon its 29.86-mile rail line near Jordan (milepost 12.14) and at Sawbill (milepost 42.00) in Lake County, MN. The abandonment certificate will become effective 30 days after this publication unless the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis D. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC 20423, no later than 10 days from publication of this Notice. Any offers previously made must be remade within this 10-day period.

Information and procedures regarding financial assistance for continued rail services are contained in 49 U.S.C. 10905 and 49 CFR 1152.27.

[Finance Docket No. 30168]

Rail Carriers; Pioneer Valley Railroad Co.—Exemption Operation Easthampton, MA

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Exemption.

SUMMARY: The Interstate Commerce Commission exempts the Pioneer Valley Railroad Company from the prior approval requirements of 49 U.S.C. 10901 for its operation of 1.58 miles of railroad in Easthampton, MA.

DATES: This exemption is effective on May 11, 1983. Petitions to reopen must be filed by May 31, 1983.

ADDRESSES: Send pleadings referring to Finance Docket No. 30168 to:

(1) Rail Section, Room 5349, Interstate Commerce Commission, Washington, DC 20423.

and

(2) Petitioner's representative: Robert L. Calhoun, Sullivan & Worcester, Suite 806, 1025 Connecticut Ave., NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289-4357 (D. C. Metropolitan area) or toll free (800) 424-5403.

Decided: May 3, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Vice Chairman Sterrett concurred except for the third ordering paragraph in the decision. Commissioner Andre would not impose a deadline for consummation of the exempted transaction.

Agatha L. Mergenovich,

Secretary.

NUCLEAR REGULATORY COMMISSION

Advisory Committee for Review of Investigation Policy on Rights of Licensee Employees Under Investigation; Meeting

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Committee for Review of the Office of Investigation Policy on Rights of Licensee Employees Under Investigation will hold a meeting on May 26, 1983, beginning at 10:30 a.m. and lasting until the conclusion of business. The meeting will be held in Room 1167, 1717 H Street, N.W., Washington, D.C.

The entire meeting will be open to public attendance except for those

VOL 48 ISS 92 MY 11 1983 UMI

portions during which the Committee finds it necessary to discuss detailed investigative practices and procedures. (Sunshine Act Exemption 7). To the extent practicable, these closed portions will be held so as to minimize inconvenience to members of the public in attendance.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to public attendance to avoid the disclosure of investigative techniques and procedures. The authority of such closure is Exemption (7) to the Sunshine Act, 5 U.S.C. 552b(c)(7).

At this meeting the Committee will hear from and hold discussions with representatives from other federal agencies, public interest organizations and a labor group on the issues before the Committee. Those issues are as follows:

1. Should the NRC as a matter of policy apprise all interviewees prior to an interview that they have a right to have an attorney present?

(a) Should there be different policies for those merely being questioned to obtain information and for those being personally investigated, *i.e.*, "suspects"?

(b) If the NRC should advise interviewees of their right to an attorney, what form should that advice take, *i.e.*, published rule, oral advice, signed acknowledgement, etc.?

2. May, and, If so, should the Commission limit an interviewee's choice of counsel by excluding from the interview any attorney who also represents the entity being investigated?

3. Should the NRC allow interviewees to tape record the interview and/or should the NRC record the interview at the request of an interviewee?

(a) If so, should the NRC advise of this right prior to the interview, and, if so, what form should that advice take?

(b) Under what circumstances should the interviewee be allowed to keep the tape or a copy of the tape?

(c) If the interviewee records the interview but the NRC does not, should the NRC insist on having copy of the tape?

4. Should the NRC give all interviewees express grants of confidentiality?

(a) What limitations, if any, should be placed on grants of confidentiality by the NRC?

(b) Should there be different policies for different types of interviewees, *e.g.*, those who come forward on their own, and those whom the NRC has to seek out?

(c) Should the NRC grant confidentiality in the absence of a request for confidentiality?

(d) Should the NRC advise witnesses of the availability of confidentiality, and, if so, what form should this notification take?

In addition, written statements on these issues may be submitted by members of the public. Such statements should be submitted by June 3 to Mr. Richard P. Levi, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. If any other member of the public wishes to make an oral presentation to the Committee, he should contact Mr. Levi (Telephone 202/634–1465).

Further information on this meeting may be obtained from Mr. Levi. A transcript of the meeting will be made available for public inspection and copying at the NRC's Public Document Room, 1717 H Street, NW., Washington, D.C.

Dated at Washington, D.C. this 5th day of May, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

Applications for Licenses to Import/Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for import/export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, NW., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 3rd day of May at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

Name of applicant, date of application, date received, and application number	Material type	Material in Kilograms		End-use	Country of destination
		Total element	Total isotope		
Babcock & Wilcox, Apr. 15, 1983, Apr. 21, 1983, ISNM03008.	93.16 pct enriched uranium	25,186	23,463	Scrap recovery and possible sale in U.S. or return to Canada.	FM Canada.

BILLING CODE 7590–01–M

[Docket No. 50–324]

Carolina Power & Light Company; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 80 to Facility Operating License No. DPR–62 issued to Carolina Power & Light Company (the Licensee) which revised the Technical Specifications for operation of the Brunswick Steam Electric Plant, Unit 2 (the facility), located in Brunswick County, North Carolina. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to remove a uniform reduction of 8.5 percent in the limiting values of the Maximum Average Planar Linear Heat Generation Rate.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated July 21, 1982, as supplemented April 28, 1983 (2) Amendment No. 80 to License No. DPR–62, and (3) the Commission's related Safety Evaluation. These items are available for public inspection at the Commissions Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Southport Brunswick County Library, 109 West Moore Street, Southport, North Carolina 28461. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Date at Bethesda, Maryland, this 5th day of May 1983.

For the Nuclear Regulatory Commission.

Domenic B. Vassallo,

Chief, Operating Reactors Branch No. 2 Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–302]

Florida Power Corp., et al.; Granting Relief From ASME Code Requirements

The U.S. Nuclear Regulatory Commission (the Commission) has granted relief from certain requirements of the ASME Code, Section XI, "Rules for Inservice Inspection of Nuclear Power Plant Components", to the Florida Power Corporation, City of Alachua, City of Bushnell, City of Gainesville, City of Kissimmee, City of Leesburg, City of New Smyrna Beach and Utilities Commission, City of New Smyrna Beach, City of Ocala, Orlando Utilities Commission and City of Orlando, Sebring Utilities Commission, Seminole Electric Cooperative, Inc., and the City of Tallahassee (the licensees), which revised the inservice inspection program for the Crystal River Unit No. 3 Nuclear Generating Plant (the facility) located in Citrus County, Florida. The ASME Code Requirements are incorporated by reference into the Commission's rules and regulations in 10 CFR Part 50. The relief was effective as of the date of issuance, April 1, 1983.

This action permits Florida Power Corporation to use the provisions of the 1977 edition of the ASME Code, Section XI, rather than the 1974 version of the Code, regarding the inservice inspection of certain vessel nozzles. The 1977 version permits these inspections at the end of each 10-year inspection interval rather than some percentage of the nozzles inspected at 3⅓ years, 6⅔ years and at 10 years.

The request for relief complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the letters granting relief.

The Commission has determined that the granting of this relief will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

For further details with respect to this action, see (1) the licensee's letters dated February 21, 1983, and March 14, 1983, and (2) the Commission's letters to Florida Power Corporation dated April 1, 1983, and April 27, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Crystal River Public Library, 668 NW. First Avenue, Crystal River, Florida. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of April 1983.

For the Nuclear Regulatory Commission.

John F. Stolz,

Chief, Operating Reactors Branch No. 4, Division of Licensing.

BILLING CODE 7590–01–M

[Docket No. 50–70]

General Electric Company; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 13 to the General Electric Company (the licensee) for Facility Operating License No. TR–1. The amendment revises the license of the General Electric Test Reactor (the facility) located in Vallecitos, California to delete the physical security requirements and the accountability requirements of the license for as long as fuel or fueled experiments are absent from the facility.

The licensee's filing, which has been handled by the Commission as an application for an amendment, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not requied since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4), an environmental impact statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the Amendment No. 13 to

Illinois Power Company, et al. (Clinton Power Station, Unit No. 1); Memorandum and Order (Scheduling Prehearing Conference)

May 6, 1983.

A special prehearing conference will be held on June 2, 1983, to assess the progress of this proceeding. The conference will convene at 9:00 a.m. in the Plaza Room of the University Inn, 302 East John Street, Champaign, Illinois 61820. All parties are directed to attend and to be prepared to discuss the folllowing topics:

(1) Status of negotiations between the parties on contentions

(2) Applicants' evaluation of construction schedule

(3) Actions being taken to assure adequate quality assurance and quality control

(4) Future schedule for this proceeding.

Upon consideration of the foregoing and the entire record in this matter, it is this 6th day of May 1983.

Ordered:

That a special prehearing conference to consider the matters set forth above shall be held at the stated time and place and shall be attended by all parties to this proceeding.

Bethesda, Maryland.

For the Atomic Safety and Licensing Board.

Oscar H. Paris,

Administrative Judge.

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light and Power Company, et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 90 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, CentralIowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center (DAEC), located in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment modifies the Technical Specifications to delete the requirements for the Shift Technical Advisor (STA) to be on duty during refueling.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated March 15, 1983 (2) Amendment No. 90 to License No. DPR-49, and (3) the Commission's letter to Iowa Electric Light and Power Company dated May 3, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401. Iowa Electric Light & Power Company, et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 91 to Facility Operating A License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the license for operation of the Duane Arnold Energy Center, located in Linn County Iowa. The amendment is effective as of its date of issuance.

The amendment incorporates a license condition requiring the licensee to follow its "Plan for the Integrated Scheduling of Plant Modifications for the Duane Arnold Energy Center."

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazard consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

Maine Yankee Atomic Power Co. (Maine Yankee Atomic Power Station); Request for Action Under 10 CFR 2.206

Notice is hereby given that by its "Request for Issuance of an Order to Show Cause" dated April 8, 1983 (Request), Sensible Maine Power. Eleanor S. Miller, Stanley R. Tupper, and Judy Flanagan, requested that certain actions be taken by the Nuclear Regulatory Commission with respect to the Maine Yankee Atomic Power Station in light of a report issued by the Federal Emergency Management Agency evaluating the emergency response exercise conducted for the Maine Yankee facility in December 1982. The relief requested includes initiation of show-cause proceedings to modify, suspend, or revoke the Maine Yankee operating license, and such other relief as may be proper. The Request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations, and action will be taken on the Request within a reasonable time.

A copy of the request is available for inspection in the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., 20555 and at the local public document room for the Maine Yankee facility at the Wiscasset Public Library Association, High Street, Wiscasset, Maine.

Dated at Bethesda, Maryland, this 29th day of April, 1983.

BILLING CODE 7590-01-M

[Docket No. 50-220]

Niagara Mohawk Power Corporation; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 52 to Facility Operating License No. DPR-63 issued to Niagara Mohawk Power Corporation (the licensee) which revised the technical specifications of the Nine Mile Point Nuclear Station, Unit No. 1 (the facility), located in Oswego County, New York. The amendment is effective as of the date of issuance.

The amendment changes the test duration for the containment integrated leak rate test to a minimum of 8 hours rather than 24 hours.

The application for this amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of the amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of the amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5 (d) (4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

For further details with respect to this action, see (1) the application for amendment dated January 11, 1979, (2) amendment No. 52 to License No. DPR-63 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW. Washington, D.C. and at the State University College at Oswego, Penfield Library, Documents, Oswego, New York 13126. BILLING CODE 7590-01-M

[Docket Nos. 50-361 and 50-362]

Southern California Edison Co., et al.; Issuance of Amendments; Facility Operating License Nos. NPF-10 and NPF-15

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 19 to Facility Operating License No. NPF-10, and Amendment No. 7 to Facility Operating License NFP-15 to Southern California Edison Company (SCE), San Diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Units 2 and 3 (the facility) located in San Diego County, California. These amendments are effective as of the date of issuance.

The amendments modify (1) the Technical Specifications covering radioactive liquid effluents and effluent monitoring instrumentation to add a steam generator blowndown bypass line as an alternate release path, along with the associated effluent sampling and monitoring; and (2) the Technical Specification covering radiation monitoring alarm instrumentation to change the alarm setpoint for the containment high range monitors. These amendments were requested by the SCE letter of April 15, 1983.

Issuance of these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which were set forth in the license amendments.

Prior public notice of these amendments is not required because the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and pursuant to 10 CFR 51.4(d)(4) an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see (1) Southern California Edison Company's letter dated April 15, 1983, (2) Amendment No. 19 to Facility Operating License No. NPF-10, (3) Amendment No. 7 to facility Operating License NPF-15, and (4) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the San Clemente Library, 242 Avenida Del Mar, San Clemente, California 92672. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission,

VOL 48 ISS 92 MY 11 1983 UMI

Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 4th day of May, 1983.

For the Nuclear Regulatory Commission.

George W. Knighton,

Chief, Licensing Branch No. 3, Division of Licensing.

BILLING CODE 7590-01-M

Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals; Meeting

Notice is hereby given in accordance with Section 10 of the Federal Advisory Committee Act that NRC's Ad Hoc Committee for Review of Nuclear Reactor Licensing Reform Proposals will hold its next meeting at 10:30 a.m., May 25, 1983. This meeting will take place at the office of Shaw, Pittman, Potts and Trowbridge, South Building, 9th Floor Lobby, 1800 M Street, N.W. Washington, D.C. and will be open for public observation. Prior announcement of this meeting was made at the committee's last open meeting which took place on May 5, 1983.

At this meeting, the committee will continue its review of administrative proposals for reforming the NRC's licensing process for nuclear plants. A transcript of the meeting will be made available for public inspection and copying at NRC's Public Document Room, 1717 H Street, N.W. Washington, D.C.

Further information on the meeting may be obtained from Mr. Rothschild, Office of the General counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. (Telephone: 202/634-1465).

Dated at Washington, D.C., this 9th day of May 1983.

John C. Hoyle,

Advisory committee Management Officer.

[Release No. 19737; SR-CBOE-83-5]

Chicago Board Options Exchange, Inc.; Order Approving Proposed Rule Change

May 5, 1983.

The Chicago Board Options Exchange, Incorporated ("CBOE"), La Salle at Jackson, Chicago, IL 60604, submitted on March 4, 1983 copies of a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder to amend CBOE rules concerning conduct on the trading floor.[1] The proposed rule change adds a Rule 6.20(c) that, among other things, restricts the activities and movements of clerks on the trading floor, prohibits them from using quote terminals in certain circumstances, requires that they display their badges at all times, requires market maker clerks to provide their employers with copies of any option or stock orders the clerks may write up and requires the marking of phone orders by clerks. The rule change proposal also adds an interpretive provision to the CBOE rules that designates failure to adequately supervise an employee for compliance with CBOE Rule 6.20(c) as an activity which may impair the maintenance of a fair and orderly market or impair public confidence in the operations of the Exchange.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19582, March 10, 1983) and by publication in the **Federal Register** (48 FR 11547, March 18, 1983). No comments on the proposed rule change were received.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule changes be, and hereby are, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12848 Filed 5-10-83; 8:45 am]

BILLING CODE 8010-01-M

[1] On March 14, 1983, CBOE filed a technical amendment indicating that its Board approved the proposed rule change.

Cincinnati Stock Exchange; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 5, 1983.

In the matter of applications of the Cincinnati Stock Exchange; For Unlisted Trading Privileges in Certain Securities; *Securities Exchange Act of 1934.*

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Bradford National Corporation, Common Stock, $.10 Par Value (File No. 7-6622)

Petro-Lewis Corp., Common Stock, $1 Par Value (File No. 7-6623)

Continental Airlines Corp., 9% Cumulative Convertible Preferred, $.10 Par Value (File No. 7-6624)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 26, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission

will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12853 Filed 5-10-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19729; File No. SR-PSDTC-83-2]

Filing and Immediate Effectiveness of Proposed Rule Change by Pacific Securities Depository Trust Company

May 4, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on April 28, 1983, the Pacific Securities Depository Trust Company ("PSDTC") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change (i) would simplify a service provided by PSDTC that allows participants to segregate portions of their securities positions held in their depository accounts while using the unsegregated portions on those positions to satisfy obligations with Pacific Clearing Corporation ("PCC"); and (ii) would establish or change fees related to that service. PSDTC's current rules provide that PCC/PSDTC participants may use their depository accounts to settle short positions included in their daily settlement obligations at PCC by (i) manually instructing PSDTC to debit the appropriate depository long postions for specified amounts of securities ("Manual Release Service") or (ii) having PSDTC automatically debit participants' long depository positions ("Automatic Release Service" or "ARS"). PSDTC believes that participants have been reluctant to use the ARS because it is cumbersome for them to release less than their entire long positions. Participants using ARS that wish to segregate portions of their positions in their depository account to satisfy Rule 15c3-3 (17 CFR 240.15c3-3) or for other purposes are required to submit two instructions: (i) to move a designated portion of their long position from the unsegregated account into a segregated account; and (ii) to return the segregated securities to the unsegregated account after the processing cycle with PCC is completed. The proposed rule change would simplify this procedure by permitting participants to submit one instruction directing PSDTC not to release a specified portion of a long position from the unsegregatd account for only one processing cycle ("By-Pass of ARS"). After the completion of the processing cycle, participants' entire positions would again be available for the ARS for the following day's processing cycle unless additional by-pass instructions were submitted. PSDTC believes that the proposal is consistent with Section 17A(b)(3)(A) of the Act because it would facilitate the prompt and accurate clearance and settlement of securities transactions for which PSDTC is responsible.

As noted, the proposed rule change would institute a new fee for the By-Pass of ARS of $.75 per instruction. The proposal also would increase the fee for the Manual Release Service from $.50 per instruction to $.75 per instruction. (The proposal would not modify the fee for the ARS of $.20 per instruction.) PSDTC belives that the proposed fee increases are consistent with Section 17A(b)(3)(D) of the Act by providing for the equitable allocation of reasonable dues, fees, and other charges among its participants.

PSDTC further believes that the proposed rule change may take effect upon filing with the Commission, pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(e) (17 CFR 240.19b-4(e)) thereunder because the proposal (i) effects a change in an existing service that (a) does not adversely affect the safeguarding of securities or funds in the custody or control of PSDTC or for which it is responsible and (b) does not significantly affect the respective rights or obligations of PSDTC or persons using the service; and (ii) it establishes or changes a due, fee, or other charge.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interestred persons are invited to submit written data, views, and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-PSDTC-83-2.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19731; File No. SR-Amex-83-10]

Self-Regulatory Organization; Proposed Rule Change by American Stock Exchange, Inc.; Miscellaneous Office

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 2, 1983, the American Stock Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange is proposing to amend Rule 464 (Record of Margin Calls) and to delete Rule 418 (Bucket Shops), Rule 349 (Press Representatives), and Rule 445 (Security Underwritings).

ii. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Items IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for the Proposed Rule Change

(a) *Purpose.* The Exchange is proposing a number of specific housekeeping rule changes as part of its continuing program to ensure that the Exchange's rules remain up to date and as uniform as possible with New York Stock Exchange rules. Each of the proposed changes is reviewed separately below.

Bucket Shops

Amex Rule 418 prohibits a member or member organization from engaging in or being in any way associated with a "bucket shop" [1] operation. As "bucket shops" can be adequately disciplined instead under Article V, Section 4(h) of the Exchange Constitution as "conduct inconsistent with just and equitable principles of trade", as well as under Article V, Section 4(i) as a violation of the anti-fraud provisions of the Exchange Act, a specific Exchange rule addressing this activity is unnecessary. It is therefore proposed that Rule 418 be rescinded. The NYSE has deleted its comparable Rule 403.

Press Representatives

Amex Rule 349 prohibits the direct or indirect employment of a representative of the press by a member or member organization for the purpose of obtaining confidential information. Since press representatives are only one group of persons among many whose employment by a member organization for such purpose would subject the member organization to disciplinary action, a specific Exchange rule addressing only this one group is unnecessary. Moreover, as with the "bucket shop" rule above, the use of inside information can be adequately disciplined instead under Article V, Sections 4(h) or 4(i) of the Constitution. It is thereore proposed that Rule 349 be rescinded. The NYSE has deleted its comparable Rule 349.

Underwriting Report

Amex Rule 445 requires members and member organizations to file with the Exchange a weekly report of net positions from security underwritings. However, this report has not been submitted to the Exchange since the industry adopted the Joint Regulatory Report in 1972 (followed by the FOCUS Report in 1975), as the underwriting information has been reflected in these broader financial reports. Since it is not necessary for this separate underwriting report to be submitted to the Exchange, it is proposed that Rule 445 be rescinded. The NYSE has deleted the comparable provision in its Rule 421.

Record of Margin Calls

Paragraph (a) of Amex Rule 464 requires member firms carrying margin accounts to make a daily record of all margin calls in a customer's account resulting from transactionis effected in the account. Although not expressly stated, the rule has always been interpreted to require that a record be kept of margin calls resulting from market fluctuations, as well as from transactions effected in the account. While the present language has caused no problems, it is proposed that the rule be amended to clarify the broader intent.

"Free-Riding"—Ominibus Accounts

Paragraph (b) of Rule 464 provides that a member firm shall not permit customers to make a practice of "free-riding" in a margin account; that is, effecting margin transactions and then furnishing the required margin through liquidation of the same or other commitments. The rule, however, exempts from this "free-riding" prohibition broker-dealers carrying the customer accounts of other broker-dealers on an "omnibus" basis, describing at length the requirements for qualifying as an "omnibus" account under Regulation T.[2] In the interests of better drafting, it is proposed that the rule be amended to incorporate the Regulation T requirements by reference, rather than tracking them in the rule. The amendments to Rule 464 conform the rule to recent amendments to the comparable NYSE Rule (Rule 432).

(b) *Basis.* The proposed amendments are generally consistent with Section 6(b) of the Exchange Act in that they are designed to ensure that the Exchange's rule remain up to date and as uniform as possible with New York Stock Exchange rules.

B. Self-Regulatory Organization's Statement of Burden on Competition

The proposed rule changes will have no impact on competition.

[1] A "bucket shop" was generally understood to be any organization which intentionally delayed the execution of customer orders in order to make a personal gain from possible price changes.

[2] Since the names of the customers of the introducing broker-dealer are not disclosed to the carrying broker-dealer under an omnibus arrangement, the carrying broker-dealer records all customer transactions of the introducing broker-dealer in a single "ominibus" account and thus is incapable of policing against free-riding. That responsibility remains with the introducing broker-dealer.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes it reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, at the above address. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated May 5, 1983.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12852 Filed 5-10-83; 8:45 am]
BILLING CODE 8010-01-M

[Release No. 34-19730; File No. SR-NYSE-83-15]

Self-Regulatory Organizations; Proposed Rule Changes by New York Stock Exchange, Inc.; Relating to Changes to Rule 472 (Advertising, Market Letters, Sales Literature, Research Reports and Writing Activities), Rule 474A (Standards for Advertising, Market Letters, Sales Literature, Research Reports, Radio, Television and Writing Activities), and Rule 474B (Standards for Speaking Activities)

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 28, 1983, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule changes as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule changes from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Changes

The proposed amendments to NYSE Rules 472, 474A and 474B consolidate all requirements for communications between member organizations and the public into one rule (Rule 472) and would rescind Rules 474A and 474B. The major changes resulting from the proposed amendments to the above three rules include:

—Replacing specific definitions of such terms as "advertisements," "market letters," "research reports" and "sales literature" with one all encompassing term—"communications."

—Only one person, a supervisory analyst, will be required to approve research reports, rather than two persons as at present (a member or allied member and a supervisory analyst).

—Research reports on non-security products may be co-approved by a supervisory analyst and a product specialist designated by the firm.

—Specific standards for communications found in Rule 472.40 and for records of past performance (472.40(3)), have been revised and updated to more appropriately reflect current market environment conditions.

—The major provisions of Rule 474A have been repositioned throughout Rule 472 with or without changes. Such changes are indicated throughout Exhibit II.

—Rule 474B is proposed to be deleted in its entirety and replaced by Rule 472.20, (Other Communications Activities) which requires member organization approval and the establishment of written procedures for supervision.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

In its filing with Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule changes. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Section (A), (B) and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Changes

(a) *Purpose of Proposed Rule Changes.* The purpose of the proposed amendments is essentially to streamline and consolidate current standards into one rule. Further, melding all definitions into the general term "communications" should eliminate confusion as to which category specific communications fall into. Also, the elimination of the dual approval requirement for research reports eliminates unnecessary and duplicative administrative procedures for members and member organizations. The Exchange believes that since the competency of supervisory analysts is determined by the Exchange both as to abilities as an analyst and as to knowledge of Exchange regulations, their review is sufficient for approval of research reports.

(b) *Statutory Basis for the Proposed Rule Changes.* The proposed amendments are consistent with Section 6(b)(5) of the Securities Exchange Act of 1934 ('34 Act) in that they are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and in general, to protect investors and the public interest in that the amended rules will continue to set forth standards of truthfulness, good taste and disclosure in the overall communications activities of members and member organizations with the public.

The elimination of the requirement for dual approval of reseach reports is consistent with Section 6(c)(3)(B)of the 1934 Act in that superevisory analysts are required to demonstrate that meet Exchange standards of training, experience and competence.

VOL 48 ISS 92 MY 11 1983 UMI

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule changes do not impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Changes Received From Members, Participants, or Others

The Exchange has neither solicited nor received comments on the proposed rule changes.

III. Date of Effectiveness of the Proposed Rule Changes and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve such proposed rule changes, or

B. Institute proceedings to determine whether the proposed rule changes should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule changes that are filed with the Commission, and all written communications relating to the proposed rule changes between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will be available for inspection and copying at the principal office of the above mentioned self-regulatory organization.

All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 5, 1983.

George A. Fitzsimmons,

Secretary.

Title: Extension of the Pilot Project in the State of Minnesota.

ACTION: Notice.

The Small Business Administration authorized a pilot program in which the State of Minnesota would use the proceeds of a taxable bond sale to purchase the guaranteed portion of long-term SBA loans. This program is fully described on page 34871 in the **Federal Register** dated August 11, 1982, Volume 47, Number 155.

The above-referenced announcement provided that SBA may extend the pilot program for six months after its scheduled termination. At the request of the Minnesota Small Business Finance Agency, SBA will extend the Pilot Project in the State of Minnesota until March 31, 1984.

DEPARTMENT OF STATE

[Public Notice CM-8/629]

Fine Arts Committee; Meeting

The Fine Arts Committee of the Department of State will meet on Monday, June 20, 1983 at 2:00 p.m. in the Diplomatic Reception Rooms. The meeting will last approximately until 3:30 p.m. and is open to the public.

The agenda for the committee meeting will include a summary of the work of the Fine Arts Office since its last meeting in February 1983, the announcement of all gifts and loans since January 1, 1983 and a discussion of the newly redesigned James Monroe and James Madison Rooms.

Public access to the Department of State is controlled. Members of the public wishing to take part in the meeting should telephone the Fine Arts Office by Monday, June 13, 1983, telephone (202) 632-0298 to make arrangements to enter the building. The public may take part in the discussion as long as time permits and at the discretion of the chairman.

Dated: April 25, 1983.

Clement E. Conger,

Chairman, Fine Arts Committee.

[Public Notice CM-8/628]

Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on May 25 and June 8, 1983. The meeting on May 25 will be in Room 1107; the meeting on June 8 will be in Room 1105, Department of State, 2201 C Street, NW., Washington, D.C. Both meetings willl begin at 10:00 a.m.

Study Group A deals with U.S. Government aspects of international telegram and telephone operations and tariffs. The Study Group will discuss international telecommunications questions relating to telegraph, telex, new record services, date transmission and leased channel services in order to develop U.S. positions to be taken at upcoming international study Groups I and III meetings.

Members of the general public may attend the meetings subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meetings. It is therefore suggested that prior to the meetings, persons who plan to attend so advice Mr. Earl Barbely, Department of State, Washington, D.C. 20520; telephone (202) 632-3405. All attendees must use the C Street entrance to the building.

Dated: April 21, 1983.

Earl S. Barbely,

Director, Office of International Communications Policy.

DEPARTMENT OF THE TREASURY

Customs Service

Application for Recordation of Trade Name: "United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada"

AGENCY: Customs Service, Treasury.

ACTION: Notice of Application for Recordation of Trade Name.

SUMMARY: Application has been filed pursuant to section 133.12, Customs Regulations (19 CFR 133.12), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada," used by the United Association of Journeymen and Apprentices of the Plumbing and Pipe Fitting Industry of the United States and Canada, an unincorporated association, located at 901 Massachusetts Avenue, NW., Washington, D.C. 20001.

The application states that the trade name is used by the Association to identify its union activities, which include the formation of local labor unions in the plumbing and pipe fitting industry, as well as certifying (1) that pipe, fabricated pipe, welded pipe and fabricated welded pipe formations were made by members of United Association's local unions and (2) that the services of fabricating and assembling such goods were performed by members of United Association's local unions. The Association's member unions and their members are authorized to use the trade name in the United States and Canada.

Before final action is taken on the application, consideration will be given to any relevent data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Notice of the action taken on the application for recordation of this trade name will be published in the **Federal Register.**

DATE: Comments must be received on or before July 11, 1983.

ADDRESS: Written comments should be addressed to the Commissioner of Customs, Attention: Entry, Licensing and Restricted Merchandise Branch, 1301 Constitution Avenue NW., Room 2417, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Harriet Lane, Entry, Licensing and Restricted Merchandise Branch, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5765).

Dated: May 4, 1983.

A. Piazza

Acting Director, Entry Procedures and Penalties Division.

[T.D. 83-104]

Decision Denying Domestic Interested Party Petition Requesting Reclassification of Certain Prefinished Hardboard Siding; Petitioner's Desire To Contest the Decision

AGENCY: Customs Service, Treasury.

ACTION: Notice of (1) decision on domestic interested party petition, and (2) receipt of notice of petitioner's desire to contest the decision.

SUMMARY: In response to a petition from a domestic interested party requesting that certain prefinished hardboard siding be reclassified for tariff purposes under the provision for other hardboard, whether or not face finished, in item 245.30, Tariff Schedules of the United States (TSUS), Customs invited public comments with regard to the correctness of the present classification. After consideration of the comments received and further review of the matter, Customs has advised the petitoner that such prefinished hardboard siding would continue to be classified under the provision for other building boards, of vegetable fibers (including wood fibers), in item 245.90, TSUS. Upon being

VOL 48 ISS 92 MAY 11 1983 UMI

informed that its petition had been denied, the petitioner filed a notice of its desire to contest the decision.

FOR FURTHER INFORMATION CONTACT: Janet L. Johnson, Classification and Value Division, Office of Regulations and Rulings, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

On July 13, 1981, a petition was filed under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), by the American Hardboard Association, a national trade association representing American manufacturers of prefinished hardboard siding, requesting that certain imported prefinished hardboard siding be reclassified under the provision for other hardboard in item 245.30, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), presently dutiable at 12 percent ad valorem. Such hardboard siding has been classified by Customs under the provision for other building boards, of vegetable fibers (including wood fibers), in item 245.90, TSUS free of duty, following Customs ruling 061750 BF, dated November 14, 1980.

A notice of receipt of the petition was published in the **Federal Register** on March 22, 1982 (47 FR 12258), inviting public comment. Written comments were to have been received on or before May 21, 1982. By notice published in the **Federal Register** on May 27, 1982, (47 FR 23249), the period of time for the submission of comments was extended to June 21, 1982.

Nine commenters responded to the notice. Four favored the reclassification of the merchandise and five opposed any change. Those favoring reclassification generally supported the claims of the petitioner, which are set forth below.

In support of its contention that the merchandise involved is properly classifiable as other hardboard under item 245.30, TSUS, the petitioner made the following claims:

(1) Item 245.90, TSUS, is intended for insulation board products such as sheathing, ceiling tile, sound deadening board and roof deck, all low density products (*i.e.*, weighing 30 pounds or less per cubic foot).

(2) Finished hardboard products weighing 31 pounds or more per cubic foot should be classified in item 245.30, TSUS.

(3) Several passages from the American Society of Testing and Materials (ASTM) publication, ASTM D1554 (Standard Definitions of Terms Relating to Wood-Base Fiber and Particle Panel Materials) support the foregoing claims.

By a ruling dated October 29, 1982 (070255), Customs advised the petitioner that its first contention is contradicted by the annotated tariff schedules. Item 245.30, TSUS, provides only for "hardboard, whether or not face finished, other". As such, the provision covers only plain sheets and strips of hardboard, not advanced in any way except face finishing. The merchandise in question has been processed by more than face finishing; it has been rabbetted and grooved, and a plastic spine has been attached. Such processing advances the hardboard from a material to an article specially designed to be used as lap siding in the construction of walls. As much, the merchandise becomes a building board, classifiable in item 245.90, TSUS.

The first contention is also contradicated by statistical breakouts in the tariff schedules. Effective January 1, 1964, item 245.90, TSUS, was divided into two major statistical sub-categories: "weighing 26 pounds or less per cubic foot," and "other" (*i.e.*, weighing more than 26 pounds per cubic foot). Effective January 1, 1978, the two major sub-categories were changed to "weighing 30 pounds or less per cubic foot, "and other" (*i.e.*, weighing more than 30 pounds per cubic foot). In view of the fact that the tariff schedules have contained these statistical suffix breakdowns under item 245.90, TSUS, since January 1, 1964, the petitioner's claim cannot overcome the administrative treatment of the tariff provision.

The petitioner's second claim is also contradicted by the tariff schedules. Schedule 2, Part 3, Headnote 1(e), TSUS, defines building boards as "panels of rigid construction, including tiles and insulation board, chiefly used in the construction of walls, ceilings, or other parts of building." The merchandise in question qualifies as "building board" according to the Headnote 1(e) definition.

Finally, concerning petitioner's third claim, when the tariff schedules provide a headnote which specifically defines a term such as "building boards," there is no need to resort to commerical definitions.

Decision on Petition and Receipt of Petitioner's Notice of Desire To Contest

In the ruling dated October 29, 1982, the petitioner was advised that its petition was denied and that Customs would continue its practice of classifying such prefinished hardboard siding in item 245.90, TSUS. In response, by letter dated November 29, 1982, the petitioner filed notice of its desire to contest this decision in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.23, Customs Regulation (19 CFR 175.23).

After careful analysis of the comments received in response to the notice and further review of the matter, Customs remains of the opinion that its practice of classifying such prefinished hardboard siding under item 245.90, TSUS, is correct. This practice will continue provided that no decision of the United States Court of International Trade or the United Stated Court of Appeals for the Federal Circuit not in harmony with this practice is rendered.

Authority

This notice is being published in accordance with section 516(c), Tariff Act of 1930, as amended (19 U.S.C. 1516(c)), and § 175.24, Customs Regulations (19 CFR 175.24).

Drafting Information

The principal author of this document was Jesse V. Vitello, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: March 22, 1983.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:10 p.m. on Thursday, May 5, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider an application for assistance under section 13(c) of the Federal Deposit Insurance Act (name and location of bank authorized to be exempt form disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

The meeting was recessed at 2:17 p.m., and at 5:03 p.m. that same day the meeting was reconvened, by telephone conference call, at which time the Board of Directors considered another application for assistance under section 13(c) of the Federal Deposit Insurance Act (name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(4), (c)(6), (c)(8), and (c)(9)(A)(ii)).

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 11 a.m. on Saturday, May 7, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to: (1) Receive bids for the purchase of certain assets of and the assumption of the liability to pay deposits made in Smith County Bank, Carthage, Tennessee, which was closed by the Tennessee Commissioner of Banking on Friday, May 6, 1983; (2) accept the bid for the transaction submitted by Murfreesboro Bank & Trust Company, Murfreesboro, Tennessee, an insured State nonmember bank; (3) approve the application of Murfreesboro Bank & Trust Company, Murfreesboro, Tennessee, for consent to purchase the assets of and to assume the liability to pay deposits made in Smith County Bank, Carthage, Tennessee, and for consent to establish the sole office of Smith County Bank as a branch of Murfreesboro Bank & Trust Company; and (4) provide such financial assistance, pursuant to section 13(c)(2) of the Federal Deposit Insurance Act (12 U.S.C. 1823(c)(2)), as was necessary to facilitate the purchase and assumption transaction.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting pursuant to subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the

Part II

Department of Health and Human Services

Health Care Financing Administration

Medicare Program; End-Stage Renal Disease Program; Prospective Reimbursement for Dialysis Services and Approval of Special Purpose Renal Dialysis Facilities; Final Rule

VOL
48
ISS
92
MY
11
1983
UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Care Financing Administration

42 CFR Part 405

Medicare Program; End-Stage Renal Disease Program; Prospective Reimbursement for Dialysis Services and Approval of Special Purpose Renal Dialysis Facilities

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: These regulations change the reimbursement system by which Medicare pays for outpatient maintenance dialysis and related physician and laboratory services. These changes establish a prospective method of payment for maintenance dialysis, whether furnished at home or in a hospital-based or independent dialysis facility, and revise other aspects of the reimbursement system to encourage home dialysis and provide incentives for economy and efficiency in furnishing these services. These amendments implement section 2145 of the Omnibus Budget Reconciliation Act of 1981. We expect that these changes will improve our administration of the end-stage renal disease program and enable us to control the rapidly growing costs of furnishing dialysis.

The controls on quality of care that have been in effect since the beginning of the program will continue to apply. These regulations will also ensure access to care by providing for adequate reimbursement to isolated, essential facilities, where patients have no alternative sources of dialysis care.

These regulations also provide for time-limited approval for Medicare participation of special purpose renal dialysis facilities. As a general rule we have not approved facilities such as transient or mobile units set up for emergency purposes or to serve vacationing dialysis patients in State parks and children's camps. This change in regulations will remove this limitation.

EFFECTIVE DATES: Most provisions of these regulations are effective August 1, 1983. However, the regulations at 42 CFR Part 405, Subpart U implementing conditions of coverage for special purpose renal dialysis facilities are effective on May 11, 1983. The regulations at 42 CFR Part 405, Subparts B, D, E, and F implementing changes in reimbursement for maintenance dialysis treatments and the physician and laboratory services related to those treatments, including the provisions discontinuing Medicare payment for 100 percent of the cost of home dialysis equipment and the optional target rate reimbursement method for home dialysis, are effective August 1, 1983. See the **SUPPLEMENTARY INFORMATION** for further discussion of these provisions and their effective dates.

FOR FURTHER INFORMATION CONTACT:

Concerning special purpose renal facilities, contact: Stanley Rosenfeld; (301) 594–9737.

Concerning all other provisions of these regulations, contact: Bernadette Schumaker, (301) 597–1337.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. Organization and Content

We published a notice of proposed rulemaking (NPRM) on prospective reimbursement on February 12, 1982, and an NPRM on special dialysis facilities on January 15, 1981. The NPRM on prospective reimbursement discussed the ESRD program and its legislative background and explained in detail the regulatory changes we proposed, the methodologies we proposed to implement the prospective reimbursement regulations, and showed what payment rates would result from those methodologies. The NPRM on special purpose facilities set forth our proposal to approve on a time-limited basis vacation and emergency units that did not meet all the requirements we have established for permanent facilities.

The second section of these final regulations summarizes the proposed regulatory changes of the NPRM on prospective reimbursement, discusses the comments we received, sets forth our responses to those comments, and explains any changes to the regulations we are making in light of those comments. This section follows the general organization of the NPRM. In order to be as concise as possible, we have not repeated here much of the discussion in the NPRM on program background and our proposed regulatory changes. The third and fourth sections summarize the proposed methodologies for determining facility payment rates and physician payment rates respectively, discuss those comments, and explain the final methodologies for facility and physician reimbursement. The fifth section deals with additional issues related to implementing the changes in the reimbursement system. The sixth section summarizes the provisions of the NPRM on special purpose dialysis facilities, discusses comments received, sets forth our responses, and explains any changes we are making in light of those comments. The seventh section discusses implementation and effective dates, summarizes those comments and describes our changes in response to those comments. The eighth section briefly addresses procedural aspects of the rulemaking process, such as clearance of reporting requirements. This is followed by the text of the regulations we are changing.

Because the reimbursement changes in these regulations constitute a major rule under Executive Order 12291, with significant economic effects, particularly on small dialysis facilities, an initial regulatory impact analysis was published with the February, 1982 NPRM. A final impact analysis has been prepared and is included in the first appendix to these regulations. A second appendix to these regulations explains and lists the area wage indexes that we will use to adjust prospective payment rates geographically.

B. Legislative Background

The end-stage renal disease (ESRD) program of Medicare was established by Section 2991 of the Social Security Amendments of 1972 (Pub. L. 92–603). That law extended Medicare coverage to individuals who have permanent kidney failure, require either dialysis or transplantation, and meet certain other eligibility requirements.

The End-Stage Renal Disease Program Amendments of 1978 (Pub. L. 95–292) were enacted in large part to alleviate the problem of rapidly increasing expenditures in the ESRD program. The amendments added section 1881(b)(2)(B) to title XVIII of the Social Security Act. That legislation directed us to publish regulations establishing methods and procedures to determine the costs incurred by renal dialysis facilities in furnishing ESRD services, and to establish a prospective reimbursement method for those services. The amendments also provided that the prospective reimbursement method should be established on a cost-related or other equitable and economically efficient basis, with incentives for encouraging more efficient and cost-effective delivery of these dialysis services.

Further legislative changes concerning the ESRD payment system were made by the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35, enacted August 13, 1981). Section 2145 of Pub. L. 97–35, amended section 1881 of the Social Security Act, requiring us to develop a prospective reimbursement system for outpatient maintenance dialysis that promotes home dialysis. This reimbursement system must either reimburse home dialysis and in-facility dialysis under composite rates or use some other method that, after detailed analysis, is determined to be more efficient and promote home dialysis more effectively. Section 2145 also revised the provisions regarding reimbursement for physicians' services to promote efficient delivery of dialysis services and to provide incentive for the increased use of home dialysis.

II. The NPRM on Prospective Reimbursement

A. Introduction

On February 12, 1982, we published an NPRM on reimbursement for dialysis services (47 FR 6556). The proposed regulations set forth in that document were designed to implement section 1881 of the Act, as amended by section 2145 of Pub. L. 97–35. Under those proposals, each facility would receive a certain payment rate per treatment, adjusted for geographic wage differences, regardless of whether the treatment was furnished in the facility or at the patient's home. We proposed to set separate (dual) rates for hospital-based and independent dialysis facilities, averaging $128 per treatment for independent facilities and $132 per treatment for hospital-based facilities. (Since we projected average payments under the NPRM, we have received and incorporated into our data updated information on geographic wage differences. As a result, we now project that average payment rates under the prospective system will be $127 per treatment for independent facilities, and $131 per treatment for hospital-based facilities.)

The NPRM included provision of a process for facilities to seek exceptions to these rates, based on atypical patient mix, extraordinary circumstances, education costs, or because they were isolated essential facilities. We also proposed to eliminate one of the two current methods of payment for physician services related to maintenance dialysis treatment, and to modify the other method, a prospective capitation payment method, to pay the same amount per treatment regardless of home or in-facility setting. The NPRM also included proposed reporting, recordkeeping, and other requirements necessary to support the proposed prospective reimbursement system.

We provided a 60-day public comment period on our proposals, ending April 13, 1982. As of May 7, 1982, we had received 507 petitions (incorporating over 10,000 signatures) and 4285 comments. The comments submitted in letter form came from a variety of sources, as follows:

- 3675 comments from patients, their relatives, and their friends (this category included many form letters);
- 406 comments from dialysis facilities, law firms representing dialysis facilities, and corporations owning such facilities;
- 85 comments from physicians (primarily nephrologists) and suppliers involved in production and distribution of dialysis equipment and supplies; and
- 99 comments from other organizations, such as the National Kidney Foundation, the Renal Physicians Association, and the American Hospital Association, representing various groups that would be affected by these proposals.

B. Congressional Hearings

Since September, 1981 there have been five hearings, held by Congressional subcommittees, devoted to the ESRD program. Three of the four hearings held since February, 1982 dealt with the NPRM in some detail. In addition to comments and questions from Members of Congress and Congressional staff, these subcommittees heard witnesses from the public, facilities, associations, physicians' groups, and other interested persons. We have not summarized their testimony, since it was also submitted to us in writing, and their comments have been included in the comment discussions below. The following hearings were devoted in whole or in part to the NPRM:

1. Subcommittee on Intergovernmental Relations and Human Resources, House Committee on Government Operations—February 24, 1982
2. Subcommittee on Health, Senate Committee on Finance—March 15, 1982
3. Subcommittee on Oversight, House Committee on Ways and Means—April 22, 1982

C. Final Regulatory Provisions and Discussion of Comments

1. General Nature of the Rate-Setting Provisions. The text of the regulations published with this preamble includes general provisions on the payment methods for both facilities and physicians, but does not include the full details of the rate-setting methodologies we propose to use to implement these regulations. These methodologies are subject to continual review, and are based on data that change over time. The specific methodology for determining facility payment rates is described in section III of this preamble. The specific methodology for determining physician payment rates is described in section IV of this preamble. In the future, we will publish changes in these methodologies in Federal Register notices, as explained in section II.C.6 below. (We received numerous comments on our proposed methodologies and provisions on rate notification, but not on the general regulations themselves.)

2. Payment for Dialysis Treatments. Since the regulations governing facility payment rates for dialysis services set forth only principles and authorities, they are relatively simple. The regulations state that HCFA has the authority to establish rate-setting methodologies and set rates in accordance with section 1881 of the Act, and specify how the amount of program payments and beneficiary liability are to be determined based on a prospective payment rate. The NPRM would have required all dialysis facilities to accept these prospective payment rates as payment in full, with beneficiaries continuing to be liable for Part B deductible obligations plus a coinsurance amount of 20 percent of the rate for each treatment. Under the proposal, after the deductible obligation is incurred, the ESRD program would be responsible for 80 percent of all payments due to the facility for covered services furnished to beneficiaries.

Coinment: It was suggested by commenters that we could allow a higher per treatment payment while still reducing our program expenditures if we were to pay less than 80 percent of the rate, and allow the facility to collect the difference from the beneficiary or another payor.

Response: Section 1881(b)(2)(A) of the Act requires that we pay 80 percent of the rate and that the beneficiary's liability be limited to 20 percent of that amount. Accordingly, the merits of this suggestion cannot be considered.

Comment: Some commenters also suggested that the real reason program costs have escalated so rapidly is the large increase in the beneficiary population, rather than inefficiency.

Response: While it is true that the beneficiary population has increased dramatically, our data indicate that we are paying many facilities significantly above their reasonable costs. We have an obligation to revise our reimbursement methodologies in order to promote efficient delivery of dialysis services.

3. Exceptions. Under the retrospective payment method, a large number of hospitals have been granted exceptions to the $138 per treatment national

VOL 48 ISS 92 MY 11 1983 UMI

payment screen based on their higher costs. In the NPRM, we made it clear that we would have much more specific exception criteria, and expected to grant fewer exceptions overall, in addition to reducing the average payment rate. As a result, many facilities reviewed the proposed exception criteria critically and commented on them. We received a number of comments favoring the proposed criteria in general, especially the exceptions for isolated essential facilities, atypical patient mix, and education costs. Some commenters were critical; others suggested additional criteria. Several comments requested greater specificity on various points of administering the exceptions process.

Comment: A number of commenters supported the idea of establishing separate, higher payment rates for special classes of facilities, rather than an exceptions process. They referred especially to pediatric hospitals, facilities that dialyze their patients less often than three times per week, and facilities with self-care training programs (which claimed that their per treatment costs for training sessions were higher than the additional $20 per treatment that we proposed to pay).

Response: We cannot set separate payment rates in these cases, because we do not have adequate data to do so. For example, outpatient maintenance dialysis facilities in pediatric hospitals have varying percentages of pediatric patients (most treat some adult patients) and widely varying costs per treatment. We do not believe that a facility with 80 percent pediatric patients should receive the same payment rate per treatment as a facility with only 40 percent pediatric patients. These problems are best handled on a case-by-case basis through an exception process. In addition, our data on pediatric facilities are not precise enough to develop a separate rate for them. Accordingly, we have clarified the exception for atypical patient mix, including pediatric patients as an example of an allowable justification for an exception. We have also made it clear that a facility with per treatment training costs higher than its rate will be eligible for an exception to its training payment rate. (This had been stated in one part of the NPRM preamble, but inadvertently omitted from the proposed regulation text. We have corrected this omission.) We have also added an exception criterion for higher costs per treatment related to frequency of dialysis. The exceptions process is superior to separate rates because it allows us to tailor reimbursement to the needs of specific facilities.

Comment: Several commenters also requested us to specify in greater detail the standards that will be used to determine whether a facility meets one of the criteria upon which exceptions will be determined.

Response: It is not possible to make an all-inclusive list of specific exception review standards. In some cases, we do not have the data yet, but we hope to get them from our recently issued new cost report forms. The medical community does not agree on precise criteria for atypical patient mix, and we have therefore concluded that the determination of whether an atypical patient mix exists is better left to consideration of specfic exception requests. In other cases, the exact nature of the excess costs cannot always be foreseen. Nevertheless, we have added to the regulations some examples of the kinds of situations that could be eligible for an exception.

Under these final regulations, we will consider granting an exception (and a higher payment rate) to a facility that is able to provide convincing objective evidence that it has excessive costs per treatment attributable to one or more of the following six criteria.

Atypical service intensity (patient mix)—In the February, 1982 NPRM, we proposed an exception criterion for "atypical patient mix". Many commenters requested that we clarify this exception, and explain how a facility could demonstrate the relation of its patient mix to its higher costs. Higher costs result when an "atypical patient mix" is related to medically necessary atypically intense services in connection with furnishing dialysis services to patients with special needs. In order to clarify this point, we have retitled this criterion "atypical service intensity (patient mix)", expanded our explanation of it, and added examples of types of patient who we believe justifiably require atypically intense services.

In order to qualify for an exception under this criterion, a facility must demonstrate that:

- When compared to other SRD facilities generally, it furnished atypically intense dialysis services or supplies during a substantial number of its outpatient maintenance treatments;
- These intense dialysis services are medically necessary because of the special medical needs of the patients to whom they are furnished;
- The facility has per treatment costs in excess of its payment rate attributable to these intense services; and
- The facility's per treatment costs and services are prudent and reasonable when compared to those of facilities with a similar patient mix.

A facility may justify an exception under this criterion if it can demonstrate that a substantial number of its outpatient treatments involve intense dialysis services that are medically necessary for patients such as:

- Patients who have been referred from other facilities on a temporary basis for more intense care during a period of medical instability, and who return to the original facility after stabilization;
- Pediatric patients, who require a significatly higher staff-to-patient ratio then typical adult patients; or
- Patients who have medical conditions that are not commonly treated by most dialysis facilities and that complicate the dialysis procedure.

Extraordinary circumstances—A facility may incur excess costs beyond its control due to a fire, earthquake, flood, or other natural disasters which could establish grounds for an exception. However, we will not recognize such costs in cases when a facility chose not to maintain adequate insurance protection against such loses (through the purchase of insurance, the maintenance of a self-insurance program or other equivalent alternative) or chose not to file a claim for losses covered by insurance, or not to utilize its self-insurance program.

Isolated essential facilities—We have clarified the criterion from the 1980 NPRM, which referred to these as "sole community providers". (The change of terminology will avoid confusion with a different exception criterion applicable under the hospital cost limits.) A facility may justify an exception under this criterion if:

- It is the only supplier of dialysis services in its geographical area;
- Its patients cannot obtain dialysis services elsewhere without substantial additional hardship; and
- Its costs in excess of its payment rate are justifiable.

In assessing these factors, we will consider local population density, typical local commuting distances for medical services, dialysis facility usage by area residents other than the applicant's patients, and volume of treatments.

Self-dialysis Training Costs—As explained in section V.D. of this preamble, we will pay for dialysis sessions during which self-dialysis training takes place by reimbursing the facility its usual per treatment rate plus $20. If a facility has per treatment training costs in excess of this amount, it may apply for an exception. We will grant an exception only for those costs that are justifiable under the new 42 CFR 405.441, which sets forth the recordkeeping and cost reporting requirements for dialysis and self-care dialysis training.

Frequency of Dialysis—The purpose of this criterion is to eliminate the financial disincentive that exists now to dialyze less often than three times per week, where less frequent dialysis is appropriate. Under certain circumstances, including medical reasons and patient convenience, patients may be dialyzed less often than three times per week. Because of this lower frequency, greater per treatment costs may be incurred, even though the total weekly cost is less than it would be if the patient were dialyzed three times per week. Increases in the per treatment payment rates granted under this exception may be for any amount up to the amount that results in the weekly reimbursement per patient equal to three times the facility's prospective composite rate exclusive of any exception amounts.

Education costs—A facility may qualify for an exception if its excess costs are attributable to an approved nursing education or intern-resident program, as specified in 42 CFR 405.421. The exception may be only for the amount that could be properly allocated to the outpatient dialysis department. The amount of the increase that we will allow under this criterion will be limited to what is reasonable when compared to the costs of other similar facilities that have educational programs.

Under the rules, if a facility shows its projected costs per treatment would be highly likely to exceed its payment rate (based on prior year costs and utilization trends), and meets any of the criteria for an exception, the facility may request an exception—

(1) Within 180 days of after notification of its payment rate (generally the intermediary will send a notice annually); or

(2) Within 180 days after an extraordinary cost-increasing event.

If we approve the exception and set an increased rate, that rate would apply retroactively to either the date HCFA accepts the facility's request, or the date of an extraordinary cost increasing event until the earlier of the effective date of the next rate notification, or the date when the circumstances justifying the exception no longer exist. The provision terminating an exception when the basis for the exception no longer exists has been added to deal more appropriately with exceptions that are needed only for short periods.

Comment: Commenters also requested us to specify our expected processing time for exceptions, without explaining, in any detail the reason for their concern.

Response: Estimating processing time is presently impossible, since we do not know how many requests for exceptions will be submitted. We will not penalize a facility for unreasonable delays on our part as far as determining the applicable retroactive period for the exception rate, but we cannot resolve any cash flow problem resulting from delays, which may be the ultimate concern of the comments.

Comment: Some commenters stated that, when an exception is granted retroactively, patients should not be liable for retroactive coinsurance obligations, and suggested instead that we should pay them.

Response: We have legal authority to pay more than 80 percent of the payment rate we establish, even if it is retroactively determined. The patient must be liable for these amounts. (But see discussion in section V.F. of this preamble on bad debt amounts.)

Comment: Some commenters argued that basing an exception on costs is not fair to proprietary facilities, which require a return on equity.

Response: Proprietary facilities are in competition with nonproprietary ones in the marketplace of dialysis services. The statutory prospective reimbursement system has no interest in which status a facility has. Proprietary facilities must earn their profit by being efficient and reducing their per treatment costs below their payment rate.

4. Appeals: In the NPRM we proposed an appeals procedure for any facility dissatisfied with the prospective reimbursement regulations, adjustment to its cost reports, or HCFA's response to a request for an exception to the prospective rate. This proposed appeals process was based on the existing appeals procedure for cost-based reimbursement of providers established by section 1878 of the Act. Under section 1881(b)(2)(D) of the Act, a renal dialysis facility is to be treated as a provider for purposes of section 1878. Under the proposal, the facility would have been required first to apply for an exception to the rate, and then, if it was dissatisfied with HCFA's response, could appeal pursuant to 42 CFR Part 405, Subpart R, to the Provider Reimbursement Review Board (PRRB) if the amount of disputed reimbursement was $10,000 or more. It was proposed that the regulations and methodology could be challenged in such a proceeding and that certain aspects of such a challenge that were not within the PRRB's jurisdiction could then be brought in district court.

Comment: Some commenters contended that the PRRB has no jurisdiction to review disputes under the ESPD prospective rate system, because section 1878 of the Act provides PRRB review of cost reports covering costs and reimbursement for prior periods. It was suggested that another body, such as the ESRD networks, should provide reviews.

Response: In consideration of these comments we have reviewed the statutory language and its legislative history and have concluded that the NPRM misstated the jurisdiction of the PRRB with respect to prospective reimbursement for dialysis services.

Under section 1878 the PRRB has limited and carefully defined authority. The PRRB has jurisdiction over a matter only if a provider "which has filed a required cost report" seeks a hearing "with respect to such cost report" (§ 1878(a)). After a hearing, the PRRB "shall have the power to affirm, modify, or reverse a final determination of the fiscal intermediary with respect to a cost report and to make any other revisions on matters covered by such cost report * * *" (§ 1878(d)). As these provisions make clear, the cost report is the basis for defining the PRRB's authority. Because the statute restricts the PRRB's mandatory authority to consideration of reimbursement disputes arising from cost reports, we conclude that the PRRB has substantially less authority under a prospective rate system, where cost reports largely perform only a data-gathering role, than under the traditional cost-reimbursement system.

This interpretation is confirmed by the legislative history. When section 1881 was enacted in 1978, it authorized the Secretary to determine the costs incurred by facilities and to determine, "on a cost-related basis or other economical or equitable basis," the amounts of payments to be made to facilities. Under this provision, the cost report filed by a facility could have had substantial significance if the Secretary had chosen to set the amounts of payments on a cost-related basis in which reimbursement depended on the costs of a particular facility, rather than by using the alternative "other economical or equitable basis." When Congress incorporated use of the PRRB procedure in section 1881 it recognized that the procedure would apply only to "renal dialysis facilities reimbursed on a cost-related basis * * *" and, by

VOL
48
ISS
92
MY
11
1983
UMI

implication therefore, not if the Secretary utilized the alternative "other economical or equitable basis." H.R. Rep. No. 95–549, 95th Cong., 1st Sess. 12 (1977); S. Rep. No. 95–714, 95th Cong., 2d Sess. 11 (1978). The congressional committee reports thus indicated that there was no intention to expand the PRRB's jurisdiction beyond the review of cost reports, as set forth in section 1878.

Under this prospective rate system which is authorized under the statute that was enacted in 1981, the cost report of an individual facility has little or no bearing on its reimbursement, and thus the PRRB does not have authority under section 1878 to review issues that may be raised with respect to the rate. Under the payment system that we are adopting the cost report governs reimbursement for the period covered by the report only with respect to bad debt costs, and therefore only issues related to bad debts are reviewable by the PRRB under section 1878.

As noted above, the NPRM proposed that an ESRD facility could appeal to the PRRB adjustments made to its cost report. We have decided to delete this provision because it is not required by law and because these adjustments (except as they relate to bad debts) are simply adjustments to data and do not have a direct effect on a facility's reimbursement. Providing an appeal in these circumstances would delay our accumulation of data for purposes of possible future rate-setting. Issues about the validity of the data are better dealt with in connection with the rate-setting, rather than in individualized appeals.

We have considered whether the ESRD networks should have a role in reviewing administrative determinations, as suggested by the comment. We have concluded, however, that the structure and basic functions of the ESRD networks are ill-suited to hearing administrative appeals and we have therefore not adopted the suggestion.

As a matter of our discretion, and not because it is required by statute, we are also authorizing the PRRB or the intermediary to review denials of requests for exceptions to the payment rate. Also as a matter of our discretion we have decided to follow the usual rule for determining PRRB jurisdiction that is followed pursuant to section 1878, that only disputes involving $10,000 or more may be brought before the PRRB. Otherwise, the dispute must be reviewed by the intermediary. The PRRB would not be permitted to review the regulations or methodology but could review whether a denial of an exception was appropriate under the rules. When a facility appeals an exception determination to the PRRB, it will not be permitted to submit cost information that was not included in the documentation supporting its exception request. Under a prospective system, it would be inconsistent to consider cost experience occurring after an exception is requested. If such cost experience were accepted in an appeal of an exception determination, it could have the effect of undermining the prospective system and its incentives by basing a facility's payment rate on costs for the period to which the rate applied. This would introduce a strong element of retrospective cost settlement, which would be inconsistent with the intent of Congress.

Comment: Some commenters state that section 1878 provides a 180-day limit in which to appeal an adjustment to a cost report to the PRRB. Therefore, the proposed limit of 30 days for this appeal is illegal.

Response: This appeal was an administrative appeal provided by regulation at the discretion of the Secretary. As explained above, we are eliminating this appeal from the final regulation; therefore, this comment is now moot.

5. Physician reimbursement. In order to remove what we believed were reimbursement disincentives to home dialysis and to establish an efficient method of physician reimbursement for dialysis services that most accurately recognized the special nature of physician services provided to dialysis patients, the NPRM proposed eliminating the "initial method" of physician reimbursement. Under the initial method, payment for routine physician services furnished during an in-facility maintenance dialysis episode was made to a facility, and payment for non-routine services was made on a fee-for-service basis. We proposed paying physicians for all services related to outpatient maintenance dialysis on the basis of a single method of monthly capitation payments that would be equal for home dialysis and in-facility dialysis. These monthly payments would be determined on a basis similar to the "alternative reimbursement method" (ARM).

The proposed regulations on physician reimbursement, like the regulations on payments to facilities for dialysis treatments, were relatively simple, since they set forth only the general principles and authorities under which we establish the rate-setting methodology and set rates. The methodology by which rates will be set is explained in section IV of this preamble.

Comments: Some commenters recommended that we retain the initial method. Some of these commenters argued that we have no legal basis to require the capitation method for all physicians, since section 1881(b)(3)(A) of the Act, which provides for payment for non-routine physicians' services to ESRD patients on a regular fee-for-service reasonable charge basis, was not abrogated by Pub. L. 97–35.

Response: The authority to pay for physician dialysis services is in section 1881(b)(3). This section was modified by section 2145 of Pub. L. 97–35 to emphasize that physician reimbursement promote efficiency and home dialysis. As amended, this section states that the Secretary shall pay under the initial method (under section 1881(b)(3)(A)) *or* under a comprehensive monthly fee (or other) basis (under section 1881(b)(3)(B)). We have interpreted this as authorizing HHS to reimburse under one or both of these methods. To implement the objectives of section 2145, we have chosen to pay only by the monthly capitation method, to pay equal amounts for home and in-facility patients, and to discontinue the initial method, which is not suited for promoting home dialysis.

Comment: Some commenters criticized our view that our proposal would create incentives for physicians to treat more patients at home. Some of these claimed that physician reimbursement has no effect on who goes on home dialysis. Commenters also stated that the proposed method would disadvantage physicians who treat only sicker patients who are not suitable for home dialysis. These commenters argued that our proposal violated section 1801 of the Act, which prohibits Federal supervision or control over the practice of medicine or the manner in which medical services are provided, by attempting to affect which patients are put on home dialysis.

Response: Section 1881(b)(3)(B) of the Act, explicitly authorizes the Secretary to reimburse physicians on a basis that "effectively encourages the efficient delivery of dialysis services and provides incentives for the increased use of home dialysis." This statutory direction indicates that Congress assumed that physicians, as the leaders of the medical team responsible for the patient's care, do have an influence on patient choice and that our reimbursement methodology should recognize that influence. We believe our monthly payment will be adequate reimbursement for the services covered under these payments. Physicians may bill on a fee-for-service basis for

services furnished in addition to those covered under the monthly rate. The comments arguing that the proposal disadvantaged physicians who treat only sicker patients provided no evidence that there is a significant number of physicians who have practices that are necessarily restricted to the supervision of patients who must dialyze at a facility. If a physician voluntarily conducts his practice such that he retains supervision only over the sicker patients, that is an individual decision that should not affect the overall system for physician reimbursement.

6. Notification and Revision of Rate-Setting Methodologies and Payment Rates. The proposed regulations governing reimbursement for both dialysis treatment and physician services did not propose to incorporate the actual rate-setting methodologies, but proposed that, if, as a result of our annual review of data, we proposed to change these methodologies, we would publish in the **Federal Register** for public comment a notice setting forth the proposed changes. We have revised the final regulations to specify that we will publish notices of changes of rates or methodologies in accordance with the rulemaking procedures established by the Department.

Comment: We proposed in the NPRM to publish changes in payment rates resulting from incorporation of updated cost data in a general notice in the **Federal Register.** We intended to solicit public comment only for proposed revisions which change the methodology for setting payment rates. Several commenters said that we cannot publish any subsequent revised rates without providing an opportunity for public comment even if there is no change in methodology, arguing that this would violate the Administrative Procedure Act and prevent the public from commenting on the data and calculations.

Response: We are not required to publish rates in a notice for comment if we use the same methodology. This is a mechanical procedure of substituting more current data. When we have improved cost data, based on the new annual cost reports for ESRD facilities, we will review the prospective payment rates we are now establishing and consider whether they are adequately fulfilling their objectives. If we determine that program objectives could be better achieved by establishing new rates, without revising the methodology, we would calculate new base rates and could issue them in accordance with the Department's rulemaking procedures without opportunity for prior public comment. Similarly, if we received new Bureau of Labor Statistics (BLS) data that were incorporated in revised and updated area wage indexes, we would publish a notice setting forth the revised base rates and area wage indexes. We have modified the final regulations to clarify that all changes in payment rates resulting from incorporation of updated cost data or general revision of geographic labor cost adjustment factors may be issued without opportunity for prior comment. Although we would not publish such rate revisions for comment before implementing them, we would, of course, accept comments on the technical accuracy of our computations, and would make the new data available to affected parties. In the event that this resulted in identification of an actual error, we would then determine what would be the most appropriate administrative remedy.

Comment: Several commenters wanted the regulations to require us to update the prospective rates annually. Generally, these commenters wanted us to establish a regular mechanism for incorporating an annual inflation adjustment in the payment rates.

Response: We will notify facilities of their payment rates annually. However, we will actually change the rates only when our data indicate the need. Based on past experience, we cannot predict whether the per treatment costs of dialysis will increase due to inflation or decrease due to new efficiencies. (The $138 per treatment payment screen has remained unchanged since 1974 because increased efficiencies in the technology and delivery of dialysis services have offset the cost increases of some components of the services.) Provision for an annual inflation adjustment would therefore be unwarranted.

7. Target Rate Reimbursement for Home Dialysis. The optional target rate payment method was established by the End-Stage Renal Disease (ESRD) Program Amendments of 1978 (Pub. L. 95–292), which added section 1881(b)(6) to the Social Security Act. This section required HCFA to establish target reimbursement rates for home dialysis for patients under the direct supervision of a hospital-based or independent renal dialysis facility.

Pub. L. 97–35 raised the limit on the maximum target rate from 70 percent to 75 percent of the average in-facility payment and also explicitly permitted the target rate to be replaced by a prospective system established under section 2145. Therefore, in the NPRM published February 12, 1982, we gave public notice that we are discontinuing the target rate payment method effective on the date that these final regulations are implemented, and we are terminating all existing target rate agreements as of that date. We are amending the appropriate regulations accordingly. (Regulations governing these optional agreements between HCFA and facilities are found at 42 CFR 405–691. Regulations governing the target rate reimbursement method and applications are at 42 CFR 405–440.)

8. One Hundred Percent Cost Reimbursement for Home Dialysis Equipment, Installation, Maintenance, and Repair. The 1978 ESRD Amendments provided that, under certain circumstances, the Secretary may reimburse the full cost of home dialysis equipment, installation, maintenance, and repair. This program was intended to encourage home dialysis by relieving the coinsurance burden on the beneficiaries, and also to avoid high equipment rental payments, which have sometimes exceeded the purchase price.

If this option were retained, the composite rate would have to be adjusted to account for the fact that some of the facility's equipment and related services costs would already have been reimbursed by Medicare. Therefore, we proposed to discontinue this option. We stated in the NPRM that we believed that the prospective rates will establish sufficient incentive for home dialysis and that the 100 percent reimbursement option creates added program expenses that are not warranted. Eliminating this option will make the prospective system both simpler and more comprehensive and will reduce the recordkeeping burden for the facilities. Therefore, the reasonable cost of equipment furnished to home dialysis patients on or after August 1, 1983, is no longer reimbursable at 100 percent.

Comments: Some commenters argued that we had no legal basis for discontinuing the provision of 100 percent reimbursement for home dialysis equipment.

Response: The legal authority for this provision is in section 1881(e) of the Act. That section states that the Secretary *may* authorize payment at 100 percent. It does not require that the Secretary do this.

Comment: Some commenters said that discontinuing the "100 percent equipment" program would create cash flow problems. In addition, the current high interest rates will prevent facilities from financing the purchase of equipment, and therefore from sending patients home.

VOL 48 ISS 92 MAY 11 1983 UMI

Response: We do not believe these factors are prohibitive for several reasons:

- Many new home patients are CAPD patients and do not require a machine.
- If home dialysis is cheaper, as our figures and many commenters agree, then a machine will be a good investment over time, and facilities will have a substantial incentive to purchase equipment for their home dialysis patients.
- At least one major manufacturer and supplier of home dialysis equipment and supplies indicated in its comments that it has offered to furnish all home dialysis equipment, supplies, and maintenance (including water treatment where necessary) to facilities at a price per treatment sufficiently low (an amount less than $97 per treatment) to allow the facilities a margin for furnishing home support services.
- We want to keep equipment costs under the composite rate to simplify billing and program management, and to ensure that equipment costs are subject to the same market discipline created by the prospective payment rates as are other costs.

Comment: Various commenters suggested ways in which we could continue this provision. These commenters believe that, in addition to the cash flow problems cited above, discontinuing this provision would be inequitable since some patients would thereafter be excluded from its benefits, and that discontinuation would not promote home dialysis. Some suggested prorating the composite rate for those patients who receive their home dialysis equipment through facilities that have agreements under the program. Others suggested modifying the program, paying 100 percent only of the capital cost of equipment and excluding water treatment, maintenance and repair services, and so forth.

Response: We want to keep equipment costs under the prospective rate system so that facilities have an incentive to contain these costs. The prospective rate is intended to be an all-inclusive rate that allows facilities maximum flexibility. They may incur high machine costs but low labor costs for one patient, and vice versa for another patient. The rate provides an incentive to keep the total cost down. Removing equipment from the rate would remove the cost containment aspect of the incentive as it applies to machines and would also reduce the facility's flexibility. It would be administratively more cumbersome to have more than one rate per facility. We have reviewed carefully the various suggestions in the comments and have concluded that, because they fail to include all equipment costs within the prospective payment rate, they are not consistent with the objectives of the prospective payment system.

To date, approximately 800 machines, serving about 8 percent of the home dialysis population, have been furnished. These include machines that were already in patients' homes and converted to 100 percent reimbursement. Any equipment already purchased under these agreements will still be handled under the pertinent regulations and the terms of the agreements. In these cases, we will reduce the composite rate that we pay to the facility be $12 per treatment, for those patients who were furnished equipment, to account for the fact that the dialysis machines have already been purchased and installed. The $12 figure is primarily based on the results of our home dialysis cost reviews, which showed total hemodialysis equipment costs to be $13 per treatment and intermittent peritoneal dialysis equipment costs to be approximately $11 per treatment. The weighted average of these two figures, taking into account the number of treatments furnished under each mode, is over $12 per treatment. Further data that are available to us from other sources support $12 as a reasonable figure.

Comment: Some commenters said that discontinuing the "100 percent equipment" program would be a disincentive to home dialysis because home dialysis patients' coinsurance obligation would increase over present amounts.

Response: As we stated above, the difference between the composite rate with "100 percent equipment" and without will be $12. Thus, the difference in the patients' coinsurance liability will only be $2.40. Furthermore, most patients do not pay their coinsurance out-of-pocket. Most often those amounts are paid by other organizations; e.g., one of 39 State programs or private insurance. We believe that the incentives of the new reimbursement system will operate most effectively if all of the components of the dialysis service are included under the composite rate.

9. Standards for Identifying Hospital-Based Facilities. Because the rates set under our methodology pay more for treatments furnished by hospital-based facilities, we must ensure that there are clear and unambiguous standards for determining which facilities are eligible for these higher rates. The NPRM set forth these standards. We received no comments on them, and they remain unchanged in the final regulation.

We note that, if a facility is based in a skilled nursing facility (SNF), the dialysis facility has the same status as the SNF. That is, a facility based in a hospital-based SNF will be considered hospital-based. If the SNF is independent, or is not an integral and subordinate part of the hospital to which it is related, the facility will be considered independent. (Note: No participating dialysis facility is currently known to be SNF-based.)

We also wish to note that we are reviewing the differences between these reimbursement-related standards for identifying hospital-based facilities, and the certification requirements for ESRD facilities, with a view to making future revisions to resolve any problems identified during the implementation of these final regulations.

10. Recordkeeping and Reporting Requirements. The NPRM also set forth proposed recordkeeping and reporting requirements that would be consistent with the demands of the prospective reimbursement system. We received no substantive comments on them and they remain essentially unchanged in the final regulation. (The inapplicability of Subpart D provisions related to reimbursement of hospital-based physicians was discussed in the preamble of the NPRM, but was inadvertently omitted from the proposed regulations text. This omission has been corrected in these final rules.) These requirements will be met by compliance with the cost report forms that are already approved and available to facilities. These are supplemental worksheet I of the Form HCFA 2552 (OMB approval number 0938–0050) for hospital-based facilities, and Form HCFA 265 (OMB approval number 0938–0236) for independent facilities.

III. Rate-Setting for Dialysis Treatment

A. General Overview

The NPRM proposed a prospective rate-setting methodology for dialysis services using composite rates for home and in-facility treatments and distinguishing between hospital-based and independent facilities. We used median audited per treatment costs of 110 facilities as the basis of the rates. Under our proposal, each facility would receive a certain payment rate per treatment that would be adjusted to account for geographic differences in the costs of labor. The adjusted payment per treatment for independent facilities would average around $128 and range from $109 to $143. The adjusted payment per treatment for hospital-based facilities would average around $132 and range from $114 to $146.[1] A facility would receive its appropriate payment rate per treatment regardless of whether the treatment is furnished in the facility or in the patient's home. There would be no year-end adjustments to ensure that the facility receives no more or less than its allowable reasonable costs. If a facility's costs per treatment were less than its payment rate, it would be allowed to retain the difference; if its costs were greater, it would not be able to recover them unless it requested and was granted a higher payment rate under the exception process.

B. Costs Included in Setting the Rate

The statute requires that the composite rate be an all-inclusive payment to approved dialysis facilities for all necessary institutional and home dialysis services, including items, supplies and equipment. These are specified at 42 CFR 405.231 (o) and (p). Payment for all of these items and services is included in the rate so that where the rate applies, facilities may not bill in addition to the rate for any of them. Furthermore, in order to participate in the program, the facility must furnish all necessary dialysis services, supplies, equipment and items (see 42 CFR 405.2163). Accordingly, the costs included in setting the rate were the reasonable costs of all these services, supplies, equipment and items.

We determined reasonable costs of the sampled facilities in accordance with the principles of provider reimbursement as described in 42 CFR Part 405, Subpart D, except for the following sections. These are specifically listed in the regulations (see section III. E., above) as not applicable for reporting ESRD facility costs.

- 42 CFR 405.429 Return on equity capital of proprietary providers;
- 42 CFR 405.430 Inpatient routine nursing cost differential;
- 42 CFR 405.436 Reimbursement of Organ Procurement Agencies (OPA) and histocompatibility laboratories; and
- 42 CFR 405.454 Payment to providers, through
- 42 CFR 405.488 Effect of principles.

In our audits, we also excluded costs as unreasonable if they did not meet the criteria set forth in § 405.451, which concerns costs related to patient care.

We included the cost of furnishing routine ESRD laboratory services in the cost per treatment calculations. (Under our regulations at § 405.231(o), these services are defined as institutional dialysis services.) Under the prospective reimbursement system, facilities are required to furnish routine laboratory tests as an integral part of the dialysis treatment, either directly or under an arrangement as defined in our regulations at § 405.2102(b). We have included an amount for these costs in calculating the prospective rates. Thus, if a dialysis facility has its routine testing done under arrangement with an independent laboratory, it must pay the laboratory itself, out of its prospective rate. Independent labs are not permitted to bill the program directly for routine tests.

As we indicated in the NPRM there will be no change in billing and reimbursing for nonroutine laboratory tests. These tests will continue to be billed and paid for separately, by either the facility, the physician or the independent laboratory.

Comment: Some commenters stated that, in making adjustments to the cost data from our audit sample, we disallowed real costs, that is, legitimate, unavoidable costs of doing business, that should have been included in determining the per treatment costs of dialysis. These "real" costs included items such as facility costs for certain taxes, stockholder servicing costs, and return on equity capital.

Response: In analyzing the audit results, our objective was not to determine all the costs incurred by the facility, but to determine the reasonable cost of furnishing dialysis services in an economical and efficient manner. In doing this, we followed the Medicare principles for determining reasonable cost, as set forth in regulations contained in 42 CFR Part 405, Subpart D and in our Provider Reimbursement Manual (PRM; HCFA Publication 15–1). In addition, we excluded costs from the rate-setting base that we determined were inconsistent with the prospective rate system.

- We excluded income taxes on profits earned by proprietary facilities because those taxes are not allowable costs under Subpart D and section 2122 of the PRM. (We consider these taxes to be costs of operating as a proprietary facility, rather than costs related to patient care under § 405.451 of our regulations.)

Furthermore, the prospective system is designed to provide incentives for efficient and economical operation through the use of fixed payment rates. Different facilities are in competition with each other to offer services within these rates. Under this type of rate, facilities that have input costs not experienced by other facilities are free to make up for this by achieving efficiencies in other input cost centers.

- We excluded stockholder servicing costs from the rate-setting base because they are not related to patient care, and therefore are nonallowable under 42 CFR 405.451. See section 2134.9 of the PRM.
- Our reason for excluding a return on equity for proprietary facilities is similar. While the Secretary is required to pay such a return to certain proprietary providers reimbursed retrospectively on the basis of reasonable cost (section 1861(v)(1)(B)), section 1881(b)(2)(c) gives the Secretary the option to not pay such a return to ESRD facilities. In addition, return on equity is a feature of retrospective cost reimbursement, under which the statute precludes payment to a proprietary facility above its Medicare reasonable costs. Under a prospective incentive systems of course, a proprietary facility is free to keep any amount by which its prospective payments exceed its costs. We believe that including such a return in the rate base for proprietary facilities would weaken the incentives established through the prospective rates. The facilities are able to earn a return on their investment by reducing their per treatment costs below their payment rates by management efficiencies and increased use of home dialysis.

Comment: One commenter said that our audit allowance of $32,000 per year for salaries of administrators and medical directors was an inappropriate limit. The commenter argued that a good administrator or director would be creative and effective enough to reduce the costs of operations sufficiently to justify a salary in excess of $32,000. It argued that we should only have audited the bottom-line cost per treatment, and not set a screen for administrator and medical director salaries.

[1] These estimates of the average per treatment payments have decreased compared with the average rates estimated in the NPRM, to $127 for independent facilities and $131 for hospital-based facilities. There are two reasons for this change. The first is related to the data we use to construct the area wage index discussed below. In the February, 1982 NPRM we used the latest wage data available at that time from the Bureau of Labor Statistics, which were 1979 data. Since then, the 1980 wage data have become available. These data incorporate revised geographic area designations, based on the 1980 census, and include Puerto Rico for the first time. The revised area wage indexes computed on the basis of these data have been used to adjust the audit data and compute our base rates, and have been incorporated in our estimation of average payment rates. Some of the difference in estimated rates results from these data. The other factor resulting in the decreased amount of the estimates is the estimation methodology itself. We have refined the methodology for estimating the effect of the area wage index in order to improve its accuracy, and this also accounts for some of the difference in the average payment estimate between the NPRM and these final regulations.

VOL 48 ISS 92 MY 11 1983 UMI

Response: In rate-setting we had to establish the rate on the basis of what we determined to be the costs of typical economical and efficient facilities. A facility is free to decide that it is cost-effective to hire an administrator or medical director at a higher salary because he or she has superior skills. However, we cannot include excessive salaries in the rate-setting data base when the great majority of facilities are paying $32,000 or less.

The most significant adjustment to the audited costs of the independent facilities concerned compensation of administrators and medical directors, which accounted for 23 percent of the total adjustment. However, this resulted from a very few, but quite large adjustments. The limit of $32,000 per year which we applied to these positions is the limit applied to administrators of 50 to 99 bed hospitals in HHS Region I, the region with the highest compensation allowances.

We made adjustments to account for unallowable amounts for medical directors' salaries in less than 5 percent of the audited facilities (3 independent facilities and 2 hospital-based facilities). Therefore, for over 95 percent of the facilities in our audits, compensation of medical directors was considerably less than the $32,000 limit that we allowed.

C. Data Used in Setting the Rate

The February, 1982 NPRM described how we accumulated data on the costs of dialysis on which to base prospective payment rates.

Access to data.

Comment: Several commenters asked that we make the data available, as we had offered to do in the NPRM.

Response: We have done so. We made a summary of the cost data on in-facility costs and provided that to some inquirers, and have also copied the complete data on home dialysis costs and given them to those who requested them. Two commenters have come to our offices to inspect the audit data themselves. We have allowed all interested parties access to the data, have assisted them in reviewing it on our premises, and have discussed their questions and problems both in person and on the telephone.

Quality of data.

Comment: We explained in the NPRM that our data on the costs of in-facility treatment were based on audits of a sample of 110 facilities, in which we reviewed facility records for cost reporting periods from 1977, 1978 and 1979. Some commenters believed that these data were too old. They recommended that we either get more recent data, or make adjustments to our sample audit data to account for inflation. For example, some commenters provided illustrations of costs of certain input components of dialysis services, such as labor and energy costs, that have increased significantly since the time of the audits.

Response: In developing our proposed payment rates, we considered whether our audit data were becoming unusable due to factors of age and inflation. However, we found no indications that the per treatment costs of dialysis have been changing over time. Certainly there have been changes in the costs of some components of dialysis, and inflation may have resulted in increases of certain input costs, but in setting a comprehensive prospective rate, we must consider the whole cost of dialysis, and not give inappropriate weight to the costs of selected components. We believe the apparent lack of increase in overall per treatment costs is attributable to increased efficiencies in dialysis technology which have offset the increases in cost of some of the inputs of dialysis services. For example, treatment times have been reduced and automation has been increased since the beginning of the program, resulting in less labor cost per treatment. The comments which suggested that the cost data should be adjusted to account for inflation did not provide information demonstrating that the overall actual costs per dialysis session had increased since the time for the audits. For instance, one large independent provider of dialysis services suggested that consideration of rising labor costs would result in a prospective rate of $155 for independents and $158 for hospitals. The supposed necessity of increasing the prospective rate to these levels to cover inflation costs is, however, refuted by the fact that the commenter and other dialysis providers are prospering and expanding at the current rate of $138. As we pointed out in the NPRM, there has been a substantial growth in the number of dialysis facilities despite the fact that the payment screen has remained at $138 since 1974. The industry growth has continued since the time of the audits (909 facilities in 1978 vs. 1184 at present) and, indeed, 114 new facilities have entered the program since we announced the proposed prospective rate on November 25, 1981. In contrast to the comments, which provided only argument and incomplete information on actual costs, the actions in the marketplace provide persuasive evidence that the audit data, without adjustment, properly reflect the costs of dialysis services today. Accordingly, we are not making any specific adjustment for inflation in setting the initial payment rates, although we have used the data for rate-setting in a way that takes into account possible deficiencies in the data.

Comment: Some commenters stated that our audits of the facility sample were conducted inconsistently and that, as a result, our audited data were invalid and inadequate. However, no specific examples or evidence of inconsistency were given. Commenters also asserted that audited facilities were not given an opportunity to challenge the findings of the auditors or the adjustments made by HCFA.

Response: We believe that we took reasonable care to ensure that our audits were accurate and consistent. In all cases, the auditors applied Medicare provider reimbursement principles. We developed a uniform audit guide, and held training sessions for the auditors. In addition, we used audit personnel from our intermediaries because they were already familiar with Medicare rules and principles. Our audit guide did provide for an exit conference at which each audited facility would have an opportunity to discuss the findings of the auditors. Auditors were also instructed to inform facilities that they could send unsettled disputes to HCFA Central Office for a final review. Moreover, as indicated above, we made the complete audit data available to commenters, who could present information about any assertedly inappropriate findings.

One commenter apparently had a summary we had prepared describing the audit adjustments we had made, and may have mistakenly assumed, because of the wide range of adjustments, excluding or disallowing certain costs for various components of dialysis services, that the audits were inconsistent. However, such variation is actually better explained by the fact that our auditors, applying consistent principles, found unreasonable costs in differing amounts for different facilities.

Costs of home dialysis.

Our data on the cost of home dialysis were more limited than our data on in-facility dialysis. Therefore, when Pub. L. 97–35 was enacted, our first priority was to obtain accurate data on the cost of home dialysis. We selected 23 dialysis facilities and two State kidney programs around the country that had home programs.

The HHS audit agency visited each of these facilities and reviewed its costs. Because of limited time, the audit agency did not attempt to make adjustments as to the reasonableness of these costs, but simply accepted the costs as reported. Although the facilities represented less than 5 percent of the total number of ESRD facilities with home programs, it included 10 of the 13 largest home programs and represented almost 30 percent of all home patients. The facilities were located in 15 States and in all 10 HHS regions.

Comment: Some commenters claimed that our home dialysis audits were not representative of average home program costs.

Response: We chose the home programs to be audited in order to sample as many of the facilities that provided the full range of home dialysis services, supplies and equipment as possible. This would give us the most complete picture of the total cost of home dialysis. Many of the facilities in the sample had large programs, but some of the facilities did not. For example, one facility had only four patients.

The purpose of these audits was to determine the cost of home dialysis when furnished in a reasonably economical manner. This was not intended to include start-up costs for home programs. The intent of the prospective reimbursement systems is to promote efficient home programs regardless of their size. Therefore, we believe it is most consistent with the intent of the legislation to base our composite rates on the costs of reasonably efficient home dialysis programs.

Comment: Some commenters said that we conducted only cursory audits to determine the costs of home dialysis. Others noted that a General Accounting Office (GAO) study had found that home dialysis costs an average of $105 per treatment as opposed to $97 per treatment in our cost study.

Response: When we were studying the costs of home dialysis in order to implement section 2145 of Pub. L. 97–35, we accepted the costs as recorded in the facilities' books because we could not go behind those costs and actually audit them within the time constraints. This may have resulted in overstating the facilities' actual per treatment costs of furnishing home dialysis in an economical and efficient manner. Thus, to the extent that our audits of home dialysis costs may have suffered from their being conducted quickly, any shortcomings would favor providers by overstating actual costs and thereby resulting in higher rates of payment. The GAO did not audit facilities, but instead reviewed home dialysis bills as paid by Medicare carriers. As a result, GAO's dialysis cost study is based on reasonable charges paid to suppliers and patients who chose to bill Medicare directly, and did not include the costs incurred by ESRD facilities that furnish home dialysis services. (ESRD facilities that furnish home dialysis services are paid through intermediaries and never bill the carriers.) Therefore, the GAO figures do not reflect the economies that can be achieved by facilities, such as bulk purchasing discounts or limitations on excess quantities or waste of supplies. The exclusion of facilities from the GAO study may have accounted for the slightly higher costs reported. In any event, the commenter who pointed and the difference in findings between our study and the GAO study did not identify any deficiencies in our study or otherwise provide information indicating that our study was invalid.

Comment: Various commenters suggested that, in determining the cost of home dialysis, we should include in these costs amounts for paid aides (which have been included in the optional target rate reimbursement system), hospitalization, or an allowance to take into account the less efficient use of supplies and equipment in the home setting. (The costs of aides and hospitalization were not included in our review of home dialysis costs.)

Response: We excluded each of these costs from the rate base for different reasons.

- We excluded the cost of paid aides for the reasons stated in the House Committee Report on H.R. 3850 (H.R. Rep. No. 97–143, Part 1, page 76). The report states:

> The committee recognizes that some patients who are appropriate candidates for self-dialysis in the home may be precluded from treatment in that setting because of the absence of a family member or other individual to assist them with dialysis. This is particularly true with hemodialysis treatment as opposed to other treatment techniques, such as continuous ambulatory peritoneal dialysis (CAPD). While provision for the costs of providing for paid assistants for home patients would permit these patients to dialyze in the home setting, the increased labor costs that would result would virtually eliminate the relative cost effectiveness of home treatment. Although facilities would not be precluded from providing paid assistants to patients who require such services, under the composite single rate approach, a separate allowance for such costs in the home component of the composite rate would not be authorized.

- We excluded the costs of hospitalization because these costs are not a component of home dialysis services, and should accordingly be reimbursed separately. We took the same approach in computing the costs of in-facility dialysis. Our per treatment payment rate is intended to cover only the dialysis session itself, not other services required by ESRD patients, which will remain separately reimbursable.

- We did not include an allowance in the rates to reflect the less efficient use of supplies and equipment by home dialysis treatments, as compared to those treated in a facility. We believe the incentives created by the composite rate will be sufficient to offset such inefficiencies, if there are any. Under the composite rate, supplies will be mostly purchased by facilities, which will be able to obtain volume purchasing advantages. Since each home dialysis patient needs a separate machine, equipment may be less efficiently used in the short term. However, the equipment will also last longer. To the extent that the total number of dialysis hours per home dialysis machine is the same or greater than the total number of hours per in-facility machine, there should not be long-term inefficiencies in equipment use.

D. Rates for Independent and Hospital-Based Facilities

Section 2145 of Pub. L. 97–35 requires us to establish prospective rates of payment for dialysis services. The statute gives preference to a method of rate determination using a single composite weighted rate for services furnished in hospital-based facilities and for services furnished at the patient's home by such facilities based on the mix of patients who receive dialysis services at the facility and at home and the relative costs of providing services in each setting. A similar single composite weighted rate would be established for home and in-facility services provided by independent facilities.

The proposed methodology based rates for both hospitals and independents on the median costs for all audited facilities. The median costs for in-facility treatment were composited with the costs for home treatment, weighted by the proportion of home treatments furnished by hospitals and independents respectively. Two further adjustments were made in the methodology to derive hospital-based payment rates: an adjustment of $2.10 per treatment to accommodate the additional overhead costs that hospitals are required to allocate to their outpatient renal dialysis units, and an adjustment of the rate for hospital-based facilities to 105 percent of the median costs for all facilities. Both hospital and independent base rates were to be adjusted by an area wage index, resulting in a wide payment range, with an estimated average independent rate of around $128 per treatment, while the

VOL 48 ISS 92 MY 11 1983 UMI

estimated average hospital-based facility rate would be around $132. (As a result of applying the most recent area wage index and refining our method for estimating average payment rates, we now estimate that the average per treatment payment rates will be $127 for independent facilities and $131 for hospital-based facilities.)

The rate-setting methodology and the resulting payment rates were the subject of numerous comments. In general, hospitals favored a greater difference between the rates for independent and hospital-based facilities, and criticized aspects of the methodology that tended to draw the rates closer. Conversely, many independents believed that efficiency and competition were increased by paying the same amount for a service regardless of the type of facility furnishing it. Some commenters directly criticized us for encouraging home dialysis through the composite rate, especially CAPD. Some also claimed that reducing payment rates was not the only, or the most appropriate way, to reduce program costs. Several commenters stated general support for a prospective, composite rate, but had specific objections to the rate methodology we proposed.

Dual vs. Single Rate.

Comment: The commenters were divided on whether they preferred a dual rate structure or a single rate. Some commenters said a dual rate methodology should not combine the cost data of hospitals and independents but should consider their costs separately. Other commenters said that the statute required us to encourage efficiency, and that this could best be done by basing the rate on the costs of efficient and economical facilities and setting a single rate. Some commenters argued that we were proposing a modified single rate, instead of an actual dual rate. They based this argument on our use of the same combined cost data for both rates rather than setting separate rates based on separate data. They claim that this does not adequately recognize differences between hospital-based and independent facilities (sicker patients, staffing for emergencies, 24-hour operation, more restrictive State and local regulations) and results in very different treatment of the two types of facilities relative to their median costs of treatment (paying hospital-based facilities an average of more than $8 less than median of that group's costs per treatment and independents an average of $14 more than their median cost per treatment).

Response: We have utilized a methodology that results in different rates for hospital-based and independent facilities in accord with the statute. Hospital payment rate will be on the average about $4 more per treatment than independents. As described in detail in the NPRM, the separate rates are based on separate weighting factors for home population, recognition of the higher general overhead costs incurred by hospitals, and an overall 5 percent upward adjustment for hospitals to allow for possible deficiencies in the data and to mitigate the effects on hospitals of the compositing.

The statute does not prescribe in detail the method for setting dialysis rates, but does require a method that distinguishes between hospital-based and independent facilities and that promotes efficiency. We must set the rates on a cost-related or other economical basis. We believe that combining the cost data from all facilities, and making adjustments to the data base to reflect legitimate cost differences incurred by hospital-based facilities as a class, is more accurate and equitable than using separate sets of data to set separate rates. This method:

- Recognizes a similar cost for a similar service;
- Recognizes that some hospitals have costs as low as the average independent facility; and
- Does not penalize the efficient, lower-cost, independent facilities for their efficiency.

We believe this methodology represents a reasonable balance between the statutory mandates of promoting efficiency and setting methodologies for hospital-based and independent facilities.

Hospital rate adjustment.

Comment: Several commenters questioned our use of the 105 percent adjustment factor for hospitals, and claimed that it, as well as other aspects of the reimbursement methodology, were designed solely to result in certain predetermined rates and program savings, without having a rational basis.

Response: In the NPRM we proposed to set the rate for hospital-based facilities at 105 percent of median costs, while the rate for independents was proposed to be set at 100 percent of median costs. As explained in the NPRM (47 FR 6565), the adjustment to the hospital's rate is appropriate because of the greater impact that any deficiencies in the data, as well as the use of composite rates, would have on hospitals. The comments questioning use of the adjustment did not challenge the fact that such greater impact existed, and we continue to believe that this constitutes a rational and reasonable basis for the adjustment. The contention that the methodology was adopted to result in predetermined rates or savings was based on internal Departmental documents that were apparently procured by the commenters which showed comparisons of rates and program savings. These comparisons were for the purpose of understanding the effects of the alternative methodologies under consideration and not a device to reach predetermined objectives.

Average Rates.

Comment: Some commenters contended that the average rates of $132 and $128 proposed in the NPRM were not the average rates that would actually result from use of the proposed methodology. Apparently, the commenters were basing this comment on a draft internal Departmental document that they had obtained, in which a wage adjustment factor had been developed to estimate the average national effect of the index. This factor had been applied to the entire rate, and the commenters asserted that it should have only been applied to the labor component of the rates. If the factor is applied only to the labor component, the commenters asserted that the actual average rates would be $128 and $125.

Response: These commenters are incorrect. The wage adjustment factor used in the Departmental document was an analytical tool designed to be applied to the entire rate.

Adverse Effect on Hospital-Based Facilities.

Comment: The payment rates we proposed appear to have a much stronger effect on hospital-based than independent facilities. Some commenters noted that the proposed base rate per treatment for hospitals would be more than $8 below the median per treatment costs of hospitals shown by our audits. Hospitals claimed that their higher costs were necessary and justifiable because:

- Hospital-based facilities treat sicker patients and have higher personnel costs;
- Hospital-facilities must have the potential to furnish emergency dialysis and operate 24 hours; and
- Medicare cost allocation rules require the hospital to assign overhead costs to the dialysis facility.

Response: Our audits and other data do show that hospital-based facilities have higher costs than independents, but we have not been able to show that all these costs are necessary and justified and, therefore, that they should be included as legitimate costs of

furnishing dialysis services in our calculation of an appropriate prospective rate for efficiently operated facilities. We believe that, at least to some extent, these higher costs are a result of the disincentives to economy and efficiency under the retrospective cost reimbursement system. For example, we have no data to confirm the nature of the average hospital patient and to correlate this to cost, and the comments that argued that hospitals have higher costs because of sicker outpatients provided no data to support their contention. HCFA has been continuing its research into the question whether the higher costs of some hospitals are attributable to sicker patients. Our Office of Research has recently completed a series of six analyses comparing patient mix of hospital-based and independent facilities (Paul W. Eggers, Ph.D., *Analyses of Indications of Case-Mix Differences Between Freestanding Facility and Hospital-Based Medicare ESRD Patients.* Working paper #OR-38; May 14, 1982.) These analyses are available on request from: Office of Research and Demonstrations, Health Care Financing Administration, Oak Meadows Building 1-A-12, 6340 Security Boulevard, Baltimore, Md. 21207.

Two of the analyses in this study do show that mortality and hospitalization rates are somewhat greater for hospital-based patients, and this indicates that some hospitals may in fact have a sicker patient case mix than independent facilities. However, another analysis in the study showed that these factors were not related to differences between allowed charge levels for hospital-based facilities. In short, although hospitals may have sicker patients, this case mix does not seem to explain their higher costs, which appear instead to be the result of inefficiencies.

We have allowed for the possibility that some facilities incur higher costs due to unusually intense dialysis services for special patients through our exception criterion for atypical service intensity patient mix. Under this exception, a facility that could show higher costs due to medically necessary atypically intense services could receive a higher payment rate. Some hospital-based dialysis facilities are certified to furnish only out-patient maintenance dialysis, just as independent facilities are. Since we can not generally support a statement that all hospitals generally have sicker patients, and higher costs attributable to dialysis services for those patients, than independent facilities, we believe the exception process is the most appropriate way to deal with this problem.

The comments suggesting that hospitals should receive a higher rate because they provide emergency services are not persuasive. We do not cover the emergency services referred to by commenters under the payment method being established. The rate we are setting is for maintenance dialysis only, not for acute care. We believe that we are setting the rate at a level adequate to cover the costs associated with those services, including overhead. Our methodology includes an adjustment that recognizes that hospitals have per treatment overhead costs higher than independents, as mentioned in the comments. Further, hospitals are not bound by the cost allocation requirements in the Medicare regulations. Hospitals can submit alternative ways to allocate costs for approval by their intermediary, if they believe they have a more accurate way to do it.

Although hospitals appear to be more adversely affected by the new prospective rates than independent facilities, the composite nature of the rates substantially mitigates the adverse effect for hospitals. Although the base rate and average per treatment payment rates will differ by about $4, the hospitals will also benefit from the composite effect to a much greater extent than independent facilities because they currently have many more patients dialyzing at home. To illustrate this effect, we have developed the following example, in which we compute hypothetical "effective payment rates" for in-facility treatment by taking into account the revenue above costs for home dialysis treatment. (This illustration uses average per treatment costs from our audits and home costs reviews, and average per treatment payments.)

Illustration of the Effect of Home Dialysis Reimbursement on In-facility Reimbursement.

Because the composite system pays the same amount for in-facility and home dialysis, the revenue above costs from home dialysis has an effect similar to a higher "effective" payment rate for in-facility treatments.

A TYPICAL HOSPITAL-BASED FACILITY

Furnishes..... 5,000 total treatments (75 percent in-facility, 24 percent home).
3,800 In-facility treatments, at $131 per treatment.
1,200 Home treatments, at $131 per treatment.

We plan to pay $131 per treatment, regardless of setting, and since we estimate that home dialysis costs approximately $97 per treatment, the facility will have $40,800 in home dialysis revenue above costs.

1,200	Home dialysis treatment.	1,200	
×$97	Cost of home dialysis.	×$131	Payment rate.
$116,400	Cost of home dialysis.	$157,200	Home dialysis revenue.

$157,200	Revenues.	3800	In-facility dialysis treatments.
−116,400	Cost.	×$131	Payment rate.
$40,800	House dialysis revenue about costs.	$497,600	In-facility dialysis revenue.
		+40,800	Excess home dialysis revenue above costs.
		$538,800	Total revenue available to offset in-facility cost.

If a facility applies this $40,800 to its in-facility costs, it would yield an effective in-facility rate of $142.

$538,800 divided by 3,800=$142 treatment.

A TYPICAL INDEPENDENT FACILITY

Furnishes..... 10,000 Total treatments (89 percent in-facility, 11 percent home).
8,900 Home treatments, at $127 per treatment.
1,100 Home treatments, at $127 per treatment.

We will pay $127 per treatment, regardless of setting, and since we estimate that home dialysis costs only $97 per treatment, the facility will have $33,000 in home dialysis revenue above costs.

1,100 Home dialysis treatments.	1,100 Home dialysis treatments.
×$97 Cost of home dialysis.	×$127 Payment rate.
$106,700 Total cost of providing home dialysis.	$139,700 Home dialysis revenue.

$139,000	Revenues.
−106,700	Costs.
$33,000	Home dialysis revenue above costs.

If a facility applies this $33,000 to its in-facility costs it would yield an effective in-facility rate of $131.

8,900	In-facility dialysis treatments.
×$127	Payment rate.
$1,130,300	In-facility dialysis revenue.
+33,000	Home dialysis revenue above costs.
$1,163,300	Total revenue available to offset in facility costs.

$1,163,300 divided by 8,900=$131 per treatment. This shows a difference of $11 per treatment ($142–$131) between the effective in-facility reimbursement rates for hospital-based and independent facilities.

E. Composite Rates for Home and In-Facitity Dialysis Introduction

In accordance with section 2145 of Pub. L. 97–35, the NPRM gave preference to a rate-setting method that combines two components—the cost of in-facility dialysis and the cost of home dialysis—to yield a composite rate that would be paid to a facility for all its dialysis treatments, whether furnished in the facility or at home.

In computing a composite rate, we proposed to weight the per treatment costs of home and in-facility dialysis by the proportion of patients dialyzing at each location. We proposed to apply the percentage of home dialysis patients served by hospitals to calculate the hospital composite rate, and the percentage of home dialysis patients served by independent facilities to calculate the independent facility composite rate.

Comment: In determining the prospective payment rates, the NPRM proposed weighting the costs of in-facility dialysis and home dialysis by the proportion of patients dialyzing in each setting. Different proportions were used for hospital-based and independent facilities based on their actual experience. Some commenters stated that they believed we were inconsistent and were penalizing hospitals for their higher percentage of home patients because we proposed to base rates for both hospital-based and independent facilities on the median costs of all facilities, while at the same time we proposed to use separate percentages of home patient population for making the composite computation. Some commenters suggested using the combined national average home patient population percentage instead of the separate respective percentages of hospital-based and independent facilities; they asserted that this would avoid disadvantaging those facilities, that is, hospital-based facilities, that already have achieved larger home dialysis programs.

Response: We believe that using the percentage of home patients served by hospitals to compute the hospital rate and the percentage of home patients served by independent facilities to compute the independent rate is fully consistent with the statute. This methodology is not inconsistent with our use of the costs of all facilities to set the basic rate. In the case of the base rate, we use data from all facilities because the statutory objective is to determine the costs of efficient dialysis, adjusted for excess costs attributable to hospitals as a class. The combined data base is a broader measure of the costs of operating an efficient facility. We do not believe that the overall methodology penalizes hospitals because they have two rate-setting adjustments over independents (an overhead add-on plus an additional 5 percent allowance), and they will be paid the composite rate for that 23.5 percent of their patients who are already less expensive home patients. The illustration above demonstrates how the home percentage effect on the composite rate benefits hospitals.

Promoting Home Dialysis.

Comment: Several commenters pointed out various ways in which they believed that our composite rate proposal would adversely affect home dialysis. For example, some commenters believe the composite rate would actually establish a disincentive for home dialysis, since the higher the percentage of home patients included in the compositing formula, the lower the rate would be in future years. Other comments stated that a patient's option to bill Medicare directly, without going through a facility for all non-physician components of home dialysis, would undermine the composite rate system and diminish the composite rate incentives for home dialysis. In addition, we were criticized for promoting home dialysis on the ground that, since the best candidates for home dialysis are also good candidates for transplantation, we are creating a disincentive for transplantation.

Response: The composite rate system is being established in the context of legal requirements to promote home dialysis. At the same time, the law ensures the right of a home dialysis patient to bill Medicare directly for home dialysis supplies and equipment. We do not have the legal authority to change this right. We have clarified sections 405.544 and 405.240 to reflect the fact that home dialysis patients may bill Medicare directly for home dialysis equipment and supplies. If a patient chooses this option, reimbursement is not made under the per treatment prospective rate. Instead, payment is made under the previous reimbursement rules. That is, payment for equipment and supplies would be made on a reasonable cost basis if the patient obtained them from an approved hospital-based or independent ESRD facility. Equipment and supplies obtained from a supplier other than an approved ESRD facility would be reimbursed on a reasonable charge basis. Payment for support services is only made when these services are supplied by an approved ESRD facility. Support services obtained from a hospital-based facility would be paid on a reasonable cost basis; those supplied by an independent facility would be paid on a reasonable charge basis.

We also do not have the authority to require home dialysis over transplantation. That is medical decision to be made by the medical team and the patient. Accordingly, to the extent that either of these two concerns may detract from the effectiveness of these regulations, they must be addressed by Congress.

We do not accept the argument of the comment that the compositing formula will result in a disincentive for home dialysis because increased home dialysis would, in future years, simply result in a lower composite rate. In the first place, we are establishing a methodology only for determining initial prospective payment rates. We are not establishing a requirement that the rate be adjusted in future years to reflect the actual percentages of home and in-facility patients. We are making no commitment for a future year rate-setting methodology. Moreover, if we did adjust the rate in the future to take increased home dialysis into account, the resulting rates would presumably be no less advantageous to the facilities than the rates we are presently establishing. In the meanwhile, however, facilities can benefit substantially from encouraging home dialysis, and therefore substantial incentives for home dialysis exist.

Comment: Some commenters believed that we were placing incentives for promoting home dialysis in the wrong place. Some said we should pay a bonus to the patients, not to the facilities. Other said that our composite rate, by encouraging facilities to furnish home dialysis, would have negative impact on the State programs that have been promoting home dialysis by furnishing supplies and equipment.

Response: The composite rate specified in the law may be paid only to an approved ESRD facility, and therefore we cannot pay the rate to patients. Of course, the facility is free to pay a bonus to its home patients out of the profit it makes and some facilities may do so to encourage home dialysis. With respect to State programs, two general circumstances can exist; either the State is competitive in price or it is not.

If the State program is competitive in price with facilities or other suppliers in the area there are two possibilities:

- Home patients have the option of billing separately for equipment and supplies and may, in turn, assign their benefits to the State program; or
- A facility may have an arrangement with the State for the State to furnish equipment and supplies to the facility's patients, for which the facility would reimburse the State.

If the State program is not competitive, then both facilities and patients will be better off dealing directly with manufacturers and wholesale suppliers. In this way, the relative efficiency of the State programs will determine their role in a composite rate system.

Comment: Some commenters noted that, since home patients have to bear extra inconvenience, including costs of water, electricity, and labor, the composite rate paid to the facility may not be sufficient to overcome the patient's disincentives to dialyze at home.

Response: The prospective reimbursement system adopts a neutral position on this issue, paying the same amount for both in-facility and home dialysis. Our data show that home dialysis is cheaper. If the patient incurs these extra costs, then the facility, in competition with other facilities, can work out with the patient whether some part of its payment should go to the patient or if other amenities should be offered. Further, while some costs to the patient for home dialysis may increase, others would decrease (e.g., transportation), and the patient may enjoy substantial benefits of convenience.

Comment: Some commenters believe that they would be unable to begin training programs for home dialysis rapidly enough to be able to compete with already existing training facilities.

Response: Any facility may arrange to have any of its patients trained by another facility, provided the second facility is approved to furnish self-care dialysis training in accordance with the Subpart U health and safety requirements.

Comment: Some commenters believe training facilities should be subsidized for the patients that they train for other facilities. On the other hand, other commenters were concerned that experienced training facilities would "steal" candidates for self-care dialysis training.

Response: The facility that provides ongoing support services for the trained home dialysis patient should be profiting from that patient and perhaps some of that profit should be paid to the training facility. This goes beyond the scope of our regulations. These types of arrangements must be worked out by the individual facilities involved.

F. Area-Wage Index

Comment: Various commenters stated that the area wage index that we proposed to use is unfair, inaccurate and based on old data, resulting in too wide a variation in rates. They stated that use of the BLS data fails to recognize that facilities in neighboring SMSA's with different indexes must compete for the same labor pool. The substance of the objection to use of BLS data, which measure wage costs experienced by hospitals in various locations, is that the data overstate the degree of variation in wages of the particular types of personnel employed in outpatient ESRD facilities.

Response: In response to these comments, we are modifying the wage index on a transition period basis for the first two years. After that, we will either use an index based on ESRD program data, or revert to the BLS wage index.

The Conference Committee Report on Pub. L. 97–35 (H.R. Rep. No. 97–208, 949) indicates that the rates should reflect local wage differences. Based on the data collection activities of the Bureau of Labor Statistics (BLS), we believe that we can adjust payments by an area wage index figure that expresses the relation of local wage levels to the national average. We originally developed these area wage indexes of use in determining cost limits for hospitals, in order to account for geographic differences in the levels of labor-related costs.

We considered developing a wage index based on salary data from Medicare ESRD cost questionnaires. These data are not highly reliable because they do not represent audited costs and they are not sufficiently accurate and detailed to develop an index. Now that we have implemented improved cost reporting, a wage index specifically related to ESRD facility experience may eventually become possible through our continued evaluation of ESRD cost data or development of additional sources of wage and salary information. Until that time, these area wage indexes are based on the most appropriate data available, which we believe are the BLS data used for the Medicare hospital cost limits.

Some commenters viewed the range of variation resulting from application of the area wage index as too great for a similar service. Immediate implementation of the geographically adjusted rates exactly as proposed in the 1982 NPRM would particularly disadvantage rural facilities, which tend to be relatively isolated, have smaller programs, and have resulting high supply and transportation costs. Some commenters also believe that the area wage index adjustment would provide an unjustifiable windfall to some urban facilities that currently have per treatment costs significantly below the $138 screen. Many commenters also described situations in which the area wage index for one geographic area resulted in payment rates in that area significantly lower than the rates in neighboring geographic areas. Some of these commenters additionally claim that they must compete for labor with facilities that have higher wage indexes

VOL 48 ISS 92 MY 11 1983 UMI

and resulting higher payment rates. Some commenters claimed that the hospital wage index data collected by BLS did not accurately represent labor costs and wage level differences for ESRD services.

As noted above, H.R. Rept. No. 97–208 states that an area wage adjustment should be used in setting prospective rates. Since 1979, we have used area wage indexes based on BLS data for hospital workers in setting Medicare cost limits for routine inpatient hospital services. Based on our experience, we believe these indexes reflect reasonbly accurately the variations in the costs of living and medical care throughout the country. However, we do not yet have adequate data specifically showing regional variations in the costs of the labor inputs of ESRD services. In the absence of such data, and in view of the numerous comments we have received that raise doubts about the suitability of the area wage indexes for use with respect to ESRD outpatient facilities, we have decided that introducing the wide variations in payment rates that result from application of the indexes is not appropriate at this time. It is possible that ESRD outpatient facilities use a narrower range of personnel services than hospitals generally and that, for this or some other reason, the area wage index overstates that amount of regional variation. Because of this possibility, and in light of the information provided in the comments, we believe that it is appropriate to restrict the impact of the area wage index until we have determined whether it is completely valid for ESRD outpatient facilities.

We will initially limit the rate variations resulting from the area wage index by allowing a two-year transition period, during which the effect of the indexes will be constrained between upper and lower limits. At the end of two years, we will have had an opportunity to collect and analyze ESRD-specific salary data from our new cost report forms. If the data permits us, we will use it as a basis for developing a special wage index for the ESRD program. However, if we cannot determine appropriate indexes on the basis of that data, we will continue to use the area wage index based on BLS data, and will discontinue the upper and lower index limits.

During the two-year transition period beginning on the effective date of these regulations, we will limit the area wage index on the lower end to no less than 0.9. (Area wage indexes for the continental United States range as low as 0.7245.) This will prevent rural facilities from experiencing the adverse effects of immediate implementation. We have selected 0.9 as the lower limit as a balance between several considerations. We believe that limiting the index to no less than the national average (1.0) would result in inappropriately high minimum rates that completely fail to recognize the existence of low-wage areas of the country. The choice of the 0.9 level will benefit about 19 percent of all facilities and will increase the lowest rates by $8 or $9 per treatment. We believe this is sufficient to alleviate the implementation problems of the most drastically affected facilities during the transition period.

We will limit the upper effect of the wage index during the transition period by setting a maximum payment rate of $138 per treatment, which is the amount we have used for some time as the screen for determining reasonable per treatment payments. This limits will prevent any excessive payment levels due to possible deficiencies in the area wage index. This level of $138 is an appropriate transition period ceiling because our audit data indicate that most facilities are capable of operating successfully at this payment level through the country. Facilities with justifiable costs above $138 per treatment will be able to apply for a higher payment rate through our exception process.

In Appendix II to these regulations, we explain how the area wage indexes are calculated and reprint the indexes we are using.

G. Other Suggestions

Comment: Several commenters believed the composite rate system could be improved by making allowance for factors we did not incorporate in our rate-setting methodology. Some of these suggestions paralleled comments on our cost data, proposing allowances for inflation, a return on equity capital, or bad debts. (We proposed in the NPRM not to include an amount for bad debts in the rate, but instead to pay dialysis facilities all of their Medicare bad debts for dialysis services, such that their total revenue from both prospective payments and bad debt settlement does not exceed their allowance costs, in a separate payment at the end of the facility's cost accounting period.)

Response: The statutory prospective reimbursement system is intended to contain costs and promote efficiency by affording facilities an opportunity to retain per treatment payments in excess of their costs. Automatic inflation adjustments are self-fulfilling and guarantee that costs will rise. We will monitor costs and adjust the rate on an as-needed basis, if inflation drives the cost of dialysis up. We believe we are allowing a margin for profit in our rate-setting. This is evidenced by the continuing growth in proprietary facilities in the period since we announced our proposed prospective rates in November 1981. With respect to the suggestion of adding an allowance for bad debts to the rate, we have no data upon which to set this allowance, nor do we intend to provide an incentive for facilities to avoid collecting copayments. As we obtain more data we may consider alternative approaches to this proposed policy, including an allowance for bad debts in the rate, in order to avoid the administratively cumbersome procedure of retroactive settlement of bad debts.

Comment: Some commenters discussed our objective of obtaining program savings under the composite system, and suggested that we could obtain savings by other means, either instead of or in addition to the prospective system. They proposed that we reduce administrative costs of the ESRD program, and that we eliminate certification requirements that the commenters believed were needless. Such savings could affect the level at which we set a prospective rate.

Response: We are attempting to reduce administrative costs. One of the advantages of the new system is that it is simpler (and therefore cheaper) to administer. The billing and processing should be easier and quicker. As for reducing certification requirements that must be met to participate in the Medicare program, those requirements are under continual review, and changes are sometimes proposed to account for changing practices. Other requirements are imposed by States, and facilities must meet them in order to furnish services in that State. In both cases, the costs of meeting the requirements are included in the audited costs of facilities sampled in setting the reimbursement level under this system. We do not believe it is possible or appropriate for us to address them further in establishing our reimbursement policies.

H. Prospective Payment Rates

Applying the principles described above to the data from our facility audits and home dialysis cost studies, we derived the basis components from which national payment rates will be computed.

	Median costs per treatment		
	Adjusted labor [1]	Nonlabor	Total
All facilities	$54.45	$71.53	$125.98
Independents	41.04	67.06	108.10
Hospital-based	61.65	73.93	135.58
Home dialysis cost (all)	11.70	85.09	96.79
Overhead cost differential of hospitals over all facilities			$2.10

	Location of patients (percent)	
	Home	In-facility
Independents	10.5	89.5
Hospital-based	23.5	76.5
Total	17.0	83.0

[1] These adjusted labor costs differ from those published in the NPRM as a result of application of the most recent area wage indexes. The inclusion of Puerto Rico in the BLS data resulted in a slightly different national average wage level.

We have computed the following prospective base rate components, based on the above data components. These rate components are used to compute the composite reimbursement rates per treatment for in-facility and home dialysis. The basic prospective rate for each facility applies directly to all hemodialysis treatments. We discuss below how these rates are also applied to peritoneal dialysis treatments.

	Component		Total base rate [1]
	Labor	Nonlabor	
Independent facilities	$49.96	$72.95	$122.91
Hospital-based	46.62	80.14	126.76

[1] As noted above, the application of the most recent area wage indexes, based on updated BLS data, resulted in slight changes from the values given in the NPRM for adjusted labor costs, which also affects these base rates.

Since the actual payment for each facility is calculated by adjusting the labor component by the appropriate area wage index, the actual average payment will be about $4 higher than the base rate, because most ESRD facilities are located in areas that have a wage index value greater than 1. The area wage index also introduces a substantial variation among the actual rates paid, as explained below. In addition, we plan to pay the composite rate for home dialysis treatments, which cost only $97 per treatment on the average. This provides facilities with extra profit, and has an effect similar to raising their reimbursement rates per in-facility treatment to $142 and $131 for hospital-based and independent facilities respectively (see illustration in section III.D. of this preamble).

IV. Rate-Setting Methodology for Physician Monthly Capitation Payments

The NPRM proposed establishment of equal monthly capitation payment for both home and in-facility dialysis, using a composite weighting formula to account for the proportion of patients currently dialyzing at home. We also proposed to revise the basis for relating the capitation payment to prevailing charges for certain medical procedures, using the most recent and complete prevailing charge data available to us, which is fee screen year 1981 (July 1, 1980–June 30, 1981).

Typically, dialysis patients dialyze between 2 and 3 times per week. Some patients dialyze routinely at a frequency of twice per week, while some patients occasionally miss a dialysis session. At the same time, the physician monthly payment represents payment for some services that may be furnished at a time other than during dialysis. As a balance between these two considerations we proposed basing the monthly payment on 149 dialysis sessions per patient per year, or 12.4 dialysis sessions per patient per month. That is, although practice may vary widely between physicians, or between patients of a physician, for purposes of constructing a payment rate we assumed a value of one physician-patient contact per dialysis session, and that every patient dialyzes 149 times per year. Of course, we do not expect that every patient will be seen by a physician during each dialysis session.

We proposed to use this figure of 12.4 sessions as a base multiplier. This multiplier is applied to the local prevailing charge for a medical specialist's brief follow-up office visit for an established patient (CRVS Code 90040). We added to the resulting figure an amount representing a routine monthly examination, based on the prevailing charge for an intermedidate follow-up office visit (CRVS code 90060). We weighted this sum for the national averages of patients dialyzing in-facility (83 percent) and at home (17 percent). We weighted for the in-facility proportion by multiplying the sum based on the medical procedure model by .83. We weighted for the home proportion by multiplying the base sum by .17, and then multiply that result by .7, which represents the 10:7 facility/home physician treatment capability ratio used under the current Alternative Reimbursement Method (ARM).

Based on the most recently available average prevailing charges for CRVS codes 90040 ($14.07) and 90060 ($20.03), which we have used in place of local prevailing charges in the following example, we have estimated that the average physician monthly payment will be $184.60.

($14.07×12.4)+$20.03=$194.50 (base sum)
$194.50×.83=$161.45 (portion weighted for in-facility treatments)
($194.50×.17)×.7=$23.15 (portion weighted for home treatments)
$161.45+$23.15=$184.60

Under the current ARM, we set upper and lower limits on physician monthly capitation payments. The minimum and maximum payments are different for home and in-facility patients. The lower and upper limits for in-facility patients were $180 and $260 per month. For home patients, the comparable limits were $126 and $182 per month.

We considered adopting this methodology without change for calculating upper and lower limits for physician composite capitation payments. However, the distribution of prevailing charges was such as to cause us to reconsider this. The minimum pair of prevailing charges occurring for the CRVS codes 90040 and 90060 were $7.00 and $11.60 respectively, producing a minimum monthly payment of $93.38. The maximum pair of prevailing charges for these codes were $49.70 and $ 33.14 respectively, producing a maximum monthly payment of $616.30. This range of monthly payments, $93.38 to $616.30, was unacceptable because we wanted to preserve approximately the same variation between the existing minimum and maximum monthly payment. In order to do this, we tried truncating prevailing charges at the tenth and ninetieth percentiles. This yielded lower and upper limits of $132 and $220 for the composite capitation payment. Thus, the upper limit under the composite system would be $36 per month higher than the upper home limit under the ARM, while the lower limit would only increase by $6 per month. We believe that it would be unfair to require some physicians to treat both home and in-facility patients for only $6 per month per patient more than they had been receiving for treating home patients under the ARM.

We therefore returned to the array of prevailing charges, in order to determine the effects of selecting a cut-off point other than the tenth percentile. We found that the prevailing charges for CRVS code 90040 are clustered at the low end in such a way that the difference between the charges for the CRVS code 90040 at the tenth and sixteenth percentiles is only $1. Truncating this array at the sixteenth percentile yields a minimum composite capitation payment of $144 per patient per month. We believe that this results in a much more reasonable range of

VOL 48 ISS 92 MAY 11 1983 UMI

payments than continuing with the tenth percentile. Therefore, based on this truncated list of national prevailing charges (which includes three-fourths of all prevailing charges) the monthly physician reimbursement rates under these regulations will be subject to a minimum of $144 and a maximum of $220.

Comment: Some commenters favored the proposed reduction in physician reimbursement because they believe these physicians have been overpaid for what they do. Other commenters believe that paying lower rates to nephrologists will force them to devote more attention to other things to earn money. Some of these claim that this lesser physician involvement could result in less preventive care, more complications, more hospitalizations, and resulting higher costs, offsetting the savings from reduced physician reimbursement.

Response: Studies of physician involvement in the care of ESRD patients are already underway. Based on other studies of physician participation in HCFA programs, we do not expect a dramatic reduction in physician involvement with dialysis patients. Furthermore, home dialysis patients do not generally require much physician attention, and, in fact, our certification regulations, which set forth the health and safety requirements that a facility must meet to participate in the program, do not require the physical presence of a physician for in-facility dialysis.

While we do not yet have detailed information on the extent of physician involvement in dialysis care, the entire industry has undergone great changes. For example, technological advances have made machines and dialysis safer and more automatic to operate. The extensive experience since the beginning of the program has resulted in more standardized procedures. Consequently, it may be that these improved procedures, nurses' training, and automated technology have reduced the degree of necessary physician involvement.

We believe that medical professionals will furnish appropriate care in a responsible manner. Physicians will be paid much more for their home patients under the new system than under the old, and can achieve the same total reimbursement by increasing the number of their home patients.

Comment: Comments questioned the use of the 12.4 multiplier in setting the physician monthly capitation payment, arguing that physicians had contact with their patients through telephone calls and office visits in addition to the dialysis sessions, which average 12.4 times a month.

Response: As discussed above, the factor of 12.4 is a balance between an approximation of the number of dialysis treatments per month furnished to the average patient, and additional physician services furnished at times other than during the dialysis treatment. Physicians are not required to see their patients at each dialysis session and we do not intent to imply that they should. Rather, the factor of 12.4 is used as a proxy, along with an amount for a single monthly examination (CRVS Code 90060), to represent the amount of overall physician involvement for the average dialysis patient. The specific services furnished by physicians for this monthly capitation payment vary widely depending on the needs of the patient and whether the patient dialyzes in the facility or at home. Because of this wide variation, especially considering that this same payment applies to home dialysis patients, we have made an approximation for the appropriate average level of payment.

Comment: It was suggested that the assumption in the current ARM and in the new physician capitation system that physicians could, on average, handle 10 home dialysis patients in the time that it would take to handle 7 in-facility patients lacked any rational justification.

Response: As pointed out in the NPRM, the 10:7 ratio exists in the present ARM and was based on expert medical advice provided at the time the ARM was established. Although the comment questioned the basis for the ratio, the comment did not propose any other ratio or provide any information suggesting that the ratio is in fact inappropriate. If we are furnished with such information, we will evaluate it and make any appropriate changes in the methodology, but until such time we must use some ratio and we believe that it is reasonable to continue using the ARM ratio.

Comment: Some commenters stated that weighting physician reimbursement by the national average percentage of all home patients (17 percent) is inconsistent with facility reimbursement, which is weighted by hospital (23.5 percent) and independent (10.5 percent) facility home percentages respectively.

Response: The statute does not specify the elements of the methodology as to how physician reimbursement should be set, as it does in the case of facility reimbursement. Also, it would be administratively cumbersome for carriers to determine whether a patient is a hospital-based or independent facility patient since the carrier sees no indication of the patient's facility on the physician's bill. Therefore, use of the national average percentage is appropriate.

Comment: Some commenters, referring to provisions for annually updating the prevailing charge screens for fee-for-service reasonable charge payments, recommended that we also annually update the monthly capitation payment level, asserting that these updates are required by law.

Response: The law does not require that the monthly capitation payment be updated each year. Our statutory authority for this capitation method, section 1881(b)(3)(B) of the Act, was added to the statute to clarify our authority to determine payments for ESRD-related physician services in a manner that adequately recognized the special nature of those services. (S. Rept. No. 95-714, 95th Cong. 2d Sess., p. 10.) The amendments specifically approved of our ARM method for paying for physician services. (Under this method we had also decided not to commit ourselves to updating ARM payments at any particular interval but to update based on program experience. See 42 CFR 405.542(b)(4).)

A physician's rate set by this methodology will be held constant and will not be automatically updated by the carrier's prevailing charge data. The rate will only change when, after review of program data, we determine that a change is warranted. We will regularly review physician reimbursement at the same times that we review the level of the prospective payment rates for facility dialysis services.

V. Other Issues

A. Access to and Quality of Care

Introduction. As noted above, the greatest number of comments expressed concern over the effect the proposed rules would have on access to and quality of care. As we said in the NPRM, we do not expect the quality of care to be adversely affected by these regulations. Access to care may be improved because the payment rates offer incentive for existing facilities to expand, and for new facilities to open.

Adverse Effects of Economic Incentives.

Comment: Some commenters said that the proposed payment levels would be inadequate to allow facilites to accumulate capital for improvements or expansion.

Response: New facilities continue to enter the program. We believe that with efficient mangement there will be sufficient profit to improve or expand facilities as needed. Future expansion will not be as critical as in the past, since we expect a decrease in the rate of growth of the ESRD population. For example, from 1980 to 1981 there was a 15.4 percent increase in the Medicare ESRD population. Over the next 5 years we expect the annual increase to decline to 3–5 percent. In addition, we expect that there will be more patients treated in the home, which will relieve still further any future demands on in-facility capacity.

Comment: Various commenters discussed the interrelation of economy and efficiency with cheaper, and possibly poorer quality care. Some commenters urged that care could be given cheaper at equal quality by reusing dialyzers, decreasing staff-to-patient ratios, using fewer registered nurses (RNs), encouraging patients to assist more in their own care, and encouraging more patients to dialyze at home. Other commenters declared that these same measures would adversely affect the quality of care and recommended that we adopt regulatory provisions that would prevent this.

Response: The prospective rate system provides an incentive to furnish care economically. The conditions of participation for ESRD facilities (42 CFR Subpart U) establish the requirements that we believe are necessary to provide quality care. Nothing in the prospective reimbursement rates allows a facility to depart from compliance with these requirements, which have proved satisfactory to ensure the adequacy of patient care. Although we will continue to be alert to the possibility of changing these requirements, nothing in the comments has persuaded us that changes should be made at this time. The medical community does not agree on an optimum model for the dialysis procedure. There is a wide variation among the staff complements and practices at various facilities. In the random sample of facilities that were audited, we included a cross section of facilities of all types. In the absence of a demonstrated need requiring a particular method of operation to ensure patient safety, medical practitioners should be permitted to devise appropriate methods of treatment.

Comment: Commenters also claimed that under the composite rate, poorly qualified self-care training units will arise, in an attempt to take advantage of the increased payment for home dialysis.

Response: All training units have to be approved, and must meet a certification requirement that they have an experienced training nurse in charge of training (42 CFR 405.2102(r)(4) and 405.2162(a). Furthermore, we believe that medical professionals are responsive to the need to provide good care. It is in the financial interest of the facilities to train the patients well so that they can be successful home patients and not be referred back to the facility where they are more expensive to treat.

Access to Care.

Comment: Many patients expressed fear that facilities will be forced to close, depriving patients of access to care.

Response: We do not expect this to happen. We believe the rate is high enough for efficient facilities to provide care. There is a potential for increased home dialysis care, which will increase facilities' profit. Facilities that are isolated and essential will be eligible for higher rates under the exception process and thus the patient will not be left without a dialysis facility in his or her area. As discussed below, we are also providing a new certification procedure for temporary emergency facilities in cases where existing facilities close for some reason. This latter procedure will allow us to authorize the immediate opening of efficient facilities to replace any inefficient facilities that close because of the new rates.

Promoting Home Dialysis.

Comment: Many commenters, especially patients, expressed fear that patients who are unsuitable for home treatments, because they are too ill, unintelligent, or have a poor environment, will be forced to go home anyway.

Response: There are successful home programs in all settings (inner city and rural), with all types of population bases. Program experience shows that home dialysis can be done in these situations. Some commenters told us of how their attitude toward home dialysis, and their patients' ability to perform home dialysis, has evolved over the past few years from being totally against, to being in favor of, more widespread use of home dialysis. More important, though, for those patients who misunderstood or were misinformed about the objectives of these regulations, is the fact that we are not, and never proposed, requiring patients to dialyze at home. The ultimate

VOL 48 ISS 92 MY 11 1983 UMI

responsibility for this decision rests between patients and their physicians. Physicians and facilities cannot force patients to dialyze at home if they are unable or unwilling. As we pointed out in the NPRM, we expect that 30–40 percent of patients can be dialyzed at home, which means that the majority of patients will continue to receive dialysis services in a facility.

Comment: Some commenters recommended that our regulations ensure that home patients received the necessary services, arguing that facilities have a financial incentive to increase profits by not furnishing all of the services necessary for home patients. One commenter recommended that all the service requirements of the current target rate program be retained under the new composite rate.

Response: We explained above why we did not include the costs of furnishing home aides in calculating our rates. Facilities are required, under 42 CFR 405.2163, to furnish all other necessary dialysis services. This certification requirement serves the same function as the specific service requirements under the target rate agreement. Facilities are reviewed periodically to ensure that they meet all certification requirements. Patients with problems may contact their patient representative on the ESRD Network Council, or the Health Standards and Quality offices of our regional offices.

Comment: A number of commenters objected that we should not promote CAPD. They claim that is not only more expensive than home hemodialysis, but is medically unproven and possibly unsafe.

Response: We are not promoting CAPD. It has been used as an example only in so far as it is one mode of home dialysis therapy and the statute requires us to promote home dialysis. To the extent that it is more expensive than other modes of home dialysis, the incentives created by the composite rate should result in relatively greater use of the other, competing, modes. As for its safety, we consulted with a panel of experts and their consensus was that, as with all modes of diaslysis treatment, it was safe and effective for suitable patients. By this time, CAPD is in wide use (as of December 31, 1981 there were 4347 CAPD patients, accounting for 45.9 percent of all home patients) and the program generally covers items and services that are commensurate with generally accepted medical practice.

C. Dialyzer Reuse

Introduction.

The ESRD community is currently divided on the issue of whether it is safe to reuse dialyzers, which is one way a facility can reduce per treatment costs. In the NPRM, we explained that we were neutral on this issue; we are neither supporting nor prohibiting it in these final regulations.

Comment: Some commenters stated that, in order to increase efficiency and reduce costs, facilities should reuse dialyzers.

Response: We have no authority to require reuse. However, if a facility decides to reuse dialyzers, it will retain the savings from that practice.

Comment: Other commenters claimed that reuse is unproven and unsafe. It was also noted that some States have constraints on reuse.

Response: HCFA is neutral on reuse. Reuse is prevalent in Europe and many facilities in the United States reuse. Preliminary studies show that reuse is successful where it is done properly. Nevertheless, we do not presently require or prohibit reuse. We will continue to study dialyzer reuse, and to monitor outcomes of those facilities that reuse dialyzers, in order to determine whether we should revise the program's health and safety, as well as reimbursement, requirements with respect to dialyzer reuse.

Comment: Some commenters suggested that we set sa separate payment rate for facilities that reuse dialyzers.

Response: We set composite rates based on the audits of randomly selected facilities. Twenty-five percent of the independent facilities in the audits reused dialyzers, and their costs were included in setting the rates. We cannot set separate rates for reuse because this would be impractical, since some patients in a facility may reuse, and some may not. In addition, some facilities may choose to use the savings from reuse to offset some other excessive cost in their operation. Under the prospective reimbursement system, we do not intend to adjust individual facilities' rates to their actual costs, because this removes the incentive to be efficient.

D. Prospective Rates for Self-Care Dialysis Training

Self-care dialysis training services are services that train ESRD patients to perform dialysis in the facility or in the home with little or no professional assistance, and train other individuals to assist patients in performing dialysis. Self-care training services are furnished under Medicare by dialysis facilities that are specifically approved to furnish these services. In addition, we expect many facilities that are not so approved will be able to purchase training services from approved ESRD training facilities.

Under Medicare, self-care dialysis training sessions have always been reimbursed based on a screen that is $20 more than the screen amount applicable to outpatient maintenance dialysis, except when an exception has been approved. In the absence of reliable cost data to the contrary, we will reimburse each self-dialysis and home dialysis training session by an amount equal to the facility's per treatment prospective rate exclusive of any exception amounts for outpatient maintenance dialysis plus an additional $20 per session. Facilities that have justifiable costs greater than this will be able to apply for an exception. (See above.) Based on data submitted through the new cost reports, and in applications for exceptions, we will continue to review whether this figure should be adjusted.

E. Prospective Reimbursement Rates for Peritoneal Dialysis and New Dialysis Techniques

Under Medicare, peritoneal dialysis has always been subject to the same reimbursement rules as hemodialysis sessions in the facility. As a result of medical consultations, we established an equivalence between peritoneal dialysis and hemodialysis. In the absence of cost data to the contrary, we set the reimbursment for intermittent peritoneal dialysis sessions at the same level as for hemodialysis. However, sometimes peritoneal dialysis was furnished in a single extended session of 30 hours or more in a week, in place of three separate sessions. Because the labor, overhead and supplies were more related to the total time in dialysis than the number of separate sessions, we reimbursed the extended session the same as three normal dialysis sessions in a week. Further case experience indicated the need for another intermediate reimbursement level to correspond to changing medical patterns. As a result, we provided that peritoneal dialysis sessions of 20 hours duration furnished twice per week be reimbursed at a rate equivalent to one and one-half times the payment for a hemodialysis session.

We have also set equivalencies for applying the prospective payment rates to continuous ambulatory peritoneal dialysis (CAPD) and other new techniques of dialysis. We included the costs of these treatment modes in our calculation of the weighted costs per treatment of home dialysis. CAPD is furnished on a continuous basis, not in discrete sessions, and therefore we cannot pay on a per session basis. We will pay for CAPD on a weekly basis, setting the weekly payment rate for CAPD at three times the per treatment incentive payment rate (corresponding to the usual hemodialysis schedule of three sessions per week) for the ESRD facility through which monitoring and support services are furnished. We will pay for continuous cycling peritoneal dialysis (CCPD) and other techniques on the same basis.

F. Bad Debts

In the NPRM, we proposed to pay Medicare bad debts for both hospital-based and independent facilities in a single payment at the end of a facility's cost reporting year. We received no opposition to this, but a number of commenters expressed confusion on how this would work.

Medicare bad debts, which are defined and governed by regulations at 42 CFR 405.420, are those deductible and coinsurance amounts for which beneficiaries are liable and which, when uncollectible, result in providers being reimbursed less than costs. Since, under reasonable cost reimbursement, costs of covered services furnished beneficiaries are not to be borne by individuals not covered by Medicare, the program will pay that part of uncollectible deductible and coinsurace amounts that brings the total of a provider's reimbursement up to the costs of these services. Conversely, since the statute requires that the program pay only for the costs of services related to care of benficiaries, reimbursement for bad debts is limited in that we will not pay any amounts that would result in total reimbursement exceeding a provider's Medicare reasonable costs. In addition, to claim Medicare bad debts, a provider must have attempted to collect the amounts in accordance with program requirements.

Under retrospective cost reimbursement, we have allowed providers, including hospitals with dialysis facilites, to make a specific write-off of Medicare bad debts, for which we have made make a special payment at the end of the provider's accounting period. Under part B reasonable charge reimbursement, independent facilities have been expected to absorb bad debts within the level of their charges. However, under the prospective reimbursement system we have decided to treat bad debts the same for both hospital-based and independent facilities in order to treat all facilities similarly with respect to a consideration that does not depend on their status as hospital-based or independent.

We considered the possibility of including an amount for bad debts in the prospective payment rate, but have decided against it. Instead, we plan to pay all dialysis facilities 100 percent of their allowable Medicare bad debts (related to maintenance dialysis treatments), up to their reasonable costs, in a separate payment at the end of each facility's cost accounting period. Hospitals must keep their ESRD related Medicare bad debts separate from other Medicare bad debts for this purpose. This process works as follows:

1. We determine the dialysis facility's Medicare reasonable cost. This is the reasonable and necessary cost related to covered patient care services furnished to Medicare beneficiaries, as shown on the annual Medicare cost report (HCFA 2552, for hospitals; HCFA 265 for independent facilities).

2. We determine the dialysis facility's Medicare revenue. This would equal the total program payment (80 percent of the facility's prospective payment rate times the number of treatments furnished, after first subtracting applicable deductible amounts) plus the deductible and coinsurance (20 percent of the rate) amounts actually collected.

3. We determine the amount of the facility's unrecovered cost by subtracting revenue from total reasonable cost. If the facility's revenue exceeds its cost, it has no unrecovered cost and is not eligible to receive payment for Medicare bad debts.

4. If the facility has some unrecovered reasonable costs, we determine whether the facility has met the program requirements in attempting to collect its unpaid deductible and coinsurance amounts.

5. If the facility meets these requirements, the program then pays the facility the lesser of:

(a) its unrecovered Medicare cost; or

(b) the uncollectible deductible and coinsurance amounts.

The following example illustrates the potential different outcomes of this process.

Assume that we have four facilities, each differing from the others only in their costs. Each facility furnishes 4000 dialysis treatments per year, at a prospective rate of $130 per treatment. Each receives a program payment of $104 per treatment (80 percent of the payment rate, with the beneficiary liable for the remaining 20 percent), yielding revenues of $416,000 per year. Each facility is unable to collect an average of $4 per treatment in deductible and coinsurance obligations, resulting in revenue from copayment of $88,000 per year, and a total uncollectible copayment of $16,000. Each facility's total revenue from Medicare and beneficiaries; payments would be $504,000.

The four facilities in our illustration have the following average costs per treatment (CPT), total annual allowable Medicare costs, total costs and total revenue from Medicare program and beneficiaries payments (total revenue).

Facility	CPT	Total costs	Total revenue
A	$124	$496,000	$504,000
B	126	$12,000	$504,000
C	130	$520,000	$504,000
D	132	$528,000	$504,000

Assuming all collection requirements were met, we would subtract total Medicare revenue from total costs for each of these facilities, giving us the unrecovered Medicare costs, if any. We would then pay, as allowable Medicare bad debts, the lesser of unrecovered cost (total costs minus total revenue) or uncollectible copayment. The result would be as follows:

Facility	Uncollectible deductible and coinsurance	Unrecovered cost	Payable bad debts
A	$16,000	0	0
B	16,000	$8,000	$8,000
C	16,000	16,000	16,000
D	16,000	24,000	16,000

VI. Special Purpose Renal Dialysis Facilities

Pub. L. 92–603 authorized the Secretary to prescribe health and safety regulations for facilities that furnish dialysis services. Regulations were published as Conditions for Coverage of Suppliers of End-Stage Renal Disease Services (41 FR 22507; June 3, 1976), Subpart U of Medicare regulations (42 CFR Part 405). Subpart U contains the health and safety standards which ESRD facilities must meet to be approved to receive Medicare reimbursement.

These amendments to Subpart U permit approval of special purpose renal dialysis facilities, which will be defined as units approved on a short-term basis to furnish dialysis services to a group of patients otherwise unable to obtain treatment. We will approve special purpose facilities for two purposes: (1) to serve ESRD patients in a vacation area that is too remote from existing approved facilities, or that is near an approved facility that does not have sufficient available capacity to serve a

VOL 48 ISS 92 MY 11 1983 UMI

number of vacationing patients; and (2) to serve ESRD patients on an emergency basis when approved permanent facilities close due to natural disasters, strikes, or bankruptcies and the backup facilities in the area cannot accommodate the patients of the closed facilities. (This latter provision will enable us to ensure continuous access to care in the event that an approved permanent facility is closed because it cannot achieve adequate revenues under the prospective reimbursement system.)

The typical patient undergoing treatment under the ESRD program requires dialysis three times a week—each treatment requiring several hours for completion. Due to the requirement for regular and prolonged treatments, patients must limit their activities in such a way that they can regularly achieve access to an approved facility where they can receive dialysis. In addition, a patient may be extremely inconvenienced if the facility he or she customarily uses either closes or reduces services. For these reasons, any facility closing, or patient travel away from the patients residential area, requires careful planning so that alternate treatment facilities will be available to patients when needed. (Many patients are sufficiently active and well enough rehabilitated so that access to dialysis is the one major consideration restricting their activities. This consideration has hampered many persons planning vacations with their families and prevented individuals from taking vacations on their own.)

Subpart U regulations (section 405.2102(h) provided that the ESRD facility furnishes services on its main premises, or the ESRD facility furnishes services on its main premises, or on its other premises that are: (1) contiguous with or in immediate proximity to the main premises, and (2) under the direction of the same professional staff and governing body as the main premises. Until now, ESRD patients have been able to go to vacation areas only if there were approved facilities with sufficient capacity to treat them or if they were able to defray the entire treatment cost at an uncertified facility. Although vacation dialysis programs (i.e., summer camps, etc.) have generally been sponsored by approved dialysis facilities, reimbursement has not been made because the programs are not in the immediate proximity to the main premises.

On January 15, 1981, we published in the **Federal Register** (46 FR 3794) a Notice of Proposed Rule Making to amend Subpart U regulations to:

- Provide for approval of a facility that furnishes training and support services for self-dialysis and/or home dialysis as the only service;
- Adapt the requirements to a recently developed treatment technique known as continuous ambulatory peritoneal dialysis (CAPD);
- Provide for approval of special purpose renal dialysis facilities; and
- Require open staffs in ESRD facilities.

The provision on special purpose dialysis facilities, was one of the four main provisions of that proposed regulation. Provision was made for a 60-day comment period on the proposed regulation changes. The comments we received during this period are now being analyzed. We expect to issue a final rule, taking into consideration public comments, in the future on all provisions except the provision for special purpose dialysis facilities. However, we wish to amend as soon as possible the regulations to permit approval of facilities furnishing emergency and vacation dialysis, which will further ensure that continuous access to care will be available to ESRD patients even if some facilities close during the implementation of the prospective reimbursement system. Therefore, we are publishing final regulations now which apply to special purpose dialysis facilities.

The NPRM stated that we had received inquiries regarding the feasibility of approving for Medicare reimbursement dialysis services provided to ESRD beneficiaries on a short term basis for special rehabilitative or emergency purposes when those beneficiaries cannot be accommodated by facilities approved under the present regulations. The following two examples illustrate the circumstances under which we would approve a special purpose facility.

In many cases existing ESRD facilities are too remote from vacation areas or too near capacity to serve vacationing patients. Accordingly, some hospitals and universities have developed programs which provide dialysis services to these patients while they are on extended vacations. These programs include both transient or mobile units in State parks and fixed location units such as children's camps. All proposals which we have received to approve these types of units as special purpose dialysis facilities emphasize the importance of these units in programs designed to assist ESRD patients and their families toward the goals of total rehabilitation and a normal lifestyle. The availability of these units allows patients some respite from severely restricted lifestyles caused by the need for dialysis treatments three times a week at a single location.

We will also approve special purpose dialysis units when these units are necessary to accommodate patients on an emergency, short term basis. Examples of these emergencies are facility closings due to strikes or bankruptcies when the backup facilities to the closed facilities cannot accommodate the patients of the closed facilities.

In response to the Notice of Proposed Rule Making, we received 23 public comments which discussed the proposed special purpose dialysis facility provisions. There were no comments which opposed the concept of a need by ESRD patients for vacations dialysis programs.

Some of the commenters felt that special purpose vacation dialysis programs should be limited to facilities approved to furnish other dialysis services. These comments have some merit in that approved facilities offering other services may have fewer administrative problems such as staffing a remote vacation dialysis unit. We expect that special purpose dialysis programs will continue to be sponsored by such approved facilities; we will, however, permit approval of a special purpose dialysis facility meeting all requirements even if approved to furnish other dialysis services.

A few commenters opposed the provision that would place a time limitation of not more than 6 consecutive months of operation in any 1 calendar year on approval for special purpose dialysis facilities. The general thrust of these comments was that a time limitation would be administratively cumbersome, particularly as written in the proposed rule. We believe that the time limitation is necessary to emphasize the temporary nature of special purpose facilities, and to prevent unnecessary proliferation of, and possible abuse of, this category of approval. It was suggested that the time limitation apply only to a "fixed location"; we have decided not to accept this suggestion because it would not provide the needed flexibility of some vacation dialysis programs. As a result of other comments, we have changed the proposal to permit greater flexibility. The time permitted has been changed from 6 months to 8 months, and the limitation to consecutive months has been removed. All ESRD facilities will continue to be reviewed for approval on an annual basis.

There were several comments that questioned the need for the proposed rule and stated that present regulations could permit approval of existing ESRD facilities to furnish dialysis services at remote locations. We believe, however, that the existing regulations present impediments, including the requirements related to furnishing dialysis services on the premises, network participation, and on-going management of patient care. As indicated above, we have decided not to require special purpose renal facilities to comply with all present regulatory provisions, and amendments to the regulations are therefore necessary.

As evidenced in this preamble, we are concerned about the costs of furnishing dialysis, and this is especially so in reference to vacation programs. We will apply the same reimbursement rules, prospective payment rates, and exception criteria to special purpose renal facilities as we apply to permanent facilities. Every special purpose renal dialysis facility will have its own separate provider number whether it is an independent facility or is affiliated with an approved permanent facility. Reimbursement will not exceed that which would be available to a permanent dialysis facility operating in the same geographic area with normal utilization rates. (Additionally, a permanent facility that has transferred patients to a special dialysis facility control could not qualify for an exception to the extent that increased costs at the permanent facility were due to reduced utilization.) A special purpose renal facility will need to furnish cost data to us in accordance with sections 405.406, 405.541, and 405.2133.

The following discussion covers each change to subpart U.

1. "Definitions". These regulations define a special purpose dialysis facility and revise the definition for "furnishes on the premises." We are allowing for the approval of new dialysis facilities which are specifically designed to provide dialysis on a time-limited basis for emergency purposes or in connection with special rehabilitative programs. We have required time-limited approvals to prevent the bypassing of the regular approval process. These amendments are strictly intended to supply temporary dialysis services for either emergencies or vacation services and not to allow facilities to randomly open satellite stations.

In order to allow an approved renal dialysis facility or renal dialysis center to provide services at rehabilitative locations services similar to those vacation services offered by a special purpose facility, we have revised the definition of "furnishes on premises." This amendment allows approved renal dialysis facilities or centers to develop their own programs at special rehabilitative locations.

Facilities which offer rehabilitative programs away from the main premises are now eligible for reimbursement as long as the rehabilitative program is approved by HCFA. Again, we have specified that approvals for rehabilitative locations are time-limited in nature in order to prevent the proliferation of unnecessary satellite units and the overreliance on the special exception intended for emergency and vacation locations.

2. "Types and duration of classification according to utilization rates." The special purpose facility must comply with the same requirements for minimal utilization rates (MUR) as any other approved dialysis facility. Due to the time-limited approval of special purpose dialysis facilities, the rate will be computed for the actual time that the facility is operational. A special purpose facility that does not meet established MUR may qualify for a time-limited exception to the rate under the criteria specified in 42 CFR § 405.2122(b).

3. "Special Purpose Renal Dialysis Facilities." This new condition adds a new type of approved dialysis facility which is designed to provide special rehibilitation services or emergency services. These types of units allow patients respite from severely restricted lifestyles by providing the opportunity to vacation in areas which have previously been inaccessible. These units also provide necessary services on an emergency, short term basis in cases where facility closings are due to natural disasters, strikes, or bankruptcies.

This regulation requires the special purpose facility to meet all conditions for dialysis facilities, with the exception of sections 405.2132, 405.2134, and 405.2137. Compliance with § 405.2132 (fulfillment of service needs in a network) is not required because of the short range, transient nature of the population to be served in such units. This requirement applies only to the ongoing permanent needs of the network to provide adequate services for the dialysis population residing within network boundaries, and as such, is not appropriate for special purpose facilities.

Compliance with § 405.2134 (membership in a network) is not required for basically the same reasons. The temporary nature of the facility and the high turnover of patients make membership in a network impractical and administratively burdensome. Moreover, since these facilities do not have responsibility for the long term care of their patients, we think that it is inappropriate for them to participate in setting and implementing network goals and objectives, particularly those for transplantation and home dialysis. We see these units as fulfilling important program goals and objectives such as patient rehabilitation. We expect to be able to collect whatever data are necessary to monitor their performance in fostering program goals and in providing quality care through the survey process and through the requirement of § 405.2133 for furnishing data and information for ESRD program administration.

In lieu of compliance with the requirements of § 405.2137 for patient long-term program and patient care plan, we are substituting a requirement which requires the special purpose renal dialysis facility to consult with the patient's physician. This is to assure that care provided in the special purpose facility is consistent with the program and plan maintained at the patient's permanent facility, as required under § 405.2137. In our opinion, this requirement assures continuity of care.

In developing our proposal for special purpose renal dialysis facilities, we considered requiring these facilities to operate directly under the auspices of a renal dialysis facility, approved under the present regulations. However, we were concerned that such a proposal might limit competition in providing special rehabilitative or emergency dialysis services. Since we are requiring special purpose dialysis facilities to meet all health and safety standards, we feel the need for a direct operating agreement with an approved dialysis facility is unnecessary. We are, of course, requiring that all special purpose facilities comply with the requirements of § 405.2160 that a renal dialysis facility have in effect an affiliation agreement or arrangement with a renal dialysis center for backup services.

We are limiting approval to 8 months in any given calendar year. This time limitation is necessary to emphasize the seasonal nature of such facilities, and to prevent unnecessary proliferation of, and possible abuse of, this category of approval. We do not think that these units need to operate for a longer period. Most of the special rehabilitative programs are designed to operate for only a limited period. In addition, the 8-month time frame is particularly important in the application of this provision in emergency situations. The 8-month time frame provides us with

VOL 48 ISS 92 MY 11 1983 UMI

enough time to either arrange permanent alternative placement for patients or to successfully resolve the emergency, yet it is short enough to prevent possible abuse by parties seeking to provide dialysis services through overreliance on the special exception intended for emergency and vacation locations.

The final requirement relates to those patients who are treated in a special purpose facility. We only allow those patients who would be unable to be dialyzed in the area to be treated by the special purpose facility. The regulation prevents the proliferation of temporary units which would not be subject to the application processes applicable to regular facilities, and possibly take patients from operational facilities in the same geographical area. This regulation also essentially limits special purpose facilities to areas in which there are limited dialysis resources.

VII. Implementation, Effective Date, and Transition Period

Introduction

In the NPRM, we announced that we were planning to implement the prospective systems on the date the final regulations were published and that we would pay all facilities under this prospective reimbursement system for ESRD services furnished on or after the effective date of these final regulations, regardless of when their accounting periods begin.

Comment: A number of commenters stated that making the new system effective on the date of publication would result in chaos. Most intermediaries and facilities said they could not possibly adjust their operations immediately, and this would result in an interruption in payments.

Response: In light of the statutory effective date and the general ability of dialysis facilities to provide dialysis services at the rates adopted, we do not believe that is is necessary or appropriate to delay effectiveness of the new rates for an extended period of time. We have, however, changed the effective date to allow a period after the publication date, which should provide sufficient time for inefficient facilities to make some adjustment and to begin institution of any more basic changes that may be necessary. During that time, we will develop instructions and training classes for regional office, intermediary and carrier personnel, explaining how the new system will work. It will provide time for intermediaries and carriers to compute and notify facilities and physicians of their new payment rates, and to inform facilities of the new system. It will also allow some time for facilities to adjust their operation and billing systems. And finally during this period of time, we must notify all home dialysis beneficiaries of the new reimbursement system. They will be given opportunity to continue to deal directly with the program, as the majority are now doing, or to come under the composite rate system.

Comment: Several commenters recommended that the change-over to the new system be done gradually, to give facilities a chance to adjust, implement improved cost controls, and develop training and home programs.

Response: Originally, the incentive system was, by law, to be effective on July 1, 1979. The industry has known for a long time that reimbursement would change. Nevertheless, we are delaying implementation and limiting the effect of the wage index for the first two years. Facilities that have legitimate higher costs can request an exception.

VIII. Miscellaneous

A. Clearance of Reporting Requirements

Section 405.441 of these regulations contains reporting and recordkeeping requirements subject the Paperwork Reduction Act of 1980 (Pub. L. 96–511). These requirements are being implemented by cost reporting forms that have already been approved by the Office of Management and Budget. Since these requirements have been approved, § 405.441 will be effective with the other provisions of these regulations. Hospital-based dialysis facilities will fulfill these requirements by completing supplemental worksheet I of form HCFA 2552, their annual cost report (OMB approval number 0938–0050; effective for cost reporting periods beginning after December 8, 1980). Independent dialysis facilities will fulfill these requirements by completing their new annual cost report, form HCFA 265 (OMB approval number 0938–0236; effective for cost reporting periods ending after September 30, 1981).

B. Other Changes

The following regulations text includes sections not discussed in this preamble. We are only making conforming revisions to these sections, not substantive changes. Effective for cost reporting periods beginning after December 8, 1980, each hospital with a dailysis facility must include the costs of that facility on supplemental worksheet I. of its annual cost report. (Before that date, this information was reported on supplemental worksheet E.3.) Effective for cost reporting periods ending after September 30, 1981, each independent facility must file a new annual cost report (Form HCFA 265).

In addition to the changes made here, we have considered making a general reorganization of most regulations related to ESRD. For example, we could remove all ESRD rules from Subparts D and E, and place them instead in Subpart U, which includes regulations on ESRD networks and certifications standards. If we did this, we might also subdivide Subpart U with center headings such as those we have used in 42 CFR Part 405, Subpart T. Although we have not made these changes in these final rules, we believe this centralization of ESRD regulations would be helpful to those who must use them, and would appreciate comments on how best to do this, and on which regulations should be so centralized.

List of Subjects in 42 CFR Part 405

Administrative practice and procedure, Certification of compliance, Clinics, Contracts (Agreements), End-Stage Renal Disease (ESRD), Health care, Health facilities, Health maintenance organizations (HMO), Health professions, Health suppliers, Home health agencies, Hospitals, Inpatients, Kidney diseases, Laboratories, Medicare, Nursing homes, Onsite surveys, Outpatient providers, Reporting requirements, Rural areas, X-rays.

42 CFR Chapter IV is amended as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

A. 42 CFR Part 405, Subpart B is amended as set forth below:

The authority citation for Subpart B reads as follows:

Authority: Secs. 1102, 1831–1843, 1861, 1862, 1866, 1871, 1881 of the Social Security Act; 49 Stat. 647, as amended, 79 Stat. 301–312, 325, 327, 331, 42 U.S.C. 1302, 1395 et seq., unless otherwise noted.

1. Section 405.231 is amended by reprinting without change the introductory text of paragraph (p) and paragraphs (p)(1) through (p)(3) and revising paragraph (p)(4), to read as follows:

§ 405.231 Medical and other health services; included items and services.

Subject to the conditions, limitations, and exclusions set forth in § 405.232, the term "medical and other health services" means the following items or services:

* * * * *

(p) Effective October 1, 1978, home dialysis services, supplies, and equipment, as follows:

(1) *Dialysis equipment,* purchase or rental, installation, and maintenance of all equipment necessary for home dialysis, and the reconditioning of this equipment. Dialysis equipment includes (but is not limited to) artificial kidney and automated peritoneal dialysis machines, and support equipment such as blood pumps, bubble detectors, and other alarm systems.

(2) *Items and supplies required for dialysis,* including (but not limited to) dialyzers, syringes and needles, forceps, scissors, scales, sphygmomanometer with cuff and stethoscope, alcohol wipes, sterile drapes, and rubber gloves.

(3) *Home dialysis support services furnished by an ESRD facility,* including periodic monitoring of the patient's home adaptation (in accordance with a plan as required by § 405.250(c)), emergency visits by qualified provider or facility personnel, routine dialysis monitoring tests specified in § 405.2163(b), routine diagnostic tests, routine diagnostic laboratory tests, personnel costs associated with the installation and maintenance of dialysis equipment, testing and appropriate treatment of water, and ordering of supplies on an ongoing basis.

(4) *Services of trained home aides,* if furnished before August 1, 1983, by a facility that has an agreement to receive target rate reimbursement under § 405.691; and

* * * * *

2. In section 405.240, the undesignated introductory paragraph is reprinted without change, paragraphs (g) and (h) are revised, and a new paragraph (i) is added, as follows:

§ 405.240 Payment of supplementary medical insurance benefits: amounts payable.

In the case of an individual who incurs expenses during his coverage period under the supplementary medical insurance plan, payment with respect to the total amount of such expenses incurred during a calendar year shall, subject to the provisions of §§ 405.243–405.246, be made as follows:

* * * * *

(g) One hundred percent of the reasonable cost for purchase, installation, maintenance, and reconditioning for subsequent use of home dialysis equipement furnished before August 1, 1983, by an ESRD facility that has an agreement with HCFA under § 405.690 (For equipment furnished on or after August 1, 1983, the equipment and services will be paid in accordance with paragraph (i) of this section.);

(h) Eighty percent of the target reimbursement rate for items and services furnished before August 1, 1983, by an ESRD facility that has an agreement with HCFA under § 405.691, except for items and services that are reimbursed under an agreement in accordance with paragraph (g) of this section (these items and services furnished on or after August 1, 1983, will be paid in accordance with paragraph (i) of this section.); and

(i) With regard to items and services specified in section 405.231, (o) and (p) furnished on or after August 1, 1983:

(1) Except as specified under paragraph (i)(2) of this section, eighty percent of the per treatment prospective reimbursement rate established under § 405.439 for outpatient maintenance dialysis furnished by ESRD facilities approved in accordance with Subpart U of this part.

(2) Where an individual who is a home dialysis patient elects to obtain his or her home dialysis supplies or equipment (or both) from a party other than an approved ESRD facility, then reimbursement is made in accordance with paragraphs (b) or (c) of this section.

B. 42 CFR Part 405, Subpart D is amended as set forth below:

The authority citation for Subpart D reads as follows:

Authority: Secs. 1102, 1814(b), 1815, 1833(a), 1861(v), 1871, 1881, 1886, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1395f(b), 1395l(a), 1395x(v), 1395hh, 1395rr, 1395ww, and 1395xx).

1. The table of contents for Part 405, Subpart D, is amended by revising the title of Subpart D, revising §§ 405.438 and 405.440, and adding new §§ 405.439 and 405.441, to read as follows:

Subpart D—Principles of Reimbursement for Providers, Outpatient Maintenance Dialysis, and Services by Hospital-Based Physicians

* * * * *

Sec.

405.438 Reasonable costs of home dialysis equipment furnished between October 1, 1978, and July 31, 1983.

405.439 Payments for covered outpatient maintenance dialysis treatments.

405.440 Target rate reimbursement for home dialysis services furnished between April 1, 1979 and July 31, 1983.

405.441 Recordkeeping and cost reporting requirements for outpatient maintenance dialysis.

* * * * *

2. The title of Subpart D is revised to read as follows:

Subpart D—Principles of Reimbursement for Providers, Outpatient Maintenance Dialysis, and Services by Hospital-Based Physicians

* * * * *

3. Section 405.402 is amended by revising paragraph (g) to read as follows:

§ 405.402 Cost reimbursement; general.

* * * * *

(g) The Health Care Financing Administration is authorized to issue temporary instructions modifying the provisions of this subpart to the extent it finds appropriate for cost reporting periods ending after June 30, 1973, in order to implement sections 201 (Coverage for Disability Beneficiaries Under Medicare) and 2991 (Chronic Renal Disease Considered to Constitute Disability) of Pub. L. 92–603. In so doing, rules may be developed for establishing limits on costs and services above which reimbursement shall be made only upon appropriate justification. Rules implementing these provisions of Pub. L. 92–603 apply for renal dialysis items and services furnished before August 1, 1983. Items and services furnished on or after that date are reimbursed and reported under §§ 405.439 and 405.441 respectively. For special rules concerning health maintenance organizations, (HMO's) and providers of services and other health care facilities that are owned or operated by an HMO, or related to an HMO by common ownership or control, see §§ 405.2042(b)(14) and 405.2050(c).

4. Section 405.438 is amended by revising the title and paragraphs (a) and (c)(5) to read as follows:

§ 405.438 Reasonable costs of home dialysis equipment furnished between October 1, 1978, and July 31, 1983.

(a) *Principle.* Effective for equipment furnished between October, 1, 1978 and July 31, 1983, approved providers of services and ESRD facilities that have an agreement with HCFA under § 405.690 of this part will be reimbused under Part B of Medicare for the full reasonable cost (without regard to the deductible and co-insurance) of the purchase, installation, maintenance, and reconditioning for subsequent use of artifical kidney and automated peritoneal dialysis machines, including supportive equipment (see § 405.231(p)), which are used exclusively by beneficiaries dialyzing at home. (See § 405.439 for rules applicable to equipment furnished on or after August 1, 1983.)

* * * * *

VOL 48 ISS 92 MY 11 1983 UMI

(c) *Computation of allowable cost.*

* * * * *

(5) No allowance for depreciation may be taken on equipment purchased under this section (see § 405.415 for rule, specifying allowable depreciation costs).

* * * * *

5. A new § 405.439 is added to read as follows:

§ 405.439 Payments for covered outpatient maintenance dialysis treatments.

(a) *Basis and purpose.* This section implements section 1881 (b)(2) and (b)(7) of the Social Security Act by:

(1) Setting forth the principles and authorities under which HCFA is authorized to establish a prospective reimbursement system for outpatient maintenance dialysis furnished in or under the supervision of an ESRD facility approved under Subpart U of this part (referred to as "facility" in this section). For purposes of this section and § 405.441, outpatient maintenance dialysis means outpatient dialysis, home dialysis and self-dialysis and home dialysis training as defined in § 405.2102 (f)(2)(ii), (f)(2)(iii), and (f)(3), and includes all items and services specified in section 405.231 (o) and (p).

(2) Providing for procedures and criteria under which a facility may receive an exception to the prospective payment rates established under this section; and

(3) Establishing procedures and criteria for a facility to appeal its reimbursement under the prospective reimbursement system.

(b) *Principles of prospective reimbursement.*—(1) Under prospective reimbursement, payments for outpatient maintenance dialysis are based on rates set prospectively by HCFA.

(2) All approved ESRD facilities must accept the prospective payment rates established by HCFA as payment in full for covered outpatient maintenance dialysis.

(3) HCFA will publish the methodology used to establish rates and changes in payment rates in the **Federal Register**, as provided in paragraph (i)(2) of this section.

(c) *Prospective rates for hospital-based and independent ESRD facilities.*—(1) In accordance with section 1881(b)(7) of the Act, HCFA will establish prospective rates by a methodology that:

(i) Differentiates between hospital-based facilities and independent ESRD facilities;

(ii) Effectively encourages efficient delivery of dialysis services; and

(iii) Provides incentives for increasing the use of home dialysis.

(2) For purposes of rate-setting and reimbursement under this section, HCFA will consider any facility that does not meet all of the criteria of a hospital-based facility to be an independent facility. A determination under this paragraph is an initial determination under section 405.1502.

(3) For purposes of rate-setting and reimbursement under this section, HCFA will determine that a facility is hospital-based if—

(i) The facility and hospital are subject to the bylaws and operating decisions of a common governing board. All authority in management flows from this governing board, which has final administrative responsibility, approves all personnel actions, appoints medical staff, and carries out similar management functions.

(ii) The facility's director or administrator is under the supervision of the hospital's chief executive officer and reports through him or her to the governing board.

(iii) The facility personnel policies and practices conform to those of the hospital.

(iv) The administrative functions of the facility (that is, records, billing, laundry, housekeeping, and purchasing) are integrated with those of the hospital.

(v) The facility and hospital are financially integrated, as evidenced by the cost report, which must reflect allocation of overhead to the facility through the required step-down methodology.

(4) In determining whether a facility is hospital-based, HCFA will not consider:

(i) An agreement between a facility and a hospital concerning patient referral;

(ii) A shared service arrangement between a facility and a hospital; or

(iii) The physical location of a facility on the premises of a hospital.

(d) *Amount of payments.*—(1) If the beneficiary has incurred the full deductible applicable under Part B of Medicare before the treatment, the intermediary will pay the facility 80 percent of its prospective payment rate.

(2) If the beneficiary has not incurred the full deductible applicable under Part B of Medicare before the treatment, the intermediary will subtract the amount applicable to the deductible from the facility's prospective rate, and will pay the facility 80 percent of the remainder, if any.

(e) *Bad debts.*—(1) HCFA will reimburse each facility its allowable Medicare bad debts, up to the facility's costs as determined under Medicare principles, in a single lump sum at the end of the facility's cost reporting period.

(2) A facility must attempt to collect deductible and coinsurance amounts owed by beneficiaries before requesting reimbursement from HCFA for uncollectible amounts. Regulations at § 405.420 specify the efforts facilities must make.

(3) A facility must request reimbursement for uncollectible deductible and coinsurance amounts owed by beneficiaries by submitting an itemized list of all specific non-collections related to covered services.

(f) *Procedures for requesting exceptions to payment rates.*—(1) All payments for outpatient maintenance dialysis furnished at or through facilities will be made on the basis of prospective payment rates, without exemption.

(2) If a facility projects on the basis of prior year cost and utilization trends that it will have an allowable cost per treatment higher than its prospective rate set under this section, and if these excess costs are attributable to factors related to one or more of the criteria in paragraph (g) of this section, the facility may request HCFA to approve an exception to that rate and set a higher prospective payment rate.

(3) This higher payment rate will be subject to the rules governing the amount of payment in paragraph (d) of this section.

(4) A facility must request an exception to its payment rate within 180 days after:

(i) It is notified of its prospective payment rate; or

(ii) An extraordinary event with substantial cost effects, as described in paragraph (g)(4) of this section.

(5) The facility is responsible for demonstrating to HCFA's satisfaction that the requirements of this section, including the criteria in paragraph (g), are met in full. That is, the burden of proof is on the facility to show that one or more of the criteria are met, and that the excessive costs are justifiable under the reasonable cost principles set forth in this subpart. The burden of proof is not on HCFA to show that the criteria are not met, and that the facility's costs are not allowable.

(6) When requesting an exception to its payment rate, a facility must submit to HCFA its most recently completed cost report as required under § 405.441, and whatever statistics, data, and budgetary projections are determined by HCFA to be needed to determine if the exception is approvable. HCFA may audit any cost report or other information submitted. The materials submitted to HCFA must:

(i) Separately identify elements of cost contributing to costs per treatment in excess of the facility's payment rate;

(ii) Show that all of the facility's costs, including those costs that are not directly attributable to the exception criteria, are allowable and reasonable under the reasonable cost principles set forth in this subpart.

(iii) Show that the elements of excessive cost are specifically attributable to one or more conditions specified by the criteria set forth in paragraph (g) of this section; and

(iv) Specify the amount of additional reimbursement per treatment the facility believes is required in order to recover its justifiable excess costs.

(7) HCFA will accept an exception request on the date that HCFA concludes that it has received all materials necessary to determine if the exception is approvable.

(8) In determining the facility's payment rate under the exception process, HCFA will exclude all costs that are not allowable under the reasonable cost principles set forth in this subpart.

(9) Except for exceptions approved under paragraph (g)(4) of this section, a prospective exception payment rate approved by HCFA will apply for the period from the date the exception request was accepted until the earlier of:

(i) The date the circumstances justifying the exception rate no longer exist, or

(ii) The end of the 12-month period during which the announced rate was to apply.

(10) A prospective exception payment rate approved by HCFA under paragraph (g)(4) of this section will apply from the date of the extraordinary event until the end of the 12-month period during which the announced rate was to apply, unless HCFA determines that another date is more appropriate. If HCFA does not extend the exception period, and the facility believes that it continues to require an exception to its rate, the facility must reapply in accordance with paragraph (f) of this section.

(g) *Criteria for approval of exception requests.* HCFA may approve exceptions to an ESRD facility's prospective payment rate if the facility demonstrates with convincing objective evidence that its total per treatment costs are reasonable and allowable under § 405.441, and that its per treatment costs in excess of its payment rate are directly attributable to any of the following criteria—

(1) *Atypical service intensity (patient mix).* A substantial proportion of the facility's outpatient maintenance dialysis treatments involve atypically intense dialysis services, special dialysis procedures, or supplies that are medically necessary to meet special medical needs of the facility's patients. The facility is able to demonstrate clearly that these services, procedures or supplies and its per treatment costs are prudent and reasonable when compared to those of facilities with a similar patient mix. Examples that may qualify under this criterion are more intense dialysis services that are medically necessary for patients such as:

(i) Patients who have been referred from other facilities on a temporary basis for more intense care during a period of medical instability, and who return to the original facility after stabilization;

(ii) Pediatric patients, who require a significantly higher staff-to-patient ratio than typical adult patients; or

(iii) Patients with medical conditions that are not commonly treated by ESRD facilities, and that complicate the dialysis procedure.

(2) *Isolated essential facility.* The facility is the only supplier of dialysis in its geographical area, its patients cannot obtain dialysis services elsewhere without substantial additional hardship, and its excess costs are justifiable. HCFA will consider local permanent residential population density, typical local commuting distances for medical services, volume of treatments, and dialysis facility usage by area residents other than the applying facility's patients, in determining whether an exception requested on this basis is approvable.

(3) *Education costs.* The facility has excess costs attributable to an approved nursing education program or intern-resident program as specified in 42 CFR 405.421. The amount of the increase in the facility's rate is limited to the amount that is properly allocated to the outpatient dialysis department, and to what is reasonable when compared to the costs of other similar facilities that have educational programs.

(4) *Extraordinary circumstances.* The facility incurs excess costs beyond its control due to a fire, earthquake, flood, or other natural disaster. HCFA will not recognize such costs in cases when a facility chose not to maintain adequate insurance protection against such losses (through the purchase of insurance, the maintenance of a self-insurance program, or other equivalent alternative) or chose not to file a claim for losses covered by insurance, or not to utilize its self-insurance program.

(5) *Self-dialysis Training Costs.* The facility incurs per treatment costs for furnishing self-dialysis and home dialysis training that exceed the facility's payment rate for such training sessions.

(6) *Frequency of Dialysis.* The facility has a substantial proportion of patients who dialyze less frequently than three times per week. Per treatment payment rates granted under this exception will be no more than the amount that results in weekly reimbursement per patient equal to three times the facility's prospective composite rate, exclusive of any exception amounts.

(h) *Appeals.*—(1) *Appeals under section 1878 of the Act.* A facility that disputes the amount of its allowable Medicare bad debts reimbursed by HCFA under paragraph (e) of this section may request a review from the intermediary or the Provider Reimbursement Review Board (PRRB) in accordance with subpart R of this part.

(2) *Other Appeals.* A facility that has requested higher payment per treatment in accordance with paragraph (f) of this section may request a review from the intermediary of the PRRB if HCFA has denied the request in whole or in part. In such a case, the procedure in subpart R of this part will be followed to the extent that it is applicable. THE PRRB, subject to review by the Secretary under § 405.1875, shall have the authority to determine whether the HCFA action under review conformed to the provisions of paragraph (f).

(3) *Procedure.*—(i) The facility must request a review within 180 days of the date of the decision on which review is sought.

(ii) The facility may not submit to the intermediary or the PRRB any additional information or cost data that were not submitted to HCFA at the time the facility requested an exception to its prospective payment rate.

(4) *Determining amount in controversy.* For purposes of determining PRRB jurisdiction under Subpart R for the appeals described in paragraph (h)(2) of this section—

(i) The amount in controversy per treatment will be determined by subtracting the amount of program payment from the amount the facility requested under paragraph (f) of this section; and

(ii) The total amount in controversy will be calculated by multiplying the amount per treatment by the projected estimated number of treatments for the exception request period (as specified in paragraphs (f) (7) and (8) of this section).

(i) *Notification of changes in rate-setting methodologies and payment rates.*

VOL 48 ISS 92 MY 11 1983 UMI

(1) HCFA or the facility's intermediary will notify each facility annually of its payment rate. This notice will include changes in individual facility payment rates resulting from corrections or revisions of particular geographic labor cost adjustment factors.

(2) Changes in payment rates resulting from incorporation of updated cost data, or general revisions of geographic labor cost adjustment factors, will be announced by notice published in the **Federal Register** without opportunity for prior public comment. Other revisions of the rate-setting methodology will be published in the **Federal Register** in accordance with the Department's established rulemaking procedures.

6. Section 405.440 is amended by revising the title and paragraphs (a) and (g)(1) to read as follows:

§ 405.440 Target rate reimbursement for home dialysis services furnished between April 1, 1979 and July 31, 1983.

(a) *Purpose.* This section is effective for items and services furnished between April 1, 1979 and July 31, 1983. (After that period, payment is made under § 405.439.) This section implements section 1881(b) (4) and (6) of the Social Security Act by specifying:

(1) The conditions under which approved ESRD facilities and providers may receive payment for home dialysis services (as specified in § 405.231(p)) under an optional target reimbursement rate per treatment; and

(2) How the target rate will be determined and applied.

* * * * *

(g) *Limitations on rate.* (1) For service furnished before January 1, 1982, the target reimbursement rate shall not exceed 70 percent of the national average payment before application of the coinsurance requirement, adjusted for regional variations, for maintenance dialysis services furnished in approved providers and facilities during the preceding fiscal year. For services furnished on or after January 1, 1982, the rate shall not exceed 75 percent of the national average payment.

* * * * *

7. A new § 405.441 is added to read as follows:

§ 405.441 Recordkeeping and cost reporting requirements for outpatient maintenance dialysis.

(a) *Purpose and scope.* This section implements section 1881(b)(2)(B)(i) of the Act by specifying recordkeeping and cost reporting requirements for ESRD facilities approved under Subpart U of this part. The records and reports will enable HCFA to determine the costs incurred in furnishing outpatient maintenance dialysis as defined in section 405.439(a)(1). These reporting requirements have been approved by the Office of Management and Budget. The approval numbers are 0938–0050, for form HCFA–2552, and 0938–0236 for form HCFA–265.

(b) *Recordkeeping and reporting requirements.*

(1) Each facility must keep adequate records and submit the appropriate HCFA-approved cost report in accordance with §§ 405.406 and 405.453, which provide rules on financial data and reports, and adequate cost data and cost finding, respectively.

(2) The cost reimbursement principles set forth in this subpart (beginning with § 405.415, Depreciation, and excluding the principles listed in paragraph (b)(4) of this section), apply in the determination and reporting of the allowable cost incurred in furnishing outpatient maintenance dialysis treatments to patients dialyzing in the facility, or incurred by the facility in furnishing home dialysis services, supplies, and equipment.

(3) Allowable cost is the reasonable cost related to dialysis treatments. Reasonable cost includes all necessary and proper expenses incurred by the facility in furnishing the dialysis treatments, such as administrative costs, maintenance costs, and premium payments for employee health and pension plans. It includes both direct and indirect costs and normal standby costs. Reasonable cost does not include costs that:

(i) Are not related to patient care for outpatient maintenance dialysis;

(ii) Are for services or items specifically not reimbursable under the program;

(iii) Flow from the provision of luxury items or services (items or services substantially in excess of or more expensive than those generally considered necessary for the provision of needed health services); or

(iv) Are found to be substantially out of line with other institutions in the same area that are similar in size, scope of services, utilization, and other relevant factors.

(4) The following principles of this subpart do not apply in determining adjustments to allowable costs as reported by ESRD facilities:

(i) Section 405.429, Return on equity capital of proprietary providers;

(ii) Section 405.430, Inpatient routine nursing salary cost differential;

(iii) Section 405.436, Reimbursement of organ procurement agencies (OPA) and histocompatibility laboratories;

(iv) Section 405.451, Cost related to patient care (except for the principles stated in paragraph (b)(3) of this section); and

(v) Sections 405.454, Payment to providers, through § 405.488, Effect of principles.

C. 42 CFR Part 405, Subpart E is amended as set forth below:

1. The authority citation for Subpart E is revised to read as follows:

Authority: Secs. 1102, 1814(b), 1832, 1833(a), 1842(b) and (h), 1861(b), 1861(v), 1871, 1881, and 1887 of the Social Security Act as amended (42 U.S.C. 1302, 1395f(b), 1395k, 1395(a), 1395u(b) and (h), 1395(b), 1395x(v), 1395hh, 1395rr, and 1395xx).

2. The table of contents for Part 405, Subpart E is amended by revising §§ 405.541 and 405.544, to read as follows:

Subpart E—Criteria for Determination of Reasonable Charges; Reimbursement for Services of Hospital Interns, Residents, and Supervising Physicians

* * * * *

405.541 Criteria for determination of reasonable charges for items and services furnished by nonprovider ESRD facilities before August 1, 1983.

* * * * *

405.544 Payment for home dialysis equipment, supplies, and support services.

* * * * *

3. Section 405.502 is amended by revising paragraph (e) to read as follows:

§ 405.502 Criteria for determining reasonable charges.

* * * * *

(e) *Determination of reasonable charges under the End-Stage Renal Disease (ESRD) Program.*—(1) *General.* Reasonable charges for renal-related items and services (furnished in connection with transplantation or dialysis) must be related to costs and allowances that are reasonable when the treatments are furnished in an effective and economical manner.

(2) *Nonprovider (independent) dialysis facilities.* Reasonable charges for renal-related items and services furnished before August 1, 1983 must be determined related to costs and charges prior to July, 1973, in accordance with the regulations at § 405.541. Items and services related to outpatient maintenance dialysis that are furnished after that date are paid for in accordance with §§ 405.439 and 405.544.

(3) *Provider services and (hospital-based) dialysis facilities.* Renal-related items and services furnished by providers, or by ESRD facilities based in hospitals, before August 1, 1983 are paid for under the provider reimbursement

provisions found generally in Subpart D of this part. Items and services related to outpatient maintenance dialysis that are furnished after that date are paid for in accordance with §§ 405.439 and 405.544.

(4) *Physicians' services.* Reasonable charges for renal-related physicians' services must be determined considering charges made for other services involving comparable physicians' time and skill requirements, in accordance with regulations at §§ 405.542 and 405.543.

(5) *Health maintenance organizations (HMOs).* For special rules concerning the reimbursement of ESRD services furnished by risk-basis HMOs, or by facilities owned or operated by or related to such HMOs by common ownership or control, see §§ 405.2042(b)(14) and 405.2050(c).

* * * * *

4. Section 405.541 is amended by revising the title, removing the undesignated introductory material and revising paragraphs (a), (e) and (f) to read as follows:

§ 405.541 Criteria for determination of reasonable charges for items and services furnished by nonprovider ESRD facilities before August 1, 1983.

(a) *Determination of a facility's customary charge.*

(1) This section applies to payment for items and services furnished by a nonprovider (independent) ESRD facility after June 30, 1973 and before August 1, 1983. (Payment for items or services furnished on or after that date will be made under §§ 405.439 and 405.544.) This section applies in place of the reasonable charge criteria in § 405.503.

(2) The customary charge of a facility for outpatient maintenance dialysis is determined based on the weighted average of reimbursements from all parties made to the facility for dialysis treatments furnished during the 12-month period preceding July 1, 1973.

(3) If a customary charge cannot be determined in this basis because the facility was not in operation during the 12-month period preceding July 1, 1973, the reimbursable amount will be determined considering the facility's proposed schedule of charges and the charges of comparable facilities in the area.

(4) Whichever method is used to determine a facility's customary charge, the amount payable is subject to the limitation described in paragraphs (b) and (c) of this section.

* * * * *

(e) *Adjustment of reimbursable amount in case of unusual hardship.* Before August 1, 1983, a facility which can demonstrate unusual hardship because of the amount of payment made under the ESRD program may submit documentation of its costs and request a determination with respect to an equity adjustment in the payment. For rules governing exceptions to payment rates effective after that date, see § 405.439(f).

(f) *Required cost data.*—(1) Nonprovider ESRD facilities are required to furnish adequate cost information, in accordance with section 1833(e) of the Act (42 U.S.C. 1395(e)). This information will be used for the following purposes:

(i) Determination of rates of reimbursement for outpatient maintenance dialysis treatments and other reasonable and medically necessary services furnished in connection with these treatments.

(ii) Justification of requests made for adjustments in reimbursement rates under paragraph (e) of this section.

(iii) Accumulation of data for overall program evaluation.

(2) The cost information required under paragraph (f)(1) of this section shall be furnished by the nonprovider facilities in accordance with the cost reporting, recordkeeping, and audit requirements set forth in § 405.406.

(3) This requirement applies to all cost reporting periods ending before August 1, 1983. For cost reporting rules that apply to reporting periods ending on or after that date, see § 405.441.

(5) Section 405.542 is amended by revising the undesignated introductory material and redesignating it as paragraph (a), and revising and redesignating subsequent paragraphs. As revised, § 405.542 reads as follows:

§ 405.542 Criteria for determination of reasonable charges for physicians' services rendered to renal dialysis patients.

(a) *Principle.* Physicians' services to renal dialysis patients are reimbursable if the services are otherwise covered by the Medicare program and if they are reasonable and medically necessary. Physicians' services furnished between July 1, 1973 and July 31, 1983 may be reimbursed under either the "Initial Physician Reimbursement Method" described in paragraph (b) of this section or, if the physician so elects, under the "Physician Monthly Capitation Payment Method" described in paragraph (c) of this section. Physicians' services furnished on or after August 1, 1983 are reimbursable only under the monthly capitation method as described in paragraph (c) of this section. This section applies to all physicians' services furnished to outpatient maintenance dialysis patients in either a nonprovider (independent) or a provider (hospital-based) ESRD facility, or to patients dialyzing at home.

(b) *Initial physician reimbursement method, effective for services furnished before August 1, 1983.* Under this method, supervisory services, as defined in paragraph (b)(1) of this section, provided by physicians to outpatient maintenance dialysis patients are reimbursable to the facility by the intermediary as a facility service part of the dialysis session if the physician has actually furnished the service. Physicians' administrative services are considered to be facility costs (see paragraph (b)(2) of this section) included in the rates of payment for dialysis treatments and are reimbursable to the facility. Nonroutine services rendered to patients during and related to the dialysis procedure (see paragraph (b)(3)(i) of this section) and services which must be rendered at a time other than during the dialysis procedure (see paragraph (b)(3)(ii) of this section) are reimbursable to the physician (or to the beneficiary) by the carrier in accordance with the reasonable charge criteria set forth in § 405.502 (a) through (d). Physicians' services rendered to hospital inpatients who were not admitted solely to receive maintenance dialysis and to patients who are self-dialyzing at home are also reimbursable under these reasonable charge criteria.

(1) *Supervisory services defined.* Supervisory services for patients who are receiving maintenance dialysis or self dialysis training in a facility are those physicians' services which are related to the care of the patient and the need for medical management over the period of time the patient is on maintenance or training dialysis. They are non-episodic services which are furnished during the dialysis session; they reflect the facility's responsibility to provide services under the general supervision of a physician. They include all patient care services not specifically defined as nonroutine in paragraph (b)(3)(i) of this section. Supervisory services include, at least all of the following when medically appropriate:

(i) Being available to patients and to staff for consultation on the care of the patients;

(ii) Overseeing the performance of dialysis on individual patients, including but not limited to review of laboratory tests and adjustments of dialysis procedures;

(iii) Monitoring the patient's medical status and vital signs, including needed adjustments in medications;

(iv) Determining the need for supplies and medications and authorizing them;

VOL 48 ISS 92 MY 11 1983 UMI

(v) Reviewing dietary issues and modifying dietary control as needed;
(vi) Evaluating the appropriateness of the patient's proposed treatment modality;
(vii) Reviewing psychosocial issues;
(viii) Making pre- and post-dialysis examinations where medically appropriate; and
(ix) Repeated insertions of a catheter for patients on maintenance peritoneal dialysis who are not provided an indwelling catheter

(2) *Administrative services defined.* The administrative services that are rendered by physicians and that are directly related to the support of the facility are a part of the facility's cost or charge for dialysis. These services are differentiated from supervisory services and other physicians' services related to patient care because they are not related directly to the patient's care, but are of benefit to all of the patients as a whole as well as to the facility. Examples of such services include staff training, participating in the management of the facility, advising on procurement of facility supplies, supervising staff for other than direct patient care services, and staff conferences.

(3) *Services not included in supervisory or administrative services.* Physician services not considered as supervisory services (or administrative services) are:

(i) Services rendered during dialysis which are nonroutine i.e., declotting of shunts, needle insertions into fistulae, supervision of blood transfusions, care during immediately life-threatening complications related to the dialysis procedure, and care of nonrenal conditions; and (ii) services which must be rendered at a time other than during the dialysis procedure, e.g., monthly and semi-annual examinations to review health status and treatment.

(c) *Physician monthly capitation payment method.* All physician services, other than those specified in paragraph (c)(1) of this section, rendered to each outpatient maintenance dialysis patient (regardless of the patient's mode of or setting for dialysis) will be reimbursed by the carrier on a monthly capitation basis. Payment of the monthly amount, subject to the deductible and coinsurance, for all such services provided for that month is made by the carrier either to the physician, if the physician accepts assignment, or to the patient, if the physician does not accept assignment. This reimbursement method recognizes the need of patients on maintenance renal dialysis for continuing medical management over relatively long periods of time, and is responsive to physicians' charging patterns in their localities. The physician must provide to a patient all physician services not listed in paragraph (c)(1) of this section that are required by the patient in a month to qualify for this reimbursement in that month.

(1) *Services not included in monthly payment.* Physician services not covered by the monthly payment, which may be reimbursed in accordance with the usual reasonable charge rules, are limited to:

(i) Declotting of shunts.

(ii) Covered physicians' services furnished by another physician during periods when the patient or his attending physician is not available for outpatient services as set out in paragraph (c)(3) of this section.

(iii) Needed physician services which are rendered either by the physician providing renal care or by another physician and which are beyond those related to the treatment of the patient's renal condition and which are not incidental to services during a dialysis session or office visit necessitated by the renal conditions. The physician should provide documentation that the illness is not related to the renal condition and that added visits are required. The carrier's medical staff, acting also on the basis of medical consultation obtained by the carrier as may be appropriate, determines whether additional reimbursement is warranted for treatment of the unrelated illness.

(iv) Covered physician services furnished to hospital inpatients by a physician who elects not to continue the capitation payment method through the period of the inpatient stay.

(2) *Reduction of monthly payment.* The monthly payment amount is reduced in proportion to the number of days the patient is: hospitalized and the physician elects to bill separately for services furnished during hospitalization; or not attended by the physician or his or her substitute for any reason, including when the physician is not available to provide patient care or when the patient is not available to receive such care.

3. *Determination of monthly payment amount.* The factors used in determining the monthly payment amounts will be related to program experience and to the charging practices of comparable physicians for comparable services. The factors will be reevaluated periodically on the basis of program experience and may be adjusted as necessary to reflect changes in these charging practices and modes of furnishing services and to assure fairness. Revisions to the monthly amounts will be published in the **Federal Register** in accordance with the Department's established rulemaking procedures.

(d) *Physician reimbursement for self-dialysis and home dialysis training.* Reimbursement for physicians' services rendered to dialysis patients undergoing self-dialysis and home dialysis training will be limited to a flat amount, to be determined from program experience—and reviewed periodically—for each patient under the physician's supervision during the training course, subject to the deductible and coinsurance provisions. Payment will be made upon completion of the training course, and will be in addition to any amounts payable under either of the reimbursement methods, described in paragraphs (b) and (c) of this section, for physicians' services rendered to a renal dialysis patient. Where the training course is not completed, e.g., the patient can no longer be trained, payment will be proportionate to the time spent in training. All those physicians' services determined to be required to create the capacity for self-dialysis and home dialysis are covered by this payment.

6. Section 405.544 is revised to read as follows:

§ 405.544 Payment for home dialysis equipment, supplies, and support services

(a) *Equipment and supplies.*—(1) Equipment and supplies furnished to patients before August 1, 1983:

(i) Are reimbursable on a reasonable cost basis in accordance with Subpart D of this part if they are furnished by an ESRD facility that does not have an agreement with HCFA under §§ 405.690 (for purchase, installation, maintenance, and reconditioning of home dialysis equipment) or 405.691 (for target rate reimbursement for home dialysis services); or

(ii) Are reimbursable on a reasonable charge basis in accordance with § 405.502 (a) through (d) if they are not furnished by or through an ESRD facility.

(2) Equipment and supplies furnished to patients on or after August 1, 1983:

(i) Are reimbursable only under the prospective payment rates established under § 405.439, except as provided in paragraphs (a)(2)(ii) or (a)(2)(iii) of this section;

(ii) Are reimbursable to a party other than an approved ESRD facility on a reasonable charge basis in accordance with § 405.502 (a) through (d) if the home dialysis patient elects, in accordance with procedures established by HFCA, to obtain his or her home dialysis equipment, supplies, or both from a supplier other than an approved ESRD facility. If the home dialysis patient elects to obtain either equipment or supplies, but not both, from a supplier other than an approved ESRD facility, then the one obtained through the approved ESRD facility is reimbursable on a reasonable cost basis in accordance with Subpart D of this part; or

(iii) If equipment is furnished under an agreement under § 405.690 (for purchase, installation, maintenance, and reconditioning of home dialysis equipment), the equipment and related services are reimbursable on a reasonable cost basis under § 405.436. In this case supplies are reimbursable on the basis of prorated prospective payment rates established under § 405.439, unless paragraph (a)(2)(ii) of this section applies.

(b) *Support services.*—(1) Support services furnished to patients before August 1, 1983:

(i) Are reimbursable on a reasonable cost basis in accordance with Subpart D of this part if they are furnished by a hospital-based ESRD facility that does not have an agreement with HCFA under section 405.691 (for target rate reimbursement for home dialysis services); or

(ii) Are reimbursable on a reasonable charge basis in accordance with § 405.502 (a) through (d) if they are furnished by an independent ESRD facility that does not have an agreement with HCFA under section 405.691 (for target rate reimbursement for home dialysis services).

(2) Support services furnished to patients on or after August 1, 1983:

(i) Are reimbursable only under the prospective payment rates established under § 405.439, except as provided in paragraph (b)(2) (ii) or (iii) of this section;

(ii) If the patient elects to obtain his or her home dialysis equipment, supplies, or both as described in paragraph (a)(2)(ii) of this section, support services furnished to the patient by a hospital-based ESRD facility are reimbursable on a reasonable cost basis in accordance with Subpart D of this part, and support services furnished by an independent ESRD facility are reimbursable on a reasonable charge basis in accordance with § 405.502 (a) through (d); or

(iii) If equipment is reimbursable under paragraph (a)(2)(iii) of this section, then support services are reimbursable on the basis of prorated prospective payment rates established under § 405.439 unless paragraph (b)(2)(ii) of this section applies.

D. 42 CFR Part 405, Subpart F is amended as follows:

1. The authority citation for Subpart F is revised to read as follows:

Authority: Secs. 1102, 1816, 1842, 1861(u), 1864, 1866, 1871, and 1881 of the Social Security Act, 49 Stat. 647 as amended, 79 Stat. 297–299, 79 Stat. 309–312, 79 Stat. 322; 79 Stat. 326; 79 Stat. 327–329; 79 Stat. 331; 80 Stat. 849; 81 Stat. 852; 81 Stat. 863; 81 Stat. 942; 42 U.S.C 1302, 1395 et seq., unless otherwise noted.

2.The table of contents for Part 405, Subpart F is amended by revising § 405.690 and 405.691, to read as follows:

Subpart F—Notice, Election and Agreements

* * * * * *

405.690 Agreement with ESRD facilities for reimbursement without regard to deductibles and coinsurance for home dialysis equipment furnished before August 1, 1983.

405.691 Agreements with approved providers or ESRD facilities for reimbursement on a target reimbursement rate basis for home dialysis supplies, equipment, and support services furnished before August 1, 1983.

3. Section 405.690 is amended by revising the titles and the undesignated introductory paragraphs as follows:

§ 405.690 Agreements with ESDR facilities for reimbursement without regard to deductibles and coinsurance for home dialysis equipment furnished before August 1, 1983.

As provided by section 1881(e) of the Act and § 405.438 of this part, HCFA may make agreements with approved ESRD providers and facilities to reimburse them for the reasonable cost of furnishing home dialysis equipment and supplies specified in § 405.231(p)(1), without regard to deductible and coinsurance provisions of this part. These agreements are effective only for equipment furnished before August 1, 1983.

* * * * * *

4. Section 405.691 is amended by revising the title and paragraph (a), and removing paragraph (c) through (e), as follows:

§ 405.691 Agreements with approved providers or ESRD facilities for reimbursement on a target reimbursement rate basis for home dialysis supplies, equipment, and support services furnished before August 1, 1983.

(a) *General requirement.* As provided by section 1881(b)(4) and (5) of the Act and § 405.440 of this part, HCFA may execute agreements for reimbursement on a target reimbursement rate basis with approved providers or ESRD facilities which demonstrate their ability to furnish efficiently the full scope of services, including where necessary, the services of trained home dialysis aides as specified in § 405.231(p)(4). The agreement shall be effective with respect to services rendered on or after the date it is accepted by HCFA. (See § 405.440 for conditions for target rate reimbursement, and § 405.439 for payment for renal dialysis, services on or after August 1, 1983.)

* * * * * *

E. 42 CFR Part 405, Subpart U is amended as set forth below:

The authority citation for Subpart U reads as follows:

Authority: Secs. 1102, 1861, 1862(a), 1871, 1874, and 1881 Social Security Act; 49 Stat. 647, as amended, 79 Stat. 325, 331, 332, and 340; 42 U.S.C. 625(g), 1302, 1395x, 1395y (a), 1995hh, 1395kk, and 1395rr unless otherwise noted.

1. The table of contents for Part 405, Subpart U is amended by adding new § 405.2164 to read as follows: Subpart U—Conditions for Coverage of Suppliers of End-Stage Renal Disease (ESRD) Services

* * * * * *

405.2164 Conditions for coverage of special purpose renal dialysis facilities.

* * * * * *

2. Section 405.2102 is amended by adding paragraph (e)(5) and revising paragraph (h) as follows:

§ 405.2102 Definitions.

* * * * * *

(e) *ESRD facility.*

* * * * * *

(5) *Special purpose renal dialysis facility.* A renal dialysis facility which is approved under § 405.2164 to furnish dialysis at special locations on a short-term basis to a group of dialysis patients otherwise unable to obtain treatment in the geographical area. The special locations must be either special rehabilitative (including vacation) locations serving ESRD patients temporarily residing there, or locations in need of ESRD facilities under emergency circumstances.

* * * * * *

(h) *Furnishes on the Premises.* The ESRD facility furnishes services on its main premises; or on its other premises that are (1) contiguous with or in immediate proximity to the main premises, and under the direction of the same professional staff and governing body as the main premises, or (2) approved on a time-limited basis as a special purpose renal dialysis facility.

* * * * * *

3. A new section 405.2164 is added to read as follows:

§ 405.2164 Conditions for coverage of special purpose renal dialysis facilities.

(a) A special purpose renal dialysis facility must comply with all conditions

VOL
48
ISS
92
MAY
11
1983
UMI

for coverage for renal dialysis facilities specified in §§ 405.2130 through 405.2164, with the exception of §§ 405.2132, 405.2134, and 405.2137.

(b) A special purpose renal dialysis facility must consult with a patient's physician to assure that care provided in the special purpose dialysis facility is consistent with the patient's long-term program and patient care plan required under § 405.2137.

(c) The period of approval for a special purpose renal dialysis facility may not exceed 8 calendar months in any calendar year.

(d) A special purpose renal dialysis facility may provide services only to those patients who would otherwise be unable to obtain treatments in the geographical areas served by the facility.

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare—Hospital Insurance and No. 13.774, Medicare—Supplementary Medical Insurance)

Note.—Appendices I and II will not appear in the Code of Federal Regulations.

Appendix I—Regulatory Impact and Flexibility Analysis

A. Introduction

Executive Order 12291. E.O. 12291 requires that a regulatory impact analysis be performed on any major rule. A "major rule" would:

- Have an annual effect on the national economy of $100 million or more;
- Result in a major increase in costs or prices for consumers, any industries, any governmental agencies, or any geographic regions; or
- Have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or import markets.

We estimate that several alternatives of the prospective reimbursement system could reduce Federal Government expenditures by 100 million dollars or more in the first 12 months of implementation. Further, nearly all alternatives would result in significantly reduced gross revenues for the ESRD dialysis service industry. We believe that the incentives established by these regulations will strongly benefit competition, productivity and innovation.

Regulatory Flexibility Act of 1980. The Regulatory Flexibility Act (Pub. L. 96-354) requires the Federal Government to anticipate and reduce the impact of rules and paperwork requirements on small businesses. If a regulation would have a significant impact on a substantial number of small entities, we must publish an analysis describing that impact. This analysis must indicate the purpose and reason for the regulations, the number of small businesses to which it would apply, reporting and recordkeeping requirements, possible overlap and conflict with other Federal rules, and a description of possible alternative means of accomplishing the stated objectives.

The average reported annual costs of the independent facilities in our audit sample was $1.3 million. The average reported costs for sampled hospitals was $.76 million. None had over 100 employees. Since most dialysis facilities, both independent and hospital-based, are small, and since this regulation will impact significantly these facilities, a regulatory flexibility analysis must be performed.

Paperwork Reduction Act. The Paperwork Reduction Act (Pub. L. 96-511) requires that all reporting and recordkeeping requirements contained in both new and existing regulations minimize the burden on persons who will provide information. Since this regulation includes reporting and recordkeeping requirements, the following analysis deals with these matters in conjunction with the other impacts expected of the prospective reimbursement system.

B. Nature of the Program

The Social Security Amendments of 1972 (Pub. L. 92-603) provided Medicare coverage for end-stage renal disease (ESRD) patients who meet certain entitlement requirements. Benefits include kidney transplants and other necessary hospitalization and maintenance dialysis treatments performed in a dialysis facility or in the patient's home.

A number of studies and public hearings indicate that the program has been generally successful in protecting renal disease patients against the catastrophic costs of needed care. However, the major problem of the ESRD program is its increasing expenditures, caused in large part by: (1) The high rates Medicare pays for dialysis in facilities; (2) the lack of incentives to encourage Medicare patients to opt for less expensive methods of treatment such as kidney transplants and home dialysis; (3) significant growth in the ESRD population, and (4) the repetitive nature of the treatment for a chronic condition.

ESRD program payments from the Supplementary Medical Insurance Trust Fund have climbed steadily to more than 9 percent of total Medicare Part B benefit payments in 1979. Thus, as of 1979, a relatively large portion of Medicare Part B benefits went to only about 50,000 ESRD beneficiaries, while the remainder was distributed among more than 23 million mostly aged beneficiaries.

Characteristics of the ESRD Industry. This industry was virtually created by the 1972 legislation. Before 1972 there were only around 200 ESRD facilities throughout the country providing outpatient maintenance dialysis services. Today there are over 1200. These facilities are largely dependent on Federal government payments for their existence. Over 90 percent of all dialysis patients are Medicare beneficiaries. The Medicare program pays 80 percent of the cost or charge of outpatient dialysis for these patients. Additional Federal money is infused into the ESRD industry through the State Medicaid programs. Most of the State Medicaid programs pay the remaining 20 percent of the facility cost or charge for those patients that meet their eligibility requirements.

Within this framework, however, two different approaches to service delivery have developed—hospital-based units and independent facilities. While their respective shares of the market are almost equal, there are distinct differences between the two types of suppliers.

For example, hospital-based units are smaller on the average than independent facilities. Our 1980 audit data indicate the average number of stations is 7.5 per hospital facility and 13.2 for independents. Similarly, the average output, in terms of treatments per unit, for hospitals was slightly over half of the average output per independent facility. Thus, while the total output is similar, the individual units used to produce services consist of many small producers in the case of hospitals, and fewer but larger independent producers. They also differ in the proportion of their home dialysis patients, with 23.5 percent of hospital-based and 10.5 percent of independent patients dialyzing at home.

Another important distinction lies in the geographic distribution of facilities. Independents tend to locate in certain geographic areas, whereas the hospital sector is more evenly dispersed. 1982 data show that 50 percent of all independents are located in six States (California, Florida, Pennsylvania, Virginia, Texas and Illinois). Nine States, mostly with less urbanized areas, have no independent facilities.

Because of the uneven distribution of independents, any prospective reimbursement system will have varying impacts depending on location. The most obvious example would be a State, such as South Dakota, which has no independent facilities and a low area wage index. If there were no exception process, this combination of factors could result in dire consequences for beneficiaries if the proposed rate was insufficient to permit hospitals to continue furnishing dialysis services.

There are also significant geographic differences in furnishing home dialysis. Certain States have a much greater percentage of their patients dialyzing at home, compared to other States. Sometimes there are dramatic differences between contiguous States. For example, Washington has 54 percent of its patients on home dialysis, while California has only 9 percent, and Indiana has a 44 percent home population as compared to 6 percent in Illinois. In addition, some States, such as New York and Maryland, have established programs that furnish all necessary supplies and equipment for home patients.

We would have liked to analyze quantitatively the relative geographic effect of the prospective reimbursement system, but, as noted elsewhere, we do not have enough cost data on independent facilities, and we have no useful information on the effect of paying hospitals less than the current screen of $138 per treatment.

Contrast between hospitals and independents is also apparent in the recent growth in the number of independent producers entering the market, where the hospital sector has shown little change:

	1978	1979	1980	September 1981	September 1982
Hospital facilities	638	645	649	654	691
Independents	275	330	405	466	514

The financial structure of the competing suppliers is also dissimilar. Over three-fourths of all independents are private, for-profit entities, while only 5 percent of hospital units fall into this category.

Finally, over half of the independent facilities are members of chain organizations. The largest chain organization owns or operates approximately one-third of the total independent facilities and provides approximately 1.5 million outpatient dialysis treatments per year. There are very few hospitals that are members of chain organizations.

Who Is Affected by These Changes?

Although we do not have adequate data to quantify all the costs and benefits of the changes we are making, we can identify the most affected groups. Many of these groups will experience both some benefit and some cost as a result of these regulations.

We expect that the major groups benefited will be:

- The more efficient hospitals and outpatient care facilities that provide dialysis services;
- Manufacturers of dialysis equipment;
- Dialysis patients and their families;
- Home dialysis aides;
- Medicare beneficiaries; and
- Taxpayers.

The primary benefit sought, that is, savings over the projected future cost of the previous reimbursement system, will accrue directly to the Federal government and indirectly to all present and prospective Medicare beneficiaries, since this will restrain the growth of the cost of the ESRD program and protect the supplemental medical insurance trust fund by restraining the accelerating outflow of funds.

Dialysis patients will benefit in several ways, although these benefits will not accrue to all patients or be evenly distributed. First, their coinsurance obligation, that is, the requirement under the Social Security Act that they be liable for 20 percent of the charges for covered services furnished to them, will be reduced or retained at the present level to the extent that their payment rates are lessened or maintained. Second, there are many positive effects of dialysis in the home. These include increased personal responsibility for and control of treatments; scheduling of dialysis treatments at the patient's convenience; eased access to care; reduced traveling; reduced need to use the lesser-preferred treatments such as extended peritoneal dialysis; and intangible benefits, such as the comfort and security that patients experience in dialyzing at home.

We also expect that some patients currently in home dialysis will benefit from being relieved of ordering supplies themselves, since prospective payments may afford facilities an opportunity to increase their revenues by performing this function.

In addition, the encouragement of home dialysis will enable more new ESRD patients to take advantage of early entitlement provisions. These provide that patients who begin a course of training for home dialysis may be excepted from the required three-month waiting period for Medicare entitlement if certain conditions are met.

These benefits to dialysis patients will often also benefit their families, especially in reducing expenses and travel.

The dialysis facilities themselves will benefit in several ways, although these benefits will not accrue to all facilities or be evenly distributed. Prospective reimbursement will clearly provide an opportunity for efficient and economical facilities to maximize their net proceeds. Facilities that currently have active home dialysis programs will have a competitive advantage, while those that do not have a substantial home program will benefit less.

Dialysis machine manufacturers will experience an expanded market, since only one patient uses a machine placed in a home, but machines in facilities may be used to dialyze several individuals during a week.

We expect the following groups will experience some costs as a result of proposed changes:

- Less efficient hospitals and outpatient care facilities that provide dialysis services;
- Some physicians treating dialysis patients; and
- Some current users of home dialysis and their families.

The less efficient dialysis facilities will experience the major adverse effects, in that inefficient and high-cost facilities that do not qualify for an exception to their payment rates may have costs greater than their revenues in the initial implementation period. Further, if we are successful in reducing the average payment per treatment under the prospective reimbursement system, the projected aggregate revenues of dialysis facilities will be reduced by an amount equal to our projected budget savings. However, the resulting pressure to reduce costs below payment rates, as well as the opportunity to retain the amount of payment in excess of costs, is central to the prospective system that we are implementing.

Our changes in physician reimbursement will have mixed results, with some physicians benefited but most adversely affected, although not very substantially. The changes will reduce payment options available to

VOL 48 ISS 92 MAY 11 1983 UMI

physicians treating dialysis patients by eliminating "initial method" reimbursement. We will pay for all physicians' routine dialysis services on a monthly capitation basis, combining home and in-facility services under a single payment rate. In some cases, this may result in a reduction of revenue, although doctors who treat relatively high proportions of home patients may benefit form these changes.

Although we expect that the majority of patients will benefit from these regulations, some patients will experience increased costs. Patients now dialyzing at home will have increased co-insurance obligations, since the composite rate will be higher than the current home dialysis charges of some facilities. However, since the co-insurance obligations of many patients are covered under State Medicaid programs (which would experience net savings due to the decreased obligations of other patients), we do not expect this effect to be substantial. Further, home dialysis patients may choose not to receive equipment and supplies through a facility, and thereby avoid co-insurance increases resulting from rate increases.

Many commenters now dialyzing at a facility expressed concern that being forced to dialyze at home would result in increased utility expenses, decreased quality of care, and an increased burden on family members. We believe these concerns are unfounded. While we are encouraging home dialysis and believe it to be beneficial to many patients now dialyzing in a facility, these regulations will not force any individual to choose home dialysis. Therefore, those patients who, in consultation with their physician, decide that they prefer continued in-facility dialysis may continue with in-facility dialysis. Only those patients who are persuaded that home dialysis offers greater net benefits will change the location of dialysis. The purpose of this regulation is to assure that, in assisting patients to make an informed decision, physicians and facilities will be unbiased because they are free from adverse reimbursement consequences if a patient chooses home dialysis.

Some commenters expressed concern that facility closures would leave them effectively unable to choose in-facility dialysis because of increased travel time to the nearest facility. The increase in facilities, even since the announcement of our proposed rates in November 1981, confirms our belief that facilities will be able to operate at these rates, and that facilities that close will be replaced by new, more efficient facilities. Further, we have provided an exception to the prospective payment rates for isolated essential facilities to prevent inappropriate facility closures.

Tightening the rate of payment and increasing the incentives for efficiency will result in pressures on the ESRD manufacturers and suppliers as facilities economize and seek to lower their costs.

Overall Effects. We expect the prospective reimbursement system to accomplish two major objectives which, though not without effects that may seem adverse to some parties, will be of sufficient benefit to offset greatly any costs that result. These objectives are (1) to encourage home dialysis to the greatest extent feasible for the ESRD patient population, and (2) to encourage economy and efficiency in furnishing dialysis services, thereby significantly decreasing the average cost per treatment, and accuring substantial budget savings over what we project would be incurred by continutation of the current payment system. The objectives are closely related, since we expect increasing home dialysis to contribute to cost reduction because it is a less expensive way to deliver treatment.

As of 1982, only 17 percent of all ESRD treatments were performed in a patient's home. Although we have made no specific projection of the dynamic responses the ESRD industry would make to our proposed prospective composite rates, many experts belive that under such an incentive system, this population could approach 30 to 40 percent within 5 to 7 years. We doubt that more than that is feasible or desirable on a national basis since many individuals are too sick or do not have the help and resources necessary to dialyze at home. This increase in home dialysis will result in generally improved quality of life for home patients and their families, and the accompanying autonomy they achieve may improve many patients' degree of rehabilitation.

These changes in the reimbursement system will also accrue to the Federal government substantial savings over projected budget expenditures under the previous payment methods. This benefit is, in a sense, offset by the fact that these savings represent a reduction of expected aggregate revenues for dialysis facilities. However, we believe that many of these facilitites have been over-reimbursed by previous payment methods, and that our historical expenditure level has not been completely justified by the services furnished and the benefits experienced. Therefore, we expect these changes to yield significantly greater net benefits than the previous system. Since we do not expect any reduction in quality of care, the improved cost-effectiveness of the dialysis delivery system justifies these changes.

C. Analysis of Alternatives

The following section sets forth our analysis of the comparative reimbursement and program savings impacts of certain alternative methodologies we considered. The costs and savings figures in the following analyses are based on the following assumptions:

- For purposes of this analysis, we have assumed the prospective reimbursement system will be implemented July 1983.
- For the remaining months of FY 1983, we project that ESRD beneficiaries will receive approximately 2.0 million treatments in facilities, and 0.4 million treatments at home (2.4 million treatments, total).
- Also in FY 1983, hospital-based facilities will furnish treatments to approximately 24,500 in-facility patients and 8,000 home patients, and independent facilities will furnish treatments to 27,600 in-facility patients and 3,400 home patients.
- If no prospective reimbursement system were established, the costs of the current payment method would increase by both the growth in treatments and, in the case of hospitals reimbursed on a cost basis, by a 5 percent annual inflation factor.
- In all alternative methods (except the continutation of the current system as it affects independent facilities) we would pay all facilitites their allowable Medicare bad debts, up to their unrecovered Medicare cost.
- The costs and savings for each alternate are projected on the basis of the average, weighted-per-treatment payment for our audit sample of 67 hospital-based and 38 independent facilities. This weighting adjusts the results both for the effects of the area wage index and the number of treatments furnished in each facility of the sample.
- For all alternatives, we project that the incremental increase in administrative costs over the previous system, including audits, exceptions approval, and cost report review, will be about $300,000 per year. The savings have not been adjusted to show this, since it would not affect the comparability of the projections.
- If no prospective reimbursement system were implemented, continuation of the present payment system would result in $295 million in incurred program costs for dialysis services during the remaining months of FY 1983.

In making these assumptions, we did not allow for hypothetical dynamic changes that may occur in the ESRD marketplace in response to implementation of the prospective reimbursement system, because we did not have an adequate basis on which to project dynamic responses. Therefore, we did not assume any growth of independent facilities beyond that which we can project from historicl data. Neither do our projected savings include adjustments to account for any expected acceleration of the trend for more patients to dialyze at home. Other dynamic responses which may reasonably be expected to occur, but which are not included in our projections, would be reductions in the unit cost of furnishing dialysis, and expansion of or market entry of new efficient types of dialysis facilities. Therefore, to the degree the following estimates are based on conservative assumptions, we expect our savings figures are underestimated.

Alternative Rate-Setting Options. Section 2145 of Pub. L. 97–35 states that the Secretary may implement an alternative to the composite rate methodology if detailed analysis shows it is more effective in encouraging the efficient delivery of dialysis services and promoting home dialysis. The main alternative to a composite rate available for consideration would be to set a separate rate for home dialysis. (We had previously considered several other options, combining rates for hospitals and independents, but this is not permitted under section 2145. Although this legal constraint does not preclude us from analyzing other alternatives, since Executive Order 12291 permits it, we did not present such analysis because the other alternatives would not have a range of effects substantially outside those of the options examined below.)

Option A: Three separate rates for home dialysis, and for independent and hospital-based in-facility dialysis. This alternative to the composite rate would essentially entail three rates: one for hospital-based in-facility dialysis, another for independent in-facility dialysis, and a third for home dialysis. The base cost components for in-facility dialysis would be set at the median of the labor and nonlabor costs we obtained from our audit data and would be set independently of the home rate. This would result in average payment rates of $140 per treatment for hospitals and $111 for independents. The home rate would be set at the maximum home dialysis target rate, as established by the 1981 Reconciliation Act at 75 percent of the national average payment for in-facility dialysis. Since 1979, the target rate has been set by law at the maximum of 70 percent of the national average payment for in-facility dialysis. This five percent increase in the home dialysis rate amounts to an average increase of $9 per treatment ($116–$107). This method would reimburse approximately 49 percent of both groups below their current costs per treatment.

The projected average, high, and low payment rates per treatment resulting from this method are given in the table below. The high and low rates are based on area wage indexes for the continental United States.

	Average [1]	High	Low
Hospital-Based In-facility	$140	$177	$119
Independent In-facility	111	136	97
Home Dialysis	116	130	104

[1] These projected average payment rates are somewhat less than those estimated in the NPRM. This is primarily the result of applying the latest BLS data. We have also refined our methodology for these estimations in order to make it more accurate.

This would have no significant impact on the copayment obligations of beneficiaries currently dialyzing at home, but would, based on the average payment rate noted above, reduce the obligations of hospital-based dialysis patients by $1192 per year, and of independent patients by $775 per year. The aggregate effect would result in significant overall reductions in these obligations, which would benefit State Medicaid programs and private insurers as well as the beneficiaries and their families. The following table shows the effects this option would have on coinsurance obligations for a full year, based on the number of patients we project will be treated in FY 1983.

	Number of patients	Average reduction per patient	Total reduction (millions)
Hospital-Based	24,500	$1192	$29.2
Independent	27,600	775	21.4
Home	11,400	179	2.0
Total	63,500	829	52.6

Further, the Federal government would realize extensive reductions in incurred costs in Fiscal Year 1983 and subsequent years, as follows:

[Millions]

Fiscal year	Projected costs [1]		Projected savings
	Present system	Option A	
1983 (July to September)	$295	$255	$40
1984	1,270	1,040	230
1985	1,370	1,080	290
1986	1,455	1,120	335
1987	1,535	1,155	380
1988	1,605	1,180	425

[1] These projections are based on the average payment rates shown above and are rounded to the nearest $5 million. In addition, they do not assume dynamic responses to the incentive proposals. See the above discussions concerning our assumptions.

This option would realize larger savings than the methodology we are implementing. This would result primarily from setting the independent in-facility rates on the basis of independent costs only. Since the majority of in-facility treatments are furnished in independent facilities, this produces significantly greater savings, but at the expense of many of the most efficient and economical facilities. Further savings would be incurred under this option as a result of the statutory cap on the target payment rate for home dialysis.

In addition to the savings that would be realized, the main advantage of this option is that the home rate would follow the present law for target rate reimbursement. However, it may be argued against this method that—

1. The present target rate system (set at 75 percent of the average in-facility dialysis payment) has little voluntary participation (20 out of the over 1200 facilities have agreements) and we do not know whether a 5 percent rate increase would change this.

2. Both the logic of the composite rate and our cost data suggest this alternative cannot satisfy the two statutory tests that the alternative both be more efficient and promote home dialysis more effectively. If home and in-facility dialysis were reimbursed at separate rates, and home dialysis were reimbursed at less than what the composite rate would have been, this alternative would not appear to promote home dialysis more effectively than the composite rate. On the other hand, if the home rate were set higher than the composite rate, then we would be paying out more than under the composite rate and the alternative would not be as efficient as the composite rate.

3. Under section 1881(b)(8), the target payment rate for home dialysis is limited to a maximum of 75 percent of the per treatment cost of in-facility dialysis. This would reduce flexibility and may result in a gradual lowering of

VOL 48 ISS 92 MY 11 1983 UMI

the home rate if the in-facility rate drops.

4. A major disadvantage of this option is that it would so greatly and rapidly reduce reimbursement to independent facilities that it would very likely have a substantial impact on the availability of services. As a result, we would have to grant a considerable number of exceptions.

Option B: Composite rates for home and in-facility dialysis based on median costs of all facilities. This option, and others that may be similar to it in effect, is clearly preferred in the statute. As discussed above, under this method we would pay each dialysis facility a certain rate per treatment for all dialysis session furnished, whether in the facility or at home. The independent rates would be based on the median costs per treatment for all audited facilities, adjusted for the proportion of independent patients dialyzing at home and for geographic differences on labor costs. The hospital rates would be similarly adjusted by area wage indexes and the proportion of hospital patients dialyzing at home and would, in addition, incorporate two other adjustments representing the differences between hospital costs and data and those of the independent facilities, as explained in section III. H. of this preamble.

The average, high, and low payment rates per treatment under this option are given in the table below. The high and low rates are based on area wage indexes for the continental United States.

	Average[1]	High	Low
Hospital-Based Composite	$131	$158	$114
Independent Composite	127	157	106

[1] These projected average payment rates are somewhat less than those estimated in the NPRM. This is primarily the result of applying the latest BLS data. We have also refined our methodology for these estimations in order to make it more accurate.

These rates would result in reimbursing 48 percent of all hospital-based facilities and 29 percent of all independent facilities at a rate per treatment below their current costs for in-facility dialysis. (Note that these projected impacts do not take into account the transitional implementation of the area wage indexes (limiting the lower indexes to no less than 0.9, and limiting the maximum payment per treatment to $138). This transition practice will have little or no discernible effect on the average payment rates or overall savings, since the effects of the two limits offset each other. Nineteen percent of all facilities will benefit by limiting the area wage index to no less than 0.9. Only 8 percent of all facilities are expected to be adversely affected by limiting the maximum per treatment payment to $138.)

This would affect beneficiary copayment obligations in two ways. First, based on the overall decrease in the average payment and the predominance of in-facility dialysis, most beneficiaries, especially those dialyzing in a facility, would experience significant reductions in their coinsurance obligations. However, because of the change from separate home and in-facility rates to composite rates, many beneficiaries already dialyzing at home would experience an increase if their treatments were reimbursed under the composite rate, since the composite rates would be significantly higher than current payment levels for home dialysis. (A beneficiary would retain the right to bill independently for supplies and equipment, in which case support services furnished by a facility would be reimbursed on a fee-for-service basis.) The amount of increase per patient would vary according to whether the related facility were independent or hospital-based. The annual effect on beneficiary coinsurance obligations, based on the average payments given above, would be as follows:

Location	Type of facility	
	Hospital-based	Independent
Home	+$268[1]	+$149[1]
In-facility	−1,341	−298

[1] This does not take into account the beneficiary's option to bill independently.

Despite the coinsurance increase for home dialysis, the aggregate savings for all patients would still be great, as shown in the following chart, based on numbers of patients for FY 1983, yielding an average savings per beneficiary of about $606 per year.

	Number of patients	Average change per patient	Total coinsurance change (millions)
Hospital-based	24,5000	−$1,341	−$32.9
Independent	27,600	−298	−8.2
Home-Hospital	8,000	+268	+2.1
Home Ind.	3,400	+149	+0.5
Total	63,500	−606	−38.5 (Net reduction)

In FY 1983 and subsequent fiscal years, we estimate savings to the Federal government over previous methods would be as follows:

[Dollars in millions]

Fiscal year	Projected costs[1]		Projected savings
	Present system	Option B	
1983 (July–September)	$295	$270	$25
1984	1270	1090	180
1985	1370	1110	260
1986	1455	1150	305
1987	1535	1185	350
1988	1605	1210	395

[1] These projections are based on the average payment rates shown above and are rounded to the nearest $5 million. These are our actuary's most recent estimates.

The exception process will be tightened compared to historic treatment of exceptions for hospital-based facilities. Projected savings are calculated based on rates remaining at the same level; however, the rates will be reevaluated periodically.

Like Option A, this option has a considerable amount of savings, although not as much as Option A. Unlike Option A, however, it does not create those legal problems discussed above. Another advantage of this option is that it phases in the prospective reimbursement system less abruptly than Option A, especially for independent facilities. This option is more likely to accelerate the growth in the number of independents than Option A. Finally, this option would encourage use of home dialysis more than Option A, since the composite rate paid for both home and in-facility dialysis is higher than the home (that is, target) rate under Option A.

Option C: An alternative method of treating cost data for deriving composite rates. We did consider a different methodology for setting composite rates.

Under this option, rates for independent facilities would be based on a percentage of the median cost of the audited independent facility data and the same percentage of the median audited cost of providing home dialysis. These two cost factors would be split into labor/nonlabor portions and weighted by the percentage of patients in each setting. Rates for hospital-based facilities would be based on the same data *plus* a difference in hospital overhead costs of $7.50.

This option could have dollar impacts similar to those of Option B, above, and would have many of that option's advantages. However, we did not adopt this methodology because, by failing to include the hospital cost experience, it may less appropriately reflect the cost

experience of the entire ESRD program than the option we have selected.

D. Impact of Proposed Changes in Physician Reimbursement

To the extent our data allows, we have projected the probable impacts of these regulations on paying for physicians' renal services only on a monthly capitation basis (discontinuing the initial method that pays on a per treatment basis). Due to problems in identifying and enumerating the affected physicians and their characteristics, our projections are limited to the aggregate impacts. At present, we are not able to assess the effects our proposal would have on individuals or particular groups of physicians. We welcome any comments or information that would contribute to our consideration of these effects when we issue a final rule.

The following section sets forth our analysis of the reimbursement and program savings impacts of our proposed rate-setting methodology as compared to continuation of the current payment methods. The costs and savings figures are based on assumptions listed in paragraph C., above, and the following additional assumptions:

- For purposes of this analysis, we have assumed that the proposed capitation system will be implemented beginning July, 1983.
- In FY 1983, payments to physicians who were under the initial method of reimbursement would average $210 per month for in-facility patients and $25 per month for home patients.
- In FY 1983, the average monthly payments to physicians under the current alternative reimbursement method would be $220 for in-facility treatment and $154 for home treatment.
- In FY 1983, 26.5 percent of all in-facility treatments and 27 percent of all home treatments would be reimbursed under the initial method; 73.5 percent of all in-facility treatments and 73 percent of all home treatments would be reimbursed under the alternative method.
- If the previous system (initial and alternative methods) of reimbursement were continued throughout the remainder of FY 1983, the cost of those payment methods would be $25 million.
- For the purpose of the savings estimates, we are holding the capitation payment levels constant. We would review the payment levels regularly with our review of the prospective payment rates for facility services.

Projected Impact on Aggregate Payments. As discussed above, under the new capitation payment system, we will pay each physician a constant monthly amount for each patient he or she treats, regardless of whether the patient dialyzes in-facility or at home. This payment will vary according to local prevailing charges from a low of $144 per month to a high of $220 per month, averaging $184 per month.

When compared to previous payment levels, it is clear that this payment level will result in a significant reduction in the amounts paid for physician services related to in-facility treatment. However, it will also result in an even larger *increase* in the amounts paid for services to home patients. As a result, the effect on an individual physician would be dependent on the proportion of patients dialyzing at home. Physicians with no home patients could experience a significant reduction in gross revenues related to dialysis services, while others, with larger home practices, could be significantly benefited.

We project subsequent fiscal year impacts as follows:

[Dollars in millions]

Fiscal year	Projected costs[1]		
	Present systems	Proposed systems	Projected savings
1983 (July–September)	$25	$25	$0
1984	130	120	10
1985	135	125	10
1986	145	130	15
1987	150	135	15
1988	150	135	15

[1] These projections are based on the average payment rates shown above, and are rounded to the nearest $5 million. These are our actuary's most recent estimates.

Note that these figures represent only a portion of the total revenues of the affected physicians. In addition to these capitation payments, they will continue to bill fee-for-service for nonroutine services to their dialysis patients. Most of these physicians have other sources of income, such as patients other than their chronic dialysis patients, although proportions would vary widely. Further, many of these physicians receive payment for administrative services from the dialysis facilities with which they are affiliated.

Comparative Administrative Costs. The prospective system will be much simpler to administer than the current one. By eliminating the initial method, we end the complexity of having parallel systems. We will reduce the number of bills to be processed, by shifting a number of physicians from a per treatment to a per month payment basis. In addition, all bills will be processed through the carriers, simplifying the identification of duplicate payments, which will yield further savings.

Other Effects. The current payment methods have produced significant incentives for physicians to treat dialysis patients in the facility. By ending the disincentive to treat dialysis patients in their homes, we expect that each physician may be able to treat a greater number of patients. Although under current regulations (set forth at 42 CFR 405.2162(b)) a physician is not required to be present for every session, even in a facility, expert advice has informed us that a physician can care for 10 home patients using the same time and personal resources it would take to care for 7 in-facility patients. By shifting as many patients to home care as feasible (considering available assistance and support, quality of care, and standards of medical practice), the current physician population could reasonably care for a patient population increased by 5 to 10 percent.

E. Impact of Other Provisions

Some of the provisions of these final regulations are not included in this impact analysis, since we believe their overall effects will be negligible. For example, we expect that the extension of coverage to ESRD services furnished by special purpose renal facilities will result in approval of between 5 and 25 such facilities, while those patients served by a special purpose facility approved on a time-limited basis for emergency purposes will certainly not consider those services insignificant, in terms of the costs of the entire program the economic effects are small. Similarly, while some patients may now be able to have their dialysis at a vacation site reimbursed, with some unquantifiable benefit to themselves and further benefit to the facility, since the reimbursement rules are the same for those facilities as for permanent certified facilities, the program result is neutral.

F. Burden and Cost of the Proposed Recordkeeping and Reporting Requirements

The recordkeeping and reporting requirements of these regulations will apply to all ESRD services furnished by the facility. These include outpatient dialysis, self-care dialysis training, and home dialysis services, supplies, and equipment. We believe that these rules merely clarify previously existing requirements. New cost reporting forms, developed under our previous regulations, have been approved by the Office of Management and Budget and implemented. The new cost report form for independent renal dialysis facilities (HCFA 265; OMB approval number

VOL 48 ISS 92 MY 11 1983 UMI

0938-026) is effective for cost reporting periods ending after September 30, 1981. The new supplemental work sheet I of the hospital cost report form (HCFA 2552; OMB approval number 0938-0050)) is effective for cost reporting periods beginning after December 8, 1980.

As discussed above, these requirements will make no significant additional demands on facilities, as the new cost report forms are already in use and each facility must already keep the records that are needed to comply with these requirements. The changes resulting from this rule will clarify the application of the principles of Subpart D. This will benefit facilities without adding recordkeeping costs or reporting burden.

Appendix II—Area Wage Indexes

We have calculated a wage index for each of about 362 areas. These areas are divided into three categories: New England County Metropolitan Areas (NECMAs), Standard Metropolitan Statistical Areas (SMSAs) and rural areas. (For each State, there is one rural area, comprising all counties in that State that are not included in a NECMA or SMSA.) These are standard geographical classifications used for many types of reports and analyses.

The area wage index is essentially very simple. First, we calculated the national average wage level for all hospital workers, combining data from all geographic areas. Second, we calculated a separate local average wage level for each SMSA, NECMA, and rural area. We then divided each local average by the national average. This computation resulted in a set of index values that show the relation of wages in each area to wages nationally.

In developing the wage index, we have used approximate, rather than actual, index values for 40 areas. (These approximate values are identified by asterisks.) We made this change because the BLS has informed us that its confidentiality requirements prohibit it from disclosing actual data for areas that include fewer than 3 hospitals. To make it possible to calculate limits for these areas, we have asked the BLS to identify the areas having wage index values numerically closest to, but not less than, the areas for which it cannot supply actual data. In the case of each area for which actual data are unavailable, we have substituted the wage index value identified by BLS as being closest to the actual value. These approximate values are either equal to, or greater than, the wage index values that would be calculated based on the actual data. We believe that the use of approximate rather than actual values for these areas will not affect the accuracy of the incentive payment rates significantly, and will assure that no facility's payment is reduced because actual data for its area are unavailable.

We expect, on the basis of experience, that we will occasionally need to revise a particular index to reflect improved data or the correction of reporting problems. When this occurs, we will notify the intermediaries and facilities affected, but we will not publish a notice in the **Federal Register**, as we would if we were revising all the indexes.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 712

[OPTS-82004J, FRL 2326-1; SH-FRL 2326-1]

Chemical Information Rules; Automatic Reporting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is promulgating an amendment to the Toxic Substances Control Act section 8(a) Preliminary Assessment Information rule (47 FR 26992). This amendment provides that all chemicals and mixtures designated by the Interagency Testing Committee (ITC) for testing consideration will be made subject to reporting by their manufacturers under the Preliminary Assessment Information rule without a separate proposal and comment. The chemicals will be added to the rule by the Agency at the same time the ITC report is published. Reporting by manufacturers will be required 90 days after the rule amendment issued by EPA is published in the **Federal Register**. Automatic reporting will speed the information gathering process and help the Agency in making its decisions on testing within the one-year mandated period.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: For further information on this rule, or to obtain copies of the Preliminary Assessment Information—Manufacturer's Report (EPA Form No. 7710-35), contact: Jack P. McCarthy, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Environmental Protection Agency, Rm. E-511B, 401 M St., SW., Washington, D.C. 20460, Toll free: (800-424-9065). In Washington, D.C.: (554-1404), Outside the USA: (Operator-202-554-1404).

SUPPLEMENTARY INFORMATION: OMB Control Number: 2000-0420.

I. Introduction

EPA promulgated the Preliminary Assessment Information rule for reporting by chemical manufacturers in the **Federal Register** of June 22, 1982 (47 FR 26992). Those companies which manufactured, produced, or imported one of the approximately 250 chemical substances listed were to report general production, use, and exposure data to the Agency by November 19, 1982. At that same time three amendments to the rule were proposed for comment. We are promulgating one of those amendments by adding § 712.30(c). The other two amendments will be promulgated in separate actions. In addition, we are revising § 712.30(a) to discuss how EPA will treat voluntary reporting. This latter revision is a nonsubstantive conforming amendment. The amendment that is being promulgated originally proposed that manufacturers of chemicals designated for testing in the future by the Interagency Testing Committee automatically report preliminary assessment information.

II. Automatic Reporting on Future ITC Designations

Following publication of the ITC report, the Agency will issue a regulation requiring the reporting of preliminary assessment information by manufacturers of chemical substances and mixtures designated by the ITC. The rule will become effective 30 days after the regulation is published in the **Federal Register**. Manufacturers are to complete and submit EPA Form No. 7710-35 within 60 days of the effective date of the rule amendment.

Each of these rule amendments will only change the Preliminary Assessment Information rule by adding chemicals; the reporting requirements will not be changed without notice and comment.

The chemical substances or mixtures which will be automatically added are those the ITC has designated for testing consideration by the Agency. Within one year after the ITC designates a chemical for testing, EPA either must initiate rulemaking to require testing under section 4 of TSCA or publish its reasons for not initiating rulemaking. Because of the short time allowed for this decision, the Agency must proceed as rapidly as possible to gather relevant data on designated chemicals.

Data received from the Preliminary Assessment Information rule will supplement available data, including existing test data, and provide a comprehensive data base with which to support a testing decision. Further, this information will be helpful to the Agency in evaluating data submitted in response to a test rule by providing a preliminary basis for evaluating the likelihood that human or environmental exposures may achieve levels found to cause adverse effects in tests.

In order to achieve maximum utility for the time-constrained test rule development process, EPA needs all data for internal review within four months after the initial ITC designation. This requires the Agency to add chemicals to the rule by issuing for publication in the **Federal Register** a final rule amendment promptly upon receipt of the ITC's report designating additional substances or mixtures for priority treatment. The rule becomes effective 30 days after it is promulgated; all submissions will be due 60 days after the effective date. Typically, the Agency would expect to receive all report within 100 days after the ITC report is received. This allows the Agency about two weeks to review a substantial amount of the data before the four-month point at which a preliminary decision is made as to whether to require testing.

In some infrequent cases, the Agency will need to work with incomplete data on the substance involved until about six months after receipt of the ITC's designation. This is because processors of a chemical may be required to report to the Agency after manufacturer reporting if insufficient information is recived from the manufacturers. An amendment under section 8(a) of TSCA providing for such processor reporting was proposed on June 22, 1982 (47 FR 27009) and a final amendment now is being developed. We anticipate requiring processor reporting very infrequently, and on few chemicals, so that there will be few instances in which EPA will have incomplete data for any interval of time.

This final amendment for automatic reporting does not allow for public comment on the need for reporting on individual chemicals designated for the ITC. Many commenters on the proposed rule objected to the issuance of a reporting rule without a notice and comment provision. The Agency understands these concerns; however, it is paramount that data be reported to the Agency as soon as possible so that assessments can be completed within the statutorily mandated one year time-frame specified in section 4(e) of TSCA. The Agency addressed this issue previously in the final TSCA section 8(d) regulation (47 FR 38784).

One of the major concerns commenters has about automatic reporting was that reporting requirements may be duplicative if the information had already been reported voluntarily to the ITC or EPA. Companies which submit data voluntarily to the ITC are encouraged to report those data using a Preliminary Assessment Information—Manufacturer's Report (EPA Form No. 7710-35). The Agency agrees that reporting may be duplicative in some instances. We have therefore developed an option whereby data submitted voluntarily to either the ITC or EPA on the appropriate for may be acceptable to the Agency in lieu of section 8(a) reporting if certain conditions are met.

EPA suggests that a company which submits a Manufacturer's Report to the ITC simultaneously send a copy of the form to EPA. A company that does submit a form to EPA before the effective date of a rule amendment adding a subject chemical will not be required to submit a current Manufacturer's Report upon the effective date of the amendment, provided that the data on the previously submitted form is no more than three years old as of the effective date. The company will still be required to notify the Agency, in writing and during the reporting period, about the earlier submission. The notification letter should also certify under oath that the data are still current, accurate, and complete. Such a letter should state that there have been no major changes in the production volume of the subject chemical or the chemical process used in producing the chemical. If this is not the case, the submitter must include an updated form.

Alternatively, a company which voluntarily submits a Manufacturer's Report only to the ITC will be allowed to submit a copy of the original Report to EPA when the subject chemical is added by amendment to the section 8(a) rule. The company will not be required to submit a new Report on the chemical. The manufacturer will be required to provide EPA with written notification that the form being used is a copy of the form given to the ITC. All other requirements concerning verification and certification of data, described in the previous paragraph, will be applicable in this case.

The Agency continues to encourage voluntary reporting. We believe that such reporting plays a vital role in providing the ITC and EPA with invaluable fundamental data so that decisions can be made on a more informed basis. Companies wishing to submit voluntary data to the ITC but not use the Preliminary Assessment Information form may continue to do so. However, this form must be used for all submissions to EPA to satisfy the reporting requirements under the section 8(a) rule.

Another concern raised by some commenters was that information provided in public comments on the proposed addition of a chemical to the section 8(a) rule might convince the Agency that section 8(a) reporting on that chemical was unnecessary. The automatic reporting provision would obviate such cases. Based on its experience in evaluating ITC-designated chemicals to date, and on its review of comments on previously proposed section 8(a) Preliminary Assessment Information reporting proposals, EPA projects such situations to occur rarely, if at all. If a firm subject to section 8(a) reporting on a chemical added to the rule through the automatic reporting approach believes reporting on that chemical is unnecessary, the firm should promptly submit to the Agency its reasons for that belief. The chemical may then be removed from the rule at the Agency's discretion, for good cause. The Agency will issue a rule amendment for publication in the **Federal Register** when withdrawing a chemical from the rule. This amendment will remove the chemical from the reporting requirements of 40 CFR 712.30 and provide the reasons for that removal.

Only those chemicals which are designated by the ITC for testing decisions within 12 months are subject to the automatic reporting provision at this time. The Agency is considering the inclusion for automatic reporting of those chemicals which the ITC recommends for consideration but does not designate for EPA response within one year. However, before requiring such reporting, the Agency will propose this new provision for comment.

III. Who Must Report

Manufacturers who qualify as small with respect to the previously prescribed standards are exempt from this rule (see 40 CFR 712.25(c)). EPA has separately proposed a generic definition of small manufacturers for TSCA section 8(a) rules (June 23, 1982; 47 FR 27208). When the final generic small manufacturers definition is issued, EPA plans to amend 40 CFR 712.25(c) to incorporate the generic definition. Periodically, the Agency will change the dollar values in the generic exemption standards, if necessary, to reflect inflation.

IV. Economic Impact

Since no chemicals are listed with the amendment at this time, there are no specific associated costs. However, with each addition of chemicals, estimated economic impacts will be calculated and made available. Figures will vary depending on the number of chemicals that are designated by the ITC.

Employing the analysis prepared for the Preliminary Assessment Information rule promulgated on June 22, 1982, as well as other relevant data, we have estimated the impact of this amendment on firms that must report and upon the Agency in terms of reporting and data processing costs. Since the average number of designations has been six per ITC report, we estimate that each amendment adding chemicals to the rule will cost manufacturers a total of approximately $9,300 and will require about 300 burden-hours. The cost to the Agency will be negligible ($800 per ITC report for data processing).

V. Rulemaking Record

The public record for this rule is a continuation of the record (OPTS-82004) for the Preliminary Assessment Information rule published in the June 22, 1982, issue of the **Federal Register** (47 FR 26992). All documents, including the index to this public record, are available to the public in the OPTS Reading Room from 8:00 a.m. to 4:00 p.m. on working days (Rm. E-107, 401 M St., SW., Washington, D.C. 20460). This record includes basic information considered by the Agency in developing the rule.

VI. Regulatory Assessment Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore requires a Regulatory Impact Analysis. EPA has determined that this regulation is not major because it will not have an effect of $100 million or more on the economy. This regulation has no associated costs at this time. However, it is expected to have a one-time total cost for each addition of ITC chemicals to the rule of less than $10,000. It will not have a significant effect on competition, costs, or prices.

This regulation was submitted to the Office of Management and Budget (OMB) for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

Consistent with the purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, small manufacturers have been defined and excluded from manufacturer reporting requirements. The average cost of reporting for a manufacturer is estimated to be less than $1,500.

In view of the exemptions and the small cost per company, the Agency finds that this rule will not have a significant impact on a substantial number of small entities.

C. Paperwork Reduction Act

The Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, authorizes the Director of the Office of Management and Budget to review certain information collection requests by Federal agencies. The reporting provisions in this amendment have been approved by OMB during their proposal stage (June 1982, under control number

List of Subjects in 40 CFR Part 712

Chemicals, Environmental protection, Reporting and recordkeeping requirements.

(Sec. 8(a), Pub. L. 94-469, 90 Stat. 2003 (15 U.S.C. 2607))

Dated: May 2, 1983.

Lee L. Verstandig,

Acting Administrator.

PART 712—[AMENDED]

Therefore, 40 CFR 712.30 is amended by revising paragraph (a) and adding paragraph (c) to read as follows:

§ 712.30 Chemical lists and reporting periods.

(a)(1) Persons subject to this Subpart B must submit a Preliminary Assessment Information Manufacturer's Report for each chemical substance or mixture that is listed or designated in this section. (OMB control number 2000-0420.)

(2) Unless a respondent has already prepared a Manufacturer's Report in conformity with conditions set forth in paragraph (a)(3) of this section, the information in each Manufacturer's Report must cover the respondent's latest complete corporate fiscal year as of the effective date. The effective date will be 30 days after the **Federal Register** publishes a rule amendment making the substance or mixture subject to this Subpart B.

(3) Persons subject to this Subpart B need not comply with the requirements of paragraph (a)(2) of this section if they meet either one of the following conditions:

(i) The respondent has previously and voluntarily provided EPA with a Manufacturer's Report on a chemical substance or mixture subject to this Subpart B, which contains data for a one-year period ending no more than three years prior to the effective date described in paragraph (a)(2) of this section. Respondents meeting this condition must notify EPA by letter of their desire to have the voluntary submission used in lieu of a current data submission and must verify the completeness and current accuracy of the voluntarily submitted data. Such letters must contain the following language: "I hereby certify that, to the best of my knowledge and belief, all information entered on this form is complete and accurate. I agree to permit access to, and the copying of records by, a duly authorized representative of the EPA Administrator, in accordance with the Toxic Substances Control Act, to document any information reported on the form." Notification letters must be submitted prior to the reporting deadline. (OMB control number 2000-0420.)

(ii) The respondent has previously submitted a Manufacturer's Report on a chemical substance or mixture subject to this Subpart B to the Interagency Testing Committee, but not to EPA, and that Report contained data for a one-year period ending less than three years prior to the effective date described in paragraph (a)(2) of this section. Respondents meeting this condition must submit a copy of the Manufacturer's Report to EPA, and must submit an accompanying letter notifying EPA of the respondent's intent that the submission be used in lieu of a current Manufacturer's Report. The notification letter must verify the completeness and current accuracy of the voluntarily submitted data. Such a letter must contain the following language: "I hereby certify that, to the best of my knowledge and belief, all information entered on this form is complete and accurate. I agree to permit access to, and the copying of records by, a duly authorized representative of the EPA Administrator, in accordance with the Toxic Substances Control Act, to document any information reported on the form." The submission must be made prior to the reporting deadline. (OMB control number 2000-0420.)

* * * * *

(c) Chemical substances and mixtures that have been designated by the Interagency Testing Committee, established under TSCA section 4(e), for EPA's testing consideration within one year, are subject to this subpart 30 days after EPA issues a regulation listing the chemical substance or mixture in the **Federal Register**. A Preliminary Assessment Information—Manufacturer's Report must be submitted for each chemical substance and mixture within 60 days after the effective date. At EPA's discretion, a designated substance or mixture may be withdrawn, for good cause, from the rule's reporting requirements prior to the effective date.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Federal Register Document Drafting Handbook

A Handbook for Regulation Drafters

This handbook is designed to help Federal agencies prepare documents for publication in the Federal Register. The updated requirements in the handbook reflect recent changes in regulatory development procedures, document format, and printing technology.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5058 of May 6, 1983

Older Americans Month, 1983

By The President of the United States of America

A Proclamation

Throughout our history, the American people have held a special place in their hearts for our older citizens.

From this Nation's earliest days, when the wisdom and eloquence of our elder statesmen played such an important role in the creation of our Republic, to this era of renewed private sector initiative, where so many of our senior citizens toil in volunteer armies of community service across the land, older Americans remain a vital force in our national life.

We recognize that no single group in our society has done more to build America and to shape our national character than our nearly thirty-three million older citizens. We treasure their continuing involvement and the unique understanding they bring to us. Their wisdom, experience, insights, and accomplishments merit an invaluable place in our culture and economy.

Through hard work and creativity, our older Americans have made enormous contributions throughout their lives to preserve our way of life and our standard of living.

Now we must keep faith with them.

It is our responsibility to protect them by reducing inflation—that monster which eats at savings and pensions and destroys the independence and well-being of our older Americans.

Of particular importance to our older citizens is the integrity of their pension funds. The recent rise in business confidence and the resulting surge in the net worth of investments have significantly increased the value of America's pension funds. These developments remind us that the most important step we can take for all Americans, but especially our senior citizens, is to follow economic policies that will create noninflationary growth.

It is also our responsibility to keep faith with our older citizens by guaranteeing a secure and stable social security system so they might live in dignity. The recent amendments to the Social Security Act assure the elderly that America will always uphold the promises made in troubled times a half-century ago.

The future of our older Americans should be as sweet as the memories of their youth. I believe the future for our older citizens holds as much promise as the achievements of their past. In this twenty-first annual observance of Older Americans Month, we celebrate that potential.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1983 as Older Americans Month. I ask public officials at all levels, community agencies, educators, the clergy, the communications media, and the American people to take this opportunity to honor older Americans and to consider how we may make it possible for them to enjoy their later years.

Proclamation 5059 of May 10, 1983

Flag Day and National Flag Week, 1983

By the President of the United States of America

A Proclamation

Two hundred eight years ago, the first distinctive American flags were flown over the colonial defenses during the Battle of Bunker Hill. One flag was an adaptation of the British Blue Ensign while the other had a new design. Both flags bore a pine tree, symbol of the struggle colonial Americans undertook to wrest their land from the forests.

As the colonials moved toward a final separation from Britain, other flags with various symbols appeared to inform the world of the hopes, dreams, and challenges of the new Nation. Many of the early American flags carried such mottoes as "Liberty or Death" or "Don't Tread on Me" to reflect the courage and quest for freedom which motivated our forefathers and gave birth to our Nation.

Two years after the Battle of Bunker Hill, the Continental Congress chose a flag which, tellingly, expressed the unity and resolve of the patriots who had banded together to seek independence. The delegates voted "that the flag of the thirteen United States be thirteen stripes, alternate red and white; that the union be thirteen stars, white in a blue field representing a new constellation." Two centuries later, with the addition of thirty-seven stars, this flag still symbolizes our shared commitment to freedom and equality. It carries a message of hope to the downtrodden, opportunity to the oppressed, and peace to all mankind.

As challenges face our Nation today, the "Stars and Stripes" continues to remind each of us of the sacrifices and determination which built this Nation. It signals the great land of opportunity that our forefathers carved out of the wilderness and gave their lives to make free so many years ago.

Now it is our responsibility to remember the great price that has been paid to keep our flag flying free today and our privilege to ensure that it will keep flying free for future generations.

To commemorate the adoption of our flag, the Congress, by a joint resolution approved August 3, 1949 (63 Stat. 492), designated June 14 of each year as Flag Day and requested the President to issue an annual proclamation calling for its observance and the display of the flag of the United States on all Government buildings. The Congress also requested the President, by a joint resolution approved June 9, 1966 (80 Stat. 194), to issue annually a proclamation designating the week in which June 14 occurs as National Flag Week and calling upon all citizens of the United States to display the flag during that week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate June 14, 1983, as Flag Day and the week beginning June 12, 1983, as National Flag Week, and I direct the appropriate officials of the Government to display the flag on all government buildings during that week. I also urge all Americans to observe Flag Day, June 14, and National Flag Week by flying the "Stars and Stripes" from their homes and other suitable places.

UMI

I also urge the American people to celebrate those days from Flag Day through Independence Day, set aside by Congress as a time to honor America (89 Stat. 211), by having public gatherings and activities at which they can honor their country in an appropriate manner.

IN WITNESS WHEREOF, I have hereunto set my hand this 10th day of May, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 93
Thursday, May 12, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Delegation of Authority; Authority To Act as Secretary of Agriculture

AGENCY: Office of the Secretary, USDA.

ACTION: Final rule.

SUMMARY: This document amends the delegations of authority of the Department of Agriculture to add the position of Assistant Secretary for Administration to the list of officials who serve as Acting Secretary in the absence or unavailability of the Secretary of Agriculture.

EFFECTIVE DATE: May 12, 1983.

FOR FURTHER INFORMATION CONTACT: Robert L. Siegler, Deputy Assistant General Counsel, United States Department of Agriculture, Washington, D.C., (202) 447-6035.

SUPPLEMENTARY INFORMATION: This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register.**

Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 2 reads as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, except as otherwise stated.

2. Section 2.5 is amended by revising paragraph (b) to read as follows:

§ 2.5 Order in which Officers of the Department shall act as Secretary.

* * * * *

(b) In the case of the absence, sickness, resignation, or death of the Secretary, the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, and the Under Secretary for Small Community and Rural Development, the Assistant Secretary for Natural Resources and Environment, the Assistant Secretary for Food and Consumer Services, the Assistant Secretary for Marketing and Inspection Services, the Assistant Secretary for Economics, the Assistant Secretary for Science and Education, the Assistant Secretary for Governmental and Public Affairs, and the Assistant Secretary for Administration shall act as Secretary in the order in which they have taken office as an Assistant Secretary. In the event that any two or more Assistant Secretaries shall have taken office on the same date they shall act as Secretary in the order listed herein.

* * * * *

Done this 9th day of May 1983, at Washington, D.C.

John R. Block,
Secretary of Agriculture.

[FR Doc. 83-12819 Filed 5-11-83; 8:45 am]
BILLING CODE 3410-01-M

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Reg. 578]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period May 13–May 19, 1983. Such action is needed to provide for orderly marketing of fresh navel oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, 202-447-5975.

SUPPLEMENTARY INFORMATION:

Findings

This rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona navel orange crop for the benefit of producers and will not substantially affect costs for the directly regulated handlers.

This regulation is issued under the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674). The action is based upon the recommendation and information submitted by the Navel Orange Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982-83. The

VOL
48
ISS
93
MY
12
1983
UMI

marketing policy was recommended by the committee following discussion at a public meeting on September 21, 1982. The committee met again publicly on May 10, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of navel oranges deemed advisable to be handled during the specified week. The committee reports the demand for navel oranges is easier.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared policy of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

PART 907—[AMENDED]

1. Section 907.878 is added as follows:

§ 907.878 Navel orange regulation 578.

The quantities of navel oranges grown in California and Arizona which may be handled during the period May 13, 1983, through May 19, 1983, are established as follows:

(a) District 1: 1,500,000 cartons;
(b) District 2: Unlimited cartons;
(c) District 3: Unlimited cartons;
(d) District 4: Unlimited cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: May 11, 1983.

D. S. Kuryloski,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 563 and 571

[No. 83-243]

Sale of Branches

Dated: April 26, 1983.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is amending its regulations governing the sale of branch offices and the transfer of savings accounts. Sales and transfers by and to institutions whose accounts are insured ("insured institutions") by the Federal Savings and Loan Insurance Corporation ("FSLIC" or the "Corporation") will be subject to new application and review procedures. The Board believes the new procedures will allow it to examine supervisory, accounting, and legal issues related to these transactions without substantial interference with the operation of an insured institution or delay in the implementation of its business decisions. The Board is also affording accountholders the opportunity to object to their accounts being transferred to uninsured institutions. Finally, the Board is also protecting rights of accountholders of mutual institutions. These amendments clarify the procedures applicable to sales and transfers of assets and liabilities.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Penfield Starke, Attorney, Office of General Counsel, Federal Home Loan Bank Board, 1700 G Street, N.W., Washington, D.C. 20552, [202] 377–6453.

SUPPLEMENTARY INFORMATION: On February 18, 1983, the Board proposed to amend §§ 563.22 and 571.5 of its regulations (12 CFR 563.22, 571.5) to clarify the Board's application and review procedures with regard to sales and transfers of assets and account liabilities by and to institutions whose accounts are insured by the Corporation. *See* Board Resolution No. 83–88 (48 FR 8460; March 1, 1983).

Although the Board believes that all such transactions should undergo staff review and Board consideration, the proposal attempted to limit the review to essential matters. The proposed regulation would have required a purchasing institution to submit information sufficient for the Board to make findings on antitrust, Community Reinvestment Act ("CRA") (12 U.S.C 2901–2905), and supervisory issues. Under the proposal, the Board's concern with regard to nonsupervisory selling institutions was limited to the accounting treatment used and assurances that the transaction was negotiated at arm's length. These procedures would allow most nonsupervisory transactions to be automatically approved within 30 days from the date of filing. However, the Board has greater concern with sales by institutions in poor financial condition, and the proposal would have required evidence from the seller demonstrating that the transaction is part of a plan to improve the institution's financial condition rather than an effort to forestall imminent collapse of the institution. In connection with its proposed procedures for the sale of branches, the Board also specifically requested comment on whether an accountholder whose account is being transferred to an institution the accounts of which are not insured by an agency of the federal government should be advised of the proposed transfer and be given the option of maintaining the account in the selling institution. After a review of the public comments submitted in response to the proposal and further staff consideration and analysis, the Board has adopted the regulation substantially as proposed with the modifications discussed below.

The Board received five comments on the proposed rule. Two were from state-chartered savings and loan associations, one each from a state supervisor, a federally chartered association, and an individual. Most commenters agreed that the proposed regulation would serve a valid purpose but felt that the review process should be restricted to reduce the burden of application. Several commenters suggested that a *de minimis* standard be applied to exempt small sales from the application process Other commenters suggested that only sellers with low net-worth ratios should be required to apply to the Board for approval. Another commenter suggested that sale of mutual accountholders' savings to a stock-type entity would be adversely affected by denying the accountholders their ownership rights. None of the comments received by the Board addressed the issue of notice to accountholders whose accounts would be transferred to an uninsured institution.

'De Minimis' Transactions

The Board has considered the suggestion of several commenters that sales of branches not exceeding a certain percentage of the selling institution's assets be exempt from Board review. In light of its experience in reviewing branch sale transactions on a case-by-case basis, the Board believes that such a standard would be extremely difficult to apply equitably because a sale that is *de minimis* in one instance may have material consequences in another. Problems have also arisen as to the yardstick that would be appropriate in measuring a transaction. For example, using the measure of a percentage of the selling institution's assets, large increases in a purchaser's asset or liability size or large decreases in a seller's liabilities would not be reviewed if the selling institution were relatively large. With these considerations in mind, the Board does not believe that a *de minimis* standard can be effectively implemented.

The intended result of the proposed procedures was to reduce the application burden for all transfer transactions. In connection with the adoption of those procedures today, the Board has directed its staff to refine the transfer application so that it would only require information that the Board believes is essential to assess the merits of the transaction and that the Board is required by statute to review. Therefore, the information required from the buyer will be limited to that necessary to the Board to make findings on antitrust, CRA, and supervisory grounds. In fact, the application will require very little information from the purchasing institution other than information typically generated by such a transaction. The Board can make findings under the antitrust laws with internal information once it is given notice of the parties involved and branches or liabilities to be transferred. Review of CRA considerations will entail an analysis of current CRA statements and a brief description of new market areas, and supervisory considerations can be reviewed by analyzing the specifics of the transaction and its effect on the general financial condition of the buying institution. Therefore, in light of the minimal requirements placed on all branch sale or transfer purchases, the Board believes that the suggestion for an even more limited review standard should not be adopted.

Seller's Application

The Board's proposal would have required that all FSLIC-insured institutions that enter into agreements to sell branches, of transfer deposits outside the ordinary course of business, file certain information to and receive approval from the Board. Two commenters suggested that the Board only require submissions by selling institutions that are in poor financial condition. Applications of nonsupervisory institutions are already significantly more limited in the scope of review than those required to be filed in supervisory cases. The proposal would have required three kinds of information from nonsupervisory sellers; (1) Accounting information, (2) a board-of-directors resolution, and (3) noninducement affidavits. The submission of a resolution and affidavits would not significantly burden the selling institution. The accounting information required would be limited to: a detailed breakdown of the assets and liabilities transferred and their contract rates; the market value of each asset and liability transferred; discount rates used; details of the calculation of the amount of profit or loss from the transaction; and information showing the effect of the transfer on the institution's cost of money and yield on assets. An opinion will be required by an independent accountant stating that the proposed accounting will conform with generally accepted accounting principles.

While the described information is not minimal, it is information that should be prepared by the selling institution's accountants as a part of the transaction and should be readily available to the selling institution. Moreover, given the Board's previously expressed concerns in the areas of accounting treatment of branch sale transactions, the Board believes that it is appropriate that such accounting information be filed in all transactions.

Affected Accountholders

The proposal requested comments concerning the treatment of accountholders whose accounts would be adversely affected by a branch sale transaction. The Board noted that one possible adverse effect in a branch sale could be the loss of federal insurance on an account transferred to a uninsured institution. Despite the fact that there were no comments received on this subject, the Board believes it is appropriate to adopt a rule requiring that such an accountholder losing federal insurance be advised of the proposed transfer and be given the option to retain the account in the selling institution.

The Board has also considered the suggestion that an accountholder of a mutual institution whose account would be transferred to a stock institution be protected from the loss of any inchoate ownership interest in the institution. The Board has adopted detailed regulations, Part 563b of the Rules and Regulations of the Federal Savings and Loan Insurance Corporation (12 CFR Part 563b), regarding conversions of institutions from the mutual to the stock form of organization, which appropriately protect the rights of the accountholders. A sale of branches is not such a significant corporate event, however, that a conversion subject to those conversion regulations is effectuated. Of course, if a conversion to stock form by an institution were disguised as a sale of branches, the transaction would still be governed by the conversion regulations.

Nevertheless, an accountholder whose account is transferred in connection with a branch sale could still be affected by that transfer. A mutual accountholder would be entitled to a *pro rata* share of the mutual institution's equity upon liquidation; an accountholder of a stock institution is merely a creditor and would have no rights in liquidation beyond the account balance. Therefore, the sale of an account by a mutual institution with positive net worth to a stock institution might be viewed as depriving the accountholder of ownership rights. In order to insure that accountholders are not aggrieved by such a transaction, the Board is requiring that the affected accountholders be given notice and opportunity to object to transfer of accounts in a fashion similar to a transfer to an uninsured institution. Thus, the accountholders would not be forced to give up their ownership rights in the mutual institution.

Final Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. No. 96–354, 94 Stat. 1164 (September 19, 1980), the Board is providing the following regulatory flexibility analysis:

1. *Reasons, objective, and legal basis underlying the rule.* These elements have been incorporated into the supplementary information accompanying the rule.

2. *Small entities to which the rule will apply.* The rule would apply to all FSLIC-insured institutions.

3. *Impact of the proposed rule on small institutions.* The rule would add new application requirements and amend existing ones for all FSLIC-insured institutions engaging in the sale or purchase of branch offices or the assumption of savings account liabilities. Small institutions must meet the same requirements as larger institutions, but the rule may have a disproportionate effect on larger institutions.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with the rule.

5. *Alternatives to the rules.* The basic regulatory requirements included in the rule concern the Board's review of the sale and purchase of branch offices and assumption of savings account liabilities by any FSLIC-insured institution. The

Board believes that the review is necessary in order to assess certain supervisory, antitrust, and CRA concerns discussed elsewhere in the supplementary materials, and that the standards accurately reflect the Board's intended policy for review. It would not be possible to eliminate or modify these requirements for small entities without causing the Board to have insufficient information to act on certain applications.

List of Subjects in 12 CFR Parts 563 and 571

Savings and loan associations.

Accordingly, the Board hereby amends Parts 563 and 571, Subchapter D, Chapter V of Title 12, Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

1. Amend § 563.22 by revising the title; revising the first sentence of paragraph (a); redesignating paragraphs (b), (c), (d), and (e) as paragraphs (c), (d), (e), and (f), respectively; adding new paragraph (b); revising new paragraphs (c) and (d); revising the introductory sentence of new paragraph (f); and adding new paragraphs (g) and (h) as follows:

§ 563.22 Merger, consolidation, purchase or sale of assets, or assumption of liabilities.

(a) No insured institution (which for purposes of this section shall not include a Federal institution the deposits of which are insured by the Federal Deposit Insurance Corporation) may increase its accounts of an insurable type: (1) as part of any merger or consolidation with another institution, (2) through the purchase of assets, or (3) through the assumption of liabilities without application to and approval by the Corporation.* * *

(b) No insured institution (which for purposes of this section shall not include a Federal institution the deposits of which are insured by the Federal Deposit Insurance Corporation) may at any time make a transfer, as defined in § 571.5(a) of this subchapter, of assets or savings account liabilities without application to and approval by the Corporation. Application for such approval shall be upon forms prescribed by the Corporation and shall contain such information as the Corporation may require.

(c) Applications filed pursuant to paragraph (a) of this section shall follow the procedures set forth in § 543.2 of this Chapter, except that: (1) The required newspaper publication of notice of application shall be made in the communities in which the home offices of each of the parties to the transaction are located; and (2) applicants may additionally mail such notice to the voting members of each institution within the time specified in § 543.2(d).

(d) The requirements of paragraph (c) of this section do not apply to any merger, consolidation, purchase of assets, or assumption of liabilities: (1) Authorized by the Corporation to be instituted for supervisory reasons, or (2) involving an interim Federal association or an interim state-chartered institution if the resulting institution is immediately acquired in accordance with the procedures set forth in § 584.4 of this Chapter.

* * * * *

(f) Corporation approval of mergers that may not occur automatically under paragraph (e) of this section, including those which entail modifications of the plan of merger, consolidation, purchase of assets, or assumption of savings account liabilities, may be given by the Board's Principal Supervisory Agent in those cases where paragraph (e) does not apply because:

* * * * *

(g) Unless the context otherwise requires, in paragraphs (e) and (f) of this section: (1) The word "merger" shall also mean "purchase of assets" and "assumption of savings account liabilities"; (2) the term "resulting institution" shall also mean "acquiring institution"; and (3) the terms "merging institution" and "acquired institution" shall also mean "selling institution."

(h)(1) Applications filed pursuant to paragraph (b) of this section shall be deemed approved automatically by the Corporation 30 calendar days after the Principal Supervisory Agent sends written notice to the applicant that the application is complete, unless:

(i) The Principal Supervisory Agent raises objection(s) to the valuation or accounting treatment of the proposed transaction; or

(ii) The Principal Supervisory Agent determines that the financial condition of the selling institution does not satisfy minimum net-worth levels set forth in § 571.5 (k) (2) of this subchapter.

(2) Corporation approval of transactions that may not occur automatically under paragraph (h)(1) of this section may be given by the Principal Supervisory Agent in those cases where paragraph (h)(1) does not apply because the Principal Supervisory Agent objects to the valuation or accounting treatment of the proposed transaction.

2. Amend § 571.5 by revising the title, revising paragraphs (a), (b)(1), (b)(3), (b)(4), the first two sentences of (c)(1), (c)(2), (d)(1), (d)(2), (d)(6), (e), (g), and (i), and adding new paragraphs (j) and (k), as follows:

§ 571.5 Mergers and transfers of assets and liabilities.

(a) *General policy.* This is a statement of the Federal Home Loan Bank Board's general policy on merger and transfer proposals. It does not ordinarily apply to mergers and transfers instituted for supervisory reasons. The term "merger" includes consolidations, and the term "transfers" means transfers in bulk not made in the ordinary course of business, including the transfer of assets and savings account liabilities, purchase of assets, and assumption of savings accounts and other liabilities. Potential merger and transfer applicants are encouraged to review proposed transactions with the Supervisory Agent prior to proceeding with the formal application process. Generally, the Board regards mergers or transfers primarily as business decisions to be made by the institutions involved.

(b) *Legal considerations*—(1) *General.* Conformity under law and regulation is a precondition to approval by the Board. Applicable laws and regulations include the Federal antitrust laws (the Clayton and Sherman Acts), section 408 (regulation of holding companies) of the National Housing Act, the Community Reinvestment Act of 1977, applicable State law, and the Board's own regulations. To enable the Board to make a legal evaluation of the possible anticompetitive impact of proposed mergers and transfers, applicants are required to submit certain information on Board-prescribed forms available at each Federal Home Loan Bank and such other information as may be requested by the Supervisory Agent. In any case in which the Supervisory Agent believes it clear that no antitrust or competitive problem exists, a merger or a transfer proposal may be submitted with relevant partial information short of the complete data called for by the schedules.

* * * * *

(3) *Antitrust considerations.* The Board will examine the impact of the merger or transfer on competition under the relevant antitrust laws and will only deny a merger or transfer on competitive grounds if the merger or transfer will be likely to violate those laws. This analysis will be done for each relevant geographic market. All firms reasonably competitive with the business of the parties to the subject transaction will be taken into account in determining deposit and loan market statistics and the competitive consequences of the merger or transfer. * * *

(4) *Convenience and needs.* The Board will also examine the extent to which the transaction will affect the convenience and needs of the communities to be served and the impact, if any, on operating efficiency of the resulting or purchasing institution.

(c) *Managerial and financial aspects.* (1) *Managerial aspects.* The Board's primary requirement is that the resulting or purchasing institution have the managerial and financial resources to operate successfully. The experience and the performance record of the persons to be in control or in key managerial positions will be evaluated as to the probability of sound operation of the resulting or purchasing institution.

* * *

(2) *Financial aspects.* The overall operations and financial condition will be reviewed to determine the resulting or purchasing institution's prospects of generating sufficient income to meet competition, making the required transfers to reserves, and conducting its affairs essentially free of supervisory concern. The adequacy of the net worth of the resulting or purchasing institution, relative to the risks inherent in its assets, and economic and other factors will be considered. Intangible assets will be closely reviewed.

(d) *Factors relating to fairness and disclosure of the plan.* The Board will review the fairness and disclosure of a merger or transfer proposal on the basis of the following criteria:

(1) *Equitable treatment.* The plan should be equitable to all concerned—savings accountholders, borrowers, creditors, and stockholders (if any) of each institution—giving proper recognition of and protection to their respective legal rights and interests. The plan will be closely reviewed for fairness where the merger or transfer does not appear to be the result of arm's length bargaining or, in the case of a stock institution, where controlling stockholders are receiving different consideration from other stockholders.

(2) *Full disclosure.* The application should make full disclosure of all written or oral agreements or understandings by which any person or company will receive, directly or indirectly, any money, property, service, release of pledges made, or other things of value, whether tangible or intangible, in connection with the merger or transfer.

* * * * *

(8) *Fees paid in connection with mergers and transfers.* The application should state the name of each person or firm rendering legal or other professional services in connection with merger or transfer. The fee expected to be paid to each such person or firm should be stated, together with a description of the services being performed, the time expected to be spent in performing such services, the hourly rate or other basis used for determining the fee, and any relationship between such person or firm and an institutional party to the transaction. If a finder's or similar fee is to be paid in connection with the merger or transfer, the application should fully justify the payment and amount of the fee and state the name of the person or firm to whom the fee is to be paid. No finder's or similar fee should be paid to any officer, director, or controlling person of an institution which is a party to the transaction.

(e) *Accounting for goodwill.* The proposed treatment of goodwill in connection with the merger or transfer must be fully described in the application. The computation and amortization of goodwill should be in accordance with accounting policies of the Board in effect at the time the application is filed.

* * * * *

(g) *Noninducement affidavits.* The application should include a noninducement affidavit on a Board-prescribed form signed by each senior officer, director, and controlling person of each institution which is a party to the transaction and each attorney or law firm regularly serving such institution.

* * * * *

(i) *Tax liability.* In a merger, a tax ruling from the Internal Revenue Service or a tax opinion will be required.

(j) *Transfers.* In addition to the other requirements of this section applicable to the parties involved in transfer transactions, the application of an insured institution which is a party to a transfer should provide a description of: (1) The assets and liabilities subject to transfer and their contract rates; (2) any discount rates used; (3) the market value of the assets and liabilities subject to transfer; and (4) the effect of the transfer on the institution's cost of money and yield on assets.

(k) *Sale of assets or liabilities.*—(1) *Accounting and valuation.* The application of an insured institution selling assets or account liabilities will be reviewed under valuation and accounting standards established by the Board.

(2) *Notice to accountholders.* Notice of a proposed account transfer and the option of retaining the account in the transferring institution shall be furnished to an affected accountholder (i) by an insured institution transferring account liabilities to an institution the accounts of which are not insured by the Corporation, the Federal Deposit Insurance Corporation, or the National Credit Union Share Insurance Fund; and (ii) by any mutual insured institution transferring account liabilities to a stock insured institution. The required notice shall allow affected accountholders at least 30 days to consider whether to retain their accounts in the transferring institution.

(3) *Supervisory concerns.* The Corporation will closely review a transfer of assets and savings account liabilities entered into by an insured institution with regulatory net worth, as defined in § 561.13 of this subchapter, calculated prior to the consummation of the transaction and without the benefit of inclusions permissible under Part 572 of this subchapter, of 0.5% or less of all liabilities. An application by such an institution should demonstrate that the proposed transaction is beneficial to the short-term and long-term viability of the institution, that the transfer was negotiated at arm's length and that the transfer is not detrimental to the interests of the Corporation.

(Sec. 408, 94 Stat. 160, secs. 402, 403, 407, 48 Stat. 1256, 1257, 1260; as amended (12 U.S.C. 1725, 1728, 1730); sec. 5A, 47 Stat. 727, as amended by sec. 1, 64 Stat. 256, as amended; Sec. 17, 47 Stat. 736, as amended (12 U.S.C. 1464), Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943–48 Comp., p 1071)

By the Federal Home Loan Bank Board.

J. J. Finn,
Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 82-ANE-17; Amdt. 39-4560]

Airworthiness Directives; Detroit Diesel Allison; Model 250-C20, -C20B, -C20C(T63-A-720), -B17, -B17B, and -B17C Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD)

VOL 48 ISS 93 MAY 12 1983 UMI

superseding AD 77-18-03. The new AD requires inspecting and replacing slotted third stage turbine wheels installed in Detroit Diesel Allison (DDA) Model 250-C20, -C20B, -C20C(T63-A-720), -B17, -B17B, and -B17C engines and restricts the N1 and N2 operating ranges. The AD is needed to prevent possible partial blade and/or shroud separation of slotted third stage turbine wheels.

DATE: Effective date—June 13, 1983. The Director of the Federal Register approves the incorporation by reference of certain publications in 14 CFR 39.13 effective on June 13, 1983.

ADDRESSES: The applicable service bulletin may be obtained from Detroit Diesel Allison, Divison of General Motors Corporation, Indianapolis, Indiana 46206. Copies of the service bulletin are contained in the Rules Docket, Office of the Regional Counsel, 12 New England Executive Park, Burlington, Massachusetts 01803.

FOR FURTHER INFORMATION CONTACT: Mr. Royace Prather, Chicago Aircraft Certification Office, ACE-140C, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7132.

SUPPLEMENTARY INFORMATION: The FAA has determined that slotted third stage turbine wheels, whether full or center slot, crimped or uncrimped, have encountered partial blade and/or shroud separation before reaching their scheduled life limit of 4,550 operating hours. This partial blade and/or shroud separation can result in loss of engine power. Detroit Diesel Allison (DDA) issued Commercial Engine Alert Bulletin CEB-A-1174/1146 on April 20, 1981, which requires inspecting and replacing slotted third stage turbine wheels per a phase-down schedule. Additionally, CEB-A-1174/1146 requires that all slotted third stage wheels not be operated between 90 percent and 96 percent N2 (including autorotation and flight idle) except during transients, while maintaining safe flight practices, and restricts engine N1 speeds during ground operation. Compliance to date with the N1/N2 operating restrictions, reduced life limits and required inspections has significantly reduced the occurrence of partial blade and/or shroud separations. The amendment will require mandatory compliance with CEB-A-1174/1146 to preclude the possibility of engine power loss resulting from operating slotted third stage turbine wheels to their life limit and to preclude operations in the restricted N1/N2 ranges.

The proposed amendment to require mandatory compliance with CEB-A-1174/1146 was published in the **Federal Register**, 47 FR 43073, as a Notice of Proposed Rulemaking on September 30, 1982.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No comments were received.

Engines, Propellers, Aircraft, Aviation safety, Incorporation by reference.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD:

Detroit Diesel Allison: Applies to all Model 250-C20, -C20B, C20C(T63-A-720), -B17, -B17B, and -B17C engines equipped with the following slotted third stage turbine wheels:

Part No.	Type of Shroud
6887113	Full slot.
6888633	Full slot.
6888663	Crimped full slot.
6888551	Center slot.
6888567	Center slot.
6888733	Center slot.
6888743	Center slot.
6888753	Center slot.
6888763	Center slot.
6888823	Crimped full slot.
6888364	Crimped full slot.
6888408	Crimped center slot.
6888415	Crimped center slot.
6888416	Crimped center slot.
6888417	Crimped center slot.
6888418	Crimped center slot.
6888419	Crimped center slot.

Accomplish the following to prevent possible engine power loss resulting from partial blade and/or shroud separation of slotted third stage turbine wheels:

1. Compliance required, as indicated, unless already accomplished:

a. Remove, inspect, reintroduce into service where applicable, and ultimately retire affected turbine wheels in compliance with the schedule and instructions provided in Detroit Diesel Allison Commercial Engine Alert Bulletin CEB-A-1174/1146, Revision 2 dated September 15, 1982, or later FAA approved revisions.

2. Compliance required within 60 days after the effective date of this AD, unless already accomplished:

a. Placards, markings, or flight manual changes shall be provided to flight crews to avoid sustained operation of all affected engines between 90 and 96 percent N2, except during transients, while maintaining safe flight practices. This restriction also applies to autorotation practice and engine idle during engine-out simulation on multiengine aircraft.

b. During all ground operation of affected turbine wheels installed in 250-C20, -C20B, -C20C(T63-A-720) engines, the engine N1 speed must be maintained at ground idle, except during transient operation, when performing required operational checks, or in high or gusty wind conditions, or where safety would be adversely affected. Placards, markings, or flight manual changes shall be used to advise flight crews of the ground operating restriction.

c. During all ground operation of affected turbine wheels installed in 250-B17, -B17B, -B17C engines, the engine N2 speed must be maintained below 90 percent N2 r.p.m., except during transient operation, when performing required operational checks, or in high or gusty wind conditions, or where safety would be adversely affected. Placards, markings, or flight manual changes shall be used to advise flight crews of the ground operating restriction.

Upon request of the operator, and equivalent means of compliance with the requirements of this AD may be approved by the Manager, Chicago Aircraft Certification Office, FAA, Central Region. The Detroit Diesel Allison Commercial Engine Alert Bulletin CEB-A-1174/1146, Revision 2 dated September 15, 1982 identified and described in this directive are incorporated herein and made by reference a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Detroit Diesel Allison, Division of General Motors Corporation, Indianapolis, Indiana 46206. These documents may also be examined at the Office of Regional Counsel, FAA New England Regional Office, 12 New England Executive Park, Burlington, Massachusetts 01803. A historical file on this AD is maintained by the FAA at the New England Regional Office.

This AD supersedes Amendment 39-3011, 42 FR 43969, AD 77-18-03.

This amendment becomes effective June 13, 1983.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89)

Note:—The FAA has determined that this document involves a regulation which is not considered to be major under Executive Order 12291 or significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), on the basis that the total cost impact is under $6 million. It is certified that the final rule will not have a significant economic impact on a substantial number of small entities because of the phase-down schedule of compliance and because the cost of the action is less than $5,000 per engine which is nominal compared to the overall cost of the aircraft involved or the cost of rebuilding the entire engine if the correction is not made in time.

A final regulatory evaluation prepared for this document is contained in the public docket, and a copy may be obtained by writing to: FAA, Office of Regional Counsel, Attn: Rules Docket No. 82-ANE-17, 12 New England, Executive Park, Burlington, Massachusetts 01803.

Note:—The incorporation by reference provisions of this document were approved by the Director of the Federal Register on April 27, 1983. The referenced Bulletin is available at the Federal Register.

Issued in Burlington, Massachusetts, on March 21, 1983.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 83-12415 Filed 5-11-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 83-CE-4R-AD; Amendment 39-4647]

Airworthiness Directives; Mitsubishi Heavy Industries, Ltd. Models MU-2B-25/-26/-30/-35/-36 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD), applicable to certain serial numbered Mitsubishi Heavy Industries, Ltd. (MHI) Models MU-2B-25/-26/-30/-35/-36 airplanes which supersedes AD 77-13-12, Amendment 39-2937 (45 FR 32520). This superseded AD required a one-time inspection and modification, as necessary, of the strobe light conduit tube installations on these airplanes. Subsequent to the issuance of AD 77-13-12, MHI has revised MU-2 Service Bulletin 174, referenced in AD 77-13-12, to recommend modification of the conduit tube installation and initial and repetitive inspections of the unmodified conduit tube at intervals of 100 hours time-in-service. This additional action will preclude fuel leaks into the strobe light assemblies and reduce the potential for explosion and fire.

DATE: Effective date: May 17, 1983.

Compliance: As prescribed in the body of the AD.

ADDRESSES: Mitsubishi Heavy Industries, Ltd. MU-2 Service Bulletin No. 174C, dated October 2, 1981, applicable to this AD may be obtained from Mitsubishi Heavy Industries, Ltd., Nagoya Aircraft Works, 10, OYE-CHO, MINATO-KU, NAGOYA, JAPAN or Mitsubishi Aircraft International, Inc., P.O. Box 3848, San Angelo, Texas 76901. This document may also be examined in Room 7108, Prince Kuhio Federal Building, 300 Ala Moana Boulevard, Honolulu, Hawaii 96850. A copy of this information is also contained in the Rules Docket, FAA, Office of the Regional Counsel, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Gary K. Nakagawa, Manager, Aircraft Certification Field Office, ANM-170H, P.O. Box 50246, Honolulu, Hawaii 96850, Telephone (808) 546-8650 or 546-8658; or Larry Werth, Foreign FAR 23 Section, ACE-109, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-6932.

SUPPLEMENTARY INFORMATION: The issuance of AD 77-13-12, Amendment 39-2937, was based upon reports received by the manufacturer, of cracks in the strobe light conduit tube in the wing tip fuel tanks on certain Model MU-2 airplanes. As a result of these reports, MHI issued MU-2 Service Bulletin No. 174, dated September 29, 1976, and the Japan Civil Aviation Bureau (JCAB), issued AD No. TCD-1370-76 incorporating the requirements of this bulletin.

The FAA found that the condition addressed by this Service Bulletin and JCAB AD No. TCD-1370-76 was an unairworthy condition likely to exist on airplanes certificated for operation in the United States and issued AD 77-13-12 which required a one-time inspection and modification, if necessary, of the strobe light conduit tube installations on MHI Models MU-2B-25/-26/-30/-35/-36 airplanes. Subsequently, the manufacturer has received additional reports of cracks and fuel leaks in the strobe light conduit tube assemblies. As a result MHI has issued MU-2 Service Bulletin No. 174C, dated October 2, 1981, which recommended modification of the conduit tube and an initial and 100-hour repetitive inspection of this component. The JCAB has issued AD No. TCD-1370A-81, dated November 5, 1981, applicable to Mitsubishi MU-2 airplanes operated in Japan which makes the modifications and inspections prescribed in this revision of the bulletin mandatory on these airplanes.

This action corresponds to the issuance of an AD by the FAA on airplanes certified for operation in the United States. The FAA relies upon the certification of the JCAB combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of MU-2 Service Bulletin No. 174C, dated October 2, 1981, and the mandatory classification of this Service Bulletin by the JCAB in their AD No. TCD-1370A-81, dated November 5, 1981.

Based on the foregoing, the FAA has determined that the condition addressed by the manufacturer's Service Bulletin No. 174C and JCAB AD No. TCD-1370A-81 is an unsafe condition that may exist on other products of the same type design certificated for operation in the United States.

Therefore, an AD superseding AD 77-13-12 is being issued which requires initial and repetitive inspections and modification of the strobe light conduit tubes in the wing tip fuel tanks on certain serial numbered MHI Models MU-2B-25/-26/-30/-35/-36 airplanes in accordance with Mitsubishi Heavy Industries, Ltd., MU-2 Service Bulletin No. 174C dated October 2, 1981.

Because an emergency condition exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and contrary to the public interest, and good cause exists for making this amendment effective in less than 30 days.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

Mitsubishi Heavy Industries, LTD: Applies to Models MU-2B-25 and -26 (serial numbers 239 through 328; except serial numbers 313, 321, and airplanes having a serial number with the suffix "SA") and Models MU-2B-30, -35, and -36 (serial numbers 501, 504, and 548 through 673; except serial numbers 652, 661 and airplanes having a serial number with the suffix "SA") airplanes certificated in any category.

Compliance: Required as indicated, unless already accomplished.

To prevent fuel or fuel vapors from entering the wing tip strobe light assemblies, accomplish the following:

(a) Within the next 100 hours time-in-service after the effective date of this AD and thereafter at intervals not to exceed 100 hours time-in-service from the last inspection, inspect the strobe light conduit tubes in the wing tip fuel tanks as detailed in MU-2 Service Bulletin No. 174C dated October 2, 1981 (hereafter referred to as the SB), Item 1—Inspection for Leakage. If leaks are found, prior to further flight, modify the tip tank conduit tube in accordance with Item 2—Rework Procedure, of the SB.

(b) On or before September 1, 1983, modify the tip tank conduit tubes in accordance with Item 2—Rework Procedure, of the SB.

(c) When Item 2—Rework Procedure of the SB is accomplished, the repetitive inspection

VOL
48
ISS
93
MY
12
1983
UMI

required by paragraph (a) is no longer required.

(d) The intervals between the repetitive inspections required by this AD may be adjusted up to 10 percent of the specified interval to allow accomplishing these inspections concurrent with other scheduled maintenance of the airplane.

(e) Aircraft may be flown in accordance with Federal Aviation Regulation 21.197 to a location where this AD can be accomplished.

(f) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Aircraft Certification Field Office, ANM–170H, Federal Aviation Administration, P.O. Box 50240, Honolulu, Hawaii 96850.

This AD supersedes AD 77–13–12, Amendment 39–2937.

This amendment becomes effective on May 17, 1983.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1566(c)); Sec. 11.89 of the Federal Aviation Regulations (14 CFR Sec. 11.89))

Note:—The FAA has determined that this regulation is an emergency regulation that is not major under Section 8 of Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the Rules Docket under the caption "ADDRESSES" at the location identified.

Issued in Kansas City, Missouri, on April 29, 1983.

John E. Shaw,

Acting Director, Central Region.

14 CFR Part 91

[Docket No. 21022A; Reg. Notice No. 91-100]

Emergency Air Traffic Regulations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Update of emergency air traffic regulations.

SUMMARY: Section 91.100 of the Federal Aviation Regulations (FAR) (14 CFR 91.100) requires aircraft operators to comply with emergency air traffic regulations issued under that section and covered by Notices to Airmen (NOTAMs) that are also issued under that section. This document provides notice of regulations already adopted that were immediately effective under § 91.100, for which the FAA has also issued NOTAMs. It adds, to Notice 91–100, emergency regulations implementing Special Federal Aviation Regulation (SFAR) No. 44, as amended, that were necessary to respond to a shortage in air traffic control personnel.

EFFECTIVE DATE: As stated in each regulation listed.

ADDRESSES: Send comments on the listed regulations, in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Docket No. 21022A, 800 Independence Avenue SW., Washington, DC 20591.

Comments may be examined in the Rules Docket, Room 915, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: B. Keith Potts, Airspace, Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, telephone (202) 426–3731.

SUPPLEMENTARY INFORMATION:

Comments Invited

The regulations issued under § 91.100 and listed herein are emergency final rules involving immediate air traffic requirements throughout the United States. The need for immediate regulatory response under § 91.100 is stated at 46 FR 16666 *et seq.* (March 13, 1981). In issuing the regulations in this notice, the FAA has found that the conditions cited in § 91.100 exist or will exist and that the regulations are necessary in order to respond to those conditions in the public interest. Where necessary, these regulations may be supplemented or amended hourly, or even more frequently, as air traffic conditions change. Accordingly, good cause exists for making these regulations effective immediately, without prior notice and public procedure.

Comments are invited on any aspect of the listed regulations, individually or cumulatively, and on any aspect of the emergency air traffic control conditions they respond to. When § 91.100 was issued, the FAA noted that it was an emergency regulation under Executive Order 12291 and DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and had no cost impact in itself since it was only procedural. However, the FAA also stated (at 46 FR 16669; March 13, 1981) that the regulations distributed in accordance with § 91.100 will be evaluated individually, as appropriate, to determine whether they have cost impacts. To assist the FAA in determining, as soon as practicable after issuance, the cost impacts of the regulations issued under § 91.100, comments on economic impact are specifically invited.

Commenters wishing the FAA to acknowledge receipt of their comments in response to these rules must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 21022A." The postcard will be date/time stamped and returned to the commenter.

Effect of Publication

Publication, in the **Federal Register**, of emergency air traffic regulations issued under § 91.100 provides constructive legal notice of those regulations to all persons who may not have received the NOTAMs concerning those regulations or who otherwise may not have legal notice of the adoption of those regulations. This document provides this constructive legal notice of immediately effective emergency regulations that have already been adopted. Additional emergency rules will be published periodically if the need for their adoption continues.

Availability Prior to Publication: Preflight Requirement

Since there is a necessary time lag between the issuance of emergency air traffic regulations and NOTAMs under § 91.100 and the publication of these regulations in the **Federal Register**, and since these regulations and NOTAMs respond to emergency conditions that exist, or will exist, relating to the FAA's ability to operate the Air Traffic Control System, the NOTAMs concerning these regulations are available at operating air traffic facilities and Regional Air Traffic Division offices prior to **Federal Register** publication and as long as they remain effective. Under § 91.5 *Preflight Action* (14 CFR 91.5), each pilot in command is required to familiarize himself or herself with all available information concerning each flight.

Air Traffic Controller Shortage: SFAR No. 44, as Amended

The air traffic regulations listed in this amendment to Notice 91–100 follow the adoption of SFAR Nos. 44 through 44–6, in response to an organized air traffic controller job action. The emergency aspects of that action are described at 46 FR 39997, *et seq.* As a result, air traffic control facilities have experienced staffing shortages that have reduced the level of air traffic that can be handled with the required levels of safety and efficiency. To ensure that these levels of safety and efficiency are fully maintained during this shortage of air traffic personnel, the emergency regulations listed in section 2 of this notice have been issued under § 91.100.

Regulatory Impact

The FAA has determined that the regulations listed in this notice are emergency regulations that are not major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to these regulations, since they were issued in response to existing or expected emergency conditions relative to FAA's ability to operate the Air Traffic Control System. It has been further determined that the listed regulations are emergency regulations under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If these regulations are later determined to be significant, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation is not required). A copy of it, when filed, may be obtained by contacting the person identified under the caption **"FOR FURTHER INFORMATION CONTACT."**

List of Subjects in 14 CFR Part 91

Air traffic control, Airspace, Aviation safety.

Notice of Adoption

Accordingly, pursuant to the authority delegated to me by the Administrator in § 91.100 of the Federal Aviation Regulations (14 CFR 91.100; 46 FR 16666, March 13, 1981) and that cited below, the following emergency air traffic regulations have been adopted and covered by NOTAMs under that secton.

(Secs. 307, 313(a), 601, 603, 902, 1110, and 1202, Federal Aviation Act of 1958, as amended (49 U.S.C. 1348, 1354(a), 1421, 1442, 1443, 1472, 1510, and 1522); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))

In consideration of the foregoing, section 2 of Notice 91–100 is hereby amended by adding the following emergency regulations following the regulation numbered FDC No. 3/528.

Air Traffic Controller Shortage of 1981, and Related Emergency Conditions (SFAR–44, as Amended; Docket No. 21022A)

* * * * *

FDC 3/628 Emergency Flight Rules—April 29–May 5. Reservation/Flight Plan Filing Rule—Houston, Texas/Offshore Oil Technology Conference, effective March 25, 1983, 2155 Greenwich Time.

The Offshore Oil Technology Conference event is expected to add a significant number of IFR aircraft operations to the air traffic control (ATC) system. To accommodate this traffic without excessive delays, increased ATC staffing and IFR arrival/departure reservations will be required.

Current rules issued under Special Federal Aviation Regulations (SFAR) 44, as amended, do not provide the air traffic system with the flexibility to accommodate much of this added traffic. For example, only a departure reservation, regardless of destination, is required under the General Aviation Reservation (GAR) Rule. This precludes ATC facilities from effectively managing an above normal and concentrated arrival demand for a specific destination. Further, under the GAR Rule departure reservations cannot be obtained earlier than 24 hours prior to the estimated departure time. This program does not facilitate accommodation planning.

Pilots proposing nonscheduled general aviation flight to the designated Houston airports will be excluded from the GAR once they have obtained an IFR arrival reservation. Departure reservations for IFR flight from the designated Houston airports will also be required under this rule. The reservation requirements of this rule are in lieu of the GAR Rule to help facilitate accommodation planning.

Reservations for VFR flight will not be required. However, appropriately rated pilots should anticipate the possibility of instrument meteorological conditions and flight plan accordingly.

Pursuant to SFAR 44, as amended, and Federal Aviation Regulations § 91.100, the following rule is effective immediately to provide for the safe, orderly handling and movement of IFR traffic:

1. No person may operate a nonscheduled general aviation flight under IFR into or out of the following airports (whether used as a primary or alternate) during the effective periods of this rule without a reservation issued under this rule: Houston Intercontinental, William P. Hobby.

2. The effective periods of this rule are May 2 through May 5, daily from 0700 to 2159 Central Daylight Time (CDT).

3. Each person planning IFR flights under this rule shall comply with, in lieu of the GAR Rule, the following requirements:

(a) Reservations may only be requested after 1400 GMT on April 29, 1983.

(b) An arrival reservation to the Houston Intercontinental and William P. Hobby Airports is required and may only be obtained from the Central Flow Control Facility (telephone (202) 382–6866).

(c) A departure reservation from the Houston Intercontinental and William P. Hobby Airports is required and may only be obtained from the Houston FSS (telephone (713) 644–8361).

(d) A flight plan may only be filed after receiving a reservation, but must be filed at least 4 hours prior to the proposed departure time.

4. Each person receiving a reservation number under this rule must include it in the remarks section of the appropriate flight plan as filed with ATC.

FDC 3/641 Emergency Flight Rules May 23–June 1. Flight Plan Filing—Indianapolis, Indiana/INDY 500 Reservation Rule, effective March 29, 1983, 1440 Greenwich Time.

The INDY 500 event is expected to cause approximately 1400 IFR aircraft operations to be added to the air traffic control (ATC) system. To accommodate this traffic without excessive delays and inconvenience to the public, increased ATC staffing and reservations will be required.

Current rules issued under SFAR 44, as amended, do not provide the air traffic system with the flexibility to accommodate much of this added traffic. For example, only a departure reservation, regardless of destination, is required under the General Aviation Reservation (GAR) Rule. This precludes ATC facilities from effectively managing an above normal concentrated arrival demand for a special designation. Further, under the GAR, departure reservations cannot be obtained earlier than 24 hours prior to the estimated departure time. This provision doesn't facilitate accommodation planning.

Pilots proposing nonscheduled general aviation flight to the Indianapolis area will be excluded from the requirements of the GAR once they have obtained an IFR arrival reservation. Departure reservations for IFR flight from the Indianapolis area will be required, and advance request and filing will be necessary.

Reservations for VFR flight will not be required; however, appropriately rated pilots should anticipate the possibility of instrument meteorological conditions and flight plan accordingly. Pilots who plan IFR return flights and obtain IFR departure reservations under this rule have the advantage of being able to know their return departure date and time prior to leaving their "home" for the Indianapolis area.

Pursuant to the Special Federal Aviation Regulation No. 44, as amended, and Federal Aviation Regulations Section 91.100, the following rule is effective immediately to provide for the safe, orderly handling, and movement of IFR traffic:

1. No person may operate a nonscheduled general aviation flight under IFR into or out of Indianapolis area during the effective periods of this rule without a reservation issued under this rule.

2. The Indianapolis area includes the airspace within a 30-nautical-mile radius of Indianapolis, Indiana, and includes the following airports:

Indianapolis International (IND)
Speedway (354)
Metropolitan (418)
Mt. Comfort (2IN2)
Brownsburg (I01)
Eagle Creek (I14)
Terry (I52)
Brookside (I21)
Skyway (5I1)
Lebanon (6I4)

The effective periods are as follows:

Arrivals: May 27, 1300 G.m.t. to May 29, 1600 G.m.t.—excluding the hours between 0300 and 1100 G.m.t.

VOL 48 ISS 93 MAY 12 1983 UMI

Departures: May 29, 2000 G.m.t. to June 1, 0300 G.m.t.—excluding the hours between 0300 and 1100 G.m.t.

4. Each person planning IFR flights under this rule shall comply with, in lieu of the GAR, the following:

(a) Reservations may only be requested after 1400 GMT on May 23, 1983.

(b) An arrival reservation to the Indianapolis area is required and must be obtained from the Central Flow Control Facility (telephone (212) 382–3366).

(c) A departure reservation from the Indianapolis area is required and must be obtained from the Indianapolis FSS (telephone (317) 244–3310).

(d) Flight plans may only be filed after receiving a reservation, but must be filed at least 4 hours prior to the proposed departure time.

(e) Flight plans for flight from the Indianapolis area must be filed with Indianapolis FSS.

5. Each person receiving a reservation number under this rule must include it in the remarks section of the appropriate flight plan as filed with ATC.

FDC 3/671 Emergency Flight Rules —IFR Flight Plan Filing/General Aviation Reservation Rule effective April 1, 1983, 2145 Greenwich Time.

The IFR capacity of the enroute ATC system is increasing and permits relaxation of the General Aviation Reservation (GAR) Rule with respect to certain operations. On March 14, 1983, several ARTCC's were added to the lists that currently allow inter- and intra-ARTCC operations without requiring reservations under this rule. The situation is such now that more turboprop operations can be conducted without a reservation. However, existing restrictions under the GAR Rule remain in effect for operations from certain airports that are capacity controlled by SFAR 44 as amended.

Accordingly, pursuant to SFAR–44, as amended, and § 91.100 of the Federal Aviation Regulations, the following regulation is effective immediately, unless otherwise specified:

1. All aircraft operators planning a flight under IFR with a proposed departure/enroute pick-up time from 0600 local to 1959 local shall file a flight plan with and obtain a departure/enroute pick-up reservation from an FAA flight service station at least 30 minutes before but not more than 24 hours before his/her proposed departure/enroute time if any segment of the flight will enter ARTCC airspace.

2. ATC clearance must be requested not later than 1 hour after proposed departure/enroute pick-up time.

3. Multiple-Leg Flight Plans may be filed provided:

A. The conditions of paragraph 1 above are met.

B. The last proposed departure/enroute pick-up time does not exceed the 24-hour filing time limitation specified in paragraph 1 above.

C. The same departure/enroute pick-up point is not specified twice in the request.

D. The request does not involve more than three departure/enroute pick-up points.

4. The provisions of this regulation do not apply to the following operators and flights:

A. FAR Part 121 or Part 135 operators with FAA/ICAO-approved two-letter or three-letter call signs.

B. Military flights.

C. Medical emergency flights.

D. Presidential or Vice-Presidential flights.

E. FAA critical flights.

F. NASA flights supporting space shuttle launch and recovery operations during periods designated by the Director, Air Traffic Service.

G. Flights to or from Washington National, John F. Kennedy, LaGuardia, and O'Hare Airports during periods when reservations are required by Subpart K of FAR Part 93—High Density Traffic Airports.

H. Flights originating within the airspace areas of Anchorage and Honolulu ARTCC's.

I. Turbojet aircraft operations at FL 290 and above to a destination 200 nautical miles or more from the point of departure.

J. Nonstop flights destined for airports outside the continental United States.

K. Intra-ARTCC—

(1) effective immediately, flights in the Albuquerque, Atlanta, Boston, Denver, Jacksonville, Kansas City, Los Angeles, Memphis, Oakland, Salt Lake City, Seattle, or Washington, ARTCC's airspace;

(2) effective immediately, turboprop flights in the Ft. Worth or Houston ARTCC's airspace; and

(3) effective 0600 local time on the date specified, flights in any of the following ARTCC's airspace—

(a) April 4, 1983—Cleveland (turboprops only);

(b) April 11, 1983—Miami;

(c) May 16, 1983—Houston;

(d) May 16, 1983—Ft. Worth;

(e) June 20, 1983—Cleveland;

(f) July 1, 1983—New York City;

(g) August 22, 1983—Minneapolis;

(k) August 22, 1983—Chicago; and

(l) August 22, 1983—Indianapolis.

L. Inter-ARTCC—

(1) effective immediately, flights within the airspace of any of the following groups:

(a) Seattle, Salt Lake City, and Oakland; and

(b) Albuquerque, Kansas City, and Memphis.

(2) effective 0600 local time on the dates specified, flights within the airspace of any of the following groups—

(a) April 4, 1983—Cleveland and Boston (turboprops only);

(b) April 11, 1983—Atlanta, Jacksonville, and Washington;

(c) May 16, 1983—Seattle, Salt Lake City, Oakland, and Los Angeles;

(d) May 16, 1983—Atlanta, Jacksonville, Washington, and Miami;

(e) June 20, 1983—Albuquerque, Kansas City, Memphis, and Denver;

(f) July 1, 1983—New York City and Boston;

(g) July 25, 1983—Atlanta, Jacksonville, Washington, Miami, and Houston;

(h) September 1, 1983—Albuquerque, Kansas City, Memphis, Denver, and Ft. Worth; and

(i) September 9, 1983—Minneapolis, Chicago, Indianapolis, Cleveland, New York City, and Boston.

5. Notwithstanding 4K and 4L above, this rule applies to flights from airports that are capacity controlled by SFAR 44, as amended.

6. Limitations on obtaining an IFR clearance while airborne remain in effect in the Anchorage ARTCC area as specified in the pertinent regulatory NOTAM.

Cancel FDC NOTAM 3/528.

Issued in Washington, DC, on May 2, 1983.

R. J. Van Vuren,

Director, Air Traffic Service.

[Economic Regulation Docket 33725; ER-1214A]

Preservation of Air Carrier Records

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Approval of Extension of Record Retention Requirements by the Office of Management and Budget.

SUMMARY: The Civil Aeronautics Board has extended the record retention requirements prescribed for air carriers in ER–1214 (46 FR 25414, May 6, 1981). The Office of Management and Budget approved the extension of these requirements through April 30, 1986, under OMB No. 3024–0006.

DATES: Effective: April 8, 1983. Adopted: May 6, 1983.

FOR FURTHER INFORMATION CONTACT: Linda K. Koman, Data Requirements Section, Information Management Division, Office of Comptroller, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, (202) 673–6042.

BILLING CODE 6320-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Parts 1610, 1615, and 1616

Standards for the Flammability of Clothing Textiles and Children's Sleepwear; Final Enforcement and Administrative Rules

AGENCY: Consumer Product Safety Commission.

ACTION: Final rules.

SUMMARY: The Commission issues on a final basis rules for the enforcement and administration of the Flammable Fabrics Act (FFA) regarding the use of tests other than the ones set forth in the flammability standards for clothing textiles (16 CFR Part 1610) and for children's sleepwear (16 CFR Parts 1615 and 1616) for purposes of supporting guaranties of items subject to those standards, and to demonstrate compliance with the pre-market testing requirements of the children's sleepwear standards. The rules interpret the phrase "reasonable and representative tests," as used in section 8 of the FFA, to include any alternate test utilizing apparatus or procedure other than those set forth in the flammability standards for clothing textiles or children's sleepwear, if the alternate test is as stringent as, or more stringent than, the test in the applicable standard. Additionally, the rules implementing the children's sleepwear standards provide that, subject to the same conditions, such alternate tests may also be used for purposes of complying with the requirements of the children's sleepwear standards for pre-market testing by manufacturers and importers of fabrics and garments subject to those standards. The purpose of these rules is to set forth conditions under which persons and firms required to perform testing to support guaranties of items subject to these standards, and for purposes of compliance with the children's sleepwear standards, may use test apparatus or procedures other than those set forth in the applicable standard.

EFFECTIVE DATE: The rules will become effective on June 13, 1983.

FOR FURTHER INFORMATION CONTACT: Elizabeth Gomilla, Division of Regulatory Management, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; (301) 492–6400.

SUPPLEMENTARY INFORMATION: The Standard for the Flammability of Clothing Textiles (16 CFR Part 1610) and the Flammable Fabrics Act (FFA, 15 U.S.C. 1191 *et seq.*) require that articles of wearing apparel and fabrics used or intended for use as clothing textiles must not exhibit "rapid and intense burning" when tested in accordance with that standard. The clothing textiles standard describes a test apparatus, and sets forth the procedure to be used for testing. The clothing textiles standard is generally applicable to all items of wearing apparel, and fabrics used for such apparel, for both children and adults.

However, children's sleepwear garments in sizes 0 to 14, and fabrics which are intended for use in making such garments, are subject to the more stringent requirements of the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (16 CFR Part 1615) or the Standard for the Flammability of Children's Sleepwear: Sizes 7 Through 14 (16 CFR Part 1616).

Both of the children's sleepwear standards require that garments and fabrics which are subject to their requirements must self-extinguish when exposed to an open flame ignition source.

In order to comply with the children's sleepwear standards, manufacturers, importers, and other persons (such as converters) initially introducing items subject to the children's sleepwear standards into commerce must regularly test items from current production. The sleepwear standards prescribe the apparatus and procedure to be used for performing tests of fabrics and garments subject to their provisions. See 16 CFR 1615.4(a), (f), and (g); and 16 CFR 1616.5. The standards prescribe pass/fail criteria at 16 CFR 1615.3(b), and 1616.3(b). Both standards require that persons and firms subject to their provisions must group items into production units, and test samples from each production unit. See 16 CFR 1615.4(b), (c), and (d); and 16 CFR 1616.4. The schedules for sampling and testing set forth in the sleepwear standards are called "sampling plans."

The manufacture for sale, importation into the United States, or introduction in commerce of any item of wearing apparel or fabric which fails to comply with an applicable flammability standard violates section 3 of the FFA (15 U.S.C. 1192) and section 5 of the Federal Trade Commission Act (FTCA, 15 U.S.C. 45). Such a violation may give rise to an administrative order to cease and desist from further violation of the FFA and FTCA, as well as to a civil action in the United States District Court under provisions of the FFA for injunction, or for seizure of items which fail to comply with an applicable standard of flammability.

In addition to seeking an administrative order, or initiating civil actions for violation of an applicable flammability standard, the FFA, and the FTCA, the Commission may also proceed under section 7 of the FFA (15 U.S.C. 1196) to seek criminal penalties against any person who "willfully" violates the FFA.

Section 8(a) of the FFA (15 U.S.C. 1197(a)) provides that no person shall be subject to criminal prosecution under section 7 of the FFA if that person establishes a guaranty received in good faith which meets all requirements set forth in section 8 of the FFA. (A guaranty does not provide the holder any defense to an administrative action for an order to cease and desist from further violation of the applicable standard, the FFA, and the FTCA, nor to any civil action for injunction or seizure brought under the FFA.)

Among the requirements established for a guaranty by section 8(a) of the FFA is that it must be based upon "reasonable and representative tests" conducted in accordance with the applicable standard. Section 8(b) of the FFA (15 U.S.C. 1197(b)) prohibits the issuance of a "false guaranty."

Application for Use of Alternate Test Apparatus

By letter dated July 11, 1975, the William Carter Company, a manufacturer of children's sleepwear, requested approval of an alternate test apparatus for use in testing fabrics and garments subject to the children's sleepwear standad for sizes 7 through 14 (16 CFR Part 1616) under provisions of § 16.16.5(a) of that standard. (2) [1] That section of the standard states:

§ 1616.5 Test procedure.

(a) *Apparatus.* The following apparatus shall be used for the test. Alternate test apparatus may be used only with prior approval of the Consumer Products Safety Commission.

The Carter application included a description of the alternate test apparatus, and a comparison of results from testing two types of fabrics using both the alternate test apparatus, and the apparatus described in the standard. Carter claimed that the comparative test data demonstrated that use of the alternate test apparatus produced results which were equivalent to, or more stringent than, the results obtained from testing using the apparatus described in the standard. The application from Carter also stated that use of the alternate test apparatus would reduce the time required for testing by one-half to two-thirds. (2)

After reviewing the data included in the Carter application, the Commission staff concluded that Carter's analysis of the equivalency of test results was correct with regard to the two specific fabrics which were the subject of Carter's comparative testing program. (5) However, the staff lacked the

resources needed to duplicate the apparatus described in the Carter application and verify that it would produce results equivalent to those obtained using the apparatus described in the standard on fabrics representative of the entire range used in the production of children's sleepwear. (8)

Related Petition

On July 8, 1980, Milliken Research Corporation submitted a petition (FP 80–3) requesting the Commission to amend the Standard for the Flammability of Clothing Textiles (16 CFR Part 1610) to allow use of an alternate test utilizing different apparatus and procedure, than those specified in the clothing textiles standard.(10)

Unlike the sleepwear standard, the clothing textiles standard does not require manufacturers, importers or other firms introducing items subject to that standard into commerce to test items from current production. All that is required for compliance with the clothing textiles standard is that any item subject to its provisions must not exhibit "rapid and intense burning" if tested by the Commission.

Although manufacturers are not required to perform testing in order to comply with the clothing textiles standard, if they issue guaranties of items subject to that standard, the guaranty must be based on "reasonable and representative tests" conducted in accordance with that standard. A memorandum of a telephone conversation on November 20, 1980, between a member of the Commission staff and the author of the Milliken petition indicates that Milliken desired to use the alternate test for purposes of supporting guaranties of fabrics subject to the clothing textiles standard. (13)

The Commission staff prepared a briefing package which recommended that the Commission grant the relief requested in the petition from Milliken by allowing persons and firms issuing guarantees to use alternate apparatus for testing to support guaranties if items subject to the clothing textiles standard, rather than by amending that standard to change the apparatus to be used for testing by the Commission. (9) The staff briefing package also recommended that the Commission act on Carter's application for approval of alternate test apparatus by issuance of a similar interpretation of the children's sleepwear standards and the FFA to allow use of alternate test apparatus and procedures under certain conditions. (9)

The sleepwear standard for sizes 7 through 14 makes provision for use of test apparatus other than the equipment specified in that standard, as noted above. The sleepwear standard for sizes 0 through 6X has no specific provision authorizing or prohibiting the use of alternate test apparatus or procedure by persons and firms required to perform testing under that standard.

In the **Federal Register** of February 6, 1978 (43 FR 4853), the Commission amended the sleepwear standard for sizes 0 through 6X to make its requirements for flame resistance of fabrics and garments substantively identical to those of the standard for sizes 7 through 14. (1) The Commission staff is aware that many firms which manufacture sleepwear produce fabrics and garments which are subject to both the standard for sizes 0 through 6X and the standard for sizes 7 through 14. For these reasons, after considering the request from Carter for approval of alternate test apparatus and the petition from Milliken Corporation, the staff recommended that the Commission authorize use of alternate test apparatus and procedures under the same conditions for persons and firms required to perform testing under the sleepwear standard for sizes 0 through 6X as well as the standard for sizes 7 through 14.

After consideration of the request of the William Carter Company, the petition from Milliken Research Corporation, the staff briefing package, and an oral briefing by the staff, the Commission voted to approve the staff's recommendations. (13, 14)

Proposed Rules

In the **Federal Register** of May 17, 1982 (47 FR 21081), the Commission published three proposed rules interpreting section 8(a) of the FFA and the flammability standards for clothing textiles and children's sleepwear to allow use of alternate apparatus and procedures by manufacturers and importers when testing to support guaranties of items subject to those standards, provided that a test utilizing such alternate apparatus or procedure is as stringent as, or more stringent than, a test utilizing the apparatus and procedure specified in the applicable standard. (17) The proposed rules interpreting the children's sleepwear standards also authorized use of alternate apparatus and procedures, subject to the same condition, for purposes of compliance with the requirements for pre-market testing in those standards.

The three proposed rules set forth the following provisions applicable to use of alternate test apparatus and procedures:

(1) Persons or firms desiring to use an alternate test apparatus or procedure must have in their possession test data or other information to demonstrate that a test using that apparatus or procedure is as stringent as, or more stringent than, a test using the apparatus and procedure specified by the applicable standard prior to use of such alternate apparatus or procedure to support guaranties or for purposes of compliance with the sleepwear standards.

(2) The Commission will consider a test utilizing alternate apparatus or procedure to be "as stringent as, or more stringent than" a test utilizing the apparatus and procedure specified by the applicable standard if, when testing identical specimens, a test utilizing the alternate apparatus or procedures yields failing results as often as, or more than, a test utilizing the apparatus and procedures specified in the applicable standard.

(3) Written application for Commission approval to use alternate test apparatus or procedures is not required, and the Commission will not act on any individual request for approval of an alternate test apparatus or procedure.

All three proposed rules stated that the Commission will test fabrics and garments subject to the three standards using the apparatus and procedure specified in the applicable standard for purposes of determining compliance with the requirements of the FFA and the three standards. (17)

The proposals also solicited information responsive to the following questions:

1. Would manufacturers and importers use alternate apparatus or procedures for testing under the conditions set forth in the proposals?

2. If so, what savings in the costs or hours required for testing are anticipated?

3. Could the proposed rules be modified to increase savings in the dollar or hourly costs of testing? (17)

Comments

In response to the proposals of May 17, 1982, the Commission received eight written comments: three from manufacturers of items subject to flammability standards; four from associations of manufacturers of such items; and one from a public interest group.

Comments from two associations of manufacturers expressed agreement with and support for the proposals. (19, 23) These comments express the view that the proposed rules, if issued, on a final basis, would not reduce the level of protection afforded by the three flammability standards, and have the potential to reduce costs and time required for testing. One comment observed that the rules would not impose any substantial burden on any new firm, because they allow use of the apparatus and procedures specified in the applicable standard if a firm elects to use them. (23)

The remainder of the comments expressed concern about or objection to one or more provisions of the proposed rules. The following issues were raised by those comments.

Economic Advantage to Larger Firms

Two manufacturers state that only the larger companies would be in a position to develop and implement tests using alternate apparatus or procedures. These commenters express concern that one effect of final rules based on the proposals would be to place smaller companies at a competitive disadvantage. (18, 21)

The Commission anticipates that larger firms most likely will be among the first to develop alternate apparatus and procedures for testing. However, economic information available to the Commission indicates that the cost advantage which larger firms may realize will be relatively small. (28) Additionally, the Commission believes that many small firms will be able to develop alternate test apparatus or procedures, or use alternate test equipment and procedures developed by larger firms, if such test methods could lead to a significant cost savings. (28) For these reasons, the Commission concludes that the possible cost advantage to larger firms which might result from issuance of final rules will have relatively little impact on competition within the affected industries.

Effect of Rules on Product Liability Actions

Comments from one manufacturer and one association of manufacturers oppose issuance of the proposed rules because the commenters believe the rules would weaken the position of garment manufacturers in product liability suits. (21, 25) These comments express concern that persons manufacturing garments from fabrics which are the subject of guaranties would not be able to determine if the guaranties were supported by tests using the apparatus and procedures specified by the applicable standards, or by tests using alternate apparatus or procedures.

Another association of manufacturers commented that issuance of the proposed rules on a final basis could create confusion in the defense of product liability actions. (22) This comment indicated that in view of the possibility of product liability actions, many manufacturers would continue to use only the apparatus and procedures specified by the applicable standard. This comment requests clarification about the effect of issuance of the rules on defense of product liability suits. (22)

These comments reflect a concern that items guarantied on the basis of tests using alternate apparatus or procedures will not necessarily meet the requirements of the applicable standard when tested using the apparatus and procedures specified in that standard. These comments seemingly overlook those provisions in the proposals which require that persons or firms using alternate apparatus or procedures must have test results or other information to demonstrate the equivalent stringency of tests using alternate apparatus or procedures with tests conducted with the apparatus and procedures specified in the applicable standard before such alternate apparatus or procedure may be used for the purpose of supporting guaranties or performing pre-market testing required by the children's sleepwear standards. (17)

Additionally, these comments apparently do not consider the possibility that use of alternate apparatus or procedures under the conditions specified in the rules could lead to increased testing of items subject to flammability standards if alternate tests could be performed more quickly or at less cost than tests using the apparatus and procedures specified by the applicable standard. In such an event, compliance with flammability standards might be improved. (28)

Like the proposals of May 17, 1982, the rules issued below state that for purposes of determining compliance with the three standards, the Commission will use the apparatus and procedures specified by the applicable standard. The rules issued below do not alter any requirement contained in the three standards.

Consequently, to the extent that compliance with the applicable standard may be an issue in a product liability suit, the resolution of that issue would require testing with the apparatus and procedure specified by that standard. The Commission observes that no provision of the rules issued below prohibits the purchaser of an item which is subject to a flammability standard to require as a condition of sale a guaranty which is supported by tests conducted with the apparatus and procedures specified in the applicable standard.

Commission Approval of Alternate Apparatus and Procedure

A comment from an association of manufacturers urges the Commission to modify the proposals to allow use of alternate test apparatus and procedures only when approved in advance by the Commission. (25) This comment observes that the sleepwear standard for sizes 7 through 14 contains explicit provisions for Commission approval of alternate apparatus prior to use by persons and firms subject to that standard. See 16 CFR 1616.5(n). This comment states that prior approval by the Commission would give greater assurance to garment manufacturers that the fabrics they purchase will meet the requirements of the applicable standard. This comment acknowledges that such an approach would add to the workload of the Commission. (25)

Similarly, comments from two manufacturers state that if any change to the test apparatus or procedure is made, it should be one to prescribe a single apparatus and procedure for use by all manufacturers. These comments express concern that a proliferation of alternate test apparatus and procedures may result if the proposed rules are issued on a final basis. (18, 20)

As noted above, the Commission began this proceeding after receiving two separate requests for approval of alternate test apparatus. (2, 10)

The basic problem with Commission approval of alternate apparatus or procedures for use by all manufacturers is that the Commission lacks the staff and monetary resources to perform the extensive testing necessary to assure that the alternate apparatus or procedure will yield results equivalent to those obtained using the apparatus and procedure specified in the standard when testing all of the fabrics currently in use which might be subject to the standard in question. (29)

The rules issued below place the burden of demonstrating equivalency of test results from the alternate apparatus on the person or firm that will derive the benefit from using the alternate apparatus or procedure. Additionally, that person or firm need not demonstrate that use of the alternate apparatus or procedure will produce equivalent results on the entire universe of fabrics or garments which may be subject to the standard. Instead, equivalency of test results must only be established with regard to the fabrics or garments being manufactured or guarantied by the person or firm desiring to use the alternate apparatus or procedure.

VOL

1983
UMI

The Commission has taken an approach regarding use of alternate laundering procedures when testing fabrics and garments subject to the children's sleepwear standards which is similar to that of the proposed rules for use of alternate test apparatus or procedure. (29) This approach places responsibility on the person or firm desiring to use an alternate laundering procedure to develop test data to show equivalent stringency of the alternate laundering procedure for the fabrics of garments which that person or firm proposes to test using the alternate laundering procedure. See 16 CFR 1615.32 and 1616.32.

The Commission's rules for use of alternate laundering procedures have been in effect since 1977. Based on its experience with the rules governing use of alternate laundering procedures, the Commission concludes that the rules issued below regarding use of alternate test apparatus and procedures and practicable for both the Commission and the affected industries.

Enforcement of Standards

A comment from a public interest group expresses concern that the rules, as proposed, might weaken the Commission's ability to enforce the standards, particularly the clothing textiles standard (16 CFR Part 1610). (24)

All three proposals contained provisions to the effect that the Commission will continue to test fabrics and garments using the apparatus and procedure specified by the applicable standard. All three proposals had additional language stating that the Commission "may consider" failing results from compliance tests "as evidence" of a violation of the applicable standard and the FFA. (17) See proposed §§ 1610.40(g); 1615.35(e), 1615.36(d); 1616.35(f), 1616.36(d).

The comment under consideration states that under the FAA, a failing compliance test would be proof of failure, not just evidence. To correct this problem, this comment suggested alternative language for proposed § 1610.40(g) to the effect that the Commission will test fabrics and garments for compliance with the standard using the apparatus and procedures set forth in the standard, and will regard as irrelevant any evidence that the fabric or garment passed an alternate test. This comment states that the rules should provide that evidence of passing results from an alternate test will be considered by the Commission only with regard to issues of good faith, knowledge, or willfulness. (24)

The Commission observes that when it considers an alleged violation of the FFA, it takes into account all relevant evidence. As this comment suggests, the principal evidence of a violation will continue to be tests conducted by the Commission using the equipment and procedures specified by the applicable standard. Although the extensive language change requested by this comment does not appear to be necessary, the Commission agrees that its position in enforcement actions would be improved by changing the sections which are the subject of this comment to state that the Commission "will consider" failing results of compliance testing as evidence of a violation of the applicable standard and the FFA. That change appears in the rules issued below.

Impact on Small Businesses

Section 603 of the Regulatory Flexibility Act (RFA, 5 U.S.C. 603) requires agencies to prepare and make available for public comment an initial regulatory flexibility analysis of the impact of any proposal on small entities, including small businesses. Section 605(b) of the RFA provides that an agency is not required to prepare a regulatory flexibility analysis if the agency certifies that the proposal, if issued on a final basis, will not have a significant economic impact on a substantial number of small entities.

In the notice of May 17, 1982, the Commission stated that it had certified that the proposed rules would not have a significant economic impact on a substantial number of small entities if issued on a final basis. In that notice, the Commission observed that the proposed rules would not add any new requirement for any person or firm issuing guaranties for items subject to the flammability standards for clothing textiles or children's sleepwear, or for manufacturers or importers of items subject to the children's sleepwear standards. Rather, the proposal would allow persons and firms currently subject to existing requirements for testing to use apparatus and procedures other than those specified in the applicable standard under the conditions specified in the proposals.

The Commission published the proposals after receiving requests from manufacturers who claimed that use of an alternate test apparatus would reduce their costs of testing. After the rules issued below become effective, those firms and any others currently required to perform testing in order to support guaranties or comply with the requirements of the children's sleepwear standards will have the option of using alternate apparatus or procedures under the conditions set forth in the rules.

However, if any person or firm concludes that use of an alternate apparatus or procedures, under the conditions specified in the rules, will not reduce testing costs or offer any other advantage, that person or firm is free to continue using the apparatus and procedures specified in the applicable standard.

The Commission received and considered comments to the effect that the rules issued below may give a competitive advantage to larger firms to the detriment of small firms. The Commission has concluded that any advantage to larger firms which may result from issuance of these rules will not be significant, for the reasons set forth in the discussion of comments.

Environmental Considerations

As stated in the notice of proposal, the Commission's environmental review procedures state at 16 CFR 1021.5(c)(1) that issuance, amendment or revocation of rules for product performance normally has little or no potential for affecting the human environment.

The Commission does not foresee any special or unusual circumstances surrounding the rules issued below. For this reason, neither an environmental assessment or an environmental impact statement is required.

List of Subjects in 16 CRR Part 1610

Clothing, Consumer protection, Flammable materials, Records, Textiles, Warranties.

List of Subjects in 16 CFR Parts 1615 and 1616

Clothing, Consumer protection, Flammable materials, Infants and children, Labeling, Records, Textiles, Warranties.

Conclusion and Promulgation

After consideration of written comments on the proposed rules, analysis of those comments by the Commission staff, and other relevant information, the Commission concludes that the rules authorizing use of alternate test apparatus and procedures should be issued on a final basis, with the modification discussed above, to become effective on June 13, 1983.

Therefore, in accordance with the provisions of the Flammable Fabrics Act (sec. 5, Pub. L. 90–189, 81 Stat. 569 (15 U.S.C. 1194)) and the Consumer Product Safety Act (sec. 30, Pub. L. 92–573, 86 Stat. 1231 (15 U.S.C. 2079)), the Commission hereby amends the Code of Federal Regulations, Title 16, Chapter II, Subchapter B as follows:

PART 1610—STANDARD FOR THE FLAMMABILITY OF CLOTHING TEXTILES

Part 1610, Subpart B is amended by adding a new § 1610.40 to read as follows:

§ 1610.40 Use of alternate apparatus, procedures, or criteria for tests for guaranty purposes.

(a) Section 8(a) of the Flammable Fabrics Act (FFA, 15 U.S.C. 1197(a)) provides that no person shall be subject to criminal prosecution under section 7 of the FFA (15 U.S.C. 1196) for a violation of section 3 of the FFA (15 U.S.C. 1192) if that person establishes a guaranty received in good faith which meets all requirements set forth in section 8 the FFA. One of those requirements is that the guaranty must be based upon "reasonable and representative tests" in accordance with the applicable standard.

(b) The Standard for the Flammability of Clothing Textiles (the Standard) prescribes apparatus and procedures for testing fabrics and garments subject to its provisions. See 16 CFR 1610.4. The Standard prescribes criteria for classifying the flammability of fabrics and garments subject to its provisions as "Normal flammability, Class 1," "Intermediate flammability, Class 2," and "rapid and intense burning, Class 3." See 16 CFR 1610.3. Sections 3 and 4 of the Flammable Fabrics Act, as enacted in 1953 and amended in 1954, prohibits the manufacture for sale, importation into the United States, or introduction in commerce of any fabric or article of wearing apparel subject to the Standard which exhibits "rapid and intense burning" when tested in accordance with the Standard. See 16 CFR Part 1609.

(c) The Commission recognizes that for purposes of supporting guaranties, "reasonable and representative tests" could be either the test in the Standard, or alternate tests which utilize apparatus or procedures other than those in the Standard. This § 1610.40 sets forth conditions under which the Commission will allow use of alternate tests with apparatus or procedures other than those in the Standard to serve as the basis for guaranties.

(d)(1) Persons and firms issuing guaranties that fabrics or garments subject to the Standard meet its requirements may base those guaranties on any alternate test utilizing apparatus or procedures other than those in the Standard, if such alternate test is as stringent as, or more stringent than, the test in the Standard. The Commission considers an alternate test to be "as stringent as, or more stringent than" the test in the Standard if, when testing identical specimens, the alternate test yields failing results as often as, or more often than, the test in the Standard. Any person using such an alternate test must have data or information to demonstrate that the alternate test is as stringent as, or more stringent than, the test in the Standard.

(2) The data or information required by this paragraph (d) of this section to demonstrate equivalent or greater stringency of any alternate test using apparatus or procedures other than those in the Standard must be in the possession of the person or firm desiring to use such alternate test before the alternate test may be used to support guaranties of items subject to the Standard.

(3) The data or information required by paragraph (d) of this section to demonstrate equivalent or greater stringency of any alternate test using apparatus or procedures other than those in the Standard must be retained for as long as that alternate test is used to support guaranties of items subject to the Standard, and for one year thereafter.

(Approved by Office of Management and Budget under control number 3041–0024)

(e) Specific approval from the Commission in advance of the use of any alternate test using apparatus or procedures other than those in the standard is not required. The Commission will not approve or disapprove any specific alternate test utilizing apparatus or procedures other than those in the Standard.

(f) Use of any alternate test to support guaranties of items subject to the Standard without the information required by this section may result in violation of section 8(b)), of the FFA (15 U.S.C. 1197(b)), which prohibits the furnishing of a false guaranty.

(g) The commission will test fabrics and garments subject to the Standard for compliance with the Standard using the apparatus and procedures set forth in the Standard. The Commission will consider any failing results from compliance testing as evidence that:

(1) The manufacture for sale, importation into the United States, or introduction in commerce of the fabric or garment which yielded failing results was in violation of the Standard and of section 3 of the FFA; and

(2) The person or firm using the alternate test as the basis for a guaranty has furnished a false guaranty, in violation of section 8(b) of the FFA.

PART 1615—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZE 0 THROUGH 6X (FF 3–71)

Part 1615, Subpart B is amended by adding new § 1615.35 and § 1615.36 to read as follows:

§ 1615.35 Use of alternate apparatus, procedures, or criteria for testing under the standard.

(a) The Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (the Standard) requires every manufacturer, importer, and other person (such as a converter) initially introducing items subject to the Standard into commerce to group items into production units, and to test samples from each production unit. See 16 CFR 1615.4 (b), (c) and (d). The Standard prescribes an apparatus and procedure for performing tests of fabric and garments subject to its provisions. See 16 CFR 1615.4 (e), (f), and (g). The Standard prescribes pass/fail criteria at 16 CFR 1615.3(b).

(b)(1) By issuance of this § 1615.35, the Commission gives its approval to any person or firm desiring to use test apparatus or procedures other than those prescribed by the Standard for purposes of compliance with the Standard, if that person or firm has data or other information to demonstrate that a test utilizing such alternate apparatus or procedures is as stringent as, or more stringent than, a test utilizing the apparatus and procedures specified in the Standard. The Commission considers a test utilizing alternate apparatus or procedures to be "as stringent as, or more stringent than" a test utilizing the apparatus and procedures specified in the standard if, when testing identical specimens, a test utilizing alternate apparatus or procedures yields failing results as often as, or more often than, a test utilizing the apparatus and procedures specified in the Standard.

(2) The data or information required by this paragraph (b) of this section as a condition to the Commission's approval of the use of alternate test apparatus or procedures must be in the possession of the person or firm desiring to use such alternate apparatus or procedures before the alternate apparatus or procedures may be used for purposes of compliance with the Standard.

(3) The information required by this paragraph (b) of this section must be retained by the person or firm using the alternate test apparatus or procedure for as long as that apparatus or procedure is used for purposes of compliance with

VOL 48 ISS 93 MAY 12 1983 UMI

the Standard, and for a period of one year thereafter.

[Approved by Office of Management and Budget under control number 3041–0027.]

(c) Written application to the Commission is not required for approval of alternate test apparatus or procedure, and the Commission will not act on any individual written application for approval of alternate test apparatus or procedure.

(d) Use of any alternate test apparatus or procedure without the data or information required by paragraph (b), of this section, may result in violation of the Standard and section 3 of the Flammable Fabrics Act (15 U.S.C. 1192).

(e) The Commission will test fabrics and garments subjects to the Standard for compliance with the requirements of the Standard using the apparatus and procedures set forth in the Standard. The Commission will consider any failing results from compliance testing as evidence of a violation of the Standard and section 3 of the Flammable Fabrics Act (15 U.S.C 1192).

§ 1615.36 Use of alternate apparatus or procedures for tests for guaranty purposes

(a) Section 8(a) of the Flammable Fabrics Act (FFA, 15 U.S.C. 1197(a)) provides that no person shall be subject to criminal prosecution under section 7 of the FFA (15 U.S.C. 1196) for a violation of section 3 of the FFA (15 U.S.C. 1192) if that person establishes a guaranty received in good faith which meets all requirements set forth in section 8 of the FFA. One of those requirements is that the guaranty must be based upon "reasonable and representative tests" in accordance with the applicable standard.

(b) Section 1615.31(f) of the regulations implementing the Standard for the Flammability of Children's Sleepwear: Sizes 0 through 6X (the Standard) provides that for purposes of supporting guaranties issued in accordance with section 8 of the FFA for items subject to the Standard, "reasonable and representative tests" are tests "performed pursuant to any sampling plan or authorized alternative sampling plan engaged in pursuant to the requirements of the Standard."

(c) At § 1615.35, the Commission has set forth conditions under which the Commission will approve the use of test apparatus or procedures other than those prescribed in the Standard for purposes of demonstrating compliance with the requirements of the Standard. Any person or firm meeting the requirements of § 1615.35 for use of alternate test apparatus or procedure for compliance with the Standard may also use such alternate test apparatus or procedures under the same conditions for purposes of conducting "reasonable and representative tests" to support guaranties of items subject to the Standard, following any sampling plan prescribed by the Standard or any approved alternate sampling plan.

(d) The Commission will test fabrics and garments subject to the Standard for compliance with the Standard using the apparatus and procedures set forth in the Standard. The Commission will consider any failing results from compliance testing as evidence that the person or firm using alternate test apparatus or procedures has furnished a false guaranty in violation of section 8(b) of the FFA (15 U.S.C. 1197(b)).

PART 1616—STANDARD FOR THE FLAMMABILITY OF CHILDREN'S SLEEPWEAR: SIZES 7 THROUGH 14 (FF 5–74)

Part 1616, Subpart B is amended by adding new §§ 1616.35 and 1616.36 to read as follows:

§ 1616.35 Use of alternate apparatus, procedures, or criteria for testing under the standard.

(a) The Standard for the Flammability of Children's Sleepwear: Sizes 7 through 14 (the Standard) requires every manufacturer, importer, and other person (such as a converter) initially introducing items subject to the Standard into commerce to group items into production units, and to test samples from each production unit. See 16 CFR 1616.4. The Standard prescribes an apparatus and procedure for performing tests of fabric and garments subject to its provisions. See 16 CFR 1616.5. The Standard prescribes pass/fail criteria at 16 CFR 1616.3(b).

(b) Section 1616.5(a) states that alternate test apparatus may be used by persons or firms required to perform testing under the Standard "only with prior approval" of the Commission.

(c)(1) By issuance of this § 1616.35, the Commission gives its approval to any person or firm desiring to use test apparatus or procedures other than those prescribed by the Standard for purposes of compliance with the Standard, if that person or firm has data or other information to demonstrate that a test utilizing such alternate apparatus or procedure is as stringent as, or more stringent than, a test utilizing the apparatus and procedure specified in the Standard. The Commission considers a test utilizing alternate apparatus or procedures to be "as stringent as, or more stringent than" a test utilizing the apparatus and procedures specified in the standard, if when testing identical specimens, a test utilizing alternative apparatus or procedures yields failing results as often as, or more often than, a test utilizing the apparatus and procedures specified in the standard.

(2) The data or information required by this paragraph (c) of this section as a condition to the Commission's approval of the use of alternate test apparatus or procedures must be in the possession of the person or firm desiring to use such alternate apparatus or procedures before the alternate apparatus or procedures may be used for purposes of compliance with the standard.

(3) The information required by this paragraph (c) of this section must be retained by the person or firm using the alternate test apparatus or procedures for as long as that apparatus or procedure is used for purposes of compliance with the standard, and for a period of one year there after.

[Approved by Office of Management and Budget under control number 3041–0027.]

(d) Written application to the Commission is not required for approval of alternate test apparatus or procedures, and the Commission will not act on any individual written application for approval of alternate test apparatus or procedures.

(e) Use of any alternate test apparatus or procedures without the data or information required by paragraph (c), of this section, may result in violation of the Standard and section 3 of the Flammable Fabrics Act (15 U.S.C. 1192).

(f) The Commission will test fabrics and garments subject to the standard for compliance with the requirements of the standard using the apparatus and procedures set forth in the standard. The Commission will consider any failing results from compliance testing as evidence of a violation of the standard and section 3 of the Flammable Fabrics Act (15 U.S.C. 1192).

§ 1616.36 Use of alternate apparatus or procedures for tests for guaranty purposes.

(a) Section 8(a) of the Flammable Fabrics Act (FFA, 15 U.S.C. 1197(a)) provides that no person shall be subject to criminal prosecution under section 7 of the FFA (15 U.S.C. 1196) for a violation of section 3 of the FFA (15 U.S.C. 1192) if that person establishes a guaranty received in good faith which meets all requirements set forth in section 8 of the FFA. One of those requirements is that the guaranty must be based upon "reasonable and representative tests" in accordance with the applicable standard.

(b) Section 1616.31(e) of the regulations implementing the Standard

for the Flammability of Children's Sleepwear: Sizes 7 through 14 (the Standard) provides that for purposes of supporting guaranties issued in accordance with section 8 of the FFA for items subject to the Standard, "reasonable and representative tests" are tests "performed pursuant to any sampling plan or authorized alternative sampling plan engaged in pursuant to the requirements of the Standard."

(c) At § 1616.35, the Commission has set forth conditions under which the Commission will approve the use of test apparatus or procedures other than those prescribed in the Standard for purposes of demonstrating compliance with the requirements of the Standard. Any person or firm meeting the requirements of § 1616.35 for use of alternate test apparatus or procedure for compliance with the Standard may also use such alternate test apparatus or procedure under the same conditions for purposes of conducting "reasonable and representative tests" to support guaranties of items subject to the Standard, following any sampling plan prescribed by the Standard or any approved alternate sampling plan.

(d) The Commission will test fabrics and garments subject to the Standard for compliance with the Standard using the apparatus and procedures set forth in the Standard. The Commission will consider any failing results from compliance testing as evidence that the person or firm using alternate test apparatus or procedures has furnished a false guaranty in violation of section 8(b) of the FFA (15 U.S.C. 1197(b)).

(Sec. 5, Pub. L. 90–189, 81 Stat. 569, 15 U.S.C. 1194; Sec. 30(b), Pub. L. 92–573, 86 Stat. 1231, 15 U.S.C. 2079(b))

Dated: May 6, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Ch. 1

[FHWA Docket No. 83–4, Notice No. 6]

Truck Size Policy Statement

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of modifications and cancellation of certain interim designated highways.

SUMMARY: The FHWA made an interim designation of each State's Federal-aid primary system highways on April 5, 1983. These roads were to be made available to certain size trucks from April 6 until issuance of the final regulation pursuant to the requirements of the Surface Transportation Assistance Act (STAA) of 1982. By this notice, the FHWA provides modifications to the interim designated highway networks for the States of Alaska, Arizona, Florida, Louisiana, Michigan, New Jersey, Oklahoma, Rhode Island, Texas, and Virginia.

EFFECTIVE DATE: The modification are effective May 12, 1983, and will expire upon designation of the final network.

FOR FURTHER INFORMATION CONTACT: Mr. Sheldon G. Strickland, Office of Highway Planning, (202) 426–0153, or Mr. David C. Oliver, Office of the Chief Counsel, (202) 426–0825, Federal

Highway Administration, 400 Seventh Street, SW., Washington, D.C. 20590. Office hours are 7:30 a.m. to 4:00 p.m. e.t., Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: On April 5, 1983, FHWA issued a policy statement (48 FR 14844) that provided an interim designation of primary system highways on which commerical motor vehicles with dimensions authorized by sections 411 and 416 of the STAA of 1982 (Pub. L. 97-424, as amended by Pub. L. 98-17) may be permitted to operate from April 6, 1983, until issuance of final regulations. The policy statement also provided that modifications to the interim designated network would be made under certain circumstances.

The designated routes in the Appendix to this notice supersede those routes designated in the April 5, 1983, policy statement. On May 3, 1983, (48 FR 20022), modifications were made in the designations for eleven States. At this time the FHWA is announcing modifications of the designations in ten additional States. Highlights of the State-by-State modifications follow.

—Alaska—Portions of AK 1 and AK 2 are removed from the interim system.
—Arizona—A portion of US 60 in Salt River Canyon has been removed.
—Florida—Since Florida has instituted an action in the United States District Court to enjoin the April 5 interim designations in that State, the FHWA is cancelling the interim designation of those primary system highways that had not been designated by the State. The agency will address the interim designation for qualifying primary system highways in Florida in a proceeding, which will be instituted in the near future.
—Louisiana—Portions of Routes US 71 and LA 1, which were designated by the State, were inadvertently excluded from the April 6 listing and are now included.
—Michigan—Portions of MI 50 and MI 52 are removed from the interim system.
—New Jersey—Routes US 206 and NJ 15 have been removed from the interim system. Portions of US 9 have been deleted and US 130 and NJ 109 added to the interim system.
—Oklahoma—Several corrections and additions have been made.
—Rhode Island—Routes RI 114, US 6, and RI 138 have been deleted from the interim system and changes made in the designation of RI 78.
—Texas—Several corrections to the April 5 designation have been made.
—Virginia—Effective May 3, 1983, and until July 1, 1983, or further notice, commercial motor vehicles with dimensions authorized by the STAA may operate on the highways designated in the April 5, 1983, policy statement (48 FR 14844) and all other Federal-aid primary highways in the State only when granted a special permit by the State. The State of Virginia shall issue a special permit without charge and within 24 hours of application. The denial of any application will specifically set forth the geometric or structural reasons upon which the denial is issued. Granting of special permits shall not be unreaonably denied. Applications for the special permit and further information may be obtained by calling the Virginia Department of Highways at (804) 786-2787, or by writing to the following address: Mr. C. O. Leigh, State Maintenance Engineer, Virginia Department of Highways and Transportation, 1221 East Broad Street, Richmond, Virginia 23219. When requesting a permit, applicants must provide the following information:

- Name and address of company or individual making request.
- License number of trailer or vehicle to be placed on permit.
- Origin and destination of the vehicle, including the routing of the vehicle while in Virginia.

No permits are required for the Interstate highways system in Virginia.

In the April 5, 1983, Policy Statement, and the May 3, 1983, Notice of Modification we indicated that a notice of proposed rulemaking (NPRM) for the final system would be published. The continuing discussions with several States have been helpful but have necessitated a delay in our anticipated schedule. The NPRM will be published in the near future, but at this time we are unable to estimate a publishing date. In the interim, we would again call attention to the Docket established in the February 3 Policy Statement (48 FR 5210) and we would encourage interested parties to continue to forward comments to that Docket.

Issued on: May 10, 1983.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

Coast Guard

33 CFR Part 117

[CGD9 83-01]

Drawbridge Operation Regulations; Sheboygan River, Wisconsin

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of the City of Sheboygan, Wisconsin, the Coast Guard is revising the regulations governing the operation of the 8th Street highway bridge, mile 0.69, over the Sheboygan River in Sheboygan, Wisconsin, by permitting the City of Sheboygan to only open the draw of the 8th Street bridge every 20 minutes (10 minutes before the hour, 10 minutes after the hour and on the half-hour) from 6 a.m. to 10 p.m., Monday through Saturday; on Sundays and legal holidays, from 6 a.m. to 10 p.m., the bridge will be opened on signal. This change is being made because of an increase in both marine and land traffic. This action will accommodate the needs of vehicular traffic and still provide for the reasonable needs of navigation.

EFFECTIVE DATE: This amendment becomes effective on June 13, 1983.

FOR FURTHER INFORMATION CONTACT: Robert W. Bloom, Jr., Chief, Bridge Branch, Ninth Coast Guard District, 1240 East Ninth Street, Cleveland, Ohio 44199. Telephone (216) 522–3993.

SUPPLEMENTARY INFORMATION: On February 10, 1983, the Coast Guard published a Proposed Rule in the **Federal Register** (FR 6137) concerning this amendment. The Commander, Ninth Coast Guard District, also published this proposal as a Public Notice dated February 25, 1983. Interested parties were given until March 28, 1983, on both documents, to submit comments.

Drafting Instructions: The principal persons involved in drafting this amendment are: Robert W. Bloom, Jr., Chief, Bridge Branch, Ninth Coast Guard District, and LCDR J.A. Blocher, Assistant Legal Officer, Ninth Coast Guard District.

Discussion of Comments: No comments were received from the **Federal Register** or Ninth Coast Guard District Public Notice.

This final regulation has previously been determined to be non-major under Executive Order 12291, and also to be nonsignificant under the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). The final regulation has previously been certified under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 et. seq.), at 48 FR 6137 (February 10, 1983). No information has been received which changes those determinations and certifications. An economic evaluation has not been conducted, Since this rule will better serve both land and marine traffic because the scheduled opening time is before and after the hour, instead of on the hour when vehicle traffic is heaviest, small entities in the area will not be economically impacted.

Bridges.

PART 117—DRAW BRIDGE OPERATION REGULATIONS

In consideration of the foregoing, Part 117 of Title 33 of the Code of Federal Regulations is amended by revising § 117.652 to read as follows:

§ 117.652 Sheboygan River, Wis.; Eighth Street Bridge at Sheboygan, Wis.

(a) From May 1 through October 30, from 6 a.m. to 10 p.m., including Sundays and legal holidays, the draw shall open on signal except that: (1) From 6:10 a.m. to 7:10 p.m., Monday through Saturday, the draw need only open every 20 minutes (10 minutes after the hour, on the half-hour and 10 minutes before the hour).

(b) At all other times the draw shall open on signal if at least two hours notice is given.

(c) Public vessels of the United States, state or local government vessels used for public safety, and vessels seeking shelter from rough weather shall be passed through the draws of this bridge as soon as possible even though the closed periods are in effect.

(d) The owner of or agency controlling the bridge shall keep conspicuously posted on both the upstream and downstream sides of the bridge, in such a manner that they can be easily read, a copy of the regulations in this paragraph together with a notice stating exactly how the representative may be reached in order to give a two hour notice during times specified in paragraph (b) of this section.

(33 U.S.C. 499, 49 U.S.C. 1655(g)(2); 49 CFR 1.48(c)(5), 33 CFR 1.05–1(g)(3)).

Dated: April 29, 1983.

Henry H. Bell,

Rear Admiral, U. S. Coast Guard, Commander, Ninth Coast Guard District.

[FR Doc. 83-12777 Filed 5-11-83; 8:45 am]

BILLING CODE 4910-14-M

33 CFR Part 165

[COTP Hampton Roads, VA, Regulation 83-08]

Safety Zone Regulations; Elizabeth River, Portsmouth, Virginia

AGENCY: Coast Guard, DOT.

ACTION: Emergency rule.

SUMMARY: The Coast Guard has established a safety zone in the Elizabeth River, Portsmouth, Virginia. The zone is needed to protect watercraft and their occupants from possible damage during the transit and placement of submerged sections of the new tunnel from Portsmouth to Norfolk, Virginia, and will be effective whenever such transit or placement occurs. Entry into this zone during effective times is prohibited unless authorized by the Captain of the Port.

EFFECTIVE DATES: This regulation becomes effective at 7:00 PM, Eastern Daylight Savings Time, 29 April 1983. It terminates when tube "F" of the new Portsmouth to Norfolk tunnel has been placed, or on 1 October 1983, whichever occurs first.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander W. K. Six, Chief, Port Operations Department, Coast Guard Marine Safety Office, Hampton Roads, Norfolk, Virginia 23510, (804) 441–3296.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was not published for this regulation and it is being made effective in less than 30 days after **Federal Register** publication. Publishing an NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to safeguard watercraft and their occupants.

Drafting Information

The drafter of this regulation is Lieutenant Commander W. K. Six, project officer for the Captain of the Port.

Discussion of Regulation

To prevent possible damage to watercraft and possible injury to their occupants during the transit and placement of the tunnel sections, no watercraft will be permitted to enter, remain in, moor in, anchor in, or transit this safety zone unless specifically authorized by the Captain of the Port, Hampton Roads, Virginia. U.S. Coast Guard patrol vessels will be on scene to enforce the safety zone monitoring VHF–FM channels 16 and 13. This action is necessary due to the hazards

VOL
48
ISS
93
MAY
12
1983
UMI

involved in moving a large fabricated tunnel section in a restricted waterway such as the Elizabeth River, which movement will effectively close the navigable channel. This rule is in response to a request by the Jones-Schiavone Construction Company for Coast Guard assistance in providing traffic control and vessel escorts for the transit and placement of the tunnel sections. This action is designed to prevent damage to watercraft and injury to their occupants in the event of collision with a tunnel section or construction equipment and will accomplish this end by preventing all such traffic from entering the safety zone.

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

PART 165—[AMENDED]

Regulation: In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations, is amended by adding a new § 165.T519 to read as follows:

§ 165.T519 Safety Zone: Elizabeth River, Portsmouth, Virginia.

(a) *Location.* The waters of the Southern Branch of the Elizabeth River within a 500 yard radius of the Jones-Schiavone Company lay-barge, in approximate position 36–50–12N, 76–17–40W, constitute a safety zone whenever the Jones-Schiavone Construction Company is moving or placing a fabricated section of the new Portsmouth to Norfolk tunnel. This safety zone will commence at 7:00 PM, Eastern Daylight Savings Time, 29 April 1983, and will terminate when tube "F" of the tunnel has been placed, or on 1 October 1983, whichever occurs first.

(b) The Coast Guard Marine Safety Office, Hampton Roads, Virginia will notify the maritime community of periods when this safety zone will be effective through Notice to Mariners and other normal means of notification.

(c) *Regulations.*—(1) In accordance with the general regulations in 165.23 of this part, entry into this zone is prohibited unless authorized by the Captain of the Port.

Dated: April 29, 1983.

D. C. O'Donovan,

Captain, U.S. Coast Guard, Captain of the Port, Hampton Roads, U.S. Coast Guard.

BILLING CODE 4910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[Docket No. AW035PA; A-3-FRL 2340-3]

Approval of Revision to the Pennsylvania State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice approves alternative emission reduction plans (bubbles) for boilers at three sources in Pennsylvania. These bubbles allow for more economical operation of the boilers with no degradation of air quality. The Pennsylvania Department of Environmental Resources (DER) requested the approval of these bubbles in a letter of June 8, 1982. These bubbles were proposed in a **Federal Register** notice of September 29, 1982 (47 FR 42760).

DATE: Effective on June 13, 1983.

ADDRESSES: Copies of the SIP revision are available for inspection during normal business hours at the following locations:

U.S. EPA, Air Programs and Energy Branch, 6th and Walnut Streets, Curtis Building, Philadelphia, PA 19106, ATTN: Raymond D. Chalmers (3AW11)

Pennsylvania Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, PA 17120, ATTN: Gary L. Triplett

Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, D.C. 20408

Public Information Reference Unit, EPA Library, Room 2922, U.S. Environmental Protection Agency, 401 M Street, SW., Washington D.C. 20460

FOR FURTHER INFORMATION CONTACT: Mr. Raymond D. Chalmers at the address listed for U.S. EPA above, or at (215) 597–8309.

SUPPLEMENTARY INFORMATION: DER held a public hearing on these bubbles on June 17, 1982. EPA proposed approval of these bubbles on September 29, 1982 (47 FR 42760) in a concurrent processing procedure. No significant changes were made and no comments were received which significantly affected the approvability of these bubbles.

The bubbles involve several boilers at each of three plants in Pennsylvania. At each plant, one or two boilers will burn natural gas to offset higher emissions of sulfur dioxide from the remaining boilers. No net increases in emissions will occur at any plant. In addition, the emission points are located close together and the emissions increases will occur at sources with equal or higher effective plume heights. Therefore, no modeling was required for any of these bubbles.

These bubbles are being approved for the Scott Paper Company in Chester, Pa., Arbogast and Bastian, Inc., in Allentown, Pa.; and J. H. Thompson, Inc., in Kennett Square, Pa. Details of each of these bubbles were noted in the **Federal Register** of September 29, 1982, proposing approval of these bubbles. For more information, see this notice.

EPA has reviewed these bubbles according to the proposed Emissions Trading Policy of April 7, 1982, 47 FR 15076, and is today approving these bubbles.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit court by July 11, 1983. This action may not be challenged later in proceedings to enforce its requirements. (See Sec. 307(b)(2)).

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Ch. 101

[FPMR Temp. Reg. G–47]

Use of Cash To Procure Emergency Passenger Transportation Services Costing More Than $100

AGENCY: Office of Plans, Programs, and Financial Management, General Services Administration.

ACTION: Temporary regulation.

SUMMARY: This regulation revises the Federal Property Management Regulations to grant agency heads or their designated representatives authority to approve emergency cash purchases of passenger transportation services exceeding $100 instead of using Standard Form 1169, U.S. Government Transportation Request (GTR). This revision will eliminate the requirement for agencies to request a written exemption from the Administrator of General Services for the emergency cash purchase of transportation services exceeding $100. Removing this restriction will reduce the administrative burden on Federal agency heads and GSA.

DATES:

Effective date: May 12, 1983.

Expiration date: May 13, 1983.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Claims Branch, Office of Transportation Audits (202–786–3014).

SUPPLEMENTARY INFORMATION: The General Services Administration has determined that this rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The General Services Administration has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

Background

A notice of proposed rulemaking was published in the **Federal Register** of March 30, 1982 (47 FR 13387), inviting comments from interested parties. The proposed rule transferred from GSA to Federal agencies authority to approve cash purchases of passenger transportation services exceeding $100. Subsequent to that notice, GSA has received increasing numbers of exemption requests involving not only cash purchases in excess of $100, but apparent violations of Government travel regulations. Some of these violations have been on a recurring basis. This leads us to believe that certain agencies may be abrogating their travel management responsibilities. It would not be prudent to entrust such agencies with the broad exception authority of this proposed rule. Accordingly, we have decided not to implement the proposed rule, but to adopt this temporary regulation which is of more limited scope. This temporary regulation permits agency heads or their designated representatives the flexibility to approve emergency cash purchases of passenger transportation services exceeding $100 but requires GSA approval for non-emergency situations. The temporary regulation also establishes procedures by which GSA may review and audit both emergency and non-emergency cash purchases of transportation exceeding $100.

(31 U.S.C. 3726; Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c))

In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter G to read as follows:

April 20, 1983.

Federal Property Management Regulations Temporary Regulation G–47

To: Heads of Federal agencies

Subject: Use of cash to procure emergency passenger transportation services costing more than $100

1. *Purpose.* This regulation revises the Federal Property Management Regulations to grant agency heads or their designated representatives the authority to approve emergency cash purchases of passenger transportation services costing more than $100 instead of using Standard Form 1169, U.S. Government Transportation Request (GTR).

2. *Effective date.* This regulation is effective upon publication in the **Federal Register.**

3. *Expiration date.* This regulation expires 2 years from date of publication in the **Federal Register.**

4. *Applicability.* This regulation applies to all Government agencies that are subject to the audit authority of GSA under 31 U.S.C. 3726.

5. *Background.* FPMR Amendment G–43, July 6, 1977, transmitted Part 101–41 to establish the policy and procedures governing the documentation and audit of payments for domestic and foreign freight and passenger transportation services furnished for the account of the United States. Section 101–41.203–2 of the regulation contains information pertaining to the use of cash to procure passenger transportation services. Normally, the GTR is used for the procurement of such services; however, agencies have the option of requiring travelers to use cash instead of GTR's where the passenger transportation services cost more than $10 but do not exceed $100 for each authorized trip. Cash may not be used for passenger transportation services that cost over $100 unless exempted in writing by the Administrator of General Services. This revision will eliminate the requirement for agencies to obtain a written exemption from GSA for emergency cash purchases of transportation.

6. *Revised policy.* Section 101–41.203–2 is revised to read as follows:

§ 101–41.203–2 Use of cash.

(a) Cash shall be used to procure all passenger transportation services costing $10 or less, exclusive of Federal transportation tax, and to pay air excess baggage charges of $15 of less for each leg of a trip, unless special circumstances justify the use of a GTR or GEBAT. Agencies have the option of requiring travelers to use cash to procure passenger transportation services from, to, or between points in the United States, including Alaska and Hawaii, and its possessions or trust territories, where such services cost more than $10 but do not exceed $100, exclusive of Federal transportation tax, for each trip authorized on an offical travel authorization. GTR's shall be used to procure all passenger transportation services costing in excess of $100 unless otherwise exempted in accordance with paragraph (b) or (c) of this section.

(b) Under emergency circumstances, where the use of GTR's is not possible, heads of agencies, or their designated representatives, may authorize travelers to exceed the $100 limitation when procuring passenger transportation services.

(1) Delegation of authority for authorizing and approving the use of cash in excess of $100 for the procurement of emergency

VOL 48 ISS 93 MAY 12 1983 UMI

transportation services shall be held to as high an administrative level as practicable to ensure adequate consideration and review of the circumstances. These delegations of authority shall be made in writing and copies retained to permit monitoring of the system. These records of delegations of authority shall be available for examination by GSA auditors.

(2) To justify the use of cash in excess of $100 instead of GTR's when procuring passenger transportation services, both the Government agency head, or his or her designated representative, and the traveler shall certify on the travel voucher the reasons for this use.

(3) Subsequent to traveler reimbursement, copies of travel authorizations, ticket coupons, and any ticket refund applications, or SF 1170's, Redemption of Unused Tickets, must be forwarded for audit to the General Services Administration (BWAA/C), Attention: Code E, Washington, D.C. 20405.

(4) Travel vouchers shall be maintained in the agency to be available for site audit by GSA auditors. General Records Schedule 9, Travel and Transportation Records (see § 101–11.404–2), provides instructions for the disposal of these travel vouchers.

(5) In the absence of written authorization or approval, travel shall be purchased in accordance with policies and procedures prescribed in applicable Government travel regulations. The traveler shall be responsible for all additional costs involved for this travel, such as the use of foreign-flag carriers, first-class travel, or more costly modes. The traveler should be aware that the use of a GTR may be required to obtain certain discount fares and to comply with the mandatory provisions of FPMR Temporary Regulations (A Series) governing the use of contract airline service between designated city-pairs. Cash shall not be used to circumvent the regulations governing airline city-air contracts.

(c) Under non-emergency circumstances, where use of a GTR is possible, heads of agencies, or their designated representatives, may request an exemption from the Administrator of General Services.

(1) Requests must be made in writing, may only be for individual travel itineraries, and must fully explain why an exemption should be granted. Simple traveler convenience will not be cause for GSA approval. For the purpose of performing a fare audit, requests must also include copies of travel authorizations, ticket coupons, and any ticket refund applications, or SF 1170's associated with the travel in question.

(2) Travelers may not be reimbursed for non-emergency use of cash to procure passenger transportation services costing more than $100 unless written approval is granted by GSA.

(d) Suspected travel management errors and/or misroutings which result in higher travel costs to the U.S. Government will be reported to the appropriate military or civil agency travel manager for corrective action with the violating agency.

(e) Agencies shall not impose a financial hardship on travelers by requiring their use of personal funds to purchase the services set forth in paragraph (a) of this section but shall provide the funds through travel advances.

(f) Travelers using cash to purchase individual passenger transportation services shall procure such services directly from carriers and shall account for those expenses on their travel vouchers, furnishing passenger coupons or other evidence as appropriate in support thereof. Moreover, travelers shall assign to the Government the right to recover any excess payments involving carriers' use of improper rates. That assignment is preprinted on the travel voucher and shall be initialed by the traveler.

(g) Travelers using cash to procure passenger transportation services shall be made aware of the provisions of § 101–41.209–4 concerning a carrier's liability for liquidated damages because of failure to provide confirmed reserved space. Also, travelers using cash shall adhere to the regulations of the General Accounting Office (4 CFR 52.2) regarding the use of U.S.-flag vessels and air carriers. (See § 101–41.203–1(b).)

Ray Kline,

Acting Administrator of General Services.

[FR Doc. 83–12730 Filed 5–11–83; 8:45 am]

BILLING CODE 6820–34–M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

41 CFR Part 51–4

Workshop Responsibilities

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped

ACTION: Final rule.

SUMMARY: The Committee amends its regulations (a) to require workshops to comply with the applicable compensation and employment standards prescribed by the Secretary of Labor and (b) to clarify the requirement that workshops must pay to their central nonprofit agencies the fee specified in § 51–3.5.

EFFECTIVE DATE: May 12, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher (703) 557–1145.

SUPPLEMENTARY INFORMATION: On February 15, 1983, the Committee published a proposed rule (48 FR 6728) to amend § 51–4.3 of 41 CFR 51–4. The background and reasons for the changes were described in the notice announcing the proposed rule.

One comment was received on the proposed rule indicating that it was an attempt to impose regulations retroactively. The commenter recommended a number of additional amendments in Parts 2 and 3 of the Committee's regulations. As indicated in the background discussion on the proposed rule relating to the payment of the central nonprofit agency fee, the purpose of the proposed change was to clarify the long-standing requirement that participating workshops must pay to their central nonprofit agencies the fee specified in § 51–3.5, and, therefore, the requirement to pay the fee already exists. The additional changes recommended by the commenter, while related to the subject of the central nonprofit agency fee, are not appropriate for consideration in connection with these proposed changes. They may be appropriate for consideration as separate actions at a later time.

Another commenter stated that the proposed change pertaining to the requirement for workshops to pay a central nonprofit agency fee was not a "clarification" but a new provision of the regulations. As indicated in the discussion on the proposed rule, the requirement regarding the payment of central nonprofit agency fees has been in effect for participating workshops since 1938.

A third commenter questioned the proposed changes on the basis that there are no statutory provisions in the Committee's Act (41 U.S.C. 46–48c) which specifically address compliance with employment and compensation standards or payment of central nonprofit agency fees. As indicated in the discussion of the proposed rule, workshops participating in the Committee's program are required by other statutes to meet the compensation and employment standards prescribed by the Secretary of Labor. Under the proposed rule, when the Department of Labor notifies the Committee that a workshop is not in compliance with the employment or compensation standards established by the Secretary of Labor, the Committee will have the authority to limit or withdraw that workshop's authorization to produce commodities or provide services under its Act. This change would preclude the incongruous situation of a workshop's being permitted to continue receiving benefits under the Committee's program while failing to comply with the standards prescribed by the Secretary of Labor regarding the pay or working conditions of its blind or other severely handicapped employees. The Committee's Act (41 U.S.C. 47(c)) requires the Committee to designate one or more central nonprofit agencies. The Act also authorizes the Committee to "make rules and regulations regarding * * * such matters as may be necessary to carry out the purpose" of the Act (41 U.S.C. 47(d)(1)). The change regarding payment of central nonprofit agency fees ensures the continued financial support the central nonprofit agencies require in order for them to carry out their functions as defined by statute and regulation. Both of the proposed changes are clearly necessary to carry out the purposes of the Act.

Two comments were received endorsing the changes and one inquiry was received regarding the Committee's role in enforcing compliance with compensation and employment standards set by the Secretary of Labor. The correspondent was informed that the Committee would not be involved in enforcing compensation and employment standards, since, by law, such enforcement is the responsibility of the Secretary of Labor.

I certify that this is not a major rule under Executive Order 12291 and would not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 41 CFR Part 51–4

Government procurement.

Accordingly 41 CFR Part 51–4 is amended as follows:

PART 51–4 —[AMENDED]

1. Section 51–4.3 is amended by revising (a)(5) and adding a new paragraph (a)(8) to read:

§ 51–4.3 Responsibilities.

(a) * * *

(5) Comply with the applicable compensation, employment, and occupational health and safety standards prescribed by the Secretary of Labor.

* * * * *

(8) Upon receipt of payment by the Government for commodities produced or services provided under the Act, pay to the central nonprofit agency the fee specified by § 51–3.5.

* * * * *

47 CFR Part 22

[Gen. Docket No. 80–183; RM–2365; RM–2750; RM–3047; RM–3068; FCC 83–146]

Allocation of Spectrum in 928/941 MHz Band and Establishment of Other Rules, Policies, and Procedures for One-Way Paging Stations in the Domestic Public Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has issued its *Memorandum Opinion and Order on Reconsideration* (Part 2), of its *Report and Order*, in General Docket 80–183, 89 FCC 2d 1337, 47 FR 24557 (1982), which allocated 3 MHz of spectrum for private and common carrier one-way paging stations. The non-network paging issues were resolved in the *Memorandum Opinion and Order on Reconsideration* (Part 1), FCC 82–503, released November 16, 1982. This Order adopts the rules and policies for the implementation of network paging in the 900 MHz band. On reconsideration, the Commission has allocated all three frequencies for nationwide paging and it has adopted a two-step regulatory process in which one carrier or group of carriers will be licensed on each network frequency with the responsibility for organizing the network and then local carriers can affiliate with a network organizer by adhering to its proposal. In addition, the Commission has preempted state authority over technical standards, entry, and rate regulations for the three network frequencies.

EFFECTIVE DATE: June 13, 1983.

Communications common carriers, Mobile radio service.

Memorandum Opinion and Order on Reconsideration (Part 2)

In the matter of amendment of Parts 2 and 22 of the Commission's rules to allocate spectrum in the 928–941 MHz band and to establish other rules, policies, and procedures for one-way paging stations in the Domestic Public Land Mobile Radio Service; General Docket No. 80–183; RM–2365, RM–2750, RM–3047, RM–3068.

Adopted April 7, 1983.
Released: May 4, 1983.

By the Commission. Commissioner Jones concurring in the result; Commissioner Fogarty absent.

I. Preliminary Statement

1. We have before us informal comments and four petitions for reconsideration [1] of our *First Report and Order* (the *Order*) in General Docket 80–183, allocating three MHz of spectrum from 929 to 932 MHz for private radio and common carrier one-way paging systems.[2]

2. On November 16, 1982, we released a *Memorandum Opinion and Order on Reconsideration (Part 1)*, FCC 82–503, resolving issues pertaining to the local, non-network frequencies and deferring reconsideration of network (regional or nationwide) issues to a subsequent Order. With respect to the non-network frequencies, we affirmed the requirement of need showings for existing carriers requesting an additional paging frequency, and we adopted a fixed forty-mile separation criterion for purposes of determining whether an applicant is entitled to an initial or additional paging frequency without demonstrating need. We also waived the submissions of topographic maps and profile graphs with 900 MHz paging applications.

3. We now address issues which pertain to the network frequencies. All four petitioners request that we change the network policies and procedures adopted in the *First Report and Order*. Page America and UTS also request that we preempt state authority over

[1] Petitions were filed by Telocator Network of America (Telocator); Mobile Communications Corporation of America (MOCA); Page America Communications, Inc. (Page America); and Beep-Beep Page, Inc. (Beep-Beep Page). Informal comments were filed by American Telephone and Telegraph Company (AT&T) and United Telephone System, Inc. (UTS).

[2] 89 FCC 2d 1337.

VOL 48 ISS 93 MY 12 1983 UMI

technical, entry, exit and rate regulations for the three network frequencies. We agree with the petitioners that certain changes are necessary and will better serve the public interest. Therefore, as discussed below, we have decided to alter the regulatory framework for network paging and preempt state authority for the three network frequencies.

II. Background

A. Current Network Paging Policy and Procedures

4. In our *First Report and Order*, we allocated three frequencies for common carriers to use to provide inter-city network paging.[3] An inter-city network paging system would enable a subscriber to receive pages when outside his local service area. If the subscriber travels to an area that is part of an inter-city system, he could be paged through the radio common carrier (RCC) or wireline carrier in that area.

5. Of the three network frequencies, one was restricted to nationwide use and the other two were designated for either nationwide and/or regional paging. Extended cut-off procedures (six months from public notice of the first filing on a channel) were adopted for all three channels, with a single date applicable to the nationwide-channel and different dates applicable for each region on the regional channels.

6. In addition, because of the limited frequencies devoted to network paging, we decided to require network licensees to share these frequencies instead of licensing only one applicant on a frequency. In an effort to encourage sharing agreements, we determined that applicants must reach unanimous agreement as to the method of interference-free use and technical operation of the frequencies within one year, or all applications would be rejected and those applicants would be barred from reapplying for those frequencies for one year. We also decided to prohibit local paging on the network frequencies. However, if after a three-year period the non-network frequencies were exhausted, any nonassigned network frequencies could be applied for and use for local paging.

B. Pleadings

7. The petitioners request numerous changes in the regulatory framework for network paging. MCCA and Telocator argue that all three frequencies should be designated for nationwide use, since a nationwide network has the capacity to service both nationwide and regional demand. Telocator and MCCA claim that under our present allocation, the Commission will simultaneously receive both regional and nationwide applications for each frequency. They argue that this will create severe practical and regulatory problems and will only complicate the applicants' task of reaching unanimous agreement as to interference-free sharing of the frequencies. Moreover, MCCA asserts that with the Commission's recent lowband frequency allocations, licensees have already assembled many regional paging systems and do not need frequencies exclusively for that purpose.

8. All four petitioners reject the unanimity concept as unrealistic and unworkable. They argue that it is unrealistic to assume that applicants will voluntarily resolve the complex technical, financial and managerial problems associated with network paging. MCCA, Telocator and Page America emphasize the distinctions between licensing considerations and the technical decisions involving signaling format and network protocol. They argue that it is unreasonable to expect applicants with differing goals and interests to agree unanimously to all aspects of network paging operation. Moreover, the petitioners claim that the unanimity requirement will encourage obstructionists or applicants wishing to obtain unwarranted concessions from those seriously interested in providing network paging to the public.

9. Telocator and MCCA also object to the cut-off procedures adopted in the *First Report and Order*. They argue that the 180 day cut-off period gives applicants who are seriously interested in providing network paging a short period to prepare applications, while "me too" applicants or obstructionists are given twice as long to prepare mutually exclusive applications. Further, MCCA claims that the cut-off procedures will result in smaller cities receiving network service on a much delayed schedule because time and economics will force applicants to first file applications for network paging authority in major markets. Thus, applicants who fail to file for the smaller cities and towns initially will be precluded from doing so for the entire year that the applicants negotiate organization of the network.

10. Further, MCCA and Page America assert that the cut-off period coupled with a three year reversion for local paging will be the death knell of network paging. MCCA claims that at least one year-and-a-half will be required to complete one cycle of network paging applications: 180-day cut-off period, followed by one year of negotiation. Since MCCA believes that network paging will be provided first to major markets and will progressively spread to smaller communities, it is concerned that it might take two cycles, or more than three years, for smaller communities to obtain network paging. Therefore, since petitioners believe that allowing local paging on network frequencies would frustrate this service, they are concerned that smaller communities might never obtain nationwide paging.

11. All four petitioners propose alternative regulatory schemes for the network frequencies. Beep-Beep Page, Inc. suggests that we adopt a plurality proposal similar to that implemented in Docket 21039, 77 FCC 2d 212, 215 (1980).[4] Page America suggests a two level approach. It claims that on one level the local licensees of nationwide paging frequencies should agree upon a method of coordinating interference-free sharing of the frequencies, and on a second level agreement should be reached among the managers of the network services.[5] It proposes that we issue construction permits to qualified applicants soon after the cut-off date and condition the permits on the establishment of a frequency sharing plan. With respect to the network managers, Page America suggests that we not require them to cooperate with one another, or file any applications with the Commission since the network plan will be included with the affiliate's applications. It also recommends that the carriers licensed on the nationwide paging frequency be allowed to affiliate with more than one manager.

12. Telocator recommends a "hybrid" form of rulemaking. It suggests that all applicants desiring to operate inter-city networks submit applications pursuant to Section 214 of the Act,[6] containing

[3] The three common carrier frequencies allocated for network paging service are 931.8875, 931.9125 and 931.9325 MHz. *See* revised 47 CFR 22.501(p)(1), in Appendix A of this Order.

[4] Under a plurality plan, if unanimous agreement as to technical coordination is not reached by a certain deadline, the plan supported by the largest group of applicants that reach an agreement would be placed on public notice and opened to comments. Subsequently, the Commission can adopt the plurality plan if it is found to be reasonable and non-discriminatory. All pending applications could then be amended to comply with the accepted form of technical coordination.

[5] Page America's proposal is vague. It does not explain who the "Managers" are, or what they should agree to and why.

[6] Although AT&T concurs with Telocator's hybrid rulemaking approach, it states that Section 214 applications are not necessary because the radio license granted under Title III of the Communications Act carries with it Section 214 authority if the lines constructed and operated are the same as those that would be the subject of a Section 214 application. Communications Satellite Corp., 20 FCC 2d 405, 411 (1969); Domestic Fixed Satellite Transponder Sales, 88 FCC 2d 1419, 1424 (1982).

information including applicant's legal, technical and financial qualifications; its sharing concept; its ability to initially serve 30 metropolitan areas and expand nationwide; and its ability to accommodate both nationwide and regional service on one frequency. The Commission would then issue a public notice listing qualified applicants. The public notice would trigger 30-day periods for comments and reply comments, which would culminate in the Commission's adoption of rules and policies for initiation of inter-city service and licensing of network stations. Telocator states further, that if a negotiated settlement is not reached for operating on the three network channels, the Commission should select the plurality proposal which best serves the public interest, convenience and necessity.

13. MCCA proposes a two-step regulatory process, in which the problem of organizing each channel is solved initially and then the processing of applications for individual stations becomes routine. MCCA suggests that we distinguish between two types of network paging entities, the network organizer and the network operator. The network organizer for each channel would be an RCC or affiliated group of RCC's and would be responsible for defining the signaling format and network protocol for its channel. On the other hand, the network operator would be licensed on one of the three network channels, would interconnect with the existing network and would conform its application to the technical standards established by the network organizer.

14. In the first step, MCCA proposes that the Commission accept applications on a date certain, 90 days after adoption of the Reconsideration Order, only from applicants seeking to organize a network channel. MCCA details the information which should be included in the application. This list is similar to the information requested by Telocator in its proposal; however, it also includes the mode of operation for the network channel, types of service offered, signaling format and network interconnection scheme, and the method by which the applicant would provide open and nondiscriminatory access to the network. MCCA further suggests that if fewer than three network applications are filed, the excess channels could either revert to local use or be held in reserve. If more than three network applications are filed, and if the applicants are unable to align themselves into three groups, MCCA proposes that we conduct written hearings to select the three superior proposals. Further, approximately ninety days after selection of the three network organizers, the Commission should accept applications for the local network paging stations. Each local applicant would be free to select the network with which it wishes to affiliate.

III. Discussion

15. We have decided to modify our network paging rules with respect to the channel designations and licensing policies and procedures. When we adopted the network policies in our *First Report and Order*, we were aware of the demand for inter-city paging, but we were unpersuaded by the proposals before us. The petitioners have outlined network proposals which differ significantly from the plan adopted in our *First Report and Order*. Moreover, two groups of experienced carriers have publicly announced proposals to establish nationwide paging systems significantly different from what was contemplated at the time of the *First Report and Order*.[7] Based upon the proposals now before us, we find that certain revisions to the regulatory framework will result in less burdensome procedures, and will lead to the establishment of more economic and efficient network paging systems. We turn first to channel designations and licensing policies, and then to application and authorization procedures.

A. Channel Designations and Licensing Policies

16. We agree with Telocator and MCCA that all three frequencies should be designated as nationwide channels.[8] In the *First Report and Order* we designated two of the three channels for nationwide or regional use in the belief that we would thereby "offer users a greater choice of service." We also expressed the view that many potential users might desire service just within a particular geographic region, such as Washington/Baltimore, rather than between regions or nationwide. However, after reviewing the petitions for reconsideration, we are persuaded that regional service can be provided on the nationwide networks and that separate regional systems on two of the channels will result in less efficient use of the spectrum and will engender difficult licensing and frequency coordination problems.

17. The regional systems we envisioned were modest expansions of the wide-area systems in existence today throughout the Northeast Corridor and other parts of the country. It is quite possible to construct a new regional system by interconnecting transmitters on a single frequency in the newly allocated 35, 43 or 900 MHz channels. In fact, a number of the hundreds of applicants for the lowband and 900 MHz channels have proposed exactly that. Our substantive requirements for network applicants, discussed below, assure that regional paging will be available to augment existing wide area service on local paging channels. Therefore, we find no need to set aside channels specifically for regional paging on the ground that such demand as may exist can readily be satisfied by both wide-area and network systems.

18. A second major change we will adopt is MCCA's proposal to license the three network channels to three common carrier "network organizers" whose services will be distributed through local "network operators" in each community. The "network organizer" will be a common carrier or group of common carriers who will organize the network, *i.e.*, determine among other things, the mode of operation, signaling format, interconnection and interference-free sharing schemes, and who will be licensed by the Commission. The "network operator" will be a local common carrier who agrees to coordinate with the technical parameters of a network organizer, and who will provide network services to its subscribers.

[7] One group consists of MCI Communications, Metromedia, Communications Industries and American Express. They propose to offer "national electronic message delivery service," primarily over MCI's long distance network and the local distribution facilities of the partners. The other group consists of MCCA and National Public Radio (NPR), which would use excess capacity in NPR's earth stations and satellite transponders for intercity distribution, with local distribution handled by any local paging company that wished to join the network. Our mention of these proposals in no way indicates our approval of them. No action has or will be taken on these proposals until they are submitted in conjunction with the procedures articulated in this Order.

[8] Local paging was prohibited on the three network frequencies in the *First Report and Order*, at para. 29. None of the petitioners requested that we allow local paging on the network frequencies and we continue to believe that local use of these frequencies could stifle their development for network use at least in the initial period of development. *But see* para. 25, *infra*. Nevertheless, once the network frequencies are licensed and in operation, economic or operational efficiency may militate in favor of loosening the absolute prohibition against local service. We will entertain requests from the three network licensees to provide local paging as long as it can be offered without displacing or otherwise reducing the quality of service to nationwide customers.

19. We believe, based on the information before us at this time, that this "carrier's carrier" approach is the easiest and most effective way to implement network paging. Unlike the plan adopted in our *First Report and Order* or the proposal submitted by Telocator, Page America and Beep-Beep Page, MCCA's plan no longer relies on interference-free sharing arrangements among potential competitors (whether by unanimity or plurality agreement) as prerequisites to network implementation. This eliminates the complicated and time-consuming cut-off procedures and negotiation periods associated with sharing arrangements. One licensee will be responsible for organizing each network and detailing the legal and financial arrangements and technical parameters of the system. We are hopeful that licensing three separate network organizers—as opposed to requiring sharing among all or a plurality of applicants—will foster technically diverse, competitive networks to the benefit of the public.

20. Under this structure, we tentatively find that the "network operators" should be afforded open and nondiscriminatory access to the network paging systems. In essence, there will be three intercity network systems whose services will be retailed through local outlets. Under our previous plan, the issue of nondiscriminatory access was insignificant because anyone who wanted to participate in nationwide service had an opportunity to share a frequency. Now that we will choose only three network licensees from a potentially large number of mutually exclusive applicants, there appears to be justification for ensuring the right of local operators to feed traffic into the networks and to participate in the distribution of traffic originating outside their service areas to the extent that it is technically feasible. If we do not, the network organizers will theoretically be able to select individual local operators, to exclude all local participants except those already affiliated with the network organizers, or to give their affiliates and subsidiaries favored treatment. We tentatively find that ceding such comprehensive control over local operation to the three organizers would not be in the public interest.

21. On the other hand, affording local carriers open and nondiscriminatory access, provided they agree to abide by the network organizer's technical specifications, will encourage competition at the local level and will increase the diversity of user choices. We also foresee benefits to paging subscribers in smaller cities and towns who will be able to obtain access to a network through a local paging company which might not otherwise have chosen to participate in the network under our previous plan for sharing. In sum, we believe the plan advanced by MCCA, with some modifications, is preferable to any other plan we have considered in terms of expediting service to the public, fostering competition in the provision of network services, and reducing the administrative burdens on the applicants and the Commission.

22. Our network licensing policies are only tentative at this time because we want to solicit further comment on the nondiscriminatory access feature in our companion Further Notice of Proposed Rulemaking. There may be significant operational or economic reasons, of which we are not now aware, militating against the nondiscriminatory access requirement. It may also be that nondiscriminatory access is not necessary to assure a competitive environment for nationwide paging because substitutable services will be available to consumers. These substitutes could influence the three network licensees to offer and price their services competitively in the absence of nondiscriminatory access, which is, after all, nothing more than unrestricted resale of network service. We do not, however, want to delay the licensing process while we continue to consider the access question. Accordingly, applicants should prepare their applications based on the assumption that the policies stated here will become final. Should we later decide not to require nondiscriminatory access, we will allow those who have filed timely applications an opportunity to amend. No new applications will be accepted after the cut-off date established here regardless of our disposition of the issues in the Further Notice.

B. How the System Works

23. As presently conceived, nationwide paging works fairly simply. The nationwide subscriber has a telephone number assigned to him in his home area by the local carrier (network operator) from whom he takes service. When he travels, he leaves the number with persons who need to reach him, for example, his employer. The employer initiates the page by dialing the local number. The network operator recognizes the number as a nationwide paging number and sends it through terrestrial facilities to the network licensee (network organizer) at the network control center. At that point the signal is routed over the network to terminal points in every city in which the network organizer operates. (The page can also be sent to selected cities, depending upon the configuration of the network.) From there, the page is transmitted over terrestrial links to the transmitters of participating network operators and then over the air to the subscriber's paging receiver. Because nationwide and local paging do not share the same frequency, the subscriber initially has to have two pagers for local and network service. However, dual frequency pagers are now under development and should soon obviate the need for two pagers.

C. Application and Authorization Procedures

24. To effectuate the revised plan for network paging, we will adopt MCCA's two-step process, with some minor modifications. First, we will accept applications from, and license, the common carrier network organizers as set forth below. The organizers will control the use of the frequencies and will have all the rights and responsibilities under the Act and the Commission's Rules associated with such control. Second, we will accept abbreviated applications from, and authorize, the local paging companies who have chosen to participate in a network. These companies will have no right to use the frequency other than in the manner specified by the organizer. As explained below, the application form for local operators will be abbreviated, and only a minimum amount of technical information will be required.[9]

25. Those seeking to organize a network must submit their applications no later than 90 days after publication of this Order in the **Federal Register**. At the close of the 90 day period, we will review the applications to determine their acceptability for filing, and we will then issue a Public Notice announcing any mutually exclusive applications and beginning the thirty day pleading period.[10] If fewer than three applications are received, we will hold the remaining channels in reserve to revert to local use if they are not used for network paging within three years as provided in the *First Report and Order*. If more than three applications are received, as expected, and if the applicants do not align themselves into three groups under the procedures in Section 22.29 of the

[9] *See* para. 25, *infra*.

[10] Applicants should *not* designate a specific channel in their applications. All applications filed for the three network channels will be deemed mutually exclusive because we consider the channels to be fungible. *Contrast* Digital Electronic Message Service, 88 FCC 2d 1716 (1982).

Rules, the three licensees will be selected by whatever comparative selection process is in effect at the time.[11]

26. Because only three network licenses are available, we agree with MCCA that the network organizers ought to submit something more than bare-bones applications on Form 401.[12] These networks are likely to be complex and expensive to organize and construct, so it is important for us to examine financial and technical ability in evaluating the applications. Furthermore, to insure that the networks are truly nationwide in scope, we find that there should be a minimum number of communities served from the initiation of service. Telecator suggested 30 cities, but we believe that may be too many considering this is a new service with which no one has any experience. We find instead that it is reasonable to require each applicant initially to propose to serve at least fifteen metropolitan areas of its choice, and to submit its plans demonstrating how it will expand service nationwide [13] within two years of the start of service. We will define "metropolitan areas" as the Standard Metropolitan Statistical Areas (SMSAs) listed in the U.S. Department of Commerce's Statistical Abstract of the United States—1981 (102 Ed.) at pp. 920–925. We do not anticipate updating this SMSA list or accepting markets from any other source.[14] The following is a summary of the information that must be filed as part of the application:

(a) The applicant's projected costs of organizing and constructing the network and its technical and financial ability to start up and operate the network;

(b) The proposed mode of operation and technical plan for implementing the network channel, including but not limited to the types of services offered, signaling format and network interconnection plan; [15]

(c) The method and extent to which the proposed network would provide for interference-free operation on the channel in each local area;

(d) The method by which the applicant would provide open and nondiscriminatory access to its network;

(e) The initial service proposal for at least fifteen Standard Metropolitan statistical Areas;

(f) The applicant's plans for expanding network service from its initial markets to nationwide coverage within two years from the initiation of service;

(g) A model tariff showing, among other things, how it intends to provide nondiscriminatory access to network operators; [16] and

(h) How the public interest, convenience and necessity would be served by a grant of the particular application.

27. The second stage of processing will be the licensing of the local operators on the network organizer's frequencies. Immediately after selection of the network organizers, we will begin taking applications from the local participants, the network operators.[17] We contemplate issuing a Public Notice formally establishing the opening application date; there will be no cut-off date because there is no mutual exclusivity. This licensing requirement is only necessary to insure compliance with our technical rules for transmitters and antenna structures. Accordingly, from carriers who already hold FCC licenses for paging or two-way mobile service, we will require only that pages 1 through 3 and the signature on page 6 of the Form 401 be submitted. These applicants may also omit answers to items 12, 13, 14, 15, 24, 25, 27, and 28, unless answers are needed to correct out-of-date information on file with the Commission. However, new entrants must complete the entire form to enable us to assess all of their qualifications to be Commission Licensees. One additional requirement for all applicants will be a statement on the Form 401, asserting their willingness to comply with the network organizer's technical specifications. We anticipate that this type of *pro forma* licensing will speed service to the public with a minimum of paperwork for the Commission and the applicants.[18]

D. Federal Preemption

28. In our *First Report and Order*, we decided not to preempt state authority for the 900 MHz frequencies. We concluded that since paging systems are basically local in nature, the states should not be preempted form decisions concerning entry, technical and rate regulations for paging common carriers.

29. In their petitions, Page America and UTS urge the Commission to preempt state authority with respect to entry, technical, and rate regulation for the three network frequencies.[19] Page America argues that by prohibiting local service on these frequencies we have created a new interstate communications service, and the states should be prohibited from regulating the operations on these three frequencies. It claims that without federal preemption, the development of an effective and feasible nationwide paging service will be delayed and its growth may be prevented. We believe Page America and UTS have raised valid concerns.

30. Federal preemption may occur in two instances. First, Congress may either expressly order preemption in a statute or implicity command preemption by the statute's structure and purpose. Second, valid federal regulation may preempt state law or regulation whenever the state action creates an obstacle to the implementation of the purpose of the federal regulation. *Fidelity Federal Saving and Loan Association v. de la Cuesta*, ——U.S. ——, 73 L.ED. 2d 664, 675 (1982). *See also, Florida Lime and Avocado Growers, Inc. v. Paul*, 373 U.S. 132, 141 (1963), *Hines v. Davidowitz*, 312 U.S. 52, 67 (1941). The second situation exists in this proceeding. We have created a new nationwide communications service pursuant to our statutory authority. Because state regulation over the technical standards,

[11] We do not rule out random selection at this time; however, we anticipate receiving disparate proposals, which may militate in favor of traditional or modified comparative procedures.

[12] It is not necessary for applicants to demonstrate need for network service because we found such need when we allocated three channels in our *First Report and Order*.

[13] By "nationwide" we do not mean literally everywhere in the country. We leave it to the applicants to forecast demand for service; however, we anticipate that the scope of the network service proposed by each applicant could be a comparative criterion in awarding licenses.

[14] There are no minimum coverage areas or any similar requirements as there are in the cellular radio rules, 47 CFR § 22.901 *et seq*. Applicants need only propose at least one nationwide transmit/receive point within their chosen SMSAs.

[15] As part of the proposal, each applicant is expected to describe how it will achieve efficient use of its channel.

[16] Our approach to rate regulation is still under consideration. *See* paras. 29 and 30, *infra*. Consequently, applicants may not be able to formulate comprehensive tariff proposals by the filing deadline. We will accept model tariffs after the filing deadline as amendments to applications if we have not decided upon the method of rate regulations before then.

[17] Since our ultimate decision on access requirements will affect the licensing of local operators, we will not accept stage two applications until that question is resolved. However, if we retain the open access requirement, the network operator would be free to affiliate with any or all of the network organizers licensed, as long as it agrees to adhere to the specifics of each carrier's network paging proposal. Furthermore, there would be no requirement's as to the number of markets an individual operator may serve.

[18] These applications will be granted without a formal comparative hearing pursuant to § 22.32(b) because the applications are not mutually exclusive, nor subject to comparative consideration. The accepted applications will be listed in an informative public notice and will be subject to petitions to deny under Section 22.30 of the rules.

[19] The method and extent of our rate regulation is discussed in an accompanying Further Notice of Proposed Rulemaking. This Notice requests comments on various tariff procedures for both the network organizers and operators.

VOL

1983

entry, and rate regulation could seriously impede the development of this service, we believe such state regulation must give way to the paramount federal interest.

31. This new nationwide paging service is being authorized pursuant to both Title III and Title II of the Communications Act of 1934, as amended. Under Title III of the Act, the Commission has broad authority to regulate all communications by radio. That authority includes the power to "classify radio stations," to "prescribe the nature of the service to be provided by each class of licensed stations," to "study new uses for radio," and to "encourage the larger and more effective use of radio in the public interest." 47 U.S.C. 303 (a), (b), and (g). Furthermore, Section 301 of the Act explicity grants this Commission sole authority to license radio facilities.[20] Under Title II of the Act, the Commission has broad authority to regulate interstate common carriers, whether or not they use radio facilities. Pursuant to Title II, the Commission regulates: (1) Entry into and exit from interstate service, (2) rates and regulations governing the offering of interstate service, and (3) interconnection between carriers for the provision of joint or "through" interstate service. 47 U.S.C. 201–105, 214. The courts have recognized a broad discretion in the Commission with respect to the manner in which it exercises its Title II powers to achieve statutory objectives.[21] Of course, the Commission's Title II authority over interstate common carriers does not extend so far as to extinguish legitimate state regulation of purely intrastate common carrier communications. 47 U.S.C. 152(b).[22] The Commission's authority over interstate common carriage, however, is comprehensive and does extend to facilities and services that might be located wholly within a single state if those facilities and services are essential or integral parts of interstate communications.[23]

32. In accordance with this statutory authority, we are creating the subject nationwide paging service. Because paging services have historically been local in nature, the states have traditionally regulated paging common carriers. Network paging, however, will be predominantly an interstate service, which may also address intrastate demands. In an effort to assure nationwide service, we have imposed two significant requirements upon any entity proposing to offer nationwide service. First, we have initially prohibited local paging on these frequencies. Although network organizers will be permitted to request permission to offer local paging on a secondary basis, such service offerings will not be the ordinary situation and will not be permitted to displace natiowide service. Second, and possibly more important, we are requiring that the three network licensees demonstrate the capability both to serve 15 SMSAs initially and to expand paging service nationwide within two years. Furthermore, in an effort to increase competition in this new market, we are tentatively requiring that the network operators be afforded open and nondiscriminate access to any or all nationwide channels. Regardless of whether that requirement is retained, it is essential to the interstate development of nationwide paging that the network organizer and its operators be afforded access to all cities and states it desires to serve. To achieve the rapid implementation of nationwide service and these policy objectives, we believe our regulation of the service must preempt state regulation with respect to entry, technical standards, and rate regulation for the three network frequencies.[24]

33. Preemption of state entry regulation is necessary for several reasons. Initially, as noted above, access for paging operators to every city and state is crucial to our network scheme. If the states restrict entry, implementation of this service will be frustrated. Depending upon how the network is organized, full nationwide coverage might be thwarted if carriers in particular cities are denied entry. State entry regulation also could delay the implementation of this new service as well as increase the carrier's expense of providing it. We realize that because this service has some intrastate characteristics the states may have an interest in how it is provided. The states, like other interested parties, may raise their concerns with this Commission whenever these entities apply for licenses.

34. We are also asserting federal primacy over technical standards for the network paging service. Nationwide operators will be required to comply with the technical parameter specified by the network organizer, including but not limited to the mode of operation, signaling format, network interconnection and method of interference free sharing. The assurance of compatible operation of equipment on an interstate and nationwide basis for the three frequencies is essential to the success of this service. State licensing requirements could add additional and possibly conflicting network technical specifications that would defeat the nationwide plan.

35. Finally, our action cannot coexist with state rate regulations of the three network organizers. The nationwide systems can be used for both interstate and intrastate communications.[25] Although the states generally regulate intrastate communications, they must stand aside when, as here, it is technically and practicably impossible to separate the two types of communications for tariff purposes.[26] Furthermore, we have issued an accompanying Further Notice of Proposed Rulemaking which solicits comments on the extent and method of rate regulation for the network operators. The scope of any preemption vis-a-vis the network operators' rates will be resolved in that proceeding.

36. We note that our preemption of state regulation in this instance is consistent with precedent. The preemptive effect of valid Commission actions over state regulation when it could interfere with interstate communications has consistently been recognized by the Courts. *Orth-Vision*, 69 FCC 2d 657 (1978), *aff'd sub nom.*

[20] In particular, Section 301 provides that "no person shall use or operate any apparatus for the transmission of energy or communications or signals by radio . . . except under and in accordance with this Act and with a license on that behalf granted under the provisions of the Act." 47 U.S.C. § 301.

[21] *E.g.*, AT&T v. FCC, 572 F.2d 17 (2d Cir.), *cert. denied*, 439 U.S. 878 (1978); Philadelphia Television Broadcasting Co. v. FCC, 359 F.2d 282 (D.C. Cir. 1966); *Cf.* Computer & Communications Industry Association v. FCC, 693 F.2d 198 (D.C. Cir. 1982), *petitions for cert. filed* (U.S. February 9 and 10 1983) (Nos. 82–1331, and 82–1352); Telocator Network of America . FCC, 691 F.2d 525 (D.C. Cir. 1982). Additionally Section 221(b) reserves to the states jurisdiction over telephone exchanges which serve single multi-state areas. North Carolina Utilities Commission v. FCC *supra* at 1045.

[22] *See* National Association of Regulatory Utility Commissioners v. FCC, 533 F.2d 601 (D.C. Cir. 1976) (NARUC II) (Opinion of Wilkey, J.).

[23] Computer & Communications Industry Association v. FCC, *supra*; People of California v. FCC, 567 F.2d 84 (D.C. Cir. 1977), *cert. denied*, 434 U.S. 1010 (1978); Puerto Rico Telephone Co. v. FCC, 553 F.2d 694 (1st Cir. 1977); North Carolina Utility Commission v. FCC, 552 F.2d 1036 (4th Cir.), *cert. denied*, 434 U.S. 874 (1977) (NCUC II). *See also* New York Telephone Co. v. FCC, 631 F.2d 1069 (2d Cir. 1980); General Telephone Co. of the Southwest v. FCC, 449 F.2d 846 (5th Cir. 1971).

[24] *See* n. 18 *supra*.

[25] For example, a nationwide system can be used to communicate intrastate from San Francisco to Los Angeles, as readily as it can be used interstate from San Francisco to New York.

[26] *See* Computer & Communications Industry Association v. FCC, *supra* at 215; North Carolina Utility Commission v. FCC, 537 F. 2d 787 (4th Cir.), *cert. denied*, 429 U.S. 1027 (1976); North Carolina Utility Commission v. FCC, 552 F. 2d (4th Cir.), *cert. denied*, 434 U.S. 874 (1977).

New York State Commission on Cable Television v. FCC & USA, 669 F. 2d 58 (2d Cir. 1982); *Telerent Leasing Corp.*, 45 FCC 2d 204 (1974), *aff'd sub nom. North Carolina Utilities Commission v. FCC*, 537 F. 2d 787 (4th Cir.) *cert. denied*, 429 U.S. 1027 (1976). Further it is well established that the Commission may assert jurisdiction over facilities that are wholly within a single state if local services cannot be easily and practicably separated from interstate services supplied through the same facilities. *People of State of California v. FCC*, 567 F. 2d 84 (D.C. Cir. 1976), *cert denied*, 434 U.S. 1010 (1978); *North Carolina Utilities Commission v. FCC*, 552 F. 2d 1036 (4th Cir.) *cert. denied*, 434 U.S. 874 (1977).

37. In conclusion, we find that federal preemption in this case is necessary if our policies are to succeed. State regulation could impede the development and provision of this new, innovative, and primarily interstate telecommunications service.

E. Other Matters

38. In the *Memorandum Opinion and Order on Reconsideration (Part 1)*, we waived the submissions of § 22.15(j)(8) topographic maps and § 22.115 profile graphs, and we added the requirement that maps on a scale of 1:250,000 be submitted. For the sake of clarity, we have rewritten the applicable rules to reflect these changes. *See* Appendix A.

IV. Conclusion

39. This is the first time that common carrier frequencies have been devoted exclusively to nationwide inter-city paging systems. We decided to reject the burdensome and time-consuming extended cut-off procedures and unanimity sharing agreements adopted in the *First Report and Order*. We also reject the complex licensing and coordination problems associated with authorizing separate regional and nationwide networks. One network organizer will be licensed on each frequency. This licensee will have thoroughly devised a method for technical interconnection and interference-free coordination among carriers. Then any local common carrier who wishes to provide network services will be authorized to affiliate with one or more network organizers by adhering to the licensee's proposal. We believe that this two-step regulatory process is workable and will promote the Commission's goals of competition and diversification. We are confident that it will implement nationwide paging in the most efficient and expeditious manner possible

V. Ordering Clauses

40. Accordingly, it is ordered, that the petitions for reconsideration are granted to the extent set forth herein, and are otherwise denied.

41. It is further ordered, that pursuant to the authority found in Section 154(i), 301 and 303(r) of the Communications Act of 1934, as amended, Part 22 of the Commission's Rules and Regulations are amended as specified in Appendix A. These amendments shall become effective June 13, 1983.

42. It is further ordered, that applications by the applicants desiring to organize a network frequency will be accepted 90 days after this Order is published in the **Federal Register.**

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

PART 22—[AMENDED]

47 CFR Part 22 is amended as follows:

1. 47 CFR 22.501(p) (1) and (2) are revised to read as follows:

§ 22.501 Frequencies.

* * * * *

(p)(1) For assignment to based stations of communication common carriers for use exclusively in providing a one-way signaling service (center frequency of 25 khz band).

931.0125 MHz	931.5125 MHz
931.0375 MHz	931.5375 MHz
931.0625 MHz	931.5625 MHz
931.0875 MHz	931.5875 MHz
931.1125 MHz	931.6125 MHz
931.1375 MHz	931.6375 MHz
931.1625 MHz	931.6625 MHz
931.1875 MHz	931.6875 MHz
931.2125 MHz	931.7125 MHz
931.2375 MHz	931.7375 MHz
931.2625 MHz	931.7625 MHz
931.2875 MHz	931.7875 MHz
931.3125 MHz	931.8125 MHz
931.3375 MHz	931.8375 MHz
931.3625 MHz	931.8625 MHz
931.3875 MHz	931.8875 MHz [1]
931.4125 MHz	931.9125 MHz [1]
931.4375 MHz	931.9375 MHz [1]
931.4625 MHz	931.9625 MHz [1]
931.4875 MHz	931.9875 MHz

[1] Reserved for stations engaged in providing nationwide network paging service; as provided for in § 22.527.

(2) Specification of frequency in application. (i) *Non-network:* An applicant for a new, non-network frequency in the band 929–932 MHz will not specify a frequency in its appplication. It may specify its non-network frequency preference, but the Commission is not bound by such requests. (ii) *Network:* An applicant wishing to organize a network frequency will not specify a frequency preference in its application but must make the showings required by § 22.527. The subsequent applications filed by the affiliating, local common carriers should specify the specific network channel it desires.

2. Part 22 is amended by adding new § 22.527 to read as follows:

§ 22.527 Channel assignment policies for 900 MHz one-way signaling channels reserved for stations engaged in providing network signaling service.

(a) An applicant wishing to organize a network signaling channel should not specify a particular channel in its application.

(b) The applicant shall submit to the Commission copies of agreements, if any, and system diagrams and plans illustrating how applicant proposes to utilize the desired network signaling channel. Applications filed pursuant to this paragraph must contain at a minimum the following:

(1) Technical standards describing the types of one-way communications to be provided, the signaling format under which individual receivers may be selectively signaled, and the network protocol under which all stations licensed or subsequently licensed on the desired network signaling channel may be connected or interconnected for the purposes of exchanging or delivering signaling messages for transmission by such stations.

(2) Description of how the proposed system and the technical standards described in paragraph (b)(1) of this section will not discriminate as to access, cost, or otherwise between applicant and the local operators for the desired network paging channel.

(3) Description of how the proposed network would provide for interference-free operation on the channel in each local area.

(4) Description of applicant's technical and financial qualifications to construct the proposed system and to develop and implement the technical standards described in paragraph (b)(1) of this section. Such financial qualifications shall satisfy the requirements of § 22.917.

(5) Description of how applicant with others, will provide network signaling service to at least fifteen standard metropolitan statistical areas initially and to how it will expand network services to the entire nation within two years.

(6) A model tariff showing, among other things, how it intends to provide nondiscriminatory access to network operators; and

UMI

VOL 48 ISS 93 MY 12 1983 UMI

(7) Description of how the public interest, convenience and necessity will be served by a grant of the application.

3. 47 CFR 22.15 is amended by revising (j)(8) and (j)(10) to read as follows:

§ 22.15 Technical content of applications

(j) * * *

(8) Topographic maps (see also § 22.216) showing the information set forth in paragraphs (j)(8) (i) and (ii) of this section are required in all Part 22 services except for 900 MHz one-way paging applications which is governed by paragraph (j)(8) (iii) of this section.

(i) Exact station location,

(ii) Location of radials used in determining elevation of average terrain,

(iii) Exact station location should be plotted on a map with a scale of 1:250,000 and the reliable service area should be depicted by a 20-mile radius for each base station.

(9) * * *

(10) For 900 MHz one-way applications, the profile graphs referred to in § 22.116 are not required.

BILLING CODE 6712-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Parts 611 and 675

[Docket No. 30408-54]

Foreign Fishing; Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NOAA issues a final rule to implement Amendment 4 to the fishery management plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area. Amendment 4 is necessary to provide sufficient amounts of fish to U.S. fishermen fishing commercially in groundfish fisheries, to take advantage of harvestable Pacific cod while they are available, and to allow foreign groundfish fleets access to narrow fishing grounds along the Aleutian Islands where fishing is more practicable. This action is intended to support U.S. fishermen harvesting underutilized groundfish stocks and to provide for fuller utilization of any harvestable groundfish by U.S. and foreign fishermen.

EFFECTIVE DATE: May 9, 1983.

ADDRESS: A copy of the final regulatory flexibility analysis for this rule is available from Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT:
Susan J. Salveson, 907-586-7230

SUPPLEMENTARY INFORMATION:

Background

Amendment 4 to the Fishery Management Plan for the Groundfish Fishery in the Bering Sea/Aleutian Island Area (FMP) was partially approved by the Assistant Administrator for Fisheries, NOAA (Assistant Administrator), on October 28, 1982. Proposed rules to implement the approved parts of this amendment were published in the **Federal Register** on December 6, 1982, and comments were invited until January 20, 1983. No comments were received. The approved parts: (1) Adjust the domestic annual harvest (DAH), joint venture processing (JVP), and the total allowable level of foreign fishing (TALFF) amounts for pollock, yellowfin sole, "other flatfishes," Atka mackerel, and "other species;" (2) increase the acceptable biological catch (ABC), optimum yield (OY), and reserve amounts for Pacific cod and for the "other species" category and increase the TALFF for Pacific cod; and (3) expand the area in which foreign fishing may be conducted in the fishery conservation zone.

One part that was disapproved would have authorized the Secretary to issue field orders adjusting fishing seasons and areas for conservation and management reasons. This part was disapproved because the amendment failed to specify adequately the procedures, limits, and types of responses that could be made in issuing such orders.

The principal aspects of Amendment 4 are described fully in the proposed rule. In addition, Amendment 4 makes the following technical changes to the FMP: (a) Consolidates the description of areas closed to foreign fishing, designates and depicts those areas, and reformats the rationale for such areas; (b) corrects or clarifies the geographical coordinates for two of the management areas; (c) adds a description of the four fishing areas and clarifies the depiction thereof; (d) clarifies the description of the fishery management area; (e) clarifies the substance of Amendment 1a and depicts the salmon savings area; (f) clarifies the specifications of domestic annual processing (DAP), domestic non-processed fish, and JVP amounts; (g) deletes references to halibut in various tables; (h) corrects the base optimum yield (OY) for "other species" that should have been increased by 1,000 metric tons (mt) (to 75,249 mt), or five percent of the 20,000 mt increase in Pacific cod OY, by virtue of Amendment 2; and (i) amends the coordinates for one area closed to foreign fishing.

The changes in OY, DAH, JVP, reserve, and TALFF for the species affected by Amendment 4 are summarized in the table below. The specifications are the same as those contained in the proposed rule as corrected on December 23, 1982 (47 FR 57306). This table will serve as notice of the changes to be effected by Amendment 4 in lieu of an amendment to the "TALFF table" which formerly was codified as Appendix 1 to 50 CFR 611.20, but which was removed by a final rule apearing at 47 FR 44264 (October 7, 1982).

Species	Species code	Areas	OY	DAH*	DAP	JVP	DNP	Reserve	TALFF
Pollock	701	Bering Sea [1]	1,000,000	74,500	10,000	64,000	500	50,000	875,500
Yellowfin sole	720	"	117,000	31,200	1,000	30,000	200	5,850	79,950
Other flat fish	129	"	61,000	11,200	1,000	10,000	200	3,050	46,750
Pacific cod	702	"	120,000	43,265	26,000	17,085	200	6,000	70,735
Atka mackerel	207	"	24,800	14,500	0	14,500		1,240	9,060
Other species [2]	499	"	77,314	7,800	1,400	6,000	400	3,866	85,648

* "DAH = DAP + JVP + DNP.

[1] Bering Sea means fishing areas, I, II, and III in Figure 2, Appendix II of 50 CFR 611.9.

[2] The category "other species" includes sculpins, sharks, skates, eulachon, smelts, capelin octopus, and all other finfish and marine invertebrates except those listed in the table and "unallocated species." See 611.93(b)(1)(iii) for the definition of "unallocated species."

The continental shelf between 170°00'W. longitude and 172°00'W. longitude is very narrow, making it impracticable to fish for groundfish in this area seaward of 12 nautical miles from the baseline used to measure the U.S. territorial sea. For this reason, Amendment 4 allows both foreign trawling and longlining between three and 12 nautical miles from the baseline in the area: (1) Bounded by 170°00'W. longitude and 172°00'W. longitude on the south side of the Aleutian Islands, and (2) bounded by 170°30'W. longitude and 172°00'W. longitude on the north side of the Aleutian Islands. In addition, Amendment 4 allows foreign longlining between three and 12 nautical miles from the baseline in the area bounded by 170°00'W. longitude and 170°30'W. longitude on the north side of the Aleutian Islands. Foreign trawling is prohibited in the latter area to avoid gear conflicts and grounds-preemption problems between U.S. crab fishermen who fish this area and foreign trawl fleets.

Finally, one set of coordinates for the Winter Halibut Savings area is modified to conform with coordinates specified for that area in the preliminary fishery management plan for this fishery.

Classification

The Assistant Administrator has determined that the approved parts of this amendment to the FMP are necessary and appropriate for the conservation and management of fishery resources in the Bering Sea and Aleutian Islands area, and that the action is consistent with the national standards of the Magnuson Fishery Conservation and Management Act (Magnuson Act), other provisions of the Magnuson Act, and other applicable law. He has, therefore, under sections 304 and 305 of the Magnuson Act given final approval to Amendment 4 except for that part relating to the field order authority.

The Assistant Administrator has determined that the final regulations implementing Amendment 4 will not significantly affect the quality of the human environment. This determination was based on an environmental assessment that was filed with the Environmental Protection Agency on March 3, 1982. Accordingly, a supplement to the FEIS for the FMP is not required.

The Assistant Administrator also has determined that implementation of this amendment will be carried out in a manner that is consistent to the maximum extent practicable with the Alaska Coastal Management Program, as required by section 307(c) of the Coastal Zone Management Act of 1972 and its implementing regulations at 15 CFR Part 930, Subpart C.

The Administrator of NOAA has determined that this final rulemaking is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291, since the sector of the U.S. fishing industry concerned with groundfish from the Bering Sea and Aleutian Islands is too small for these measures to have a significant effect on the economy. By providing additional amounts of groundfish for domestic harvest, Amendment 4 benefits the domestic groundfish fishery and encourages its development.

The Administrator has determined that the final regulations implementing Amendment 4 will have a significant economic impact upon a substantial number of small domestic entities for purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* The following is a summary of the final regulatory flexibility analysis.

The increase in JVP amounts for pollock, yellowfin sole, "other flatfishes," Atka mackerel, and "other species" results in an 87,150 mt increase in the total JVP available to domestic fishermen. The mean exvessel value of these species to domestic fishermen fishing for joint venture operations had recently been about $141 per mt. The additional total gross revenues to about 30 U.S. vessels that may deliver groundfish to foreign processors in 1983 could approach $12.3 million.

The increases in JVP amounts for pollock, yellowfin sole, "other flatfishes," Atka mackerel, and "other species" result in corresponding decreases in the TALFF amounts for these species. If all of the 87,150 mt total decrease in the TALFF were harvested by foreign fishermen, the revenue to the U.S. Treasury through foreign fishing fees in 1983 could be about $3.8 million. A comparison with actual total foreign catches in 1982, however, shows that for each of the individual species' TALFFs being decreased, the adjusted TALFFs would have been sufficient to provide for the 1982 catches, except for pollock. The 1982 total foreign pollock catch exceeded the adjusted TALFF by about 28,000 mt. If the same amount of foreign effort and capacity is applied in 1983 as in 1982, and if availability of stocks allow for a similar fishery, the total foreign catch in 1983 could be short by about 28,000 mt of pollock. The U.S. Government would lose only about $868,000 in foreign fees that it would have charged for pollock, instead of $3.8 million. This potential loss, however, could be offset by the proposed 39,235 mt increase in TALFF for Pacific cod, an higher value species for which the 1983 poundage fee is $60 per mt. The loss of revenue to the U.S. Government from the reduced pollock TALFF would be compensated for if foreign nations were to harvest only about 15,000 mt of the Pacific cod TALFF increase. Any additional harvest of Pacific cod would yield a net increase in revenue.

The Assistant Administrator finds good cause not to delay the effective date of this final rule under 5 U.S.C. 553(d) for the following reasons: (1) The intended effects of this rule are to support U.S. fishermen harvesting underutilized groundfish stocks and to provide for fuller utilization of certain harvestable groundfish by foreign fishermen; (2) the increases in DAH for pollock, yellowfin sole, "other flatfish", atka mackerel, and "other species" are necessary in view of expected 1983 harvests by U.S. fishermen; (3) the increase in the OY for Pacific cod is necessary for full utilization of a stock while it is available; (4) ample opportunity for involvement was accorded the public during public hearings and the 45-day public comment period; and (5) both the U.S. and foreign fishing sectors are aware of and expect these changes, and (6) immediate relief of a current foreign fishing restriction is necessary to promote fuller utilization of available fishery resources.

This final rulemaking does not contain a collection of information requirement or involve any collection of information within the meaning of the Paperwork Reduction Act of 1980.

List of Subjects

50 CFR Part 611

Fish, Fisheries, Foreign relations, Reporting requirements.

50 CFR Part 675

Fish, Fisheries, Reporting requirement.

Dated: May 6, 1983.

Roland F. Smith,

Acting Director, Office of Data and Information Management, National Marine Fishery Service.

For the reasons set out in the preamble, 50 CFR Parts 611 and 675 are proposed to be amended as follows:

PART 611—FOREIGN FISHING

1. The authority citation of Part 611 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*, unless otherwise noted.

2. Section 611.93 is amended by revising paragraphs (c)(2)(i) and (c)(3)(i) to read as follows:

§ 611.93 Bering Sea and Aleutian Islands groundfish fishery.

* * * * *

(c) * * *

(2) * * *

(i) Trawling by foreign vessels between 3 and 12 nautical miles from

VOL 48 ISS 93 MY 12 1983 UMI

the baseline used to measure the territorial sea is allowed (A) at all times in the areas bounded by 170°00′ W. longitude and 172°00′ W. longitude south of the Aleutian Islands and by 170°30′ W. longitude and 172°00′ W. longitude north of the Aleutian Islands; (B) from July 1 through December 31 on Petrel Bank; and (C) from May 1 through December 31 in other areas west of 176°30′ W. longitude. Petrel Bank is bordered by straight lines connecting the following coordinates in the order listed:

Latitude	Longitude
52°51′ N.	176°30′ W.
52°51′ N.	179°00′ E.
51°15′ N.	179°00′ E.
51°15′ N.	176°30′ W.
52°51′ N.	176°30′ W.

* * * * *

(3) * * *

(i) Longlining by foreign vessels between 3 and 12 nautical miles from the baseline used to measure the territorial sea is allowed west of 170°00′ W. longitude.

* * * * *

3. In addition to the amendments set forth above, § 611.93 is amended by removing the second set of coordinates, "52°40′ N. latitude, 170°00′ W. longitude," in paragraphs (c)(2)(ii)(C) and (c)(3)(ii), and inserting in their place "52°46′ N. latitude, 170°00′ W. longitude."

PART 675—GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

4. The authority citation for Part 675 reads as follows:

Authority: 16 U.S.C. 1801 *et seq.*

5. Section 675.20(a) is amended by revising Table 1 to read as follows:

§ 675.20 General limitations

* * * * *

TABLE 1.—BERING SEA AND ALEUTIAN ISLANDS FISHERY OPTIMUM YIELDS AND INITIAL DAHS, TALFFS, AND RESERVES

[In metric tons]

Reference: Species group and subarea [1]	OY	Reserve	Initial DAH	Initial TALFF
Pollock:				
Bering Sea	1,000,000	50,000	74,500	675,500
Aleutians	100,000			100,000
Yellowfin sole	117,000	5,850	31,200	79,950
Turbots	90,000	4,500	1,075	84,425
Other flatfishes	61,000	3,050	11,200	46,750
Pacific cod	120,000	6,000	43,265	70,735
Pacific ocean perch:				
Bering Sea	3,250	162	1,380	1,708
Aleutians	7,500	375	1,380	5,745
Other rockfish	7,727	500	1,550	5,677

Proposed Rules

Federal Register
Vol. 48, No. 93
Thursday, May 12, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 989

Raisins Produced From Grapes Grown in California; Change in List of Countries to Which Reserve Raisins May Be Exported

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice of proposed rulemaking invites written comments on enlarging the list of countries eligible for reserve pool sales. The current list includes all countries outside the Western Hemisphere and Greenland. The proposed change would add all countries in Central and South America and adjacent islands except the Caribbean Islands. The change in the list is brought about by a recent change in the industry's export merchandising program to include the additional countries. The export program is intended to increase California raisin exports. The proposal was recommended by the Raisin Administrative Committee, which works with the USDA in administering the marketing order.

DATE: Comments must be received by July 11, 1983.

ADDRESSES: Send two copies of comments to the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, where they will be available for public inspection during regular business hours.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250 (202) 447–5053.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

The proposal is to expand the list of countries to which raisin handlers may sell reserve raisins to permit sales to countries in Central and South America and adjacent islands, except the Caribbean Islands. This list is contained in § 989.221 of Subpart—Supplementary Regulations (7 CFR 989.201—989.231). The Subpart is operative pursuant to the marketing agreement, and Order No. 989, both as amended, regulating the handling of raisins produced from grapes grown in California (hereinafter referred to collectively as the "order"). The order is effective under the Agriculture Marketing Agreement Act of 1937, as amended (7 U.S.C. 601.674).

Currently, all countries outside the Western Hemisphere and Greenland are eligible outlets for reserve raisins.

The proposed change in the list would conform it with the industry's expanded export merchandising program and permit the later replacement of exports to the additional countries with reserve raisins. Pursuant to § 989.66(f) of the order, reserve raisins can be used to replace exports of free tonnage to countries listed in § 989.221.

Canada, Mexico, and the Caribbean Islands were excluded from the merchandising program because the industry feared that any exports to these countries would be transshipped to the United States. The likelihood of this happening with exports to the countries proposed to be added to the list is unlikely because of high freight rates and tariffs.

List of Subjects in 7 CFR Part 989

Marketing agreements and orders, Grapes, Raisins, California.

PART 989—[AMENDED]

The proposal is to revise § 989.221 of Subpart—Supplementary Regulations (7 CFR 989.210—989.221) to read as follows:

§ 989.221 Countries to which sale and export of reserve raisins may be made by handlers.

Pursuant to § 989.67(c), the Committee shall sell reserve raisins to handlers for export to all markets in the world except to the following: The United States, Canada, and Mexico and all islands adjacent to these countries, and all of the Caribbean Islands north of the 12th parallel, but not excluding those islands on the continental shelf of South America.

Dated: May 6, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 121 and 135

[Docket No. 23634]

Flight Time, Duty Time, and Rest Requirements for Flight Crewmembers Utilized by Air Carriers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to form advisory committee for regulatory negotiation.

SUMMARY: The FAA is considering the establishment of an advisory committee to develop a report including a recommended rulemaking proposal concerning flight time, duty time, and rest requirements for flight crewmembers engaged in air transportation. The committee would develop its recommendation using a negotiation process. The committee would be comprised of persons who represent the interests affected by the flight time rules, such as persons representing flight crewmembers, air carriers, air taxis, and the public.

DATE: Comments and suggestions must be received on or before June 10, 1983.

ADDRESS: Comments and suggestions concerning the membership of the advisory committee, the issues that it should consider, the interests affected, the procedures that should be followed and any other matters relating to such a

committee may be mailed in duplicate to:

Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 23634, 800 Independence Avenue, SW., Washington, D.C.

or delivered to:

Room 915G, 800 Independence Avenue, SW., Washington, D.C.

Comments and suggestions may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT:

FAA Contact: Edward P. Faberman, Deputy Chief Counsel, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, Telephone: (202) 426-3773

Convenor/Mediator: Nicholas A. Fidandis, Director, Mediation Services, Federal Mediation and Conciliation Service, Washington, D.C. 20247, Telephone: (202) 653-5240.

SUPPLEMENTARY INFORMATION:

Background

Section 601(a)(5) of the Federal Aviation Act of 1958 (49 U.S.C. 1421(a)(5)) requires that the Administrator of the FAA prescribe reasonable rules and regulations governing, in the interest of safety, the maximum hours or periods of service or airmen, and other employees, of air carriers. The FAA's flight and duty time regulations implementing this statutory requirement have remained essentially unchanged for approximately 30 years. During this span of time there have been dramatic changes in the equipment and operating practices of air carriers. The flight and duty time regulations also have become a matter of contention between carriers on the one hand and employees, particularly employee organizations, on the other. The agency has been involved in litigation over the meaning of certain phrases in those regulations and has issued more than 1,000 pages of interpretations, mostly in response to requests from employees or employee organizations. Of all the provisions of the Federal Aviation Regulations, the flight and duty time requirements have proven to be the most prolific source of requests for interpretations.

Recent efforts by the agency to clarify and update these regulations commenced in 1975. Two notices of proposed rulemaking (NPRM) were issued proposing to revise and simplify the Parts 121 and 135 flight and duty time regulations. Notice No. 77-17 (42 FR 43490; August 29, 1977) contained several proposals to revise the flight and duty time regulations applicable to air taxi operators in Part 135. Similar proposals applicable to air carriers operating under Part 121 were contained in Notice No. 78-3 (43 FR 8070; February 27, 1978). The basic objective of these proposals was to reduce the amount of regulatory material on flight and duty time requirements and to simplify the regulations.

After extensive review and analysis of the comments received on the flight and duty time proposals in Notice Nos. 77-17 and 78-3, the FAA issued a consolidated supplemental notice of proposed rulemaking (Notice No. 78-3B) (45 FR 53316; August 11, 1980) which refined the earlier proposals and covered both Parts 121 and 135. The comments received on Notice No. 78-3B reflected that virtually all affected segments of the air transportation community opposed one or more aspects of the proposals. In light of the comments received, the FAA was not able to fully delineate the safety benefits or the costs associated with the proposals. In the view of the above circumstances Notice No. 78-3B was withdrawn (46 FR 32413; June 22, 1981).

After a period of reassessment, the FAA published a new proposal (Notice No. 82-4) (47 FR 10748; March 11, 1982) to amend the air carrier flight and duty time limitations contained in Parts 121 and 135. As was the case with previous notices, Notice No. 82-4 was greeted with considerable criticism and opposition by the Airline Pilots Association, Alaskan operators, and rotorcraft operators, to name only a few. The latest proposal, therefore, also was withdrawn (47 FR 51585; November 16, 1982).

The agency has found, in attempting to revise the flight and duty time regulations, that conflicts exist on a number of issues between the views of air carriers and those of their flight crewmembers. On certain issues, widely disparate views have been submitted for flight crewmembers themselves depending upon the types of operations in which they are involved, their geographical location, and the type of aircraft operated. For example, some Part 135 pilots have criticized the absence of a monthly limitation on Part 135 flight time. In sharp contrast, other Part 135 pilots vigorously oppose a monthly flight time limitation on the theory that it restricts their ability to earn a living in a peak demand or seasonal flying environments.

Differences are by no means confined to a central issue such as a monthly flight time limitation. For example, flight crewmembers operating under Part 121 contend that the definition of "deadhead" transportation should include not only transporation by air, but also surface transportation between airports in the same metropolitan area, such as the Newark, Laguardia, and Kennedy Airports in the New York City area. Differences also exist among operators over the kind of rules that are needed.

The FAA's experience with attempted rulemaking to improve the flight and duty time regulations convinces the agency that the time has come for a new approach to solve the complex issues that have confronted the agency, air carriers, and flight crewmembers for many years. That new approach is Regulatory Negotiation (RN), a procedure recommended by the Administrative Conference of the United States (ACUS) (Recommendation 82-4, "Procedures for Negotiating Proposed Regulations," 47 FR 30708, June 16, 1982) for handling certain regulatory actions. To ensure its legality, RN would be carried out by an advisory committee created under the Federal Advisory Committee Act, Pub. L. 92-463, 5 U.S.C. app. 1. The purpose of RN is to have representatives of all affected interests fully discuss the issues under conditions that would provide incentives to narrow or eliminate their differences and to negotiate a proposed rule acceptable to each interest. The recommendation by the committee should be of a proposal which reflects appropriate rulemaking objectives including Executive Order 12291. The agency would take part in the discussions. Additionally, to facilitate this process, the agency will utilize the services of an impartial convenor/mediator to conduct RN. While the agency is hopeful that this process will result in the issuance of an NPRM that would be acceptable to most parties, the agency is committed to improving the existing regulation.

If this process fails, the agency would issue a new NPRM based upon the complete regulatory record including the record of this process.

Regulatory Negotiation

The increasing complexity of some Government regulations compounded by what some see as an increased formalization of the written rulemaking process can make it difficult for an agency to develop a sound regulatory solution to some problems. The standard process often leads to participants developing adversarial relationships with each other. In this more formal structure, they may take extreme positions, withhold information from one another, or attack the legitimacy of

opposing positions. The give and take sometimes necessary to develop a workable solution is not always possible through the comment and reply process. Public comments are often focused on finding problems with the proposals of others rather than helping to develop creative solutions.

With these problems in mind, participants often tell the agency that a "better rule could be developed if we could all just sit around a table and work it out." As the Administrative Conference has pointed out:

> Experience indicates that if the parties in interest were to work together to negotiate the text of a proposed rule, they might be able in some circumstances to identify the major issues, gauge their importance to the respective parties, identify the information and data necessary to resolve the issues, and develop a rule that is acceptable to the respective interest, all within the contours of the substantive statute.

As a result of research on this problem, the Administrative Conference adopted Recommendation 82-4. The Administrative Conference's recommendation is essentially that agencies consider assembling a group of representatives of all affected interests who would be encouraged to reach consensus on a resolution of the issues and to draft, for the agency head's consideration, the text of a proposed regulation. Recognizing the experimental nature of this approach, we agree with this recommendation. We have set forth below a set of suggested procedures that we believe will provide a mechanism by which the benefits of negotiation can be achieved. We also believe that the procedures provide the appropriate safeguards suggested by the Administrative Conference, "to ensure that affected interests have the opportunity to participate, that the resulting rule is within the discretion delegated by Congress, and that it is not arbitrary or capricious."

Procedures and Guidelines

The following proposed procedures and guidelines would apply to this process, subject to appropriate changes made as a result of comments received on this notice or as are determined to be necessary during the negotiating process. It should be noted that several necessary preliminary steps have already been taken.

1. *Convenor/Mediator:* Nicholas Fidandis, Director, Mediation Services, Federal Mediation and Conciliation Service, will act as convenor/mediator. The FAA, in consultation with the convenor/mediator, will set up the negotiating group. Upon determination by the FAA (in consultation with the convenor/mediator) of the appropriate negotiating group, the convenor/mediator, a neutral third-party, will conduct the RN process and help it run smoothly. This individual is not involved with the substantive development or enforcement of this regulation. The convenor/mediator will chair the actual negotiations, participate in the "negotiations," and be expected to offer alternative suggestions toward the desired consensus. He may also ask the parties to present additional material or to reconsider their position. Because he is "neutral" with respect to the end result, he can make some of the objective decisions that are necessary in determining the feasibility of negotiaiton for particular issues and in determining potential interests and participants.

2. *Feasibility:* The FAA and the convenor have examined the issues and interests involved and we have made a preliminary inquiry among representatives of the identified interests to determine whether it is possible to reach agreement on: (a) Individuals to represent those interests, (b) the preliminary scope of the issues to be addressed, and (c) a schedule for developing a notice of proposed rulemaking. The issues and interests are listed in subsequent sections of this document. On the basis of the regulatory history of the rulemaking and the preliminary inquiry, the convenor and the FAA believe that regulatory negotiation could be successful with respect to the development of a flight and duty time proposal and that the potential participants listed below could adequately represent the affected interest.

3. *Participants:* The number of participants in the negotiating group should not exceed 15; a number larger than this could make it difficult to have effective negotiations. One purpose of the present notice is to assist the convenor and the identified interests to determine whether other interests, who would not be adequately represented by the proposed participants, may be substantially affected by the proposed rule to be developed. However, we do not believe that each potentially affected individual or organization must have its own representative. Rather, each interest should be adequately represented by the selected parties. To ensure a balanced group, we will make every effort to ensure that no one interest has more than a third of the members of the negotiating committee.

4. *Good Faith:* Participants must be willing to negotiate in good faith. In this regard, it is important that senior individuals within each organization be designated to represent that organization. This applies to the FAA as well, and the agency has designated Kenneth Hunt, Director, Office of Flight Operations, as its representative or his alternate, William Brennan, Manager, Air Transportation Division. No individual is required to "bind" the interests he or she represents, but the individual should be at a high enough level within their organization to "carry a lot of weight." The FAA plans to issue the negotiated proposal in a notice of proposed rulemaking unless it is inconsistent with the statutory authority of the agency or other statutory requirements, or it is not appropriately justified. It is expected that, during the negotiating process, the participants will communicate to their respective organizations the progress of the negotiations. For the process to be successful, the interests represented should be willing to accept the final product of the advisory committee.

5. *Notice of Intent to Establish Advisory Committee and Request for Comment:* In accordance with the requirements of the Federal Advisory Committee Act, an agency of the Federal government cannot establish or utilize a group of people in the interest of obtaining advice or recommendations unless that group is chartered as a Federal advisory committee in accordance with the requirements of the statute. It is the purpose of this notice to indicate our intent to create a Federal advisory committee as well as to—

a. Identify the issues we believe are involved in the rulemaking.

b. Identify the interests we believe are affected by those issues.

c. Identify the participants we have initially determined will adequately represent those interests in the negotiations; and

d. Ask for comment on the use of regulatory negotiation for this rulemaking and on whether the issues, parties, procedures, and guidelines are adequate and appropriate.

6. *Requests for Representation:* If, in response to this notice, an additional person or interest requests membership or representation in the negotiating group, the agency, in consultation with the convenor, would determine (i) whether that interest would be substantially affected by the rule, (ii) if so, whether it would be adequately represented by an individual already in the negotiating group, and (iii) whether, in any event, the requester should be added to the group or whether interests can be consolidated and still provide adequate representation.

7. *Final Notice:* After evaluating comments and requests for

VOL
48
ISS
93
MAY
12
1983
UMI

representation received as a result of this notice, the FAA would issue a final notice announcing the establishment of the Federal advisory committee, unless it determines that such action is inappropriate after reviewing the comments. After the Federal advisory committee is appropriately chartered, and notice is published in the **Federal Register**, the negotiation process would begin.

8. *Administrative Support and Meetings:* Staff support would be supplied by the FAA. Meetings, at least initially, would be held in the Washington, D.C., area.

9. *Consensus:* The goal of the negotiating process is consensus. Generally, consensus means that each interest should concur in the result. In this regard, a professional mediation service will be provided by the convenor/mediator to facilitate the negotiation process.

10. *Record of Meetings:* In accordance with the requirements of the Federal Advisory Committee Act, the FAA would keep a record of all meetings of the advisory committee. This record would be placed in the public docket for this rulemaking. Meetings of the committee would generally be open to the public, subject to space availability, and would be announced in the **Federal Register** before being held.

11. *Committee Procedures:* Under the general guidance and direction of the convenor and subject to any applicable legal requirements, the committee would establish the detailed procedures for committee meetings that it deemed most appropriate.

12. *Notice of Proposed Rulemaking:* The objective of the committee is to prepare a report containing a notice of proposed rulemaking (NPRM) and preamble. The FAA would provide drafting assistance to the committee. The report should also describe the factual material on which the group relied. If consensus is not obtained on some issues, the report should identify the areas of agreement, the areas in which consensus could not be reached, and the reasons for nonagreement. It is expected that, to the extent possible, the participants would address economic and regulatory flexibility requirements.

13. *Agency Action on NPRM:* The FAA would issue the proposed rule as prepared by the committee unless the agency finds that it is inconsistent with the statutory authority of the agency or other statutory requirements or it is not appropriately justified. In that event, the agency would explain its reasons for its decision. If the agency wishes to modify the negotiated proposal, it would do so in a way that allows the public to distinguish its modifications from what the group proposed.

14. *Final Rule:* After the comments have been received on any notice of proposed rulemaking, the advisory committee would review the comments to determine whether its original recommendations to the agency should be modified. Any necessary changes would be negotiated by the committee in the same manner as the NPRM. The committee would prepare a final report, including a preamble responding to public comment and a proposed final rule. The final rule is the sole responsibility of the Administrator of the FAA. It must be stressed that the Administrator wants to use the regulatory negotiation process and intends to use any negotiated rule on which there is a committee consensus, if it is practicable and legally proper for him to do so.

Major Issues That Would Be Considered in RN on Flight and Duty Time Limitations

The FAA has closely analyzed the dockets on prior notices of proposed rulemaking and has identified what it believes to be the major issues to be considered in RN. They are listed below. Persons who desire to suggest additional issues that should be considered during RN may do so by submitting comments and suggestions in the manner described under the paragraph entitled **"ADDRESS."** Other regulatory issues would be considered by the committee as they arise.

1. Number of Rules.

a. Should there be two rules, one for air carriers under Part 121 and another for air taxi and commuter operators under Part 135?

b. Should commuter air carrier rules be different from the rules for other Part 135 operators?

2. Flight Time and Duty Time Limitations.

a. Should both flight time and duty time limits be proposed?

b. Should the amount of allowable flight time and duty time vary in proportion to crew size?

c. Should there be weekly and monthly flight time and duty time limitations under Part 121?

d. Should there be an annual flight time limitation under Part 121?

e. Should Part 135's theoretical 300 hours per month of permitted flight time be reduced? If so, to what?

f. Should factors such as crossing time zones and the number of landings and takeoffs be considered in establishing flight time limitations.

3. Definition of Duty Time.

a. How should duty time be defined?

b. Should reserve or standby status be considered duty time?

c. Should travel by surface means between airports be permitted during a rest period?

4. Rest Provisions.

a. Should a normal minimum daily rest period be established for all operations? How long should it be?

b. For overnight, away-from-domicile, short turnarounds, should a minimum rest period be prescribed? What should it be? If a short rest period is prescribed, should a longer rest period be required upon return to domicile?

c. If a duty period is lengthy (e.g., in excess of 10 hours), should a lengthy rest period (e.g., 16 hours) be required. If so, when would it be required to be given?

d. Under Part 135, in the absence of a required 1 day off in 7 days, should a certain number of rest days be required after a given number of consecutive duty days? If so, what should be the number of days in each case?

5. Deviation Authority.

a. Should Part 135 have a built-in deviation authority provision for unusual operations? (e.g., hospital helicopter flights; highly seasonal activities such as Alaska, cannery, and harvest operations, etc.)

6. Basis for Calculating Flight and Duty Time Limitations.

a. Should a benchmark of calendar months or, instead, any 30 consecutive days be used?

Interests Involved in Flight and Duty Time Requirements

The following interests should be represented in negotiations to develop new flight and duty time requirements:

1. Commercial operators, including—
   a. Non-scheduled charter operators.
   b. Domestic air carriers.
   c. International air carriers.
   d. Rotorcraft operators.
   e. Short-haul scheduled operators.
   f. Short-haul non-scheduled operators.
   g. Operators subject to special operating conditions (e.g., weather, limited operating hours and months).
2. Flight crewmembers, including pilots and flight engineers, with similar subinterests as operators.
3. Federal Government.
4. Public/Consumer.

Comments and suggestions on this list of interests should be submitted as explained in the **"ADDRESS"** paragraph above.

Parties that Could be Part of the RN Process

The advisory committee would recommend an NPRM to the FAA. Therefore, it is important that the advisory committee be comprised of persons who possess substantial expertise and divergent viewpoints on the various issues which would be presented to it for discussion and preparation of recommendations.

They must also adequately represent their interests and be able to "speak for them" to the fullest extent possible. The following is a list of possible representatives which the FAA and the convenor have tentatively identified.

1. Federal Aviation Administration.
2. National Air Carrier Association.
3. National Air Transportation Association (NATA).
4. Air Line Pilots Association (ALPA).
5. Allied Pilots Association.
6. Flight Engineers International Association.
7. Alaska Air Carriers Association.
8. Aviation Consumer Action Project (ACAP).
9. Air Transport Association (ATA).
10. A representative (to be identified) of scheduled air carriers whose interests are not represented by ATA.
11. Regional Airline Association.
12. Helicopter Association International.

Comments and suggestions on this tentative list of representatives may be submitted as explained under the paragraph entitled **"ADDRESS."** Others who believe they should be a party to these proceedings should submit requests to the same location explaning who they represent and how they can represent and interest that would not be adequately represented by the parties listed above.

Tentative Schedule

In accordance with the importance the FAA attaches to the flight and duty time rulemaking, the FAA plans to expedite the processing of any rule changes. The FAA believes that the use of RN should facilitate these plans by providing a consensus proposal and by providing for the imput of interested persons early in the rulemaking process. The FAA hopes to be able to establish an advisory committee by June 15, 1983. The first meeting to the Advisory Committee is tentatively scheduled for June 29, 1983. The location and the time for the meeting will be announced at a later date. A regulatory proposal in the form of an NPRM from the committee, together with any required economic analyses, would be expected by August 15, 1983. In order to eliminate the possibility of disagreement during Office of the Secretary (OST) and Office of Management and Budget (OMB) review of the notice that is required under DOT rulemaking procedures and Executive Order 12291, the FAA has already taken steps to ensure the involvement of OST and OMB during the process. The FAA would hope to issue the NPRM by September 15, 1983, with a 30-day period for public comment being provided. The development of any final rule would, of course, depend on the comments received and their consideration by the advisory committee, but the FAA would strive to complete action on the NPRM by the end of 1983.

Failure of Advisory Committee To Agree on Recommendations

In the event the advisory committee is unable to reach a consensus on a proposed NPRM for submission to the FAA, the agency will proceed with prompt development of a NPRM proposing such changes in the flight and duty time regulations as the FAA deems appropriate.

Because of the importance we attach to developing an NPRM on this matter, and to prevent the possibility that anyone would attempt to use the RN process simply to delay the development of an NPRM, the Administrator has directed that the committee be dissolved if it cannot reach agreement by the middle of August. Earlier dissolution will occur if the convenor recommends or the agency believes that it will be impossible to meet the deadline because of a lack of sufficient progress.

Issued in Washington, D.C., on May 9, 1983.

Michael J. Fenello,

Deputy Administrator.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 111

Extension of Time on Proposed Customs Regulations Amendments Relating to Customhouse Brokers

AGENCY: Customs Service, Treasury.

ACTION: Notice of extension of time for comment.

SUMMARY: This notice extends the period of time within which interested members of the public may submit written comments with respect to a Customs proposal to amend the Customs Regulations relating to customhouse brokers. A document inviting the public to comment on the proposal was published in the **Federal Register** on April 7, 1983 (48 FR 15154). Comments were to have been received on or before June 6, 1983. A national association has requested Customs to extend the period for the submission of comments claiming that because of the many issues raised and the need to solicit comments from its members throughout the United States, additional time is needed to prepare and submit thorough comments. Customs believes the request has merit. Accordingly, the period of time for the submission of written comments is extended to July 5, 1983.

DATE: Comments must be received on or before July 5, 1983.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Margaret M. O'Rourke, Chairperson, Customs Headquarters Task Force on Broker Licensing and Regulation, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-8074.

Dated: May 6, 1983.

John P. Simpson,

Director, Office of Regulations and Rulings.

BILLING CODE 4820-02-M

POSTAL SERVICE

39 CFR Parts 447 and 956

Code of Ethical Conduct for Postal Employees; Post-Employment Activities; Rules of Practice in Proceedings Relative to Disciplinary Action For Violation of Restrictions on Post-Employment Activity

AGENCY: Postal Service.

ACTION: Proposed rules.

SUMMARY: The Postal Service proposes a number of amendments to its Code of Ethical Conduct. The first of these amendments would eliminate the specific dollar limit by which "nominal" value or amount is defined in several sections relating to the prohibition on the acceptance of gifts. A second would add new sections to the Code to implement the provisions of 18 U.S.C. 207 by establishing rules and procedures to: (1) Permit the communication of scientific and technological information to the Postal Service by certain former postal employees, and (2) impose administrative sanctions upon former postal employees who violate the provisions of subsections (a)–(c) of section 207. The third amendment would add a new section to the Code to govern

VOL
48
ISS
93
MY
12
1983
UMI

the submission by postal employees of the financial disclosure reports as required by Title II of the Ethics in Government Act, Public Law 95–521. The Postal Service also proposes to adopt rules of practice in proceedings relating to the imposition of the administrative sanctions to which reference is made above.

DATE: Comments must be received on or before June 11, 1983.

ADDRESS: Written comments should be sent to Assistant Ethical Conduct Officer, Law Department, Room 1P–602, United States Postal Service, Washington, D.C. 20260–1113. Comments will be available for public inspection and photocopying in Room 1P–602 475 L'Enfant Plaza West, SW., Washington, D.C., from 9:00 a.m. to 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Charles D. Hawley, (202) 245–4584.

SUPPLEMENTARY INFORMATION: Among the provisions of the Postal Service's Code of Ethical Conduct is a section which imposes restrictions on the acceptance by postal employees of gifts of goods or services in any form from persons whose economic interests may be affected by the Postal Service. These restrictions, although intentionally stringent, are not absolute. the Postal Service recognizes, as does Executive Order 11222, the provisions of which the Code implements, that under some circumstances the acceptance of gifts or benefits, which a literal application of the Code would not allow, may properly be permitted. For example, a postal employee may accept a birthday gift from his brother, even though the latter is a Postal Service contractor, so long as it is clear that it is the family relationship, and not the business relationship, which is the motivation for the gift. In other instances when the gift is of little economic value, a rigid prohibition upon acceptance seems unnecessary to protect the integrity of public service and indeed may give the appearance of trivializing the principle involved. The term "nominal value" is used in several paragraphs of § 447.24 to describe gifts of this nature. "Nominal value" is defined with respect to gifts in existing § 447.81(h) as an item of no greater retail value than $2.00. The Postal Service considers that this specific dollar figure, which was adopted in 1974, is today unrealistic as a maximum acceptable level even for items of little economic worth. Experience, moreover, teaches that any fixed dollar figure is likely to be rendered obsolete by the passage of even a relatively short period of time. The Postal Service therefore proposes to delete the section of the Code which defines the term, § 447.81(h), and the reference in § 447.23(b)(2) to the $2.00 figure, leaving "nominal value" to the common understanding of the term. Section 447.81(h) also defines "nominal value" with respect to food and refreshment in terms of what an employee would ordinarily spend if paying his own bill. While this statement does not suffer from the same defect as the dollar figure, we do not consider it essential to define only this limited aspect of the term.

It is certainly not intended in deleting this definition to abandon the principle that nominal value means having little economic worth. It is the very lack of economic worth that makes the acceptance of a gift of nominal value permissible. We think, however, that the term must derive its meaning from the circumstances in which it is applied, from reasonable social conventions where they exist, and in the final analysis from sound judgment and common sense as to what is, and what is not, appropriate.

As a second amendment to the Code, the Postal Service proposes two new sections relating to the post-employment activities of postal employees and the statutory limitations on them imposed by 18 U.S.C. 207. One proposed section, 39 CFR 447.33, summarizes these limitations. It also implements subsection 18 U.S.C. 207(f) by establishing procedures which enable former postal employees, otherwise barred by other provisions of section 207 from communicating with the Postal Service, lawfully to furnish scientific or technological information to the Postal Service. Similarly it implements the statutory authority of the Postmaster General under certain circumstances to exempt a former employee having outstanding qualifications in a scientific or other technical discipline from the restrictions of section 207 so that he may participate with the Postal Service for the benefit of the national interest.

The other proposed section in this part, § 447.34, establishes rules and procedures in implementation of subsection 207(j), which authorizes an agency to impose administrative sanctions upon former employees who violate subsections (a)–(c) of section 207. Complementing this section would be a new Part 956 which establishes rules of practice to govern the conduct of a hearing in the Postal Service's Judicial Officer Department in the event that a former employee, faced with administrative sanctions pursuant to § 447.34, should seek a hearing. Together, these provisions would establish a framework for the administrative imposition of fair and appropriate sanctions, in the manner contemplated by Congress in enacting subsection 207(j).

Of particular significance is proposed § 447.34(e) which authorizes specific sanctions. These are of three kinds: denial of the right to appear before or communicate with the Postal Service as a representative of another for up to five years; debarment from contracting or entering into other business arrangements with the Postal Service directly or as a subcontractor for up to five years; or the cancellation of an existing contract, subcontract or other business arrangement with the Postal Service that was affected by a violation of 207. It is contemplated that any sanctions would be carefully tailored to the nature of the conduct in violation of section 207 which was the occasion for initiating the proceeding. For example, the extended ban on acting in a representative capacity would be appropriate for a violation that involved representation of others. Cancellation of an existing contract, however, or a ban on future contracts would be appropriate if needed to ensure that a former employee not benefit in that manner from agency action which may have been influenced by his or her misconduct.

It should be noted that, because the Postal Service has other procedures which generally apply to debarment from contracting and disputes involving existing contracts, it is necessary to coordinate the procedures established by § 447.34 and Part 956 with those other procedures. To this end § 447.34(f) provides that the proposed procedures would supersede those of Part 957 and govern proceedings involving debarment from contracting when the proposal to debar is based on an alleged violation of section 207. On the other hand the proposed procedures would not govern in the event it is proposed to cancel a contract on the grounds of such an alleged violation. In the former instance, because the alternative procedural rights of the respondent are based on Postal Service regulations and are not significantly different from those of Part 956, we think it appropriate to have Part 956 control. In the latter, however, the rights of the holders of existing contracts are affected by the Contract Disputes Act of 1978, Pub. L. 95–563, 41 U.S.C. 601 *et seq.*, which, of course, is not subject to variance by regulation. Rather than create uncertainty as to which set of procedures governs, § 447.34(f)(2) unequivocally provides that the usual procedures for resolving contract disputes are to be followed even though the cancellation of a contract is based upon an alleged violation of section 207.

The Postal Service expects that normally only one form of sanction would be imposed in any instance, that it would be the one of the three herein discussed most closely related to the violation, and that the period of time for which the sanction would be in force would reflect the severity of the violation. The regulation, however, like the statute, would permit as a sanction "such other action as may be appropriate to the violation." This clearly dispels the notion that the Postal Service is rigidly limited to these forms of sanctions when some other sanction is more appropriate.

The third proposed amendment to the Code adds a new section which implements with respect to Postal Service employees the public financial disclosure requirements of title II of the Ethics in Government Act, Pub. L. 95–521. Title II requires all employees in the Executive Branch of the Government who are paid at a rate equivalent to GS–16 to file with their employing agency a report, available to the public, of their personal financial interests. Proposed § 447.42 applies the statutory terms to the circumstances of the Postal Service, identifying those employees who are required to file reports and providing for the filing, review, retention and availability to the public of the reports. A related editorial amendment to § 447.41(a), as amended, substitutes for a reference to Pub. L. 95–521 a reference to proposed § 447.42, as the authority requiring certain postal employees to file financial disclosure reports.

For the above reasons the Postal Service proposes to amend title 39, Code of Federal Regulations, as follows:

List of Subjects in 39 CFR Parts 447 and 956

Conflict of interests, Government employees, Administrative practice and procedure, Postal Service.

PART 447—CODE OF ETHICAL CONDUCT FOR POSTAL EMPLOYEES

1. In § 447.24, paragraph (b)(2) is revised to read as follows:

§ 447.24 Conflicts of interest—gifts, entertainment, and favors.

* * * * *

(b) * * *

(2) Accept unsolicited advertising and promotional items, such as a pen, pencil, note pad, or calendar of nominal value;

2. Add new §§ 447.33 and 447.34 reading as follows:

§ 447.33 Post-employment activities.

(a) Restrictions on the post-employment activities of persons who have been employed by the Postal Service are imposed by section 207 of title 18, United States Code. In general, the restrictions contained in 207(a) permanently prohibit appearance as an agent or attorney before Federal agencies or courts on behalf of a private party in any particular matter in which the employee participated in some substantial way while a postal employee. Section 207(b) generally prohibits for two years after leaving postal employment the representation of a private party before Federal agencies or courts in any particular matter that was under the employee's official responsibility within one year prior to leaving postal employment. Section 207(c), which applies only to a limited number of the Officers of the Postal Service, designated as Senior Employees, generally prohibits any appearance before or communication with the Postal Service, with an intent to influence any Postal Service action, for one year after leaving the Postal Service.

(b) Criminal sanctions of imprisonment and fines are provided for violations of section 207. The Attorney General of the United States is responsible for initiating criminal prosecution of persons believed to have violated that statute. To this end, on receipt of information regarding a possible violation of section 207, and after having determined that such information appears substantial, the Ethical Conduct Officer shall expeditiously furnish this information to the Chief Inspector who shall bring it to the attention of the Criminal Division, Department of Justice, and to the Director, Office of Government Ethics. Any investigation or administrative action conducted thereafter by the Postal Service should be coordinated with the Department of Justice to avoid prejudice to any criminal prosecution, unless the Department has determined that it does not intend to initiate such prosecution.

(c) The Postal Service may impose administrative sanctions in the case of a violation of section 207, even though criminal prosecution is not sought. Regulations governing the imposition of these sanctions, which may include prohibiting the former employee for up to five years from appearing before or communicating with the Postal Service, are contained in § 447.34 below. Rules of practice before the Judicial Officer Department in proceedings arising under these regulations are found in Part 956.

(d) Notwithstanding the prohibitions described above, section 207 permits certain types of communications. Any former postal employee may:

(1) Give testimony under oath and make statements required to be made under penalty or perjury (section 207(h));

(2) Appear before or communicate with a Federal agency or court on a matter of a personal and individual nature, such as personal income taxes or retired pay (section 207(i)); or

(3) If he receives no compensation other than established witness fees, make a statement based on his special knowledge (section 207(i)).

(e) In accordance with section 207(f), the prohibitions of section 207(a)–(c) do not apply to the making of communications by former employees solely for the purpose of furnishing scientific or technological information to the Postal Service under the following circumstances:

(1) The former employee shall submit to the Ethical Conduct Officer a notice in writing stating the nature of the restriction that is applicable to him and describing his participation in behalf of the Postal Service which gives rise to the restriction. He shall summarize briefly the information he wishes to communicate and shall describe the circumstances under which he intends to communicate the information. The Ethical Conduct Officer may approve the proposed communication, either as submitted by the former employee or with such modification as he deems necessary to protect the public interest.

(2) A former employee having outstanding qualifications in a scientific, technological or other technical discipline may be exempted from the restrictions of section 207(a)–(c) if the Postmaster General, after consultation with the Director, Office of Government Ethics, makes a certification which is published in the **Federal Register**. The certification shall state that the former postal employee has outstanding qualifications in a scientific, technological or other technical discipline; that he is acting with respect to a particular matter which requires such qualifications; and that the national interest would be served by the former employee's participation.

§ 447.34 Administrative enforcement procedures.

(a) Whenever the Ethical Conduct Officer determines that there is reasonable cause to believe that a former employee has violated section 207 (a), (b) or (c) of title 18, United States Code, in any matter affecting the Postal Service, he may initiate an

VOL 48 ISS 93 MY 12 1983 UMI

administrative disciplinary proceeding by sending to the former employee, hereinafter referred to as the respondent, notice of proposed disciplinary action as provided in this part.

(b) The notice shall inform the respondent of the subsection that he is alleged to have violated and of the basis for the allegation in sufficient detail to enable him to prepare an adequate defense. It shall also inform him of the disciplinary action which is proposed, of his right to a public hearing on the allegation, and of the method of requesting a hearing.

(c) Except as provided in paragraph (f)(2) below, a respondent may, within 20 days following the receipt of the notice of proposed disciplinary action, file an answer with the Recorder in the Postal Service's Judicial Officer Department. The answer shall be in writing and shall comply with the Rules of Practice provided in Part 956 of this title, which shall govern all subsequent proceedings in the Judicial Officer Department.

(d) If no answer is filed, the allegations of the notice shall be taken as admitted and the proposed disciplinary action shall become effective as the final agency decision. The Ethical Conduct Officer may, however, at the expiration of the period for filing an answer or any time thereafter, for good cause, mitigate or remit all or any part of a proposed disciplinary action or a sanction imposed by a final agency decision following default. If an answer is filed, the final agency decision shall be rendered pursuant to Part 956.

(e) Disciplinary action taken in accordance with a final agency decision may consist of:

(1) Prohibiting the respondent from making on behalf of any other person (except the United States) any formal or informal appearance before or, with the intent to influence, any oral or written communication to the Postal Service on any matter of business for a period not to exceed five years;

(2) Excluding the respondent from entering into any contract, lease, permit or other business arrangement with, or any subcontract involving, the Postal Service for a reasonable, specified period of time, not to exceed five years;

(3) Cancelling any contract, lease, permit, or other business arrangement between, or any subcontract involving, the Postal Service and the respondent, affected by a violation of section 207; or

(4) Such other action as may be appropriate to the violation upon which it is based.

(f)(1) In the event that the proposed disciplinary action is that authorized by paragraph (e)(2) of this section, relating to exclusion from entering into contracts, the provisions of this section and of Part 956 shall govern to the exclusion of the provisions of, and of any rights or procedures which might otherwise be available to the respondent pursuant to, Section 1, part 6 of the Postal Contracting Manual and or Part 957 of this title.

(2) In the event that the proposed disciplinary action is that authorized by paragraph (e)(3) of this section, relating to the cancellation of contracts, the proposed disciplinary action shall be handled as a contract dispute subject to Part 955.

(g) A final agency decision imposing disciplinary action is subject to judicial review, as provided in 18 U.S.C. 207(j), as enacted by Pub. L. 95–521.

3. Revise § 447.41(a)(1) and add new §447.42 to read as follows:

§447.41 Confidential statements.

(a) *Employees required to file statements.* (1) Each employee who is in one or more of the following categories (other than a special employee or one required by §447.42(a) to file a Financial Disclosure Report for Executive Branch Personnel (Standard Form 278)) shall file a Confidential Statement of Employment and Financial Interests (Postal Service Form 2417):

* * * * *

§447.42 Public financial disclosure reports.

(a) *Employees required to submit reports.* Each employee who is in one or more of the following categories shall submit a financial disclosure report as prescribed by the Director, Office of Government Ethics, (hereinafter, the Director), currently on Standard Form 278, in accordance with this section.

(1) The Postmaster General.

(2) The Deputy Postmaster General.

(3) The Ethical Conduct Officer.

(4) Each administrative law judge.

(5) Each employee whose basic rate of pay is equal to or greater than the rate of basic pay for the first step of GS–16.

(b) *Person with whom reports should be filed and time for filling.* (1) Financial disclosure reports required under this section shall be filed with the Ethical Conduct Officer. Reports are due as follows:

(i) Within 30 days of assuming a position described in paragraphs (a)(1) through (a)(4) of this section, unless the employee has, within 30 days prior to assuming that position, left another position in which he or she has filed a current report;

(ii) Within 30 days of the effective date of an increase in the rate of basic pay to the level described in paragraph (a)(5) or of an initial appointment at such a rate;

(iii) Within 30 days of the termination of employment with the Postal Service, by retirement or otherwise, unless the employee enters a similarly covered position with another agency in the Executive Branch of the Government;

(iv) Within 30 days of the effective date of an absolute decrease in the rate of basic pay which causes the rate of basic pay of the employee to be less than the current rate of basic pay for the first step of GS–16; and

(v) On or before May 15 of each year when he or she has been in one of the categories in paragraph (a) of this section for more than 60 days during the previous calendar year.

(2) The Ethical Conduct Officer may, for good cause shown, grant to an employee or class of employees an extension of up to 45 days. An additional extension of up to 45 days may be granted by the Director for good cause shown. An employee requesting such an additional extension shall submit in writing a statement of specific reasons for the extension to the Ethical Conduct Officer who shall transmit the request with his comments to the Director.

(c) *Information required to be reported—reporting forms.* (1) Instructions as to the extent of the information to be provided in the report are included with the report form. More detailed instructions may be found in title 5, Code of Federal Regulations, Part 734.

(2) Each report submitted to the Ethical Conduct Officer shall be a full and complete statement, on the form prescribed by the Director and in accordance with instructions issued by him. The form currently in use is Standard Form 278.

(3) The basic categories of information to be included in the report are: Income from sources other than the Postal Service; interests in property; purchases, sales and exchanges of property; gifts and reimbursements; liabilities; positions held; and relations with other employers.

(d) *Reviewing reports and remedial action.* (1) Financial disclosure reports filed in accordance with the provisions of this section shall within 60 days after the date of filing be reviewed by the Ethical Conduct Officer, who shall either approve the report, or make an initial determination that a conflict or appearance thereof exists. In conducting this review, the Ethical Conduct Officer

may utilize the assistance of the reporting employee's Associate Ethical Conduct Officer or his or her designee.

(2) If the reviewing official considers that additional information is needed to complete the report or to allow an adequate review to be conducted, the official shall request the reporting employee to furnish that information by a specified date. The reporting employee shall promptly comply with that request.

(3) If the reviewing official determines initially that a conflict or the appearance of a conflict exists, he shall proceed as provided in § 447.32, relating to remedial action.

(4) The Ethical Conduct Officer shall refer to the Postmaster General the name of any employee he or she has reasonable cause to believe has wrongfully failed to file a report or has wrongfully falsified or failed to report required information.

(5) The Postmaster General may take any appropriate personnel or other action in accordance with applicable law or regulations against any employee whose name is so referred. He shall cause the Chief Inspector to refer to the Attorney General the name of any employee he has reasonable cause to believe has willfully failed to file a report or has willfully falsified or failed to report required information.

(e) *Custody of and public access to reports.* (1) Retention of reports. Each report filed with the Ethical Conduct Officer shall be retained by him for a period of six years. After the six-year period the report shall be destroyed unless needed in connection with an investigation then pending.

(2) Availability for public inspection. Each report shall, within 15 days after it is received, be available for inspection by, or a copy of it shall be furnished to, any person who makes a written application stating:

(i) The person's name, occupation and address;

(ii) The name and address of any other person or organization on whose behalf the inspection or copy is requested; and

(iii) That the person is aware of the prohibitions on the obtaining or use of the report, as set forth in section 205(c)(1) of Pub. L. 95–521, the Ethics in Government Act.

The application shall be available to the public throughout the remainder of the period during which the report itself is available to the public. A reproduction fee of 10 cents per page shall be charged if the aggregate number of pages furnished to or for the benefit of a person or related persons exceeds 30.

(3) Official Position Description. A copy of the official position description of the position held by the reporting employee shall, if available, be attached by the Ethical Conduct Officer to each report. If an official position description is not available, but another form of position description is, the latter shall be attached. A copy of the position description shall be available or furnished to the public together with the report to which it pertains.

(f) *Waiver regarding certain personal gifts.* An individual seeking an exemption pursuant to subsection 202(a)(2)(D) of Pub. L. 95–521, the Ethics in Government Act (to exempt one or more gifts from aggregation under the provisions of said subsection) shall file a request with the Director which sets forth the identity and occupation of the donor; a statement that the relationship between the donor and the reporting individual is purely personal in nature; and a statement that neither donor nor any person or organization for whom the donor actually works or serves as a representative conducts business with, or is subject to regulation by, or is directly affected by action taken by the agency by which the reporting individual is employed. In the event that the immediately preceding statement cannot be made without qualification, the reporting individual may indicate such qualifications along with a statement demonstrating that he or she plays no role in any official action which might directly affect the donor or any organization for which such donor works or serves as a representative. Such a request will be made publicly available if, and at the time, it is granted.

§ 447.81 [Amended]

4. In § 447.81, paragraph (h) is removed, and paragraphs (i) and (j) are redesignated (h) and (i) respectively.

5. Add new Part 956 reading as follows:

PART 956—RULES OF PRACTICE IN PROCEEDINGS RELATIVE TO DISCIPLINARY ACTION FOR VIOLATION OF RESTRICTIONS ON POST-EMPLOYMENT ACTIVITY

Sec.

956.1 Authority for rules.
956.2 Scope of rules.
956.3 Definitions.
956.4 Initiation of proceedings.
956.5 Answer.
956.6 Hearing election.
956.7 Notice of hearing.
956.8 Reply.
956.9 Service and filing documents for the record.
956.10 Respondent's failure to appear at the hearing.
956.11 Amendment of pleadings.
956.12 Continuances and extensions.
956.13 Hearings.
956.14 Appearances.
956.15 Presiding officer.
956.16 Burden of proof and evidence.
956.17 Discovery—depositions.
956.18 Interrogatories to parties, admission of facts, and production of documents.
956.19 Transcript.
956.20 Proposed findings and conclusions.
956.21 Decisions.
956.22 Exceptions to initial decision or tentative decision.
956.23 Judicial Officer.
956.24 Motion for reconsideration.
956.25 Modification or revocation of orders
956.26 Computation of time.
956.27 Official record.
956.28 Ex parte communications.

Authority: 18 U.S.C. 207(j), 39 U.S.C. 204, 401.

§ 956.1 Authority for rules.

The rules in this part are issued by the Judicial Officer of the Postal Service pursuant to authority delegated by the Postmaster General (39 U.S.C. 204, 401).

§ 956.2 Scope of rules.

The rules in this part shall be applicable in all formal proceedings before the Postal Service pertaining to proposed disciplinary action initiated under § 447.34 of this title.

§ 956.3 Definitions.

(a) The term "Ethical Conduct Officer" has the same meaning as in § 447.31 of this title and includes his authorized representative.

(b) "Respondent" means any individual who has been served a written notice of proposed disciplinary action pursuant to § 447.34 of this title.

(c) The "Recorder" means the Recorder of the U.S. Postal Service, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

§ 956.4 Initiation of proceedings.

(a) The Ethical Conduct Office shall initiate a proceeding by serving upon the proposed respondent a written notice of proposed disciplinary action in the manner hereinafter (§ 956.9(d)) provided for the service of all other papers.

(b) The notice shall:

(1) State that disciplinary action is being considered;

(2) Inform the respondent of the subsection of section 207 (18 U.S.C. 207) that he is alleged to have violated and of the basis of the allegation;

(3) Inform the respondent of the disciplinary action which is proposed;

(4) Advise the respondent that he may oppose the proposed disciplinary action by filing an answer within 20 days following receipt of the notice;

VOL 48 ISS 93 MY 12 1983 UMI

(5) State that the disciplinary action will not become effective until after a final agency decision is issued;

(6) Inform the respondent of the rules in this part, a copy of which shall be enclosed with the notice.

(c) If no answer is filed within 20 days following the receipt of the notice, the proposed disciplinary action set forth in the notice shall become the final agency decision without further notice to the respondent.

§ 956.5 Answer.

Within 20 days from receipt of the notice of proposed disciplinary action, the respondent may file an answer setting forth simple, concise, and direct statements admitting, denying or explaining each of the allegations set forth in the notice.

§ 956.6 Hearing election.

Either party may, within 10 days following the filing of the respondent's answer, request a hearing. If a timely request is not made, the case shall be submitted on the record without a hearing. Submission of the case without a hearing does not relieve the parties of the necessity of proving the facts supporting their allegations or defenses. Affidavits, depositions, admissions, answers to interrogatories and stipulations may be employed to supplement the pleadings which constitute the record. The presiding officer may permit such submission to be supplemented by oral argument (transcribed if requested) and by proposed findings of fact and conclusions of law.

§ 956.7 Notice of hearing.

(a) When a request for a hearing is filed, a notice of hearing, stating the time and place thereof and advising the respondent of the consequences of a failure to appear at the hearing, will be issued (see § 956.10). In setting a hearing date, due regard shall be given to the respondent's need for:

(1) Adequate time to prepare a defense properly; and

(2) An expeditious resolution of allegations that may be damaging to his or her reputation. Subject to those considerations, whenever practicable, the hearing date shall be within 30 days of the date of the notice of hearing.

(b) The notice of proposed disciplinary action and the answer together with the reply, if any, shall become the pleadings in any proceeding in which a hearing is held.

§ 956.8 Reply.

Not more than 15 days from the service of the answer, the Ethical Conduct Office may submit a reply.

§ 956.9 Service and filing of documents for the record.

(a) Each party shall file with the Recorder pleadings, motions, orders and other documents for the record. The Recorder shall cause copies to be served promptly on other parties to the proceeding and on the presiding officer.

(b) The parties shall submit four copies of all documents unless otherwise ordered by the presiding officer. One copy shall be signed as the original.

(c) Documents shall be dated and shall state the docket number and title of the proceeding. Any pleading or other document required by these rules or by order of the presiding officer to be filed by a specified date shall be filed with the Recorder on or before such date. The filing date shall be entered thereon by the Recorder.

(d) Service of all papers shall be effected by mailing the same, postage prepaid registered or certified mail, return receipt requested, or by causing said notice to be personally served on the proposed respondent by an authorized representative of the Postal Service. In the case of personal service, the person making service shall if possible secure from the proposed respondent or his agent, a written acknowledgment of receipt of said notice, showing the date and time of such receipt. If the person upon whom service is made will not acknowledge receipt, the person effecting service shall execute a statement, showing the time, place and manner of service, which shall constitute evidence of service. The acknowledgment, statement, or return receipt, when service is effected by mail, shall be made a part of the record by the Ethical Conduct Officer. The date of delivery, as shown by the acknowledgment or statement of personal service or the return receipt, shall be the date of service.

§ 956.10 Respondent's failure to appear at the hearing.

If the respondent shall fail to appear at the hearing, the presiding officer shall receive the Ethical Conduct Officer's evidence and render a decision without requirement of further notice to the respondent.

§ 956.11 Amendment of pleadings.

(a) By consent of the parties a pleading may be amended at any time. Also, a party may move to amend a pleading at any time prior to the close of the hearing: Provided, That the proposed amendment is reasonably within the scope of the proceeding.

(b) When issues not raised by the pleadings but reasonably within the scope of the proceedings initiated by the notice of proposed disciplinary action are tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings. Such amendments as may be necessary to make the pleadings conform to the evidence and to raise such issues shall be allowed at any time upon the motion of any party.

(c) If a party objects to the introduction of evidence at the hearing on the ground that it is not within the issues framed by the pleadings, but fails to satisfy the presiding officer that an amendment of the pleadings would prejudice him on the merits, the presiding officer may allow the pleadings to be amended and may grant a continuance to enable the objecting party to rebut the evidence presented.

(d) The presiding officer may, upon reasonable notice and upon such terms as are just, permit service on a supplemental pleading setting forth transactions, occurrences, or events which have transpired since the date of the pleading sought to be supplemented and which are relevant to any of the issues involved.

§ 956.12 Continuances and extensions.

Continuances and extensions will not be granted by the presiding officer except for good cause shown.

§ 956.13 Hearings.

(a) Hearings are held at the headquarters of the Postal Service, Washington, D.C. 20260, or other locations designated by the presiding officer.

(b) A party may, not later than 7 days prior to the scheduled date of a hearing, file a request that such hearing be held at a place other than that designated in the notice of hearing. He shall support his request with a statement outlining:

(1) The evidence to be offered in such place;

(2) The names and addresses of the witnesses who will testify;

(3) The reasons why such evidence cannot be produced at the place designated in the notice of hearing.

The presiding officer shall give consideration to the convenience and necessity of the parties and the relevance of the evidence to be offered.

§ 956.14 Appearances.

(a) A respondent may appear and be heard in person or by attorney.

(b) An attorney may practice before the Postal Service in accordance with applicable rules issued by the Judicial Officer (see Part 951 of this chapter).

(c) When a respondent is represented by an attorney, all pleadings and other papers subsequent to the notice of proposed disciplinary action shall be mailed to the attorney.

(d) All counsel shall promptly file notices of appearance. Changes of the respondent's counsel shall be recorded by notices from retiring and succeeding counsel and from the respondent.

(e) After an answer has been filed pursuant to the rules in this part, the Law Department shall represent the Ethical Conduct Office in further proceedings relative to the hearing and shall in its notice of appearance identify the individual member of such department who has been assigned to handle the case on its behalf.

§ 956.15 Presiding officer.

(a) The presiding officer shall be an Administrative Law Judge qualified in accordance with law. The Chief Administrative Law Judge shall assign cases under this part upon rotation so far as practicable. The Judicial Officer may, for good cause found, preside at the reception of evidence upon request of either party.

(b) The presiding officer shall have authority to:

(1) Administer oaths and affirmations;

(2) Examine witnesses;

(3) Rule upon offers of proof, admissibility of evidence, and matters of procedure;

(4) Order any pleading amended upon motion of a party at any time prior to the close of the hearing;

(5) Maintain discipline and decorum and exclude from the hearing any person acting in an indecorous manner;

(6) Require the filing of briefs or memoranda of law on any matter upon which he is required to rule;

(7) Order prehearing conferences for the purposes of the settlement or simplification of issues by the parties;

(8) Permit oral argument by any party;

(9) Order the proceeding reopened at any time prior to his decision for the receipt of additional evidence;

(10) Render an initial decision, if the presiding officer is not the Judicial Officer, which becomes the final agency decision unless a timely appeal is taken; the Judicial Officer may issue a tentative or a final decison;

(11) Take such other and further action as may be necessary properly to preside over the proceeding and render decision therein.

§ 956.16 Burden of proof and evidence.

(a) Each party may introduce and examine witnesses and submit physical evidence. The Ethical Conduct Officer has the burden of proof in any proceeding under this part and must establish a violation by a preponderance of the evidence.

(b) Except as otherwise provided in these rules, the Federal Rules of Evidence shall be applicable to the hearings conducted under this part. Such rules may be relaxed, however, to the extent that the presiding officer deems proper to insure a fair hearing.

(c) Testimony shall be under oath or affirmation, and witnesses shall be subject to cross-examination.

(d) Agreed statements of fact may be received in evidence.

(e) Official notice or knowledge may be taken of the types of matters of which judicial notice or knowledge may be taken.

(f) Each party may present oral argument.

§ 956.17 Discovery—depositions.

(a) The parties are encouraged to engage in voluntary discovery procedures. In connection with any deposition or other discovery procedure, the presiding officer may make any order which justice requires to protect a party or person from annoyance, embarrassment, oppression, or undue burden or expense; and those orders may include limitations on the scope, method, time and place for discovery, and provisions for protecting the secrecy of confidential information or documents.

(b) After an answer has been filed, the parties may mutually agree to, or the presiding officer may, upon application of either party and for good cause shown, order the taking of the testimony of any person by deposition upon oral examination or written interrogatories before any officer authorized to administer oaths at the place of examination, for use as evidence or for purposes of discovery. The application for order shall specifiy whether the purpose of the deposition is discovery or for use as evidence.

(c) The time, place, and manner of taking depositions shall be mutually agreed by the parties or, failing such agreement, governed by order of the presiding officer.

(d) No testimony taken by depositions shall be considered as part of the evidence in a hearing unless and until such testimony is offered and received in evidence at such hearing. It will not ordinarily be received in evidence if the deponent is present and can testify personally at the hearing. In such instances, however, the deposition may be used to contradict or impeach the testimony of the witness given at the hearing. In cases submitted on the record, the presiding officer may, in his discretion, receive depositions as evidence in supplementation of that record.

(e) Each party shall bear its own expenses associated with the taking of any deposition.

§ 956.18 Interrogatories to parties, admission of facts, and production of documents.

(a) After an answer has been filed, a party may serve on the other party written interrogatories to be answered separately in writing, signed under oath and returned within 30 days. Upon timely objection by the party, the presiding officer will determine the extent to which the interrogatories will be permitted. The scope and use of interrogatories will be controlled by § 956.17.

(b) After an answer has been filed, a party may serve upon the other party a request for the admission of specified facts. Within 30 days after service, the party served shall answer each requested fact or file objections thereto. The factual propositions set out in the request shall be deemed admitted upon the failure of a party to respond to the request for admission.

(c) Upon motion of any party showing good cause therefor, and upon notice, the presiding officer may order the other party to produce and permit the inspection and copying or photocopying of any designated documents or objects, not privileged, specifically identified, and their relevance and materiality to the cause or causes in issue explained, which are reasonably calculated to lead to the dicovery of admissible evidence. If the parties cannot themselves agree thereon, the presiding officer shall specifiy just terms and conditions in making the inspection and making the copies and photographs.

§ 956.19 Transcript.

Testimony and argument at hearings shall be reported verbatim, unless the presiding officer otherwise orders. Transcripts or copies of the proceedings shall be supplied to the parties at such rates as may be fixed by contract between the reporter and the Postal Service.

VOL 48 ISS 93 MY 12 1983 UMI

§ 956.20 Proposed findings and conclusions.

(a) Each party to a proceeding, except one who fails to appear at the hearing may, unless the presiding officer orders otherwise, submit proposed findings of fact, conclusions of law and supporting reasons, either in oral or written form at the discretion of the presiding officer. The presiding officer may also require parties to any proceeding to submit proposed findings of fact and conclusions of law with supporting reasons. Unless ordered otherwise by the presiding officer, the date set for filing of proposed findings of fact and conclusions of law shall be within 15 days after the delivery of the official transcript to the Recorder who shall notify both parties of the date of its receipt. The filing date for proposed findings shall be the same for both parties. If not submitted by such date, or unless an extension of time for the filing thereof is granted, they will not be included in the record or given consideration.

(b) Proposed findings of fact shall be set forth in serially numbered paragraphs and shall state with particularity all evidentiary facts in the record with appropriate citations to the transcript or exhibits supporting the proposed findings. Each proposed conclusion shall be separately stated.

§ 956.21 Decisions.

(a) A written initial decision by an Administrative Law Judge shall be rendered with all due speed. The initial decision shall include findings of fact and conclusions of law, with the reasons therefor, upon all the material issues of fact or law presented on the record, and an appropriate order. The initial decision shall become the final decision of the Postal Service unless an appeal is taken in accordance with § 956.22.

(b) When the Judicial Officer presides at the hearing, he shall issue a final or a tentative decision. Such decision shall include findings of fact and conclusions of law, with the reasons therefor, upon all the material issues of fact or law presented on the record, and an appropriate order. A tentative decision shall become the final decision of the Postal Service unless exceptions are filed in accordance with § 956.22.

§ 956.22 Exceptions to initial decision or tentative decision.

(a) A party in a proceeding presided over by an Administrative Law Judge, except a party who failed to file an answer, may appeal to the Judicial Officer by filing exceptions in a brief on appeal within 15 days from the receipt of the Administrative Law Judge's written initial decision.

(b) A party in a proceeding presided over by the Judicial Officer, except one who has failed to file an answer, may file exceptions within 15 days from the receipt of the Judicial Officer's written tentative decision.

(c) Upon receipt of the brief on appeal from an initial decision of an Administrative Law Judge, the Recorder shall promptly transmit the record to the Judicial Officer. The date for filing the reply to a brief on appeal or to a brief in suppport of exceptions to a tentative decision by the Judicial Officer is 10 days after the receipt thereof. No additional briefs shall be received unless requested by the Judicial Officer.

(d) Briefs on appeal or in support of exceptions and replies thereto shall be filed in quadruplicate with the Recorder and contain the following matter in the order indicated:

(1) A subject index of the matters presented, with page references; a table of cases alphabetically arranged; a list of statutes and texts cited, with page references.

(2) A concise abstract or statement of the case.

(3) Numbered exceptions to specific findings of fact or conclusions of law of the presiding officer.

(4) A concise argument clearly setting forth points of fact and of law relied upon in support of, or in opposition to, each exception taken, together with specific references to the pertinent parts of the record and the legal or other authorities relied upon.

(e) Unless permission is granted by the Judicial Officer, no brief on appeal or in support of exceptions shall exceed 50 printed or 100 typewritten pages double spaced.

(f) The Judicial Officer will extend the time to file briefs only upon motion for good cause found. The movant shall be promptly notified of the Judicial Officer's decision on the motion.

§ 956.23 Judicial officer.

The Judicial Office is authorized:

(a) to act as presiding officer at hearings;

(b) to render tentative decisions;

(c) to render final decisions of the Postal Service;

(d) to refer the record in any proceedings to the Postmaster General or the Deputy Postmaster General who will make the final decision of the Postal Service; and

(e) to revise or amend these rules of practice. In determining appeals from initial decisions or exceptions to tentative decisions, the entire official record will be considered before a final decision of the Postal Service is rendered. Before rendering a final decision of the Postal Service, the Judicial Officer may order the hearing reopened for the presentation of additional evidence by the parties.

§ 956.24 Motion for reconsideration.

Within 10 days from the date thereof, or such longer period as may be fixed by the Judicial Officer, either party may file a motion for reconsideration of the final agency decision. Each motion for reconsideration shall be accompanied by a brief clearly setting forth the points of fact and law relied upon in support of said motion. The Judicial Officer, in his discretion, may hold a hearing on the issues raised by the motion.

§ 956.25 Modification or revocation of orders.

A party against whom an order has been issued may file an application setting forth reasons which he believes warrant the modification or revocation of the order. The Recorder shall transmit a copy of the application to the Ethical Conduct Officer who shall file a written reply. A copy of the reply shall be sent to the applicant by the Recorder. The Judicial Officer, in his discretion, may hold a hearing on the issues raised by the application. Thereafter an order granting or denying such application will be issued by the Judicial Officer.

§ 956.26 Computation of time.

A designated period of time under the rules of this part excludes the day the period begins and includes the last day of the period unless the last day is a Saturday or Sunday or legal holiday, in which event the period runs until the close of business on the next business day.

§ 956.27 Official record.

The transcript of testimony together with all pleadings, orders, exhibits, briefs, and other documents filed in the proceeding shall constitute the official record of the proceeding.

§ 956.28 Ex parte communications.

The provisions of 5 U.S.C. 551(14), 556(d) and 557(d) prohibiting ex parte communications are made applicable to proceedings under these rules of practice.

(39 U.S.C. 401, 18 U.S.C. 207(j))

BILLING CODE 7710-12-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-41

Interest Assessment on Overcharges (Receivables)

AGENCY: Office of Plans, Programs, and Financial Management, General Services Administration.

ACTION: Proposed rule.

SUMMARY: The General Services Administration (GSA) proposes to amend the Federal Property Management Regulations to enable GSA to assess interest on overcharges issued to transportation carriers for freight and passenger services furnished for the account of the United States. This amendment is necessary in order to increase the efficiency of Government-wide efforts to collect debts owed the United States and to provide additional procedures for the collection of debts owed the United States as required by the Debt Collection Act of 1982, Pub. L. 97-365.

DATE: Written comments must be received by July 11, 1983.

ADDRESS: Comments should be sent to the General Services Administration (BWCP), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: John W. Sandfort, Chief, Regulations, Procedures, and Claims Branch, Office of Transportation Audits (202-786-3014).

SUPPLEMENTARY INFORMATION: The GSA has determined that this proposed rule is not a major rule for the purposes of Executive Order 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. The GSA has based all administrative decisions underlying this proposed rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this proposed rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-41

Air carriers, Accounting, Claims, Freight, Freight forwarders, Government property management, Maritime carriers, Moving of household goods, Passenger services, Railroads, Transportation.

PART 101-41—TRANSPORTATION DOCUMENTATION AND AUDIT

It is proposed to amend 41 CFR Part 101-41 as follows:

Subpart 101-41.5—Claims by the United States Relating to Transportation Services

Section 101-41.502(b)(3) is added to read as follows:

§ 101-41.502 Examination of payments and initiation of collection action.

* * * * *

(b) * * *

(3) Overcharges issued in accordance with § 101-41.502(b)(1) are subject to the assessment of a minimum annual rate of interest equal to the average investment rate for Treasury tax and loan accounts for the twelve-month period ending on September 30 of each year, rounded to the nearest whole per centum. The Treasury will publish such rate each year not later than October 31 to become effective on the first day of the next calendar quarter, and may revise the rate quarterly. Interest accrues as follows: (i) From the voucher payment date to the Notice of Overcharge date when refund is postmarked within 30 days of the date of the Notice of Overcharge; (ii) from the voucher payment date to the date of payment of the amount due when refund is not postmarked within 30 days of the date of the Notice of Overcharge; and (iii) from the voucher payment date to the date of deduction action by offset when such action is taken. The rate of interest to be charged shall be the rate in effect on the date from which interest accrues, and shall remain fixed at that rate for the duration of the indebtedness. Charges to cover the cost of processing and handling delinquent claims, and a penalty charge, not to exceed 6 per centum per annum, will be assessed for failure to pay any portion of a debt more than 90 days past the date of the Notice of Overcharge.

* * * * *

(31 U.S.C. 952, 31 U.S.C 3726 and 40 U.S.C. 486(c)).

Dated: April 13, 1983.

[CC Docket No. 78-50; FCC 83-177]

Telecommunications Services for the Deaf and Hearing Impaired

AGENCY: Federal Communications Commission.

ACTION: Order terminating notice of inquiry proceeding.

SUMMARY: Commission terminates Notice of Inquiry proceeding re Telecommunications Services for the Deaf and the Hearing Impaired which sought comments with respect to the telecommunications needs of the deaf and the hearing impaired. The inquiry was terminated in CC Docket No. 78-50, largely because of provisions of the Telecommunications for the Disabled Act of 1982 (Disabled Act). That legislation requires the Commission to make essential telephones hearing aid compatible and to ensure reasonable access by the hearing impaired to telephone service. In addition, the Commission does not require a reduction in long distance rates for users of telecommunications devices for the deaf (TTYs) because competition in the interexchange market has reduced rates and AT&T offers a discount to deaf TTY users. Finally, the Commission does not require TTYs to be provided in conjunction with pay telephones because portable TTYs are available which can be used with coin telephones and the Disabled Act is designed in part to promote access to such devices.

Memorandum Opinion and Order

In the matter of Telecommunications Services for the deaf and hearing impaired; CC Docket No. 78-50.

See 2-21-78; 43 FR 7263.

Adopted April 27, 1983.

Released May 3, 1983.

By the Commission: Commissioner Jones absent.

I. Introduction

1. This inquiry was instituted in February 1978 in order to examine the telecommunications needs of the deaf and the hearing impaired, the adequacy of existing telecommunications services for such persons, and the feasibility of improving such services. 67 FCC 2d 1602 (1978). In view of the Telecommunications for the Disabled Act of 1982, Pub. L. 97-410, 97th Cong., 2d Sess., signed into law on January 3, 1983, and due to changed circumstances we are terminating this proceeding. *See Access to Telecommunications Equipment by the Hearing Impaired and Other Disabled Persons*, CC Docket No. 83-427, FCC 83-176 (adopted April 27, 1983) (*Disabled NPRM*).

2. We initiated this proceeding in Docket 78-50 to obtain information which would be of assistance in exercising our statutory responsibility to determine what actions, if any, were feasible to foster additional use of communications services by the disabled. The notice also stated that this inquiry would provide "a nationwide forum whereby communications common carriers and other vendors of communications related equipment could interact with the deaf community in order to better understand their communications needs" and could provide a repository for comments with respect to research efforts which have been or might be undertaken to improve telecommunications services for the deaf and the hearing impaired.

3. We have received a substantial number of formal and informal comments which are of significant value to all individuals and organizations that may be concerned with the telecommunications needs of the deaf and the hearing impaired.[1] *See* Appendix A for list of commenting parties. Many parties have noted that the telecommunications needs of the deaf are quite distinct from those of persons who have less severe hearing impairments. Persons who can distinguish spoken words with the assistance of special equipment, such as a hearing aid, use the telephone for voice communications in essentially the same manner as persons with unimpaired hearing. Persons who cannot distinguish spoken words with the assistance of any mechanical device necessarily must rely upon data communications and visual terminals.

4. Many deaf persons rely upon teletypewriters (TTYs or TDDs), alternatively named telecommunications devices for the deaf, to satisfy their telecommunications needs. The utility of the deaf TTY system is limited because some TTYs are not compatible with computer terminals. At the time the comments were filed, the absence of operator and directory assistance also limited the utility of the deaf TTY system. AT&T has subsequently established a toll free 800 number to provide such services to both Bell and independent telephone company customers. In addition, many comments suggested that interstate MTS rates should be reduced for deaf TTY users. AT&T recently revised that tariff to include special rates for deaf TTY users.

5. Several circumstances have caused us to terminate this proceeding. Most importantly, Congress enacted the Disabled Act. That Act is designed to promote access to telephone service by the hearing impaired. It is also designed to enable telephone companies to accommodate the communications needs of persons whose speech, hearing, sight or mobility is impaired. Pursuant to the terms of the Act we have today adopted a Notice of Proposed Rulemaking in CC Docket 83-427, which will result in rules to implement the Act. *See Disabled NPRM*. Some of the issues which were originally raised in CC Docket 78-50 were addressed by Congress in the Disabled Act and those issues will therefore be left to CC Docket 83-427 for resolution. Those issues raised in Docket 78-50 include: (1) Whether the Commission should adopt technical standards to achieve hearing-aid compatibility in telephone terminal equipment; (2) whether any regulatory impediments prevent technological improvement in services or equipment for the hearing impaired, (3) whether and what types of communications services should be improved for the deaf, (4) whether any Commission action could be taken to reduce the high cost of obtaining deaf TTYs, (5) whether we should resolve incompatibility problems between Baudot code TTYs and those which operate on the ASCII format, and (6) whether government funded research and development with respect to ways to improve the deaf TTY system is needed.

6. Two other issues raised in Docket 78-50 are resolved in this Order. Commission action at this time appears unnecessary on the proposal to reduce MTS rates for TTY users due to carrier actions. Finally, we also consider whether we should require TTYs to be provided in conjunction with coin telephones.

II. Discussion

A. Issues Addressed by the Disabled Act

7. A major focus of the Disabled Act is to promote access by the hearing impaired to hearing-aid compatible telephones. In achieving that goal, the Act requires the Commission to adopt or approve technical standards defining such hearing-aid compatibility. Disabled Act, § 610(c). Thus, Congress has resolved the issue raised in the Notice of Inquiry in the Docket 78-50 proceeding whether or not to establish such standards.

8. In addition, the Notice of Inquiry asked commenting parties whether there existed any regulatory barriers which prevented technological innovation in services for the deaf. Section 610(e) requires that any regulations issued pursuant to the Act be framed to avoid inhibiting technological achievements. Therefore, there is no need to further address this issue in this proceeding.

9. Furthermore, the Notice raised the question of whether a need exists for telephone companies to provide the following services for deaf customers using TTYs: operator, directory and business office assistance, and recorded messages. Carrier services for deaf TTY users were quite limited at the time the comments were filed. The AT&T comments stated that it was in the process of establishing consumer assistance offices for each operating company which would provide business office and directory assistance services for TTY users. No telephone company was providing operator assistance services to deaf TTY users at the time we instituted this Inquiry. The absence of operator assistance services precluded deaf TTY users from placing any type of call that requires operator assistance.

10. AT&T subsequently established regional centers that do provide operator, directory and business office assistance to deaf TTY users. AT&T has advised us that these operator assistance services are available 24 hours a day, that such services are offered through a single nationwide toll-free number, (800) 855-1155, and that the services are available to both Bell and independent telephone company customers. Although it appears that carrier action has ameliorated somewhat the need for additional services for deaf TTY users, it is not clear the extent to which current services are offered and whether the Commission should continue to rely on the voluntary cooperation of only one carrier, AT&T, to provide such services. Therefore, this issue will be addressed in the context in which it is raised by the Disabled Act. *See Disabled NPRM*, para. 11.

11. This Notice of Inquiry further raised the question of whether there was any Commission action which could reduce the high cost of obtaining a TTY. At the time comments were filed in this proceeding, TTYs for the deaf cost between $300 and $800. Any reduction in costs for those TTYs would expand the use of the network for the deaf.

12. In the Disabled Act, Congress determined that the most cost-effective method of providing specialized CPE for the deaf is under state-sponsored programs whereby state public utility commissions permit equipment costs to be recovered in the tariff rates for communications services. The implementation of the Act should go far to promote the availability of such devices because the cost of obtaining TTYs could be subsidized, lowering the costs for individual deaf persons. See Disabled Act, §610(g); *Disabled NPRM*, paras. 28-35. Therefore, we find it unnecessary to further address the high cost of obtaining TTYs in this proceeding.

13. In addition, the comments filed in this proceeding indicated that the usefulness of existing standard deaf TTY equipment was limited because many of those devices are incompatible with other types of TTYs and computers which have communication capabilities. Around 1967 the deaf began to rely upon used teletypewriters donated by AT&T, Western Union and others, using a specially designed acoustic coupler which allowed the user to transmit and receive teletypewriter messages over the standard telephone network. Teletypewriters employed the five bit Baudot code with a half duplex modem. Eventually, some devices were developed employing the eight bit ASCII code with a full duplex modem, which is also the standard employed with most personal computer terminals. Generally, those persons with Baudot code TTYs cannot communicate with devices using the ASCII code, and vice versa, although some of the newer deaf devices can transmit and receive in either code. *See* "Telecommunications Devices for the Deaf", *Telephone Engineer & Management*, at p. 69, October 1, 1980.

14. At the time comments were filed, the general consensus appeared to be that the deaf will be relying primarily upon TTYs to satisfy their interactive telecommunication needs for a substantial period of time and that efforts to improve telecommunications services for the deaf should accordingly be directed at making TTY communications less costly and more effective. Nevertheless, technological advances which have occurred since the time comments were filed in this proceeding, particularly the proliferation of personal computers, have cast substantial doubt on that conclusion. Particularly given significant price reductions for personal computers over the last few years and the ability of these terminals to communicate with other ASCII-compatible equipment, there is significantly less reason to conclude that TTYs which employ the Baudot code will be the primary means of the future for the deaf to communicate over the nationwide telephone network.

15. Even if most deaf TTY users will not be interested in interacting with computers, they will probably be interested in communicating with hearing persons who acquire ASCII compatible computers. Many of these computers will also be used as communications terminals. The deaf would probably realize benefits in the long-run if they used TTYs to communicate with persons who have ASCII computer terminals.

16. Some comments state that the incompatibility problem will eventually solve itself without any governmental intervention. Many deaf persons will acquire dual capacity devices, which are presently available during a transition period. The Baudot terminals will eventually cycle themselves out of existence and both deaf and hearing persons will then acquire ASCII only devices. The proliferation of cheap personal computers should also reduce the need for government action to solve compatibility problems.

17. The Disabled Act, by providing for Commission-promulgated rules which would ensure access to telephone service by the hearing impaired, requires that we address the problem of whether customer premises equipment (CPE) used by the deaf provides them with reasonable access to telephone service. The potential TTY incompatibility problem may limit such access. In light of the provisions of the Disabled Act and because the comments received in this Notice of Inquiry are now almost four years old, we are seeking updated comments with respect to this potential incompatibility problem in the context of the CC Docket 83-427 proceeding. The consideration of this issue in this proceeding is therefore terminated.

18. Finally, many comments also suggest that government research funds should be provided to finance the development of an inexpensive ASCII or dual capability TTY which the deaf could use. Congress has established a regulatory framework in the Disabled Act for the provision of TTYs. Congress has determined that carriers should decide, with state regulatory guidance, what equipment to offer disabled persons. Disabled Act, section 610(g). In light of this Congressional scheme, we conclude that no further Commission action, other than to implement the Act, is warranted. The Act should be one mechanism to provide research and development funds for communications CPE for the disabled since states may authorize carriers to recover such costs in the rates for communications services. Thus, in conjunction with privately sponsored and government-funded research efforts, the Disabled Act can further technological advances in CPE needs of the deaf.

B. Toll Rates for TTY Use

19. We have received over sixty formal or informal comments which express the belief that toll rates should be reduced for TTY communications by deaf users. Some suggested that hearing persons who use TTYs to communicate with deaf persons should also qualify for reduced rates. Since this Inquiry was instituted, long distance service has been the subject of increasing competition. This competition has reduced rates substantially below what they were in 1978. Thus, reduced long distance rates are available for hearing, as well as deaf, users of TTYs.

20. In addition, AT&T has a tariff in effect at this Commission that offers reductions in interstate MTS rates for deaf TTY users. *See* AT&T Tariff FCC No. 283, § 3.1[c][4]. In view of the fact that reduced long distance rates are available to most telephone users, including deaf TTY users, and because of AT&T's action giving deaf TTY users discounted long distance rates, no purpose would be served by conducting further proceedings to determine whether this Commission should adopt rules that would prescribe reduced rates for deaf TTY users.

[1] These comments are available for public inspection in the Docket Reference Room in the Commission's Offices at 1919 M Street NW., Washington, D.C.

VOL 48 ISS 93 MY 12 1983 UMI

C. Use of Coin Telephones

21. The initial Notice invited interested persons to comment upon the need for pay TTYs which the deaf could use to place calls from coin telephones. We received a number of comments from deaf individuals and organizations that said such pay TTYs would be extremely useful to the deaf and that a particular need exists in places such as rail, bus and airline terminals. Most of these comments suggested that the telephone companies provide the pay TTYs. The comments indicate that no telephone company provides pay TTYs and none of those companies has any present plans to provide them.

22. The AT&T comments state that the provision of pay TTYs is not "currently feasible" and that its experience with coin telephones indicates that any pay TTY would have to be placed in a "secure and attended location." GTE says that its experience with the effects of "environmental stresses, abuse and vandalism" upon regular coin telephones demonstrates that carrier provision of pay TTYs would be "economically prohibitive." The Reply of the National Center for Law and the Deaf says that public TTYs could be placed in many sheltered, supervised areas such as libraries, government buildings and police stations.

23. Congress has determined pursuant to the Disabled Act that carriers and state public utility commissions should decide such matters. Section 610(g) of the Act permits state commissions to allow carriers to subsidize the provision of specialized CPE needed by disabled persons from revenues from rates for communications services. The legislative history of the Act makes clear that the subsidy should be restricted to "those persons, to institutions which serve them, and to associates who require compatible equipment regularly in order to communicate with them." House Report No. 97–888, 97th Cong., 2d Sess., at 13 (1982). In those institutions which serve the deaf, a state-sponsored subsidy program could provide access to such pay TTYs. *See Disabled NPRM*, paras. 33–35. Thus, the Act encourages states to devise ways to make available TTYs for use in conjunction with public coin telephones.

24. Furthermore, many of the newer TTYs are operated by means of acoustic couplers to directly interface with the telephone network through any standard telephone and are light enough to be easily transportable. *See* "Telecommunications Devices for the Deaf," *Telephone Equipment & Management*, at p. 73, October 11, 1980. Portable TTYs would enable the deaf to use coin telephones when they are away from home. Any state-sponsored program for subsidized CPE offerings could easily take portability characteristics into account in promoting access by the hearing impaired to specialized CPE needed to use residential, business and coin telephones.

III. Ordering Clauses

25. Accordingly, it is hereby ordered, that pursuant to Section 4(i) and 4(j) of the Communications Act of 1934, as amended (47 U.S.C. 154 (i) and (j)), this Inquiry is terminated.

26. It is further ordered, that the AT&T motion, dated May 5, 1980, for leave to file supplemental comments is granted.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[Gen. Docket No. 80-183; RM-2365; RM-2750; RM-3047; RM-3068; FCC 83-145]

Amendment of the Commission's Rules To Allocate Spectrum in the 928–941 MHz Band and To Establish Other Rules, Policies, and Procedures for One-Way Paging Stations in the Domestic Public Land Mobile Radio Service

AGENCY: Federal Communications Commission.

ACTION: Further notice of proposed rulemaking.

SUMMARY: In a companion decision the Commission adopted rules and policies to govern the licensing and use of three nationwide paging frequencies in the 900 MHz band, *Memorandum Opinion and Order on Reconsideration (Part 2)*, Gen. Doc. 80–183, FCC 83–145. The Commission considered the record insufficient to adopt final rules on two issues. Therefore, in the *Further Notice*, the Commission solicits comments on the method and extent of rate regulation for the network participants and whether to retain the requirement of open and nondiscriminatory access for the network operators.

COMMENT DATE: Comments are due by June 10, 1983 and replies by July 11, 1983.

ADDRESS: Send comments to—Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Lisa Wershaw, Common Carrier Bureau, (202) 632–6450.

List of Subjects in 47 CFR Part 22

Communications common carriers, Mobile radio service.

Further Notice of Proposed Rulemaking

In the matter of amendments of Parts 2 and 22 of the Commission's rules to allocate

spectrum in the 928–941 MHz Band and to establish other rules, policies, and procedures for one-way paging stations in the domestic public land mobile radio service; Gen. Doc. No. 80–183, RM–2365, RM–2750, RM–3047, RM–3068.

Adopted April 7, 1983.

Released: May 4, 1983.

By the Commission: Commissioner Fogarty absent; Commissioners Jones and Sharp concurring in the result.

1. In a companion decision adopted today,[1] we set forth policies and rules governing licensing and use of three frequencies previously allocated for nationwide network paging at 900 MHz.[2] We decided to license three "network organizers" whose services will be distributed in each community served by carriers operating locally ("network operators"). We also tentatively required open and nondiscriminatory access by the network operators to the network channels. Under that access plan, the network operators will be subject only to the minimal federal regulation necessary to assure technical compliance with the underlying network, avoidance of harmful electrical interference, and proper lighting and marking of antenna structures. Because paging networks will be nationwide in scope and predominantly will transmit interstate messages, we preempted state regulation of technical standards, entry and exit. We did not believe, however, that the record was sufficient to enable us to determine the method of rate regulation which will best satisfy the public interest. Accordingly, in this Further Notice we solicit comments on that issue. We also solicit comment on the issue of open and nondiscriminatory access for the network operators.

Tariff Options

2. *Option 1.* Under this option, we would require each of the three common carrier network licensees to file a tariff with the Commission in accordance with the Communications Act and Part 61 of the Commission's rules. This tariff would set forth the terms, conditions and end-to-end charges applying for through service to the ultimate user. In other words, the licensee would file the total charges for the service applicable to the ultimate user. The network licensees would be obligated to file exception rates, if any, of each local carrier on a case-by-case basis. This approach would be relatively simple and efficient because the multitude of carriers providing network service at the local level would not have to file tariffs individually. Revenues would be divided between the network licensees and local network operators pursuant to contractual arrangements. We would contemplate preempting state tariff regulation under this option because the Commission would regulate the rates.

3. *Option 2.* Under this option, which is similar to Option 1, we would also require each of the common carrier network licensees to file a tariff with the Commission in accordance with the Communications Act and Part 61 of the rules. The tariff, which also would apply to the ultimate user, would separately set forth the charges of the network licensee for the haul between its operating centers. The charges assessed by the local network operator for its haul between the ultimate user and the licensee's operating center could be handled in either of two ways. They could be filed by the licensee in its own tariff on behalf of the local operator, or they could be published in the local operator's state tariff and referenced in the FCC tariff. In each case, the local operator would be listed in the licensee's tariff as an "other participating carrier." We recognize that this option might be more burdensome and complex than Option 1.

4. *Option 3.* This option would be to regulate the rates of the network organizers for the haul between cities at the federal level and leave to the states the regulation of the rates for local access to the network as well as the long distance intrastate rates of the network organizers. It would, however, impose an additional burden on the local network operators and the network organizers because they would have to file tariffs in many jurisdictions rather than with this Commission alone. There is already substantial variance among the states in the ways they do or do not regulate local paging rates and charges. This approach may create confusion, delay and inconsistent treatment from state to state. In addition, it does not adequately recognize that network paging is predominantly interstate and, therefore, outside the jurisdiction of state regulatory authorities.

5. *Option 4.* Under this option the Commission would regulate the carrier-to-carrier rates of the three network organizers, but we would forbear from regulating the rates charged by the network operators to their customers for local distribution of network service. With only three network organizers, the marketplace may not be sufficiently competition to justify forbearance regaring the inter city, long-haul rates. On the other hand, open, nondiscriminatory access to the networks by local carriers would assure vigorous competition by the local operators. Given sufficient competition, no public purpose would be served by either state or federal scrutiny of the charges levied by the local operators on top of the network organizer's charges. Implicit in this proposal is our tentative opinion that we can both forbear from regulating preempt state regulation based on the predominantly interstate character of network paging.

6. *Option 5.* This final option is similar to the fourth option except that we would forbear from regulating the rates and charges of both the network organizers and the network operators. To adopt this approach, we would have to be satisfied that, even with only three network organizers, the marketplace is sufficiently competive that regulatory oversight of rates would not advance the public interest. A disadvantage of this option is the absence of any oversight of the network organizers to assure their compliance with the nondiscriminatory access requirement of our concurrent decision. Nevertheless, our complaint procedures would remain available to carriers who may be denied access to a network. New para. F–12 on attached sheets.

Open Access Requirement

7. In deciding to require open and nondiscriminatory access to the three network channels by the local network operators, we recited the public interest benefits expected to flow from that policy. *Reconsideration Order Part 2, supra* note 1, at paras. 20–21. However, we also recognized that there may be important operational or economic reason militating against nondiscriminatory access. *Id.* at para. 22. Moreover, competition sufficient to relieve much of our concern over potential monopoly pricing may exist even absent an access requirement. We decided, consequently, to make our access requirement tentative rather than final and to solicit further comment on this issue here. Interested persons are directed to address only the narrow question of whether we should remove the nondiscriminatory access requirement and not to reargue other issues which have been considered and resolved. We are also interested in how The access policy might be interrelated

---

[1] Memorandum Opinion and Order on Reconsideration (Part 2), Gen. Doc. No. 80–183, FCC 83–145 (Reconsideration Part 2).

[2] In this docket, we have allocated 3 MHz of spectrum (929–932 MHz) for private radio and common carrier paging. Three of the forty common carrier channels derived from the 3 MHz block are reserved for nationwide network paging. *See* First Report and Order, 89 FCC 2d 1337 (1982), *reconsideration* (Part 1), FCC 82–503, released November 16, 1982.

with the tariff options raised in this Further Notice.

Regulatory Flexibility Act—Initial Analysis

8. *Reasons for Action and Objective.* We have solicited comments on the tariff issue to help the Commission determine what method of rate regulation for 900MHz nationwide frequencies will best serve the public interest. The objective is to implement practical and effective tariff procedures and, thus, to provide expeditious nationwide paging service to the public.

9. *Legal Basis.* The authority for this proposed rulemaking is contained in Sections 4 and 303 of the Communications Act of 1934, as amended.

10. *Small Entities Affected and Potential Impact.* The impact of the rules adopted will be on all common carriers interested in offering the nationwide paging service to their subscribers. The option chosen will have no impact upon the tariff procedures and attendant paperwork requirements for the network participants.

11. *Reporting, Record-Keeping and Compliance.* Depending upon the option chosen, the participants will either be relieved of filing tariffs or will be directed to file them with the states or Federal Communications Commission. The rulemaking does not involve any additional reporting requirements other than those typically associated with rate regulation.

12. *Alternatives that Would Lessen Impact.* One proposed option is to both preempt state rate regulation and forbear from regulating the rates and charges of both the network organizers and operators. This option would eliminate all tariff filing and reporting requirements.

13. Interested parties are invited to submit written comments on their views concerning what method of rate regulation will best satisfy the public interest, and whether or not the requirement of open and nondiscriminatory access should be changed, to the Federal Communications Commission, Washington, D.C. 20554.

14. Comments should be submitted in accordance with Rule Section 1.419, 47 CFR § 1.419. Comments should be submitted by June 10, 1983, Reply Comments by July 11, 1983. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, Section 1.1231 of the Commission's Rules, 47 CFR § 1.1231. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

(Secs. 4, 303, 48 stat., as amended 1066, 1082; 47 U.S.C. 154, 303)

[CC Docket No. 82-122]

Interconnection Arrangements Between and Among Domestic and International Record Carriers; Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order & Request for Further Comments; Extension of comment/reply comment period.

SUMMARY: In an order released April 11, 1983, CC Docket No. 82-122 (48 FR 16708, April 19, 1983), the FCC requested comments on methods for applying the requirement of full and equal interconnection mandated by the Record Carrier Competition Act of 1981 to differences in access provided by record carriers. Comments were due in fifteen days. The FCC now grants a request for an additional two weeks to file comments, in response to a filed motion.

DATES: Comments are now due by May 18, 1983. Reply comments are due by June 2, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Daniel Grosh, Common Carrier Bureau, (202) 632-6917.

Order

In the matter of interconnection arrangements between and among the Domestic and International Record Carriers; CC Docket No. 82-122.

Adopted: April 29, 1983.
Released: May 3, 1983.
By the Chief, Common Carrier Bureau:

A request by RCA Global Communications, Inc. for extension to time to file comments with respect to single stage-double stage dialing access is granted. Comments presently due on or before May 4 will now be due May 18. Reply comments will be due June 2, 1983.

Federal Communications Commission.

Gary M. Epstein,

Chief, Common Carrier Bureau.

[Order 83-5-53; Docket 41354]

Delta Air Lines, Inc.; Order to Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause: Order 83-5-53, Docket 41354.

SUMMARY: The Board is issuing an order directing all interested persons to show cause why the certificate of Delta Air Lines, Inc. for Route 27-F should not be amended to delete its authority to provide the foreign air transportation of persons, property and mail between Burlington, Vermont and Montreal, Quebec, Canada.

Objections: All interested persons having objections to the Board's tentative findings and conclusions that this authority should be deleted as described in the order cited above, shall, no later than May 31, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies, addressed to Docket 41354, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428) and mail copies to all persons named in the service list for Docket 41354 (which can be obtained from the Docket Section).

A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Board will issue an order which will make final the Board's tentative findings and conclusions.

To get a copy of the complete order, request if from the CAB Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673-5432. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Krevor (202) 673-5203, Bureau of International Aviation, Civil Aeronautics Board, Washington, D.C. 20428.

By the Civil Aeronautics Board: May 6, 1983.

DEPARTMENT OF COMMERCE

International Trade Administration

[Docket No. 30505-75]

Grants for Small Business International Marketing Programs

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Fiscal Year—1983 matching grants program.

SUMMARY: As required by Title III of Pub. L. 96-481, the Commerce Department's International Trade Administration is carrying out a program awarding matching grants of up to $100,000 to defray the costs incurred in establishing Small Business International Marketing Programs. The purpose of the individual Small Business International Marketing Programs will be to increase U.S. new-to-market/new-to-export sales by providing (at the most local level practical) export assistance and services to small businesses interested in pursuing export sales. Grants totaling $950,000 will be awarded under this program. Grant application are now being solicited.

DATES: Grants applications must be postmarked or received on or before June 24, 1983. Mailed applications received after June 24, but on or before close of business June 28, 1983, will be considered as on time, if mailed on or before June 24, 1983, as evidenced by the U.S. Postal Service postmark on the wrapper or on the original receipt from the U.S. Postal Service. It is important to ask Postal Officials for a date stamp.

ADDRESSES: Grant applications and modifications thereof shall be enclosed in sealed envelopes with the applicant's name and address on the face of the envelope. Mailed applications should be addressed to the appropriate United States Commercial Service District Office listed below or to: Don Stow, Small Business Grants Coordinator, Small Business Export Development Assistance Program, International Trade Administration, Room 2800A, U.S. Department of Commerce, Washington, D.C. 20230.

Hand-delivered proposals may be taken to the Small Business Grants Coordinator at the above address or to the appropriate U.S. Commercial Service District Office listed below. These will be accepted daily between 9:00 and 5:00 p.m. except Saturdays and Sundays, or Federal holidays. Hand-delivered proposals will *not* be accepted after 5:00 p.m. on June 24, 1983. Receipt of proposals will be acknowledged by letter.

FOR FURTHER INFORMATION CONTACT: Application kits are available from the appropriate District Office of the United States Commercial Service as listed above. For further information contact Don Stow (202) 377–2474.

SUPPLEMENTARY INFORMATION: The Small Business Export Development Assistance Program is established under section 302 of Pub. L. 96–481, 94 Stat. 2331 (15 U.S.C. 649b). The program is designed to test and refine the theory that a matching grant program to local entities is an effective method for encouraging the development of Small Business International Marketing Programs which will in turn provide export assistance to small business concerns interested in pursuing export sales. The program is listed in the Catalog of Federal Domestic Assistance under number 11.108.

One grant will be awarded in each of the ten regions of the Department of Commerce. Each grant recipient will act as an intermediary, utilizing its own and Federal funds to establish and maintain an organization which will provide export assistance to a number of small businesses in its locality. The grants are not intended to help only one small business, but rather to provide support services, through the grantee, to a number of small businesses in the grantee's region.

Under this program, the Commerce Department is authorized to make grants to a State government or agency or instrumentality thereof, any Small Business Administration-designated "Small Business Development Center", any for-profit small business, any non-profit organization, any regional commission or any combination of such entities. In 1982, grants totaling $1.95 million were awarded to 16 organizations.

The International Trade Administration is now soliciting applications (proposals) for the 1983 program for matching grants of up to $100,000. Appplication kits may be obtained by contacting local U.S. Commercial Service District Offices. Grantees selected under the 1982 program are not eligible to apply for grants under the 1983 program.

The completed application package (original plus 2 copies must include: (a) An application (Standard Form 424). The use of this form has been approved by OMB. The OMB approval number is 0625–0124. It expires October 31, 1984. (b) a concise description of the proposed Small Business International Marketing Program for which the application is being made; (c) a proposed budget; and (d) other supporting data.

To be considered, applications must be received or postmarked no later than June 24, 1983. The review process will begin June 30, 1983. Awards will be made by the end of September, 1983. The agreement between the selected organizations and the Federal Government will be a grant.

At the time of award of grants, grantees will be required to sign standard certifications and assurances related to: equal opportunity, fair labor standards, political activity of program employees, etc. In addition, successful applicants may be required to prepare and submit other standard government grant forms.

The final decision regarding the award of grants will be made by the Assistant Secretary for Trade Development.

This solicitation does not commit the Government to pay any cost incurred in the preparation of a proposal.

General Conditions

a. Unnecessarily elaborate brochures or other presentations beyond that sufficient to present a complete and effective application are not desired and may be construed as an indication of the applicant's lack of cost consciousness. Elaborate art work, expensive paper and bindings and expensive visual and other presentation aids are neither necessary nor wanted.

b. At the discretion of the Department of Commerce, a pre-award survey of successful applicants may be required.

Preparation of Applications and Proposal Content

The application shall contain a concise description of the proposed activities to be undertaken by the Small Business International Marketing Program to be established under this grant. The description should be precise, factual, and complete.

The Budget section of each application shall present projected expenditures for the Program showing salaries including benefits, consultants, contract services, travel and per diem, space costs and other rentals, supplies, postage, telephone and telex, printing, etc. The specific format to be used is included in the Application Kit.

The following information supplementing the projected budge must be provided in a separate section:

a. Explanation of sources of grantee's matching cash share (see definition section below for more details).

b. Explanation of sources of grantee's matching in-kind share, if any (see definition section below for more details). Note: Grantees' matching cash and in-kind shares may be raised from any sources except from other Federal funding or from prospective or actual clients, subject to the restrictions below. The Commerce Department reserves the right to verify the applicant's sources of funds by an audit made immediately after the grant award.

c. Explanation of program income, if any.

d. Proposed hourly rate and estimated annual program hours for each member of the staff. Hourly rate should include benefits. Note: Names and resumes of proposed professional level staff members must be included with the application. If these individuals are not available at the time of the grant award, substitutions must be submitted to the Grants Coordinator for approval prior to appointment. All resumes should contain the person's date and place of birth, educational institutions attended with dates, and previous and current job responsibilities and titles listed in chronological order showing dates positions were held.

e. A description and justification of that portion of work to be contracted out, if any. Include a task description, the proposed cost, and the means of selection for each individual contract.

f. System for determining per diem rates. Standard U.S. Government per diem schedule is acceptable. Copies are available on request from the Grants Coordinator.

g. A statement that all resources, whether their own or from other sources, that they apply to this program (i.e., their matching share) represent an increase in funds above the amount they would have spent in the absence of a

VOL 48 ISS 93 MY 12 1983 UMI

grant to promote small business exports during the grant period.

h. A statement showing the nature and timing of expected program accomplishments and means by which such accomplishments should be measured.

i. An organization chart for the Small Business International Marketing Program showing position titles and the designated person's name, where known. The chart should show how the proposed organization relates to the applicant's existing organization structure.

j. Statement of projected incremental export sales resulting from the proposed Small Business International Marketing Program and explanation of how these sales will be achieved.

k. Explanation of how the applicant's proposal will enable its Small Business International Marketing Program to become self-sustaining (i.e., for how long, from what sources and in what amounts will the applicant have resources to enable it to continue the Small Business International Marketing Program after the grant agreement terminates).

Freedom of Information Act

The information submitted in the application or with supporting documents will be subject to the provisions of the Freedom of Information Act (FOIA) and the Privacy Act of 1974. It is intended that information concerning the identity of applicants, the number of applications, and the status of application evaluation shall not be made publicly available prior to award of grants under this Program, except as may be required to be publicly released by statute (under the FOIA).

Scope of Work

The purpose of the individual Small Business International Marketing Programs established under the Small Business Export Development Assistance Program is to increase U.S. new-to-market/new-to-export sales by providing export assistance and services to small businesses at the most local level practical.

In view of the above and in concert with other requirements set forth in the legislation each Small Business International Marketing Program must:

(a) *Program:* Develop a program which can deliver the services required by the legislation, specifically:

(1) *Counseling:* Counseling of small businesses interested in pursuing export sales, including providing information concerning available financing, credit insurance, tax treatment, potential markets and marketing assistance, export pricing, shipping, documentation, and foreign financing and business customs;

(2) *Market Analyses:* Providing market analyses of the export potential of small business concerns; and

(3) *Contacts:* Developing contacts with potential foreign customers and distributors for small businesses and their products, including arrangements and sponsorship of various overseas trade promotion activities (foreign trade missions, trade fair participation, etc.) through which small business concerns can meet with identified potential customers, and organizations, interested in licensing or joint ventures.

(b) *Full-Time Staff Director:* Appoint a full-time staff director to manage program activities.

(c) *Access to Export Specialists:* Have access to export specialist to counsel and to assist small business clients in international marketing when such expertise is not available in house.

(d) *Geographical Area To Be Served:* Identify the geographical area to be served—i.e., in which cities, counties or states will the small businesses be located that the applicant will assist?

(e) *Number of Firms To Be Assisted:* Identify the number of firms to be assisted and the nature of assistance to be given.

(f) *Advisory Board:* No later than 60 days after accepting the grant award, establish an advisory board of nine members to be appointed by the staff director of the program, not less than five members of whom shall be small business persons or representatives of small business associations. Each advisory board shall elect a chairperson and shall advise, counsel, and confer with the staff director of the program on all policy matters pertaining to the operation of the program (including who may be eligible to receive assistance, ways to promote the sale of United States products and services in foreign markets or to encourage tourism in the United States, and how to maximize local and regional private consultant participation in the program).

(g) *Program Time Frame:* Implement and operate the program proposed in the grantee's application for assistance for 12 months commencing no later than December 1, 1983.

Evaluation of Applications

The Scope of Work above describes the required activities to be undertaken by the selected organizations. Each applicant's proposal should respond in the *same sequence shown* in the Scope of Work to each point in the Scope of Work. Each proposal will be evaluated, against the evaluation factors specified below. In the development of the proposal, applicants should carefully consider the criteria against which the applications will be evaluated. For example, if an applicant doesn't demonstrate in the proposal how the program will become self-sustaining at the end of the grant period, then the evaluators will be forced to give a low mark for this evaluation factor. Similarly, inadequate information on personnel qualifications may result in low scores by evaluators.

Evaluation Factors and Weight Assigned each Factor out of 100:

(The numbers show the relative weight to be given to each of the 6 evaluation factors when determining the applicant's total score)

Evaluation factor	Weight
a. Potential for proposal resulting in new-to-market/new-to-export sales of small businesses. Of particular interest will be those proposals having the ability to generate substantial sales within the 12-month grant period	25
b. Comprehensiveness and responsiveness of the proposal to this entire solicitation and applicant's recognition of overall program objectives. Logic and realism of the proposal in reaching objectives in the Scope of Work and the degree to which the proposal may incorporate innovative approaches to achieve program goals including value of additions to the Scope of Work, if any	30
c. Staff quality. Experience, education, background of the Staff Director and his/her demonstrated competence for performing and directing the work set forth in the application. Also, experience, education, background, and record of past accomplishment of other members of the staff	25
d. Logic for utilization of personnel and other resources including resources available through existing trade development programs	5
e. Cost Effectiveness. Projected program achievements compared to projected program expenditures	5
f. Potential that project will become self-sustaining at the end of the grant period	10
Total weight	100

Payments

Upon signing the Grant Agreement, grantees will be eligible to request the initial payment. Subsequent payments will be based on reports detailing expenditures against and progress related to the proposed budget and program as set forth in the Grant Agreement. An equal amount of the Grantees matching share must be expended before subsequent payments will be issued.

Furnished Property

No material, equipment, labor, or facilities will be furnished free of charge by the Department of Commerce for the purpose of performance under this program.

Definitions

a. *Small Business:* A small business concern for the purpose of this solicitation is a concern, of 250 or less employees, which is not dominant in its field. This definition applies both to applicants which may be small, for-profit businesses and to clients which must be small businesses. Any exception to this requirement must be approved in writing by the Small Business Grants Coordinator.

Note.—Small business applicants should indicate "Small Business" in Block 6K of Standard Form 424.

b. *New to Market/New to Export:* New-to-Export-sales are sales by a firm which has not sold its product(s) or service(s) in any foreign country. A firm already engaged in exporting is considered as being "New-to-Market" each time it successfully enters a new country market. "Entry" is accomplished through the sale of product(s)/service(s), or the appointment of a sales agent or distributor. However, occasional sales resulting from unsolicited orders or sales made by another firm acting on its own behalf rather than on behalf of or at the direction of the firm in question, do not constitute "entry". Although a firm can be New-to-Market any number of times, it can be New-to-Market in a particular country only once.

c. *Grantee's Matching Cash Contributions:* These are the grantee's cash outlays and include payments for goods and services applicable to the grant. *Also included* are salary and other costs paid for or reimbursed by the grantee for work applicable to the grant.

d. *Grantee's Matching In-Kind Contributions:* These contributions represent the value of the grantee's non-cash resources dedicated to the program.

Note.—The criteria for determining the allowability of cash and in-kind contributions made by grantees are contained in Attachment F to OMB Circular A–102 for grants made to State and local governments, in Attachment E to OMB Circular A–110 for grants made to all other applicants including for-profit organizations).

e. *Tourism Component of the Small Business International Marketing Program.* It is *not* intended that grants be used exclusively for the promotion of foreign tourism in the United States. However a grantee may have clients that are exclusively engaged in promoting foreign tourism in the United States. Manufacturers, producers of services, and businesses engaged in attracting foreign tourists to the U.S. are all legitimate clients of proposed Small Business International.

Marketing Programs. Successful applicants must demonstrate in their proposal the ability *and* intent to carry out the *complete* Scope of Work *including the provision of export counseling and assistance in the traditional sense.* Applications aimed exclusively or principally towards tourism promotion are not acceptable. At least 51 percent of the grantee's clients must be small businesses from other than the tourism promotion sector.

Specific Restrictions

a. Not more than one-third of Federal funds awarded under this solicitation may be used for personnel salaries and benefits. A larger portion of the grantee's matching share may be used for personnel salaries and benefits.

b. *No portion of any Federal funds* awarded under this solicitation may be used to directly underwrite any small business participation in foreign trade missions abroad, but such federal funds *may* be used to underwrite small business participation in foreign trade shows abroad.

In this regard a trade mission is defined as a group of business persons traveling together to several overseas locations for one or two day stops with product literature or samples which might be carried in a brief case. A trade show is defined as an event where the business persons travel separately to a given show in one location overseas where their products would be on display in a booth for approximately one week.

c. A sum equal to the amount of the grant awarded under this solicitation must be provided from souces other than the Federal Government. This non-Federal additional amount known as the matching share, shall not include any amount of direct or indirect costs or in-kind contributions paid for under any other Federal program. Nor shall indirect costs or in-kind contributions from other non-Federal sources exceed 50 per cent of the matching share—stated otherwise, at least 50 percent of the matching share must be in cash or the equivalent of cash (see definition above).

d. No portion of the grantee's matching share may be contributed by clients of its proposed Small Business International Marketing Program.

e. Grantees may not charge their clients a fee or solicit or accept a contribution of any kind or authorize or allow any one affiliated with the grant program, including contractors, to charge the grantee's clients a fee or solicit or accept a contribution for services rendered under the program except as stated below under Program Income.

f. No portion of the Federal funds or the matching share may be used to pay salaries or expenses of the nine member advisory board.

g. Members of the Advisory board may not simultaneously be employees, clients and/or paid consultants of the Small Business International Marketing Program, nor employees of the U.S. Department of Commerce or any U.S. Government Agency, nor may they work for or hold a financial interest in the grantee's organization.

Other Regulations

State and local governments will be subject to the Uniform Administrative Requirements for Grants-in-Aid as set forth in Office of Management and the Budget (OMB) Circular A–102 Revised. All other applicants will be subject to the Uniform Administrative Requirements for Grants-in-Aid as set forth in OMB Circular A–110.

The budget should be prepared in accordance with appropriate Office of Management and the Budget Cost Principles. OMB Circular A–87 shall be used for state and local governments. OMB Circular A–21 shall be used for educational institutions. OMB Circular A–122 shall be used by all other applicants. However, notwithstanding the provisions of OOMB Circular A–122, for-profit organizations are limited to an indirect cost rate of 100 percent. Free copies of the above circulars are available on request from the Small Business Grants Coordinator at the address specified above or by telephone on (202) 377–2474.

Reporting

Program and financial reports will be required quarterly during the grant period. Grantees will be required to furnish such information as is deemed appropriate to complete the Congressionally required program evaluation. Such evaluation and information required shall be limited to that information necessary for:

(a) Determining the impact of "small business international marketing programs" on those small businesses assisted;

(b) Determining the amount of new-to-market/new-to-export sales generated by small businesses assisted through such programs; and

(c) Making recommendations concerning continuation and/or expansion of the program and possible improvements in the program structure.

Grantees will be provided with instructions on how to complete the

VOL 48 ISS 93 MY 12 1983 UMI

final report at the time of the grant award.

Program Income

Grantees may charge clients participating in the program for assistance and services, but such income may *not* be used to reduce the matching share; and furthermore, such income must be limited to and collected on the basis of an appropriate percentage of export income generated as a direct result of participation in the program, i.e. as a commission.

If applicants expect to generate program income by charging a commission, the basis for such income must be fully explained in the application including rates to be charged. Funds so collected must be accounted for and reported on. All such "program income" earned during the grant period and for twelve months thereafter that is attributable to assistance provided under the grant shall be retained by the grantee and added to the funds committed to the program and shall be used to further program objectives. Provided that, if the program income is not expended within eighteen months after the expiration of the grant, it shall be remitted to the Government in proportion to the Government's financial contribution to the total project cost. *If clients are to be charged (i.e., a commission), applicants must include projections of amounts to be collected in the grant period and for 12 months thereafter.*

Restrictions on Purchase of Non-Expendables

Grantees may not use Federal or matching share funds for the purchase of non-expendables such as real property, vehicles or other capital assets or furniture, office equipment, etc. However, grantees may use funds from other sources (i.e., funds not dedicated to this Small Business International Marketing Program) to purchase equipment or other non-expendables and the fair-market rental value may be included as part of their matching share in-kind contribution.

Other Funding Sources

Federal-share funds granted for this program shall not be used to replace any financial support previously provided or assured from any other source. The existing and projected level of expenditure by the Grantee for small business export assistance shall be increased in order to match the Federal grant funds.

Fees and Profits

Applicants may not charge the Federal Government a fee or profit under the grant award.

Federal Export Development Assistance

All applicants must state if they currently receive or have applied for funds from any Federal agency to support export development programs similar to or incorporating elements of the Small Business International Marketing Program. List the program name, amount of funds awarded or requested, Federal agency involved, and name and phone number of the Federal contact person.

Type of Entities

The Small Business International Marketing Programs for which grants will be awarded under this solicitation may be (but do not have to be) independent legal entities. However, operations and records must be sufficiently separated from other activities to be able to account for all expenditures made from Federal grant or matching funds.

Government Not Committed To Pay Costs

This solicitation does not commit the Government to pay any cost incurred in the preparation of a proposal.

OMB Circular A-95

To comply with the provisions of OMB Circular A-95 which requires the coordination of Federal assistance programs with the states, each applicant must submit a copy of their completed Standard Form (SF) 424 application, attached to either the complete proposal or a one page summary of the proposal, to the appropriate state clearinghouse listed in the application kit. Applicants should include a statement that clearinghouse comments on the proposal should be sent to Don Stow, Small Business Grants Coordinator, Room 2800A, U.S. Department of Commerce, Washington, D.C. 20230.

Checklist

The Department of Commerce will not comment on the quality or completeness of applications prior to final submission. However the application kit contains a checklist of required information provided to help applicants make certain their application is complete and to assist evaluators in finding the required information. *Each applicant must submit a completed checklist.* Failure to furnish a completed checklist will result in the application being declared nonresponsive and thus not eligible for evalution and award.

Paul T. O'Day,

Acting Assistant Secretary for Trade Development.

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Mercantile Exchange Standard and Poor's 100 Stock Price Index Futures Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity futures contract.

SUMMARY: The Chicago Mercantile Exchange ("CME") has applied for designation as a contract market in the Standard and Poor's 100 Stock Price Index. The Commission has determined that the terms and conditions of the proposed futures contract are of major economic significance and that, accordingly, making available the proposed contract for public inspection and comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before June 13, 1983.

ADDRESS: Interested persons should submit their views and comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Reference should be made to the CME Standard and Poor's 100 Stock Price Index futures contract.

FOR FURTHER INFORMATION CONTACT: Ronald Hobson, Division of Economics and Education, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. [202] 254-7303.

A copy of the terms and conditions of the CME proposed S&P 100 Stock Price Index futures contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address or by phone at (202) 254-6314.

Other materials submitted by the CME in support of its application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1982)). Requests for copies of such materials should be made to the FOIA, Privacy and Sunshine Acts Compliance Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures contract, or with respect to other materials submitted by the CME in support of its application, should send such comments to Jane K. Stuckey, Secretary, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581, by June 13, 1983. Such comment letters will be publicly available except to the extent that they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9.

Issued in Washington, D.C., on May 9, 1983.

Jane K. Stuckey,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the total number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Information Collection in Support of DoD Acquisition Management Systems and Data Requirements Control List (AMSDL) DoD 5000.19-L Vol II

The DoD awards approximately 12 million annual contracts for supplies/services and hardware. Information Collection Requests contained in these contracts, for which each contractor is reimbursed, number 2,600 and are listed in the AMSDL for repetitive use. The majority of DoD Information Collection Requests are contained in approximately 5,000 annual contracts of $1.0 million or more. These Information Collection Requests from the Public (contractors) are necessary for the Government to support the design, test, manufacture, training, operation, maintenance, rebuild and logistical support of items of Defense material being acquired under the provisions of the Armed Services Procurement Act Title 10, U.S.C.

Contractors: 1,983,800 responses; 218,218,000 hours (preliminary estimate).

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Wenderoth, DoD Clearance Officer, OASD(C), DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone: (202) 697-1195.

A copy of the information collection proposal may be obtained from James D. Richardson, DMSSO, II Skyline Place, Suite 1403, 5203 Leesburg Pike, Falls Church, VA., 22041, telephone: (703) 756-2340/1.

Dated: May 9, 1983.

M. S. Healy,

OSD Federal Register Liason Officer, Department of Defense.

[FR Doc. 83-12782 Filed 5-11-83; 8:45 am]

BILLING CODE 3810-01-M

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the total number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Information Collection in Support of DoD Contractual Actions

The DoD issues approximately 13 million contractual actions annually. Information Collection from the Public in support of the DoD Acquisition Process is necessary for the Government to evaluate contractor(s) and supplier(s) approach to support contractual actions for services, supplies and hardware in conformance with the requirements of the Armed Services Procurement Act Title 10, U.S.C.

Contractors: 26,000,000 responses; 416,000,000 hours.

Forward comments to Edward Springer, OMB Desk Officer, Room 3235, NEOB, Washington, D.C. 20503, and John V. Wenderoth, DoD Clearance Officer, OASD(C), DIRMS, IRAD, Room 1A658, Pentagon, Washington, D.C. 20301, telephone: (202) 697-1195.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[ERA Docket No. 83-01-NG]

Natural Gas Import/Export and Northwest Pipeline Corp.

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Changed Circumstances in Existing Authorization.

SUMMARY: Northwest Pipeline Corporation ("Northwest") filed an application on March 2, 1983, with the Economic Regulatory Administration (ERA) notifying ERA of its proposal for a deferred exchange of natural gas with Westcoast Transmission Company Limited ("Westcoast") and requesting that an order be issued authorizing Northwest to carry out the exchange. Under the deferred exchange arrangement, Northwest would import natural gas under its existing authorization for seasonal storage at the Jackson Prairie Storage Project (Jackson Prairie) in Lewis County, Washington, for the account of British Columbia Hydro and Power Authority ("B.C. Hydro"), rather than for delivery to Northwest's system supply.

Under the Northwest proposal, up to 50,572 Mcf per day of Canadian natural gas will be delivered to or withdrawn from storage, but the total volume held

VOL
48
ISS
93
MY
12
1983
UMI

in storage at any one time will not exceed 1, 719,468 Mcf of natural gas and volumes received for storage will be balanced by withdrawals over the five-year term of the proposal. Withdrawal of natural gas will be accomplished by displacement with stored volumes being delivered to Northwest's system supply concurrently with delivery of equivalent volumes by Westcoast directly to B.C. Hydro with a corresponding reduction in the volumes otherwise deliverable to Northwest under its existing import authorization.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass (Natural Gas Division, Office of Fuels Programs), Economic Regulatory Administration; Department of Energy, Forrestal Building, Room GA–007, RG–43, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–9482.

Michael T. Skinker (Office of General Counsel, Natural Gas and Mineral Leasing), Department of Energy, Forrestal Building, Room 6E–042, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–6667.

Background

Northwest is currently authorized to import up to 809,000 Mcf of Canadian natural gas per day through the import point near Sumas, Washington, pursuant to a series of authorizations issued by the Federal Power Commission (FPC).

On November 25, 1955, the FPC issued an Opinion and Order in Docket No. G–8932 (14 FPC 157) granting authority to Pacific Northwest Pipeline Company ("Pacific Northwest") to import up to 303,462 Mcf of natural gas per day through the import point near Sumas, Washington, for resale to customers in the United States. Upon merger of Pacific Northwest into El Paso Natural Gas Company ("El Paso"), this import was continued by El Paso under authority granted in Docket No. G–13019 (22 FPC 1091 and 28 FPC 7). El Paso's authorization was amended by FPC orders in Docket No. CP70–136 (43 FPC 723, May 12, 1970, and 45 FPC 252, February 9, 1971), which amendments increased the daily import authorization to the currently authorized level of 809,000 Mcf per day. On September 21, 1973, the FPC, in Docket No. CP73–332 (50 FPC 825), authorized Northwest to acquire and operate the facilities of El Paso's Northwest System Division and to continue the importation of gas from Westcoast as El Paso's successor in interest, under the same conditions as those prevailing under the authorizations issued to El Paso in Docket No. CP70–136.

Changed Circumstance

Northwest proposes a deferred exchange of existing authorized import volumes, whereby, from May through September, Westcoast would deliver natural gas paid for by B.C. Hydro to Northwest at Sumas, Washington. Northwest would then transport the gas for storage in space held by The Washington Water Power Company ("Water Power") at Jackson Prairie. Water Power has agreed to release part of their storage space to B.C. Hydro. During the subsequent heating season, October through April, Northwest would withdraw the gas stored for the account of B.C. Hydro for Northwest's system supply, but assess transportation charges to B.C. Hydro as if Northwest were transporting the gas to Westcoast at Sumas, Washington, for delivery to B.C. Hydro. Northwest further asserts that the actual flow of natural gas during withdrawal from storage is accomplished by displacement with natural gas from Jackson Prairie being withdrawn by Northwest for system supply in exchange for delivery from Westcoast directly to B.C. Hydro of equivalent volumes of natural gas which would be subtracted from the volumes otherwise deliverable by Westcoast to Northwest.

Northwest indicates that B.C. Hydro will play for the natural gas at the time of delivery to Northwest for storage at the commodity price agreed upon in 1987 between B.C. Hydro and Westcoast for domestic deliveries at Huntington, British Columbia. Northwest pays for the gas it withdraws from storage at the time of delivery into its system supply at the current price applicable to natural gas purchased from Westcoast and imported through the Sumas import point.

Northwest states that it does not propose to import or export volumes in excess of those currently authorized. The proposal has been structured specifically to preclude any expansion or extension of existing authorized imports or exports by all parties. Northwest notes that the deferred exchange is for the purpose of providing off-peak storage of natural gas within reasonable proximity to B.C. Hydro's distribution system. Northwest further states that volumes of natural gas received into storage in the United States would be balanced by withdrawals over the term of the proposed project commencing on May 1, 1983, and continuing until April 30, 1988, and thereafter on a year-to-year basis.

Procedural Matters

Any person wishing to become a party to the proceeding and thus to participate as a party in any conference or hearing which might be convened must file a petition to intervene. Any person may file a protest with respect to this application. The filing of a protest will not serve to make the protestant a party to the proceeding. Protests will be considered in determining the appropriate action to be taken on the application.

All protests and petitions to intervene must meet the requirements that are specified by the regulations that were in effect on October 1, 1977 in 18 CFR 1.8 and 1.10. They should be filed with the Natural Gas Division, Economic Regulatory Administration, Room GA–007, RG–43, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585. All protests and petitions to intervene must be filed not later than 4:30 p.m., May 27, 1983.

A hearing will not be held unless a motion is made by a party or person seeking intervention and granted by the ERA, or if the ERA on its own motion believes that a hearing is necessary or required. A person filing a motion must demonstrate how a hearing will advance the proceedings. If a hearing is scheduled, the ERA will provide notice to all parties and persons whose petitions to intervene are pending.

A copy of Northwest's application is available for inspection and copying in the Natural Gas Division Docket Room, located in Room GA–007, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday except Federal holidays.

Issued in Washington, D.C., on May 6, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[ERA Docket No. 83–CERT–008]

Long Island Lighting Co.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On March 15, 1983, Long Island Lighting Company (LILCO), 250 Old Country Road, Mineola, New York 11501, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 2.0 billion cubic feet of natural gas which is expected to displace the use of approximately 8,000 barrels of No. 2 fuel oil (0.30 percent sulfur) and 280,000 barrels of residual fuel oil (0.37 percent sulfur) per year at its E. F. Barrett Electric Plant in Island Park, New York, and approximately 37,000 barrels of residual fuel oil (0.37 percent sulfur) per year at its Glenwood Electric Plant in Glenwood Landing, New York.

The eligible seller of the natural gas is New York State Electric and Gas Corporation, 4500 Vestl Parkway, East Binghamton, New York 13902. The gas will be transported by Tennessee Gas Pipeline Company, Tenneco Building, P.O. Box 2511, Houston, Texas 77001.

Notice of that application was published in the **Federal Register** (48 FR 18867, April 26, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed LILCO's application for certification in accordance with 10 CFR Part 595 and the policy consideration expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that LILCO's application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed information, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 6, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–009]

Gates Rubber Co.; Certification of Eligible Use of Natural Gas To Displace Fuel Oil

On March 21, 1983, The Gates Rubber Company (GATES), 999 South Broadway, Denver, Colorado 80217, filed with the Administrator of the Economic Regulatory Administration (ERA), pursuant to 10 CFR Part 595, an application for certification of an eligible use of approximately 1,480,000 Mcf per year of natural gas which is expected to displace the use of approximately 1,650,000 gallons (39,285 barrels) of No. 2 fuel oil (0.80 percent sulfur) and 7,410,000 gallons (176,428 barrels) of No. 6 fuel oil (0.90 percent sulfur) per year at its rubber manufacturing facility in Denver, Colorado.

The eligible seller of the natural gas, as amended on April 28, 1983, is Western Gas Processors, 10701 Melody Drive, Northglenn, Colorado 80234. The gas will be transported by Montana-Dakota Utilities Company, 400 North 4th Street, Bismarck, North Dakota 58501, and Colorado Interstate Gas Company, Box 1087, Colorado Springs, Colorado 80944. The local distribution company will be Public Service Company of Colorado, 243 Lipan Street, Denver Colorado 80223.

Notice of that application was published in the **Federal Register** (48 FR 18866, April 26, 1983) and an opportunity for public comment was provided for a period of ten (10) calendar days from the date of publication. No comments were received.

The ERA has carefully reviewed GATES' application for certification in accordance with 10 CFR Part 595 and the policy considerations expressed in the Final Rulemaking Regarding Procedures for Certification of the Use of Natural Gas to Displace Fuel Oil (44 FR 47920, August 16, 1979). The ERA has determined that GATES' application satisfies the criteria enumerated in 10 CFR Part 595 and, therefore, has granted the certification and transmitted that certification to the Federal Energy Regulatory Commission. More detailed informaton, including a copy of the application, transmittal letter, and the actual certification, is available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D.C., May 6, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Energy Information Administration

Form EIA–7A, Coal Production Report; Extension of Comment Period

AGENCY: Energy Information Administration, U.S. Department of Energy.

ACTION: Extension of comment period on the revision of the Form EIA–7A, "Coal Production Report," to May 31, 1983.

SUMMARY: The comment period for the Form EIA–7A, "Coal Production Report," is extended to May 31, 1983, from the original due date of April 30, as published in the 48 FR 13226–13235, dated March 30, 1983. This extension is in response to requests of several interested members of the coal industry and the National Coal Association.

DATES: Written comments must be submitted by May 31, 1983.

ADDRESS: Send comments to Harriet M. Tarver at the address listed below.

FOR FURTHER INFORMATION CONTACT:

To obtain additional information or copies of the EIA–7A, contact Ms. Harriet M. Tarver, Coal Division, MS: 2F–021, Energy Information Administration, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, D.C. 20585, (202) 252–9723.

Issued in Washington, D.C., May 6, 1983.

Federal Energy Regulatory Commission

[Docket No. RP83–74–000]

Robert Abrams et al. v. Tennessee Gas Pipeline Co.; Notice of Complaint

May 6, 1983.

In the matter of Robert Abrams, as Attorney General of the State of New York, Joseph Gerace, as County Executive for Chautauqua County, and Edward J. Rutkowski, as County Executive of Erie County, Complainants, v. Tennessee Gas Pipeline Company, Defendant.

Take notice that on April 20, 1983, a complaint was filed pursuant to Section 5 of the Natural Gas Act, 15 U.S.C. § 717d, and Order 141 of the Federal Energy Regulatory Commission (Commission) as amended by Order 359, 18 CFR § 1.6. Complainants seek to have the Commission reform certain practices and contracts of the defendant, including "take-or-pay" contract clauses, which are unjust, unreasonable, and preferential and which result in the imposition by defendant of unlawful, unjust, reasonable, and preferential rates and charges in violation of Sections 4 and 5 of the Natural Gas Act, 15 U.S.C. §§ 717 c and d and in violation of the lowest reasonable rate

VOL 48 ISS 93 MAY 12 1983 UMI

requirement of Section 5. Complainants allege that defendant has imprudently purchased large amounts of expensive gas while reducing its purchases of far less expensive gas. The Commission has jurisdiction over this complaint under Sections 1(b) and 5 of the Natural Gas Act, 15 U.S.C. §§ 717 b and d. Jurisdiction is not invoked solely by reason of a first sale and therefore NGPA 601(a)(1) does not apply.

Complainants are Robert Abrams, as Attorney General of the State of New York, who appears on behalf of the people of the State of New York, Joseph Gerace, as County Executive for Chautauqua County, who appears on behalf of the people of Chautauqua County, and Edward J. Rutkowski, as County Executive of Erie County, who appears on behalf of the people of Erie County.

Defendant Tennessee Gas Pipeline Company (Tennessee) is engaged both in the transportaion of gas in interstate commerce and in the sale in interstate commerce of such gas for resale. It is a natural gas company within the meaning of Section 1a of the Natural Gas Act, 15 U.S.C. § 717a, and is subject ot the jurisdiction of the Commission. Tennessee is a division of Tenneco, Inc.

Any person desiring to be heard or to protest said complaint should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-476-000]

Connecticut Light and Power Co.; Notice of Filing

May 6, 1983.

The filing Company submits the following:

Take notice that on April 25, 1983, Connecticut Light and Power Company (CL&P) tendered for filing as an initial rate schedule an agreement (the Agreement) between CL&P, Western Massachusetts Electric Company (WMECO, and together with CL&P, the NU Companies) and Central Vermont Public Service Corporation (CVPS). The Agreement, dated as of January 20, 1983, provides for the NU Companies to sell to CVPS excess power from the system of the NU Companies ("system power") that may be available on a daily or weekly basis. CL&P states that the timing of transactions cannot be accurately estimated but that the NU Companies would offer to sell such system power to CVPS only when it was economic for them to do so.

CVPS would accept such an offer only if it was economic for CVPS to do so.CVPS will pay a capacity charge to the NU Companies for each transaction in an amount equal to the kilowatthours of system capacity utilized by the NU Companies to supply system power to CVPS during a transaction, times a rate negotiated between the parties prior to each transaction, not to exceed $0.0175 per kilowatthour. CVPS will also pay any energy charge to the NU Companies for each transaction in an amount equal to the kilowatthours provided by the NU Companies during such transaction times an energy charge rate. The energy charge rate is based on the heat rate and the replacement fuel price of the generating unit(s) which the NU Companies determine to be available to provide power at the time a transaction is agreed to by the parties.

CL&P requests an effective date of January 20, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been served upon WMECO and CVPS.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before May 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-286-000]

Florida Gas Transmission Co.; Request Under Blanket Authorization

May 9, 1983.

Take notice that on April 22, 1983, Florida Gas Transmission Company (Applicant), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. CP83-286-000, a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes to abandon in place a lateral line and metering facilities and the gas service through said facilities at Amax Phophate, Incorporated's Teneroc Plant located in Lakeland, Polk County, Florida, under the authorization issued in Docket No. CP82-553-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant states that the 3½-inch lateral line and metering facilities used to serve the Teneroc Plant are no longer required since the plant closed down and the land on which the plant was located has been dedicated to the State of Florida for a park. Applicant therefore proposes the abandonment of such facilities and service to the plant.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 358.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Kenneth F. Plumb

Secretary

BILLING CODE 6717-01-M

[Docket No. CP83-288-000]

Florida Gas Transmission Co.; Request Under Blanket Authorization

May 9, 1983.

Take notice that on April 22, 1983, Florida Gas Transmission Company (Applicant), P.O. Box 44, Winter Park, Florida 32790, filed in Docket No. GP83-288-000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Applicant proposes the addition of a delivery point to Peoples Gas System (Peoples) in Plantation, Broward County, Florida, under the authorization issued in Docket No. CP82-553-00 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes the construction and operation of an additional deliver point to Peoples to allow for more efficient distribution of natural gas on the Peoples' system. It is stated that gas entitlements would not be increased. Further it is asserted that the cost of the additional delivery point would be 100 percent reimbursed by Peoples.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

BILLING CODE 6717-01-M

[Docket No. OF83-235-000]

Lebanon Methane Recovery, Inc.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 6, 1983.

On March 28, 1983, Lebanon Methane Recovery, Inc., (Applicant), 920 Rosstown Road, Lewisberry, Pennsylvania 17339, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules. On April 21, 1983 additional information was filed.

The facility, located in Lebanon County, Pennsylvania, will use as its primary energy sources biomass, in the form of biomethane obtained from a sanitary landfill. No coal, gas or oil will be used in the facility. The electric power production capacity of the facility will be 2,000 kilowatts. The owner of the facility does not own any other biomass-fueled small power production facility located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to interevene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Moon Lake Water Users Association; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 6, 1983.

On March 31, 1983, Moon Lake Water Users Association (Applicant), of P.O. Box 235, Roosevelt, Utah 84066, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectric facility will be located near the Big Sand Wash Reservoir in Duchesne County, Utah. The power production capacity of the facility will be 1,700 kilowatts. There are no other hydroelectric facilities owned by the Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Pennsylvania Power & Light Co.; Notice of Filing

May 6, 1983.

The filing Company submits the following:

Take notice that on April 2, 1983, the Pennsylvania Power & Light Company (PP&L) tendered for filing as a Supplement to Rate Schedule FERC No. 68 an executed agreement dated as of April 15, 1983 between PP&L and UGI Corporation (UGI). This supplement will increase PP&L's charges by changing the return on equity component in the cost of service formula used to compute charges to UGI. This supplement will increase PP&L's charges to UGI by $529,529 or 4.2% due to the aforementioned change in the return on equity component in the cost of service formula used to compute charges to UGI. This supplement will increase PP&L's charges to UGI by $529,529 or 4.2% due to the aforementioned change in the return on equity component.

PP&L requests an effective date of April 22, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing have been served upon UGI and the Pennsylvania Public Utility Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR §§ 385.211, 385.214). All such motions or protests should be filed on or before May 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Public Service Company of New Mexico; Notice of Filing

May 6, 1983.

The filing Company submits the following:

Take notice that on April 25, 1983, the Public Service Company of New Mexico (PNM) tendered for filing a peaking capacity sales agreement entitled "Service Schedule I—Peaking Capacity Sales", between PNM and Plains Electric Generation and Transmission Cooperative, Inc., (Plains). Such agreement is to become a party of the PNM and Plains Master Interconnection Agreement (PNM Rate Schedule FPC No. 31).

PNM is to sell a minimum of 15 megawatts and up to a maximum of 50 megawatts of peaking capacity from its three (3) Reeves Generating Station Units. Service is to commence on June 1, 1983, subject to FERC acceptance, at 15 megawatts and continue through May 31, 1989.

Copies of the filing were served upon Plains and the New Mexico Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Rules of Practice and Procedures (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER83-475-000]

Sierra Pacific Power Co.; Notice of Filing

May 6, 1983.

The filing Company submits the following:

Take notice that Sierra Pacific Power Company (Sierra) on April 25, 1983, tendered for filing proposed changes in its FERC Electric Tariff (Volumes 1 and 2).

This filing involves a wheeling agreement between Wells Rural Electric Company (Wells) and Sierra. The agreement consolidates two previous wheeling agreements between Wells and CP National Corporation, which agreements were assumed by Sierra upon its acquisition of CP National Corporation's Elko, Nevada and Winnemucca, Nevada service territories on April 1, 1982. The new agreement also increases the wheeling demand charge under the contracts to cover the cost of reconductoring of a portion of the lines involved. The loss calculation is also increased to cover losses caused by new loads. The wheeling limit for both delivery points involved in the contract was raised, and a penalty charge instituted for any usage in excess of that limit.

Sierra requests an effective date of February 18, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 23, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-73-000]

State of North Dakota v. Northern Natural Gas Company Division of InterNorth, Inc. and Midwestern Gas Transmission Co.; Notice of Complaint, Petition for Declaratory Order, and Request for Evidentiary Hearing of the State of North Dakota

May 6, 1983.

Take notice that on April 14, 1983, the State of North Dakota, by and through counsel Robert O. Wefald, Attorney General, State of North Dakota, and Frederick L. Miller, Jr. and J. Cathy Lichtenberg, Special Assistant Attorneys General for the State of North Dakota, filed a Complaint, Petition For Declaratory Order, And Request For Evidentiary Hearing Of the State Of North Dakota (Complaint) alleging facts and circumstances that constitute a basis for the Complaint and entitle Petition to relief pursuant to the Natural Gas Act, 15 U.S.C. § 717 *et seq.* as hereinafter described.

This Complaint is filed pursuant to Sections 4, 5, 13 and 14 of the Natural Gas Act, 15 U.S.C. §§ 717c, 717d, 717l and 717m and Rules 206 and 207 of the Rules of Practice and Procedure of the Federal Energy Regulatory Commission.

North Dakota accordingly files this Complaint against Northern Natural Gas Company and Midwestern Gas Transmission Company in its *parens patriae* or sovereign capacity as guardian of the health, welfare, and property of its citizens.

Any person desiring to be heard or to protest said complaint should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 6, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this complaint are on file with the Commission and are available for public inspection.

[Docket No. QF83-256-000]

Whisky Run Energy Partners Ore. Ltd.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 6, 1983.

On April 13, 1983, Whisky Run Energy Partners, Ore. Ltd. (Applicant), of 50 California Street, Suite 3300, San Francisco, California 94111, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The wind facility is located in Coos Bay, Oregon. The generating capacity of the facility is 1,250 kilowatts. There are no other wind facilities owned by the Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to

VOL 48 ISS 93 MY 12 1983 UMI

intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. QF83-262-000]

Winchester Water Control District, and Elektra Power Corp.; Notice of Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 6, 1983.

On April 19, 1983, Winchester Water Control District, and Elektra Power Corporation (Applicant) 744 San Antonio Road, Palo Atlo, California 94303, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The hydroelectic facility will be located at the Winchester Dam on the North Umpqua River, near Winchester, Douglas County, Oregon. The power production capacity of the facility will be 1,500 kilowatts. There are no other hydroelectric facilities owned by the Applicant located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP82-57-000]

United Gas Pipe Line Company; Settlement Conference

May 6, 1983

Take notice that on May 19, 1983, at 10:00 a.m. and extending to May 20, 1983, a settlement conference will be convened in the above-captioned docket. The meeting place for the conference will be at the offices of the Federal Energy Regulatory Commission, 285 North Capitol Street, NE., Washington, D.C. 20426.

The number of the hearing or conference room where the conference will be convened will be posted on the second floor bulletin board by 9:30 a.m. on May 19, 1983.

All interested parties and Staff are invited to attend.

The Staff states that all parties should consider its previous suggestion that it might save time for all interested participants if parties with substantial counter-proposals to proposals already offered on March 18, 1983, would circulate their proposals to participants prior to the settlement conference.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-51466; TSH-FRL 2362-4]

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of eighteen PMNs and provides a summary of each.

DATES: Close of review period:

PMN 83-680, 83-681 and 83-682—July 27, 1983.

PMN 83-683, 83-684, 83-685 and 83-686—July 30, 1983.

PMN 83-687 and 83-688—July 31, 1983.

PMN 83-689, 83-690, 83-691, 83-692 and 83-693—August 1, 1983.

PMN 83-694, 83-695, 83-696 and 83-697—August 2, 1983

Written comments by:

PMN 83-680, 83-681 and 83-682—June 27, 1983.

PMN 83-683, 83-684, 83-685 and 83-686—June 30, 1983.

PMN 83-687 and 83-688—July 1, 1983.

PMN 83-689, 83-690, 83-691, 83-692 and 83-693—July 2, 1983.

PMN 83-694, 83-695, 83-696 and 83-697—July 3, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS-51466]" and the specific PMN Number should be sent to: Document Control Officer (TS-793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M St., SW., Washington, DC 20460, (202-382-3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202-382-3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

PMN 83-680

Manufacturer. Confidential.

Chemical. (G) Hydroxyethylaminoethylated tannin.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture, processing, use and disposal: dermal, a total of 13 workers, up to 1 hr/da, up to 125 da/yr.

Environmental Release/Disposal. 1,000-10,000 kg/yr release to water. Disposal by publicly owned treatment works (POTW) and approved landfill.

PMN 83-681

Manufacturer. American Cyanamid Company.

Chemical. (G) Carbocyclic isocyanate.

Use/Production. (G) Urethane copolymers. Prod. range: Confidential.

Toxicity Data. Acute oral: 3.1 ml/kg; Acute dermal: > g/kg; Irritation: Skin—Severe, Eye—Minimal; Inhalation: 0.750 mg/l; Ames Test: Non-mutagenic.

Exposure. Manufacture: dermal, a total of 29 workers, up to 24 hrs/da, up to 330 da/yr.

Environmental Release/Disposal. Minimal release to land. Disposal by incineration and landfill.

PMN 83-682

Manufacturer. American Cyanamid Company.

Chemical. (G) Carbocyclic isocyanate.

Use/Production. (G) Urethane copolymers. Prod. range: Confidential.

Toxicity Data. Acute oral: 4.4 g/kg; Acute dermal:>2 g/kg; Irritation: Skin—Maximum mean daily store of 4.0 for erythema and 0.6 for edema, Eye—Minimal; Skin sensitization: Sensitizer.

Exposure. Manufacture: dermal, a total of 29 workers, up to 24 hrs/da, up to 330 da/yr.

Environmental Release/Disposal. Minimal release to land. Disposal by incineration and landfill.

PMN 83-683

Manufacturer. Farchan Laboratories, Inc.

Chemical. (S) 1-ethynyl-1-cyclopentanol.

Use/Production. (S) Site-limited intermediate and industrial R&D reagent. Prod. range: Confidential.

Toxicity Data. Acute oral: 500 mg/kg; Irritation: Skin—Mild, Eye—Strong; Ames Test: Non-mutagenic; Skin sensitization: Not a sensitizer.

Exposure. manufacturer and processing: dermal and inhalation.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water. Disposal by POTW and incineration.

PMN 83-684

Manufacturer. Farchan Laboratories, Inc.

Chemical. (S) 1,4-bis(1-hydroxy cyclopentyl) butadiyne.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Acute oral: 98 mg/kg (male), 139 mg/kg (female); Irritation: Skin—Non-irritant, Eye—Mild:, Ames Test: Non-mutagenic; Skin sensitization: Not a senitizer.

Exposure. manufacture, processing and use: dermal and inhalation.

Environmental Release/Disposal. Less than 10 kg/yr released to air and water. Disposal by POTW and incineration.

PMN 83-685

Manufacturer. Rohm and Haas Company.

Chemical. (G) [(Substituted phenyl)Hydrazono]substituted oxoheteromonocycle.

Use/Production. (S) Intermediate for agricultural chemical. Prod. range: Confidential.

Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >5 g/kg; Irritation: Skin—Non-irritant, Eye—Moderate; Ames Test: Non-mutagenic.

Exposure. manufacture, processing and disposal: dermal, a total of 30 workers, up to 8 hrs/da, up to 80 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air and land with 10-1000 kg/yr to water. Disposal by incineration.

PMN 83-686

Importer. Confidential.

Chemical. (G) Modified ethylene—tetrafluoroethylene copolymer.

Use/Import. (S) Wire and cable coating and chemical and electrical process equipment used for industrial, commercial, and consumer use. Import range: Confidential.

Toxicity Data. No data submitted.

Exposure. Processing and disposal: dermal, a total of 33 workers, up to 8 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. 100-12,000 kg/yr released to land. Disposal by landfill.

PMN 83-687

Manufacturer. National Starch and Chemical Corporation.

Chemical. (G) Carboxylated vinylic polymer.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. Acute oral: >23.07 g/kg; Acute dermal: >110.25 g/kg; Irritation: Skin—Mild, Eye—Minimal; Human Insult Patch Test: Not an irritant; 20 day subacute dermal: No significant adverse findings.

Exposure. Manufacture: inhalation, a total of 50 workers, negligible.

Environmental Release/Disposal. Release is negligible. Disposal in accordance with existing regulations.

PMN 83-688

Manufacturer. American Cyanamid Company.

Chemical. (G) Substituted acrylamide copolymer.

Use/Production. Confidential Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 50 workers, up to 24 hrs/da, up to 365 da/yr.

Environmental Release/Disposal. Release is minimal. Disposal by POTW.

PMN 83-689

Manufacturer. Confidential.

Chemical. (G) Water reducible alkyd resin.

Use/Production. (S) Industrial water reducible paint vehicle. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal and inhalation, a total of 4 workers, up to 2 hrs/da, up to 6 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air. Disposal by incineration.

PMN 83-690

Manufacturer. Confidential.

Chemical. (G) Quaternary salt of a polymer of methyl methacrylate, butyl acrylate, and substituted methacrylate.

Use/Production. (G) Dispersive use. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal, less than 9 workers, up to 24 hrs/da, up to 350 da/yr.

Environmental Release/Disposal. 1,000-10,000 kg/yr released to water. Disposal by POTW.

PMN 83-691

Manufacturer. Confidential.

Chemical. (G) Trisubstituted benzothiazole salt.

Use/Production. (G) A minor constituent in an article for commercial and consumer use. Prod. range: 100 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: dermal and inhalation, minimal.

Environmental Release/Disposal. Release to air and water is negligible. Disposal by biological treatment system and incineration.

PMN 83-692

Manufacturer. Confidential.

Chemical. (G) Trisubstituted benzothiazole salt.

Use/Production. (G) A minor constituent in an article for commercial and consumer use. Prod. range: 5-10 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, use and disposal: dermal and inhalation, minimal.

Environmental Release/Disposal. Release to air and water is negligible. Disposal by incineration.

PMN 83-693

Manufacturer. AZS Chemical Company.

Chemical. (S) N,N'-diaminopropyl ethyl piperazine.

Use/Production. (S) Industrial inhibitor, lube oil and asphalt additive. Prod. range: 25,000-1,000,000 kg/yr.

VOL 48 ISS 93 MY 12 1983 UMI

Toxicity Data. No data submitted.
Exposure. Manufacture: a total of 6 workers, up to 8 hrs/da, up to 3 da/yr.
Environmental Release/Disposal. No release.

PMN 83-694

Importer. Confidential.
Chemical. (G) Polyester of phthalic anhydride and polyhydric saturated alcohols.
Use/Import. (S) Commercial ball pen inks. Import range: 10,000–40,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Processing: dermal and inhalation, a total of 8 workers, up to 1 hr/da, up to 44 da/yr.
Environmental Release/Disposal. Release is unknown.

PMN 83-695

Manufacturer. Confidential.
Chemical. (G) Copolymer of vinyl amides.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential. Disposal by POTW.

PMN 83-696

Manufacturer. Confidential.
Chemical. (G) Dimer fatty acids, monocarboxylic acid, and polyamines polymer, modified with an acrylic acid copolymer.
Use/Production. (S) Solvent-based flexographic printing inks. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Manufacture: inhalation, a total of 2 workers, up to 1 hr/da, up to 18 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10–100 kg/yr to land. Disposal by biological treatment system and approved landfill.

PMN 83-697

Manufacturer. Confidential.
Chemical. (G) Fatty acid alkyd based polymer.
Use/Production. (G) Open use. Prod. range: 20,000–500,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, inhalation and ocular, a total of 111 workers, up to 8 hrs/da, up to 240 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air and water with 10 to more than 10,000 kg/yr to land. Disposal by incineration and approved landfill.

Dated: May 9, 1983.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket Nos. 83-432 and 433, File Nos. BPET-820709KE and BPET-820824KT]

Applications etc.; Black Television Workshop of Santa Rosa, Inc. and Bay North Educational Television, Inc.; For Construction Permit; Hearing Designation Order

Adopted: April 27, 1983.
Released: May 5, 1983.

By the Chief, Mass Media Bureau:

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of Black Television Workshop of Santa Rosa, Inc. (BTW) [1] and Bay North Educational Television, Inc. (Bay North) [2] for authority to construct a new non-commercial educational television broadcast station on Channel 62, Santa Rosa, California.

2. On August 24, 1982, Sonoma Broadcasting, Inc., Licensee of Station KFTY(TV), Santa Rosa, California, filed a petition to deny BTW's application on the grounds that BTW specified KFTY's transmitter site for its proposed station. The petitioner alleges that it has not authorized BTW to use its site. On March 3, 1983, BTW amended its application to specify a different site. The petition to deny will, therefore, be dismissed as moot.[3]

3. Bay North indicates, in response to Section V-C, Item 16, FCC Form 301, that construction of the proposed station would not be a major environmental action within the meaning of § 1.1305 of the Commission's Rules, That section of the Rules defines construction of a television tower of over 300 feet above ground level (AGL) as a major action, subject to certain exceptions not applicable here. The applicant proposes a tower 457 feet AGL. The construction would, therefore, be a major environmental action. Accordingly, the applicant will be required to submit an environmental narrative statement to the presiding Administrative Law Judge within 30 days of the date of release of this Order.

4. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

5. Accordingly, it is ordered, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine the extent to which each applicant's proposed operation will be integrated into the overall cultural and educational objectives of the respective applicants;

2. To determine the manner in which each applicant's proposed operation meets the needs of the community to be served;

3. To determine whether the factors in the record demonstrate that one applicant will provide a superior non-commercial educational broadcast service;

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

6. It is further ordered, That the petition to deny filed by Sonoma Broadcasting Inc., is dismissed as moot.

7. It is further ordered, That Bay North shall submit, pursuant to § 1.1311 of the Commission's Rules, to the presiding Adminstrative Law Judge within 30 days after the release of this Order, an environmental narrative statement.

8. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

[1] On October 20, 1982, BTW amended its application to change from an unincorporated assocation to a corporation and to change its name from Black Television Workshop.

[2] A Petition for Leave to Amend was filed by Bay North on December 14, 1982. The amendment pertains to additional information regarding the directors. For good cause shown, the petition is granted and amendment is accepted.

[3] Petitioner also alleged that there would be overlap with a TV station proposed by BTW to operate on Channel 22, Cotati, California, but that application has been dismissed.

9. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

[FR Doc. 83-12709 Filed 5-11-83; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 83-436, File No. BPCT-821221KG, et al.]

Applications, etc.; Golden Valley Communications (Limited Partnership), et al.; Hearing Designation Order

Adopted: April 28, 1983.
Released: May 5, 1983.

In re applications of Golden Valley Communications (limited partnership), Oroville, California, MM Docket No. 83-436, File No. BPCT-821221KG; Jane A. Filler, Dora Clapp and James E. Auel, d.b.a., Oroville Television, Oroville, California, MM Docket No. 83-437, File No. BPCT-821221KI; Gridley Community Television of Oroville [1] Oroville, California, MM Docket No. 83-438, File No. BPCT-821221KJ; Patricia Luz Gonzalez, and Douglas Jones, d.b.a. Oroville Communications 28, Ltd.,[2] Oroville, California, MM Docket No. 83-439, File No. BPCT-821221KK; for construction permit.

By the Chief, Mass Media Bureau:

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications for authority to construct a new commercial television broadcast station on Channel 28, Oroville, California; "Petitions to Deny" the applications of Oroville Television and Oroville Communications 28, Ltd., filed by the State of California and the United States Forest Service; and related pleadings.

2. Two of the applicants, Oroville Television and Oroville Communications 28 Ltd., have each specified "Bloomer Hill" as its transmitter site. On February 17, 1983, and February 18, 1983, "petitions to deny" the applications were filed by the United States Forest Service and the State of California, respectively. The petitioners are concerned that a high-power broadcast station would cause objectionable interference to their public safety communications facilities. These facilities apparently are microwave stations and land mobile radio systems operated by Federal and State agencies.

3. The frequency separation of Channel 28 (554–560 MHz) and the petitioners' facilities is so great (a minimum of 84 MHz) that objectionable interference is not likely to occur. However, in the event that interference does occur as a result of the operation of a Channel 28 broadcast facility, the Commission relies on its long standing policy that the "newcomer" is responsible, financially and otherwise, to effect corrective measures. Accordingly, the "petitions to deny" will be denied. However, since the potentially affected radio facilities involve the safety of life and property, the successful permittee for Channel 28, in Oroville, California is cautioned to take adequate measures *during its equipment test stage* to identify and correct any objectionable interference caused by its operations. This may require meetings and coordination with the potentially affected radio services users (prior to conducting equipment tests) as well as the allocation of time and resources to employ effective corrective measures should interference occur.[3]

4. Golden Valley Communications (Golden) and Gridley Community Television of Oroville (Gridley) are both 9 miles short-spaced to the reference point for Channel 29, Sacramento, California. Golden has not requested a waiver of § 73.610(d) of the Commission's Rules; Gridley has. The other two applicants have proposed transmitter sites that are consistent with the minimum separation requirements. Accordingly, an issue will be specified with respect to the short-spacing of Golden and Gridley's proposed transmitter sites.

5. The Commission is not in receipt of the Federal Aviation Administration's study for the tower proposed by Oroville Television. Consequently, no determination has been made that the tower height and location proposed would not constitute a hazard to air navigation. Accordingly, an appropriate issue will be specified.

6. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

7. Accordingly, it is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to Golden Valley Communications and Gridley Community Television of Oroville whether each of their proposed transmitter sites is consistent with the minimum mileage separation requirements of § 73.610 of the Rules, and if not, whether circumstances exist which would warrant a waiver of the Rule.

2. To determine with respect to Oroville Television whether there is a reasonable possibility that the tower height and location proposed would constitute a hazard to air navigation.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

8. It is further ordered, That the "Petitions to Deny" filed by the United States Forest Service and the State of California ARE DENIED.

9. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to issue 2.

10. It is further ordered, That to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

[1] Applicant amended its application on March 16, 1983, to change its name from Gridley Community Television.

[2] Applicant amended its application to change its limited partner. Since the transfer of the limited partner's interests does not affect control of the partnership, the amendment does not constitute a transfer of control and it is not, therefore, a major amendment. *Anax Broadcasting, Incorporated,* 87 FCC 2d 484 (1981).

[3] The State of California also alleges that the proposed "Bloomer Hill" transmitter site will obstruct the Dept. of Forestry's fire lookout line-of-sight visibility. In the absence of any additional supporting information, the issue will be denied. We note that no such allegation has been made by the Forest Service itself.

VOL 48 ISS 93 MAY 12 1983 UMI

11. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

[FR Doc. 83-12710 Filed 5-11-83; 8:45 am]

BILLING CODE 6712-01-M

[MM Docket No. 83-434. File No. BPCT-820827KH; and MM Docket No. 83-435. File No. BPCT-821027KE]

Applications, etc. Mid Shore Resources, Inc. and Norwell Broadcasting Co.; for a Construction Permit for a New Television Station on Channel 46, Norwell, Massachusetts; Hearing Designation Order

Adopted: April 27, 1983.

Released: May 5, 1983.

By the Chief, Mass Media Bureau:

1. The Chief, Mass Media Bureau, acting pursuant to delegated authority, has under consideration: (1) the above-captioned mutually exclusive applications of Mid Shore Resources, Incorporated ("Mid Shore" or "petitioner") Norwell, Massachusetts and Norwell Broadcasting Company ("Norwell Broadcasting") Norwell, Massachusetts; [1] (2) a motion to dismiss and a petition to deny the Norwell Broadcasting application, filed by Mid Shore on December 21, 1982, and January 5, 1983, respectively; and (3) responsive pleadings thereto.

2. *The Mid Shore Pleadings.* In its motion to dismiss, Mid Shore contends that the Norwell Broadcasting application should be dismissed as not substantially complete and thus unacceptable for filing. Although it is acknowledged that all sections of the application were completed when originally filed, the petitioner maintains that the information contained therein was so incorrect, contradictory, confusing "and so anticipatory of the allowance of liberal amendments by the Commission to gain the level of grantability, as to render its acceptability for filing completely absent." Further, Mid Shore contends that because of these deficiencies, Norwell Broadcasting should not be permitted to amend its application.

3. The standards for determining whether an application is sufficiently complete to be acceptable for filing are well established. What is required is not *total* completeness, but *substantial* completeness. *Miami STV, Inc.*, FCC 80-204, 47 RR 2d 556, released May 2, 1980. *See also Peoria Community Broadcasters, Inc.*, 79 FCC 2d 311 (1980); *K & L Communications, Inc.*, 70 FCC 2d 1987; *KALE, Inc.*, 56 FCC 2d 1033 (1975). *Central Florida Enterprises, Inc.*, 22 FCC 2d 260 (1970). A substantially complete application may be acceptable for filing purposes and yet not demonstrate the requisite qualifications for grant. *James River Broadcasting Corp. v. F.C.C.*, 399 F. 2d 581 (1968). It is undisputed that all sections of the Norwell Broadcasting application were completed when tendered. The petitioner's dispute here involves matters relating to legal and comparative qualifications, not acceptability. It is unnecessary at this time to determine whether Norwell Broadcasting's application is sufficient to demonstrate that it is fully qualified to receive a construction permit. Our acceptance of the application for filling merely means that it has been subject to administrative examination and found to be complete so as to enable the staff to begin processing procedures. Section 73.3564 of the Commission's Rules; *KALE, Inc., supra*, at 1034. Alleged deficiencies of the nature set forth by the petitioner are fairly typical of the many applications filed for construction permits the are routinely accepted for filing and later corrected by amendment. In fact, on January 7, 1983, Norwell Broadcasting properly amended its application as a matter of right pursuant to Section 73.3522(b) of the Commission's Rules. [2] Inasmuch as the application was substantially complete when filed and meets the criteria for acceptance, the motion to dismiss will be denied.

4. In the petition to deny, Mid Shore charges that the Norwell Broadcasting application was filed not to acquire a construction permit, but rather "* * * with the singular intention of exacting a settlement for consideration paid" in exchange for dismissing its application. However, Mid Shore has not supported its allegations with an affidavit of one with personal knowledge of the facts alleged, as required by Section 309(d)(1) of the Communications Act of 1934, as amended, nor submitted any other specific evidence to support its claim. Therefore, there is no basis to act on this allegation. The remainder of the petition to deny, comprises, in essence, a pre-designation petition to specify issues. Since such issues pleadings are no longer permitted, the petition to deny and pleadings related thereto will be dismissed. *Revised Processing of Contested Broadcast Applications*, 72 FCC 2d 202, 214 (1979). This action is without prejudice to Mid Shore, however, as it will have an opportunity to raise such allegations, if warranted, pursuant to § 1.229 of the Commission's Rules.

5. Since we have not received a determination from the Federal Aviation Administration that the tower height and location proposed by each of the applicants would not constitute a hazard to air navigation, an issue regarding this matter will be specified.

6. Norwell Broadcasting proposes to operate with maximum visual effective radiated power (ERP) of more than 1000 kilowatts from a site located within 250 miles of the Canadian border. The proposal poses no interference threat to United States stations; however, it contravenes an agreement between the United States and Canada which limits the maximum visual ERP of United States television stations located within 250 miles of Canada to 1000 kilowatts. *Agreement Effectuated by Exchange of Notes*, T.I.A.S. 2594 (1952). Accordingly, in the event of a grant of the Norwell Broadcasting application, the construction permit shall be appropriately conditioned.

7. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

8. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether there is a reasonable possibility that the tower height and location proposed by each of the applicants would constitute a hazard to air navigation.

2. To determine which of the proposals would, on a comparative basis, better serve the public interest.

3. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

9. It is further ordered, That the Federal Aviation Administration is made a party respondent to the proceeding with respect to issue 1.

10. It is further ordered, That the motion to dismiss filed by Mid Shore Resources, Incorporated, is denied, and its petition to deny is dismissed.

11. It is further ordered, That, in the event of a grant of the Norwell Broadcasting Company application, the construction permit shall be conditioned as follows:

Operation with maximum visual effective radiated power in excess of 1000 kilowatts shall not commence absent Canadian consent.

12. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within twenty (20) days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

13. It is further ordered, That the applicants herein shall, pursuant to Section 311(a) (2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

National Industry Advisory Committee, Common Carrier Communications Subcommittee; Meeting

Pursuant to the provisions of Pub. L. 92-463, announcement is made of a public meeting of the Common Carrier Communication Subcommittee of the National Industry Advisory Committee (NIAC) to be held Thursday, May 26, 1983. The Subcommittee will meet at AT&T Long Lines, 1120 20th Street, NW., Washington, D.C. at 9:30 a.m.

Purpose: To consider emergency communications matters.

Agenda: As follows:

1. Opening remarks by Chairman.
2. Continuation of the deliberations of the Subcommittee's May 5, 1983 meeting.
3. Other business.
4. Adjournment.

Any member of the public may attend or file a written statement with the Committee either before or after the meeting. Any member of the public wishing to make an oral statement must consult with the Committee prior to the meeting. Those desiring more specific information about the meeting may telephone the NIAC Executive Secretary in the FCC Emergency Communications Division at (202) 634-1549.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Manufacturers Hanover Corp. and Redmond Bancorp.; Bank Holding Companies; Proposed de Novo Nonbank Activities

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Manufacturers Hanover Corporation*, New York, New York (finance and insurance activities; Connecticut): To continue to hold the shares of Manufacturers Hanover Financial Services of Connecticut, Inc. ("MHFS") after MHFS engages in the activities of making or acquiring loans and other extensions of credit, secured or unsecured, such as would be made or acquired by a finance company under Connecticut law; and offering credit related life insurance and credit accident and health insurance at a new location in West Hartford, Conneticut. These insurance activities are permissible under sections 601 (A) and (D) of the Garn- St Germain Depository Institutions Act of 1982. MHFS presently engages in these activities from an office in Wallingford, Connecticut. The application is only to continue to hold the shares of MHFS after MHFS engages in these activities at a different location servicing an expnaded service area; the application does not involve the commencement of any new activities at the new location. The office will serve customers in the State of Connecticut. Comments on this application must be received not later than June 6, 1983.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Redmond Bancorp*, Redmond, Washington (lending and servicing activities; western United States): Through its wholly-owned subsidiary, Redmond Mortgage Company, Redmond, Washington, will engage in the financing, refinancing, buying, selling, servicing and warehousing of all types of real estate loans secured by mortgages and trust deeds. These include, but are not limited to, single-family residences, apartments, condominiums, town houses, industrial and commercial real estate loans. These activities will be conducted from an office in Redmond, Washington, serving the western United States. Comments on this application must be received not later than June 6, 1983.

---

[1] By amendment filed on January 7, 1983, the Commission was advised, *inter alia*, that Pepsi Cola Bottling Company of Alton, Inc., in whose name the application was tendered, transferred its interest to Norwell Broadcasting, a general partnership comprised of the two individuals noted as principals in the originally tendered application. The amendment is a minor change in that there is no change in the ownership interest of the principals.

[2] The petitioner has provided no support for its contention that Norwell Broadcasting should not be permitted to amend its application as a matter of right. Moreover, although the petitioner maintains that the amendment constitutes a prohibited 50% change in its originally proposed coverage area, Norwell Broadcasting has demonstrated that its amended proposal is a "minor change" in that the coverage area was changed by 44%. Therefore, no further discussion of these allegations is warranted.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules; Ultramar Public Ltd. Co. et al.

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction and Waiting Period Terminated Effective—

(1) Transaction Number 83-0220 Ultramar Public Limited Company's proposed acquisition of all voting securities of Pittston Petroleum, Incorporated (The Pittston Company, UPE)—April 21, 1983
(2) Transaction Number 83-0254, GFI/Knoll International Holding Company's proposed acquisition of voting securities of Sotheby Parka Bernet Group p.l.c.—April 21, 1983
(3) Transaction Number 83-0205, The Dun & Bradstreet Corporation's proposed acquistion of all voting securities of McCormack & Dodge Corporation—April 22, 1983
(4) Transaction Number 83-0257, Alpha Sierra, Incorporated's proposed acquistion of assets of Baxter Travenol Laboratories, Incorporated—April 22, 1983
(5) Transaction Number 83-0258, Duckwall-ALCO Stores Incorporated's proposed acquisition of all voting securities of Sterling Stores Company, Incorporated—April 21, 1983
(6) Transaction Number 83-0249, Occidental Petroelum Corporation's proposed acquiation of certain voting securities of The Southland Corporation—April 21, 1983
(7) Transaction Number 83-0247, The Southland Corporation's proposed acquistion of all voting securities of Cities Service RMT Corporation—(Occidental Petroleum Company UPE)—April 21, 1983
(8) Transaction Number 83-0259, InterNorth, Incorporated's proposed acquisition of all voting securities of Belco Petroleum Corporation—April 27, 1983
(9) Transaction Number 83-0270, Jefferson Smurfit Group Limited's proposed acquisition of voting securities of The Diamond Match Company (Sir James Goldsmith, UPE)—April 28, 1983
(10) Transaction Number 83-0229, Texaco, Incorporated's proposed acquisition of certain voting securities of Pogo Producing Company—April 11, 1983
(11) Transaction Number 83-0276, Austin Industries, Incorporated's proposed acquisition of all voting securities of National Valve and Manufacturing Company (Henry E. Haller, Jr., UPE)—April 28, 1983
(12) Transaction Number 83-0268, Hughes Properties, Inc.'s proposed acquisition of all assets of Sands Hotel and Casino, Incorporated (Pratt Hotel Corporation, UPE)—April 28, 1983
(13) Transaction Number 83-0240, Heizer Corporation's proposed acquisition of all voting securities of Sea Pines Company—April 28, 1983

For further information contact: Patricia A. Foster, Compliance, Specialist, Premerger Notification Office, Bureau of Competition, Room 301, Federal Trade Commission, Washington, D.C. 20580 (202) 523-3894.

By direction of the Commission.
Emily H. Rock,
Secretary.

BILLING CODE 4160-17-M

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Village of Chalkyitsik, Alaska; Ordinance Prohibiting the Introduction, Possession, and Sale of Intoxicating Beverages

April 27, 1983.

This Notice is published in accordance with authority delegated by the Secretary of Interior to the Assistant Secretary-Indian Affairs by 209 DM 8, and in accordance with the Act of August 15, 1953, 67 Stat. 586, 18 U.S.C. 1161. I certify that the Chalkyitsik Liquor Ordinance relating to the application of the Federal Indian Liquor Laws within an area of Indian country was duly adopted by the Chalkyitsik Village Council on March 18, 1982. The Chalkyitsik Liquor Ordinance reads as follows:

John E. Fritz,

Acting Assistant Secretary, Indian Affairs.

Code of Village Regulations

Chalkyitsik, Alaska

Chapter 10—Definitions and Scope

10.01 *Enabling Action:* Pursuant to the authority granted to the Village Council under Article III of the Bylaws of the Village of Chalkyitsik, the village council enacts the following to be the code of village regulations.

10.05 *Village Regulations, Purpose:* To set forth a code of village regulations that will govern the conduct of people within the boundaries of the Chalkyitsik village townsite so that no infringement will be made upon individual rights or the peace and dignity of the people, the village, and the State of Alaska.

10.10 *Village Regulations:* Are the rules that all persons shall obey when within the boundaries of the Chalkyitsik village townsite. Regulations shall be enacted by the council to protect the life, property, and welfare of the people and village. New rules may be enacted to the regulations by the council as the need arises.

10.15 *Chalkyitsik Village Boundaries:* The boundaries of the Chalkyitsik village townsite shall be the boundaries as surveyed and marked by the Bureau of Land Management as shown on the plat marked Chalkyitsik Townsite.

10.20 *Village Council:* For the purpose of these regulations, the village council shall mean the council members as provided under Article VII of the Bylaws of the Village of Chalkyitsik.

10.30 *Village Member:* A village member shall be as defined under Article IV of the Bylaws of the Village of Chalkyitsik and shall include all stockholders of the Chalkyitsik Native Corporation.

10.40 *Village VPSO:* For the purposes of these regulations, the Village Public Safety Officer shall be a person appointed or so designated by the village council, and shall serve at the pleasure of the Council.

10.50 *Dry Village:* A dry village shall mean that no alcoholic beverages shall be transported to, sold, or consumed by any person or persons within the boundaries of the Chalkyitsik village townsite.

10.55 *Alcohol, or Intoxicating Beverages:* Shall include all forms of alcohol of intoxicating beverages which are manufactured, sold, and commonly used for human consumption.

10.60 *Hallucinogenic Drugs and Substances:* Shall include all those drugs and substances which are illegal under state and federal laws.

10.65 *Possession:* Possession shall mean on his person, under his control, or on his property. It shall also mean on her person, under her control, or on her property.

10.70 *Weapons:* Weapons shall mean all high powered rifles, shotguns, hand guns, and knives, or any other instruments that are dangerous when used against or to the disadvantage of any person or persons.

10.75 *Surface Vehicles:* Surface vehicles shall include all motor vehicles driven within the boundaries of the Chalkyitsik village townsite.

10.80 *Speed:* Shall mean the rate of motion of any surface motor driven vehicle within the boundaries of the Chalkyitsik village townsite.

10.85 *Summer Months:* Shall be from the last day of school in the spring to the first day of school in the fall.

10.90 *Minors:* Shall include all persons under the age of eighteen (18).

Chapter 20—Liquor Control

Purpose of this regulation is to provide for a dry village as clearly mandated by the people in the form of a petition against the drug and alcohol abuse and the resulting disorder and problems which occur as a direct result of such abuse.

20.01 *Regulation:* No person or persons will transport to, or cause to be transported to the Village of Chalkyitsik, intoxicating liquor for the purpose of selling or consuming such intoxicating liquor within the boundaries of the Chalkyitsik village.

20.05 *Possession:* No person or persons will possess by consumption or otherwise intoxicating liquor within the boundaries of the Chalkyitsik village.

20.10 *Complaints and Enforcement:* This chapter shall be enforced as a civil matter under Sec. 90.20 of this code. In addition, to village enforcement of this chapter, a person unlawfully introduces, possesses and/or sells intoxicating beverages contrary to 18 U.S.C. § 1161 (or any subsequently enacted law relating to federal regulation of intoxicating beverages in Indian county) by

(a) introducing, selling or possessing intoxicating beverages within the Indian country of the Village of Chalkyitsik contrary to this chapter, and

(b) such a determination is found pursuant to the tribal judicial code, and

(c) said person fails to comply with a duly entered tribal court order.

The First Chief of the Village of Chalkyitsik is hereby authorized to request federal enforcement of 18 U.S.C. § 1161 (or any subsequently enacted federal regulation of intoxicating beverages in Indian country) in the event that this section is violated.

Certification

I, *James Nathaniel, Sr.* hereby certify that the Code of Village Regulations was revised and approved by the Chalkyitsik Village Council at a duly called meeting of this 17th day of January, 1983.

James Nathaniel, Sr.,

1st Chief.

Attest: Robin Thomas.

[A-18560]

Arizona; Order Providing for Opening of Public Lands

May 4, 1983.

1. By Order P-150 dated May 6, 1976, the Federal Power Commission (now the Federal Energy Regulatory Commission) vacated the land withdrawal in its entirety for Power Project 150 of May 24, 1921, August 26, 1921, May 12, 1922, April 18, 1936, and May 5, 1952, as to the following described lands:

Gila and Salt River Meridian, Arizona

All portions of the following tracts lying within 20 feet of the centerline of the transmission line location shown on maps designated as Exhibit J(1), Sheets 1 to 8, inclusive, and entitled "Map of Location of Transmission Line of the Pacific Gas and Electric Company", and filed in the office of the Federal Power Commission on May 16, 1921:

T. 3 N., R. 2 E.,
Sec. 11, SE¼SE¼;
Sec. 14, NE¼NE¼.
T. 4 N., R. 2 E.,
Sec. 1, W½SW¼;
Sec. 12, W½W½;
Sec. 13, W½W½;
Sec. 25, W½NW¼.
T. 5 N., R. 2 E.,
Sec. 3, lot 1, SE¼NE¼, NE¼SE¼;
Sec. 11, W½NW¼, SW¼;
Sec. 14, E½W½;
Sec. 23, E½W½;
Sec. 26, SW¼NE¼, E½NW¼, NE¼SW¼, W½SE¼;
Sec. 35, NW¼NE¼, SE¼NE¼.
T. 6 N., R. 2 E.,
Sec. 22, SW¼NW¼.
T. 7 N., R. 2 E.,
Sec. 35, NW¼NW¼.
T. 8 N., R. 2 E.,
Sec. 3, lot 1;
Sec. 22, SW¼SW¼;
Sec. 27, NW¼NW¼, SE¼SW¼, W½SW¼.
T. 9 N., R. 2 E.,
Sec. 25, S½SE¼;
Sec. 34, SE¼SE¼;
Sec. 35, S½NE¼, NE¼SW¼, S½SW¼, NW¼SE¼.
T. 9 N., R. 3 E.,
Sec. 19, SE¼SE¼;
Sec. 20, SE¼NE¼, NE¼SW¼, S½SW¼.

The areas described aggregate approximately 34 acres in Maricopa and Yavapai Counties.

2. The surface estate of the lands described in paragraph 1 has been conveyed out of Federal ownership. Therefore, these lands will not be open to operation of the public land laws.

3. Of the lands described in paragraph 1, the mineral estate in the following described lands was reserved to the United States and remains under the jurisdiction of the Bureau of Land Management:

T. 7., R. 2 E.,
Sec. 35, NW¼NW¼.

The area described aggregates approximately one area in Maricopa County.

4. At 10:00 a.m. on May 10, 1983, the land described in paragraph 3 shall be open to the operation of the United States mining laws, subject to valid existing rights and the requirements of applicable law.

5. The land described in paragraph 3 has been and remains open to applications and offers under the mineral leasing laws.

Inquiries concerning the lands should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, 2400 Valley Bank Center, Phoenix, Arizona 85073.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

Phoenix District Advisory Council; Meeting

The first meeting of the newly-appointed Phoenix District Advisory Council will be held June 15, 1983, between 9:00 a.m. and 5:00 p.m. The meeting will be held at the District Headquarters, 2929 West Clarendon Avenue, Phoenix, Arizona. The Council has been established by, and will be managed according to, the Federal Advisory Committee Act of 1972, the Federal Land Policy and Management Act of 1976, and the Public Rangelands Improvement Act of 1978.

The agenda for the meeting includes:

1. Introduction of Council members.
2. Discussion of agenda, meeting objectives and function of the Council.
3. Discussion of District organization, resources, and current activities.
4. Issues and programs in the Lower Gila, Kingman, and Phoenix Resource Areas.
5. Election of officers.
6. Public comment and statements.
7. Discussion of Council objectives.
8. Future meetings and agenda topics.

The meeting is open to the public. Interested persons may make oral statements to the Council between 3:30 p.m. and 4:00 p.m. or file written statements for the Council's consideration. Anyone wishing to make an oral statement must notify the District Manager at the above address by June 10 1983. Depending on the number of persons wishing to make an oral statement, a per-person time limit may be established.

Summary minutes of the meeting will be maintained in the District Office and be available for public inspection and reproduction during regular business hours within thirty days following the meeting.

For further information contact Jean Ghigo, (602) 241–2903.

Dated: May 4, 1983.

William K. Barker,

District Manager.

BILLING CODE 4310-84-M

[I-20087]

Realty Action; Competitive Sale of Public Lands; Cassia County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I-20087, Competitive Sale of Public Lands In Cassia County, Idaho.

SUMMARY: The following land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of the tract is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The lands will be offered for sale at public auction for no less than the appraised fair market value indicated below. Both sealed and oral bids will be accepted.

Legal description	Acres	Value
T. 15 S., R. 24 E., B.M. Sec. 22: SW¼NE¼	40	$5,000

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year perod.

The lands will be subject to the following reservations when patented:

1. Ditches and Canals.
2. Oil and Gas and Geothermal rights.
3. Oil and Gas lease I-18032.

The public auction will be held on July 27, 1983 at 1:30 p.m.

ADDRESSES: The public auction will be held at the Burley District Office, 200 South Oakley Highway, Burley, Idaho 83318. Additional information concerning the land, terms and conditions of the sale, and bidding instructions may be obtained from Nick Cozakos, District Manager at the above address, or by calling (208) 678-5514.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Nick James Cozakos.

Dated: May 2, 1983.

Nick James Cozakos,

District Manager.

BILLING CODE 4310-84-M

[CA 13733]

Realty Action—Lease of Public Lands in Shasta County, Calif.

The following-described land has been identified as suitable for lease under Section 302(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1732, at no less than fair market value.

Legal Description: T. 32 N., R. 5 W., Section 30, M.D.M., California, as described by metes and bounds on Exhibit A.

Acreage: Approximately 0.61 acres.

Rental Value: $390 year (estimated).

The above-described land is being offered as a direct, noncompetitive lease to William Dowell, owner of the improvements (house and garage) on the lease tract. The subject lands are adjacent to Iron Mountain Road approximately four miles west of Redding.

The subject lands were previously leased to W. E. and Libby Alexander. Mr. Dowell acquired the improvements from Mrs. Alexander subsequent to Mr. Alexander's death.

This decision notice is based on the following reasons:

1. The land is not of national significance and not essential to any Bureau of Land Management program.

2. The proposed action will not have any significant (including controversial) effects on the human and natural environment.

3. The proposed use is in conformance with the existing land use plan.

For a period of 45 days from this notice, interested parties may submit comments on the proposed lease or its environmental consequences to the Area Manager, 355 Hemsted Drive, Redding, California 96002. Any adverse comments will be evaluated by the State Director. In the absence of any action by the State Director, this realty action will become the final determination of the Department of the Interior.

Dated: May 4, 1983.

Robert J. Bainbridge,

Area Manager.

BILLING CODE 4310-84-M

[I-19182]

Realty Action; Modified Competitive Sale of Public Lands; Lemhi County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I-19182, Modified Competitive Sale of Public Lands in Lemhi County, Idaho.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($8,000).

T.21N.,R.23E., Boise Meridian
Section 14: N½SW¼W¼,
Section 15: SE¼NE¼NE¼,SE¼SE¼NE¼
Total, 40 acres

The land will be sold at public auction by modified competitive bidding. William B. Swahlen, Rt. 1, Salmon, Idaho 83467 owner of all adjacent property, will have a preference right to purchase the land. Such a preference is being offered because he has access to the tracts and has used the land for agricultural production. Several irrigation ditches also cross through the tract and are used in conjunction with his adjacent farming operation.

The location and physical characteristics of this isolated tract make it difficult and uneconomic to manage as public land. The sale is consistent with the Bureau's planning for the area. The land has not been used and is not required for any federal purpose. Disposal would best serve the public interest by facilitating proper land use planning and development. The sale would enhance land use compatibility with adjoining private land.

Patent, when issued, will contain the following reservations:

1. All minerals in the lands will be reserved to the United States in accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.

2. A right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

3. All valid existing rights and reservations of record including: (a) Oil and gas lease I-16485

4. The right of the United States or its permittees or licensees to enter upon, occupy, and use any or all of such lands for power purposes under Section 24 of the Federal Power Act for Power Site Reserve 595 (E.O. dated April 4, 1917).

The sale will be held at the Salmon BLM District Office, Highway 93 South, Salmon, Idaho on Thursday, July 21, 1983 at 3:00 p.m.

Bidder Qualifications: The Federal Land Policy and Management Act requires that bidders must be citizens of the United States 18 years of age or over, or, in the case of a corporation, be subject to the laws of any state of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly qualified agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value of $8,000. Bids must be for all the land in the specified tract.

Method of Bidding: Bids may be made either by mail or personally at the sale. Bids sent by mail will only be considered if received at the Salmon District Office, P.O. Box 430, Salmon, Idaho 83467, prior to a 3:00 p.m. bid opening on July 21, 1983. Bids sent by mail must be in sealed envelopes accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount of the bid. All sealed envelopes must be marked in the lower left-hand corner, "Sealed Bid, Public Land Sale, I-19182". If two or more valid sealed bids in the same amount are received and they are the high bid, the determination of which bid is to be considered the highest bid shall be by a drawing. The drawing, if required shall be held immediately following the opening of the bids. The highest qualifying sealed bid shall then be announced.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid is announced. The highest sealed bid will be the base for oral bids. All oral bids must be in increments of not less than $20.00. Sealed bidders present at the sale may also make oral bids. The highest bid price, either sealed or oral, will establish the sale price. If the highest bid is an oral bid, the successful bidder will be required to pay immediately one-fifth of the high bid price by cash, personal check, money order, bank draft, or any combination of these.

Modified Bidding: For a period of 30 days following the date of the sale, William B. Swahlen will have a preference right to purchase the land by meeting the highest bid. If he meets the highest bid, the land will be sold to him, and the other low bids will be returned. Refusal or failure by the designated bidder to meet the highest bid shall constitute a loss of preference rights, and the land will be sold to the highest bidder.

Final details: The successful high bidder, whether it is by sealed or oral bid, will be required to submit full payment for the balance of the bid within 30 days from the date of the sale. Failure to submit such payment within the 30 day period shall result in the cancellation of the sale and the bid deposit shall be forfeited. All unsuccessful sealed bids will be returned within 30 days from the sale date. If no bids for the land, either sealed or oral, are received on the sale date, the sale will be adjourned until the next Thursday at the same hour and place and continued on each succeeding Thursday, until the lands are sold as specified in this notice or the sale is otherwise terminated.

FOR FURTHER INFORMATION CONTACT: *Inquiries:* Detailed information concerning this sale, including the planning documents and Environmental Assessment, is available for review in the Salmon District Office, Highway 93 South, Salmon, Idaho. For a period of 45 days from the date of this notice, interested parties may submit comments to the Salmon District Manager at the above address. Any adverse comments will be evaluated by the Idaho State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director this realty action will become the final determination of the Department of the Interior.

Kenneth G. Walker,

District Manager.

[FR Doc. 83-12006 Filed 5-11-83; 8:45 am]

BILLING CODE 4310-84-M

[I-19181]

Realty Action; Modified Competitive Sale of Public Lands; Lemhi County, Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, I-19181, Modified Competitive Sale of Public Lands in Lemhi County, Idaho.

SUMMARY: The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat.

VOL
48
ISS
93
MAY
12
1983
UMI

2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($12,000):

T. 21 N., R. 23 E., Boise Meridian
Section 10: W½NE¼, SE¼NW¼
Total, 120 acres

The land will be sold at public auction by modified competitive bidding. Bolton Ranch, Inc. Rt. 1, Box 14 and William B. Swahlen, Rt. 1, both of Salmon, Idaho 83467, are the adjoining landowners who will have a preference right to purchase the tract. This preference is being offered because there is no public access to the tract and both Bolton Ranch and Mr. Swahlen have access.

Mr. Swahlen has used this land as part of his adjoining livestock operation. This tract is also fenced in with Swahlen's private land. A modified sale would afford compatible future uses and resolve the unauthorized livestock use without jeopardizing the present uses.

The location and physical characteristics of this isolated tract make it difficult and uneconomic to manage as public land. The sale is consistent with the Bureau's planning for the area. The land has not been used and is not required for any federal purpose. Disposal would best serve the public interest by facilitating proper land use planning and development. The sale would enhance land use compatibility with adjoining private land.

Patent, when issued, will contain the following reservations:

1. All minerals in the lands will be reserved to the United States in accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.

2. A right-of-way for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

3. All valid existing rights and reservations of record including:

(a) Oil and gas lease I–16485.

(b) The right of the United States or its permittees or licensees to enter upon, occupy, and use any or all of such lands for power purposes under Section 24 of the Federal Power Act for Power Site Reserve 595 (E.O. dated 4/4/1917).

The sale will be held at the Salmon BLM District Office, Highway 93 South, Salmon, Idaho on Thursday, July 21, 1983 at 1:00 p.m.

Bidder *Qualifications:* The Federal Land Policy and Management Act requires that bidders must be citizens of the United States 18 years of age or over, or, in the case of a corporation, be subject to the laws of any state of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly qualified agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value of $12,000. Bids must be for all the land in the specified tract.

Method of Bidding: Bids may be made either by mail or personally at the sale. Bids sent by mail will only be considered if received at the Salmon District Office, P.O. Box 430, Salmon, Idaho 83467, prior to a 1:00 p.m. bid opening on July 21, 1983. Bids sent by mail must be in sealed envelopes accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount of the bid. All sealed envelopes must be marked in the lower left-hand corner, "Sealed Bid, Public Land Sale, I–19181". If two or more valid sealed bids in the same amount are received and they are the high bid, the determination of which bid is to be considered the highest bid shall be by a drawing. The drawing, if required shall be held immediately following the opening of the bids. The highest qualifying sealed bid shall then be announced.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid is announced. The highest sealed bid will be the base for oral bids. All oral bids must be in increments of not less than $20.00 Sealed bidders present at the sale may also make oral bids. The highest bid price, either sealed or oral, will establish the sale price. If the highest bid is an oral bid, the successful bidder will be required to pay immediately one-fifth of the high bid price by cash, personal check, money order, bank draft, or any combination of these.

Modified Bidding: For a period of 30 days following the date of the sale, Bolton Ranch, Inc. and William B. Swahlen will have a preference right to purchase the land by meeting the highest bid. They will determine the division of the land. If no agreement is reached the authorized officer will determine the division. If either or both of them meet the highest bid, the land will be sold to them, and the other low bids will be returned. Refusal or failure by the designated bidder to meet the highest bid shall constitute a loss of preference rights, and the land will be sold to the highest bidder.

Final Details: The successful high bidder, whether it is by sealed or oral bid, will be required to submit full payment for the balance of the bid within 30 days from the date of the sale. Failure to submit such payment within the 30 day period shall result in the cancellation of the sale and the bid deposit shall be forfeited. All unsuccessful sealed bids will be returned within 30 days from the sale date. If no bids for the land, either sealed or oral, are received on the sale date, the sale will be adjourned until the next Thursday at the same hour and place and continued on each succeeding Thursday, until the lands are sold as specified in this notice or the sale is otherwise terminated.

FOR FURTHER INFORMATION CONTACT:

Inquires: Detailed information concerning this sale, including the planning documents and Environmental Assessment, is available for review in the Salmon District Office, Highway 93 South, Salmon, Idaho. For a period of 45 days from the date of this notice, interested parties may submit comments to the Salmon District Manager at the above address. Any adverse comments will be evaluated by the Idaho State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director this realty action will become the final determination of the Department of the Interior.

Kenneth G. Walker,

District Manager.

BILLING CODE 4310–84–M

[ES 24622, Survey Group 121]

Minnesota; Filing of Plat of Survey

1. On December 6, 1979, the plat representing the survey of an island in T. 59 N., R. 26 W., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The island listed below describes the land omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 59 N., R. 26 W.,
Tract No. 37.

2. Tract No. 37 rises about 5 feet above the ordinary high water mark of Smith Lake and is composed of glacial till and boulders up to 4 feet in diameter. Its edaphic character is entirely similar to the mainland, supports the same vegetation and has always been vegetated similarly to the upland surrounding the lake. This is evidenced by old pine stumps which were in excess of 20 inches in diameter when cut many years ago; these stumps indicate an age of 90 years by growth ring count. The age of these stumps and the elevation and composition of the soil show conclusively that the island existed in 1858 when Minnesota was admitted into the Union and all subsequent dates.

3. The Tract No. 37 was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is therefore held to be public land.

4. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 27, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

[FR Doc. 83–12684 Filed 5–11–83; 8:45 am]

BILLING CODE 4310–84–M

Minnesota; Filing of Plat of Survey

1. On October 6, 1982, the plat representing the survey of one island in T. 34 N., R. 30 W., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The island listed below describes the land omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 34 N., R. 30 W.,
Tract No. 37.

2. The island Tract No. 37 rises about 7 feet above the ordinary high water mark of Stickney Lake and is composed of glacial till parent material. Timber on the island consists of ash, basswood, willow, aspen, elm, oak, and cedar. Trees up to 24 inches in diameter and 100 years of age were found on the island. Tree stumps ranging up to 30 inches in diameter were found on the island.

3. The elevation of the island, age of timber, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. Tract No. 37 was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is therefore held to be public land.

5. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304 on or before June 27, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

BILLING CODE 4310–84–M

[ES 32056, Survey Group 142]

Minnesota; Filing of Plat of Survey

1. On October 6, 1982, the plat representing the survey of one island in T. 35 N., R. 31 W., Fourth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The island listed below describes the land omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 35 N., R. 31 W.,
Tract No. 37.

2. The island Tract No. 37 rises 4 feet above the ordinary high water mark of Mississippi River and is composed of glacial till parent material. The character of the island is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of silver maple, willow, ash, and elm. The largest of the dominant trees on the island is a silver maple measuring 30 inches in diameter and is approximately 100 years of age.

3. This island was noted in the 1859 survey by Robert D. Lancaster, Deputy Surveyor. This fact, along with the elevation of the island, age of timber, similarity of timber succession on the island and adjacent surveyed lands, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858, when Minnesota was admitted into the Union, and at all subsequent dates.

4. Tract No. 37 was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). Therefore, it is held to be public land.

5. All inquiries relating to this island should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, on or before June 27, 1983.

Jeff O. Holdren,

Deputy State Director for Lands and Minerals Operations.

Minnesota; Filing of Plats of Survey

1. On October 5, 1982, the plats representing the survey of two islands in Cedar Lake in T. 46 N., R. 27 W., Fourth Principal Meridian, Minnesota, were accepted. They will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The islands listed below describe the lands omitted from the original survey.

Fourth Principal Meridian, Minnesota

T. 46 N., R. 27 W.,
Tract Nos. 37 and 38.

2. Tract No. 37 rises about 5 feet above the ordinary high water mark of Cedar Lake and is composed of glacial till parent material with large granite boulders. The character of this island is similar in all respects to that of the adjacent surveyed lands. Timber consists of cedar, oak, basswood, ash, and elm. An oak tree which measured 20 inches in diameter was aged at 90 years. Tree stumps were also found on the island.

The island Tract No. 38 rises about 3 feet above the ordinary high water mark of Cedar Lake and is composed of glacial till parent material with large granite boulders. The character of this tract is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of ash, elm, basswood, willow, and dogwood. A willow tree measuring 20 inches in diameter was aged at 80 years old. Tree stumps were found on this Tract.

3. The elevation of the islands, age of timber, presence of tree stumps, similarity of timber succession on the islands and mainland, composition of the soil and character of the channels, show conclusively that these Tracts of land existed as islands in 1858 when Minnesota wad admitted into the Union, and at all subsequent dates.

4. The areas described above were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore, held to be public land.

5. All inquiries relating to these islands should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, on or before June 27, 1983.

Jeff O. Holdren,

Minnesota; Filing of Plat of Survey

1. On October 8, 1982, the plat representing the survey of an island in Perch Lake, T. 131 N., R. 38 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The island listed below describes the land omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 131 N., R. 38.,
Tract No. 37.

2. Tract No. 37 rises about 4 feet above the ordinary high water mark of Perch Lake, and is composed of glacial till parent material with large granite boulders. The character of the island is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of birch, aspen, oak, basswood, willow, and ash. Tree stumps were found on the Tract No. 37.

3. The elevation on the island, age of tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, how conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. The island described above was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). It is therefore held to be public land.

Minnesota; Filing of Plat of Survey

1. On October 8, 1982, the plat representing the survey of two islands in Lake Mason in T. 134 N., R. 43 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia at 7:30 a.m. on June 27, 1983.

The islands listed below describe the lands omited form the original survey.

Fifth Principal Meridian, Minnesota

T. 134 N., R. 43 W.,
Tracts 37 and 38.

2. The island Tract No. 37 rises about 15 feet above the ordinary high water mark of Lake Mason, and is composed of glacial till parent material. Timber consists of elm, oak, basswood, ash, willow, cedar, and aspen. An elm tree measuring 27 inches in diameter was found on this Tract and is aged at approximately 135 years. Tree stumps were found on the island.

Tract No. 38 rises about 12 feet above the ordinary high water mark of Lake Mason and is composed of glacial till parent material. Timber consists of elm, ash, oak, willow, basswood, box elder, cottonwook, birch, and balsam poplar. An elm tree measuring 24 inches in diameter was aged at about 120 years.

3. The elevation of the islands, age of timber, similarity of timber succession on the islands and mainland, composition of the soil and character of the channel, show conclusively that these Tracts of land existed as islands in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. The areas described above were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore, held to be public land.

Minnesota; Filing of Plat of Survey

1. On October 8, 1982, the plat representing the survey of an island in Tom's Lake, T. 1231 N., R. 39 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m. on June 27, 1983.

The island listed below describes the land omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 131 N., R. 39 W.,
Tract No. 37.

2. The island Tract No. 37 rises about 10 feet above the ordinary high water mark of Tom's Lake, and is composed of glacial till parent material with large granite boulders. Its character is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of elm, oak, ash, basswood, aspen, willow, and ironwood. An oak tree measuring 14 inches in diameter was found on the island and was aged at approximately 80 years. Tree stumps were found on the Tract.

3. The elevation of the island, age of timber, presence of large tree stumps, similarity of timber succession on the island and mainland, composition of the soil and character of the channel, show conclusively that this body of land existed as an island in 1858 when Minnesota was admitted into the Union, and at all subsequent dates.

4. The island described above was found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore held to be public land.

Minnesota; Filing of Plat of Survey

1. On October 6, 1982, the plat representing the survey of 5 islands in T. 117 N., R., 30 W., Fifth Principal Meridian, Minnesota, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia at 7:30 a.m. on June 27, 1983.

The islands listed below describe the lands omitted from the original survey.

Fifth Principal Meridian, Minnesota

T. 117 N., R. 30 W.,
Tracts 37, 38, 39, 40, and 41.

2. Tract No. 37 rises about 8 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and granite boulders up to 4 feet in diameter. Its character is similar in all respects to that of the adjacent surveyed lands. Timber consists of oak, elm, ash, cottonwood, box elder, and willow. An elm tree measuring 20 inches in diameter and was aged at about 80 years. Old tree stumps were found on the island.

The island Tract No. 38 rises about 6 feet above the ordinary high water mark

of Cedar Lake, and is composed of glacial till and outcrops of granite. Its character is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of oak, elm, ash, basswood, and cottonwood. The ground cover consists of dense growth dogwood and willow. An elm tree measuring 20 inches in diameter was aged at approximately 80 years. Old tree stumps were found on this Tract.

Tract No. 39 rises about 6 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and outcrops of granite. Its character is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of elm, ash, box elder, basswood, cottonwood, aspen, and willow. The ground cover consists of dense growth willow. Old stumps were found on the island. An elm tree measuring 20 inches in diameter was aged at approximately 80 years.

The island Tract No. 40 rises about fi feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till and granite boulders ranging up to 5 feet in diameter. Its character is similar in all respects to that of the adjacent surveyed lands. Timber on the island consists of oak, elm, ash, basswood, box elder, and willow. The ground cover consists of dense growth snowberry and willow. An elm tree measuring approximately 16 inches in diameter was aged at approximately 70 years. Tree stumps were found on the island.

Tract No. 41 rises about 10 feet above the ordinary high water mark of Cedar Lake, and is composed of glacial till. Its character is similar in all respects to that of the adjacent surveyed lands. Timber consists of ash, elm, oak, and basswood. The ground cover consists of willow and snowberry shrubs. An elm tree measuring 16 inches in diameter was aged at approximately 80 years. Tree stumps 30 inches in diameter and aged at approximately 150 years were found on the island.

3. The elevation of the islands, presence of old stumps, similarity of timber succession on the islands and mainland, composition of the soil and character of the channel, show consclusively that these bodies of land existed as islands in 1858 when Minnesota was admitted in to the Union, and at all subsequent dates.

4. The islands described above were found to be over 50 percent upland in character within the purview of the Swamp Lands Act of September 28, 1850 (9 Stat. 519). They are, therefore held to be public land.

5. All inquiries relating to these islands should be sent to the Deputy State Director for Lands and Minerals Operations, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304, on or before June 27, 1983.

Conveyance of Public Lands; Montana

May 5, 1983.

AGENCY: Bureau of Land Management, Montana State Office, Interior.

ACTION: Notice of Conveyance of Public Lands, Montana.

SUMMARY: Notice is hereby given that, pursuant to Section 206 of the Act of October 21, 1976, the following described public lands were transferred to various private parties in exchange for certain other lands or interests in lands:

Principal Meridian, Montana

John R. Hughes

T. 13 N., R. 24 E.,
Sec. 2, NW¼SE¼.
40 acres.

A. Russell and Betty Ann Gjerde

T. 14 N., R. 24 E.,
Sec. 23, NE¼NW¼;
Sec. 33, NE¼SW¼;
Sec. 35, NW¼NW¼, NE¼SW¼.
160 acres.

George Poetter or Alice Poetter

T. 16 N., R. 20 E.,
Sec. 35, NE¼SE¼.
40 acres.

Tom Duffy

T. 16 N., R. 21 E.,
Sec. 25, SE¼.
160 acres.

Bruce Brown or Shirley Brown

T. 17 N., R. 17 E.,
Sec. 12, NW¼NW¼.
40 acres.

Eleanor L. Fields

T. 17 N., R. 21 E.,
Sec. 34, SE¼NW¼.
40 acres.

William D. Snapp

T. 18 N., R. 17 E.,
Sec. 20, SW¼SW¼.
40 acres.

M. R. Norman, et al.

T. 19 N., R. 17 E.,
Sec. 21, SE¼SE¼;
Sec. 22, SE¼NW¼;
Sec. 27, SW¼NW¼.
120 acres.

Gail Barnes or Patricia Barnes

T. 19 N., R. 17 E.,
Sec. 25, NW¼NW¼;
Sec. 26, SE¼NE¼.
80 acres.

Sherry Arntzen

T. 19 N., R. 19 E.,
Sec. 14, W½W½.
160 acres.

J. A. Martin

BILLING CODE 4310-84-M

[M 55146]

Montana; Order Providing for Opening of Public Lands

May 3, 1983.

AGENCY: Bureau of Land Management, Interior.

ACTION: M 55146, Order Providing for Opening of Public Lands in Rosebud and Custer Counties, Montana.

SUMMARY: Pursuant to Section 206 of the Act of October 21, 1976 (43 U.S.C. 1716 (1976)), the following described land was conveyed to the United States:

Principal Meridian, Montana
T. 12 N., R. 44 E.,
Sec. 12, ALL.
T. 12 N., R. 45 E.,
Sec. 6, Lots, 1, 2, 3, 4, 5, 6 and 7, S½NE¼, SE¼NW¼, E½SW¼, SE¼;
Sec. 7, Lots, 1, 2, 3 and 4, E½, E½W½;
Sec. 8, NW¼SW¼, N½SE¼; and
Sec. 18, NE¼, N½SE¼, SE¼SE¼.
Aggregating 2,136.19 acres

The grantor reserved all right and title to all minerals existing on the lands, except coal where it was reserved to the United States in the original patent.

This order restores the land acquired by the United States to the operation of the public land laws generally. At 9 a.m. on June 20, 1983, the lands shall be open to the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law. All applications received at or prior to 9 a.m. on June 20, 1983, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Edgar D. Stark,
Acting Deputy State Director, Division of Lands and Renewable Resources.

[N-37749]

Nevada; Proposed Withdrawal and Opportunity for Public Meeting

On May 3, 1983, a petition was approved allowing the Bureau of Land Management to file an application to withdraw the following described public land from settlement, sale, location, or entry under the general public land laws, including the mining laws, subject to valid existing rights:

A parcel of land within the S½NW¼ of Section 1, T. 34 N., R. 55 E., MDM, Elko County, Nevada, and more particulary described as follows:
Beginning at the point of intersection of the east-west quarter-section line of said Section 1 and the newly adopted southerly right-of-way line of former U.S. Highway 40 (now 40 feet southeasterly from centerline of said highway), as Corner No. 1, from which point the West quarter-section corner of said Section 1 bears S. 89°08'02" W. 570.09 feet.
thence along said new ritght-of-way, from a tangent bearing N. 36°31'09" E. on a curve to the right, with a radius of 9960 feet, through a central angle of 0°36'59" an arc distance of 112.95 feet, to Corner No. 2,
thence continuing along said new right-of-way N. 39°10'08" E. 474.25 feet to Corner No. 3,
thence N.. 89°08'02" E. 849.20 feet to Corner No. 4,
thence S. 0°51'58" E. 450.00 feet to Corner No. 5, a point on the east-west quarter-section line of said Section 1,
thence along said line S. 89°08'02" W. 1226.43 feet to Corner No. 1, the point of beginning.

The area described contains 10.7 acres in Elko County.

The purpose of the proposed withdrawal is to reserve the land for use as the Bureau of Land Management Elko office complex which will consolidate three existing facilities into one administrative site.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested persons who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the undersigned officer within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with regulations set forth in 43 CFR Part 2300.

For a period of two years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or canceled, or the withdrawal is approved prior to that date. Construction of the administrative site will be permitted during this segregative period under a right-of-way authorization.

All communications in connection with this proposed withdrawal should be addressed to the Deputy State Director, Operations, Nevada State Office, P.O. Box 12000, Reno, Nevada 89520.

May 3, 1983.

Wm. J. Malencik,
Deputy State Director, Operations.

Information Collection Submitted for Review

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed information collection requirement and related explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the Bureau clearance officer and the Office of Management and Budget reviewing official at 202–395–7340.

Title: 30 CFR Part 221.37, Site Security on Federal and Indian (except Osage) Oil and Gas Leases.

Bureau Form Number: None.

Frequency: Nonrecurring.

Discription of Respondents: Lessees and/or operators of Federal and Indian (except Osage) Oil and Gas resources.

Annual Respondents: 201, 080.

Annual Burden Hours: 94, 809.

Bureau Clearance Office (alternate): Linda Gibbs, 202–653–8853.

Dated: April 12, 1983.

James M. Parker,
Associate Director, Bureau of Land Management.

[M-58045]

Realty Action: Exchange of Public and Private Lands in Valley County, Montana

AGENCY: Bureau of Land Management, Lewistown District Office, Interior.

ACTION: Notice of Realty Action M–58045, Exchange of Public and Private Lands in Valley County, Montana.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Principal Meridian, Montana
T. 36 N., R. 41 E.
Sec. 7: N½SE¼
Aggregating 80 acres of public land

In exchange for these lands, the United States Government will acquire the surface estate in the following described lands:

Principal Meridian, Montana
T. 35 N., R. 37 E.
Sec. 26: N½NE¼
Aggregating 80 acres of private land

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, Airport Road, Lewistown, Montana 59457. Any adverse comments will be evaluated by the BLM, Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of this Department.

FOR FURTHER INFORMATION CONTACT: Information related to this exchange, including the environmental assessment and land report, is available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire private lands for enhancement of the Bureau's grazing, wildlife and recreation programs. In return, an isolated parcel of public land would be transferred to private ownership. The value of the lands are equal. The proposed exchange will benefit public needs and improve manageability of public lands. The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 4 U.S.C. 945, for the lands being transferred out of Federal ownership.

2. All valid existing rights (e.g. rights-of-way, easements, and leases of record).

3. The exchange must meet the requirements of 43 CFR 4110.4–2(b).

This exchange is consistent with Bureau of Land Management policies and has been discussed with local officials. The public interest will be well served by completion of this exchange.

Segregation: The publication of this notice segregates the public lands described above from settlement, sale, location and entry under the public land laws, including the mining laws, but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976.

Dated: May 6, 1983.

James Barnum,
Acting District Manager.

Conveyance; Non-Competitive Sale of Public Land in Sweetwater County, Wyoming

May 4, 1983.

Notice is hereby given that pursuant to Section 203 of the Act of October 21, 1976; 43 U.S.C. 1713 (1976), the City-School Joint Recreation Board, Green River, Wyoming, has purchased, by noncompetitive sale, and received a patent for the following described public land in Sweetwater County, Wyoming, for use as a city/school public recreation complex:

Sixth Principal Meridian
T. 18 N., R. 107 W.,
Sec. 34, NE¼SE¼NE¼.
Aggregating 10.00 acres.

James L. Edlefsen,
Chief, Branch of Land Resources.

BILLING CODE 4310-84-M

Escondido Project Area; Realty Action for Public Lands in San Diego County, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty action and Recreation and Public Purposes Classificaftion and Lease and or Patent of Public Lands in San Diego County.

SUMMARY: Notice is hereby given that the City of Poway, has submitted an application to lease (with option to patent) five parcels of public land for equestrian riding and hiking trail system park.

VOL
48
ISS
93
MY
12
1983
UMI

The following described land has been examined and classified as suitable for lease and or patent under the Recreation and Public Purposes Act of June 14, 1926 (44 Stat. 74) as amended (43 U.S.C. 869 et. seq.):

T. 13 S., R. 1 W., San Bernardino Meridian
Sec. 17, S½ SE¼;
Sec. 20, NE¼, NE¼, S½ NE¼, E½ SW¼ SE¼;
Sec. 27, N½ SW¼;
Sec.28, SE¼ SW¼, S½ SE¼, NE¼ SE¼;
Sec.33, NE¼, NE¼ NW¼, S½ NW¼;
Sec.34, S½ SE¼, NW¼ SE¼, SW¼ NE¼ SE¼, S½ SE¼ NE¼ SE¼;
T. 14 S., R. 1 W., San Bernardino Meridian
Sec. 1, W½ SW¼;
Sec. 2, Lot 4 (40.34A), S½ NE¼, SE¼ SW¼, SE¼;
Sec. 3, Lot 3 (41.02A), Lot 4 (40.64A);
Sec. 11, N½, N½ SW¼, SE¼ SW¼;
Sec. 12, W½ NW¼;
Total, 1,877 acres

The decision/notice is based on the following reasons:

1. The lands have been found to be valuable for public purposes and/or recreational uses.
2. The land is not of national significance and not essential to any Bureau of Land Management Program.
3. The proposed use is in conformance with the existing land use plan.
4. The proposed action will have no significant (including controversial) effects on the human and natural environment.
5. Leasing of the above described lands to the City of Poway will serve important public purposes. (i.e., Provide land for riding and hiking trails, open space and watershed protection, outdoor classroom for local education institutions.)
6. The subject lands are isolated and receive only custodial management.
7. The classification, lease and/or patenting of the land to the City of Poway, California is in conformance with the Secretary of the Interior's "Good Neighbor Program."

DATES: Interested parties may submit comments until 60 days after this notice is published. Send comments to the District Manager, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of this Department.

FOR FURTHER INFORMATION CONTACT: Information related to this Recreation and Public Purposes Application, including the environmental assessment, land report, terms, conditions, and special stipulations that will be included in the lease is available for review at the California Escondido Project Office at 1695 Spruce Street, Riverside, California 92507.

SUPPLEMENTARY INFORMATION: The classification and granting of the lease for a maximum period of 25 years with the option to purchase/patent the land will not be adverse to any known public or private interests.

Classification of these lands to the City of Poway, California, under the provisions of the above cited authority segregates them from all appropriations, including locations under the mining laws, except as to applications under the Mineral Leasing Laws.

This Recreation and Public Purposes Application is consistent with Bureau of Land Management policies and planning and has been discussed with state and local officials.

Petition for classification CA–13066 is approved as to the land described above.

Name of Petitioner: City of Poway, by its Mayor.

Type of Petition: Recreation and Public Purposes Act of June 14, 1926, as amended.

Dated: April 29, 1983.

Hugh Reicken

Acting Associate District Manager.

[Exchange CA 12957]

Public Lands in Humboldt County, California; Realty Action; Correction

In FR Doc. 82–19770, pages 31755 and 31756 of the Thursday, July 22, 1982 issue, the lands applied for are corrected to add Lot 2; Sec. 35, T. 11½ N., R. 3 E., Humboldt Meridian. Total acreage is changed to contain 917.22 acres, vice 866.61 acres.

The publication of this correction in the **Federal Register** shall segregate the applied for public lands from all other forms of appropriation under the public land laws, including the mining laws, for a period of two years. The exchange is expected to be consumated before the end of that period.

Detailed information concerning the exchange, including the environmental analysis and the record of non-federal participation, is available for review at the Eureka Area Office, BLM, 1585 J Street, P.O. Box II, Arcata, California 95521.

All remaining sections of publication FR Doc. 82–19770 for Exchange CA 12957 are correct and remain effect.

John W. Lahr,

Area Manager, Eureka Resource Area, Ukiah District Office.

Fish and Wildlife Service

Migratory Bird Hunting and Conservation Stamp Contest

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of 1983 contest.

SUMMARY: The Service announces the 1983 Migratory Bird Hunting and Conservation Stamp ("Duck Stamp") Contest to select the stamp design for the 1984–85 hunting seasons. Regulations governing the contest are contained in 50 CFR Part 91.

DATES: This year's contest will be held on Tuesday, November 8th and Wednesday, November 9th, beginning at 9:00 a.m. each day. Entries may be received any time after July 1, but must be received or postmarked no later than midnight of October 1.

ADDRESSES: This year's contest will be held in the Department of the Interior Auditorium, 18th & C Streets, NW., Washington, D.C.

Requests for copies of the contest regulations and Reproduction Rights Agreement and entries should be sent to Migratory Bird Hunting and Conservation Stamp Contest, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Anastasi, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240; Telephone 202–343–5508.

SUPPLEMENTARY INFORMATION:

Background

Under the Migratory Bird Hunting and Conservation Act, 16 U.S.C. 718 requires migratory bird hunters that are 16 years of age or older to possess a Federal migratory bird hunting and conservation stamp. Under the authority contained in 5 U.S.C. 301 and 31 U.S.C. 483a, the U.S. Fish and Wildlife Service conducts an annual contest to select the design for the following years's hunting seasons. The contest is open to the public.

Ineligible species.

As provided by 50 CFR 91.14, the dominant feature of the design of each eligible entry may not be a species that

was selected for the Stamp during the preceeding five years. Accordingly, the following species are ineligible as the dominant feature for the 1983 contest:

Green-winged teal
Mallard
Ruddy duck
Canvasback
Pintail

Dated: May 3, 1983.

J. Craig Potter,

Acting Assistant Secretary for Fish and Wildlife and Parks.

Chesapeake and Ohio Canal National Historical Park Commission; Meeting

Notice is hereby given in accordance with Federal Advisory Committee Act that a meeting of the Chesapeake and Ohio Canal National Historical Park Commission will be held Saturday, June 18, 1983, at 1:00 p.m. at the District 18 Fire Company, North Branch, Maryland.

The Commission was established by Pub. L. 91–664 to meet and consult with the Secretary of the Interior on general policies and specific matters related to the administration and development of the Chesapeake and Ohio Canal National Historical Park.

The members of the Commission are as follows:

Miss Carrie Johnson, Chairman, Arlington, Virginia
Mr. Carl L. Shipley, Washington, D.C.
Ms. Polly Bloedorn, Bethesda, Maryland
Mr. James B. Coulter, Annapolis, Maryland
Mrs. Constance Lieder, Baltimore, Maryland
Mr. William H. Ansel, Jr., Romney, West Virginia
Mr. Silas Starry, Shepherdstown, West Virginia
Ms. Bonnie Troxell, Cumberland, Maryland
Mr. John D. Millar, Cumberland, Maryland
Mr. Rockwood H. Foster, Washington, D.C.
Mr. Barry Passett, Washington, D.C.
Ms. Barbara Yeaman, Brookmont, Maryland
Ms. Joan LaRock, Lovettsville, Virginia
Ms. Elise Heinz, Arlington, Virginia
Ms. Majorie Stanley, Silver Spring, Maryland
Mrs. Minny Pohlmann, Dickerson, Maryland
Dr. James H. Gilford, Frederick, Maryland
Mr. R. Lee Downey, Williamsport, Maryland
Mr. Edward K. Miller, Hagerstown, Maryland

Matters to be discussed at this meeting include:

1. Cumberland/North Branch Development Concept Plan
2. Old and New Business
3. Superintendent's Report
4. Park Land Protection Plan
5. Committee Reports
Plans and Projects Committee
Recreation Policies and Issues Committee
Resource Protection Committee
6. Public Comments

The meeting will be open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting, or who wish to submit written statements, may contact Richard L. Stanton, Superintendent, C&O Canal National Historical Park, P.O. Box 4, Sharpsburg, Maryland 21782.

Minutes of the meeting will be available for public inspection four (4) weeks after the meeting at Park Headquarters, Sharpsburg, Maryland.

Dated: May 5, 1983.

Protect Our Wetlands and Duck Resources Task Force; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Protect Our Wetlands and Duck Resources (POWDR) task Force will be held on Friday, May 27, 1983, at 9:00 a.m. at Ormond Plantation, 10 Villere Drive, Destrehan, Louisiana.

The purpose of the Task Force is to identify and implement, where possible, innovative methods and measures to conserve wetlands, particularly for migratory bird habitat. This includes the identification of opportunities to encourage private landowners, businesses, and State and local governments to participate in the conservation of wetlands.

The purpose of the Task Force meeting is to discuss recent public and private initiatives in the wetlands conservation area. The tentative agenda

VOL 48 ISS 93 MY 12 1983 UMI

consists of: (1) A status report on the Protect Our Wetlands and Duck Resources Act of 1983 (introduced in the U.S. House of Representatives as H.R. 2268 on March 23, 1983, and in the U.S. Senate as S.978 on April 5, 1983); (2) a report on Task Force public information activities; (3) discussion of possible initiatives in the tax incentives area; and, (4) discussion of new initiatives.

The meeting will be open to the public. However, facilities and space to accommodate members of the public are limited and persons will be accommodated on a first come, first served basis. Any member of the public may file with the committee a written statement concerning the matters to be discussed.

Persons wishing further infromation about the meeting may contact Kathryn Yasueda, Staff Assistant, Office of the Secretary, Department of the Interior, Washington, D.C. 20240 (202/343–4203). minutes of the meeting will be available for public inspection from the address, above, approximately one month after the meeting.

Dated: May 9, 1983.

Emily S. DeRocco;

Assistant to the Secretary, Department of the Interior.

BILLING CODE 4310-10-M

INTERSTATE COMMERCE COMMISSION

[Investigation & Suspension Docket No. M-29788]

Charge for Shipments Moving on Order-Notify Bills of Lading; National Railroad Freight Committee and Railroad Interterritorial Agreements

AGENCY: Interstate Commerce Commission.

ACTION: Extension of time to file comments.

SUMMARY: The previously established due date for comments of May 11, 1983 extended at 48 FR 17407, April 22, 1983, on the requirement that rules and charges unrelated to classification and not prescribed by the Commission be removed from the classification where the scope of the pertinent agreement is limited to classification making has been extended 40 days for Section 10706(a) Application No. 12 and Section 5(b) Application No. 5. The original notice in this proceeding was published at 47 FR 11572, March 17 1982.

DATE: Comments must be received by June 20, 1983.

ADDRESSES: Send comments (original and 15 copies) to: Section 10706(a) Application No. 12; Section 5(b) Application No. 5, Interstate Commerce Commission, Office of Proceedings, Room 5444, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION: The Commission, in Investigation and Suspension Docket No. M–29788, *Charge For Shipments Moving on Order-Notify Bill of Lading*, —— I.C.C. —— (served March 22, 1983), ordered, among other matters, that all rail freight classifications either: (1) comply with the Commission's policy, as set forth concerning the National Motor Freight Classification; or (2) submit comments under their approved 5b [49 U.S.C. 10706(a)] agreements.

By petition filed April 20, 1983, the rail carrier members of the National Railroad Freight Committee Agreement and the Railroad Interterritorial Agreement have requested an extension of time to June 20, 1983, for the filing of their comments. Petitioners state that the extension is necessary to permit further review and evaluation of the Commission's decision in I&S M–29788.

Since the Commission's decision in I&S M–29788 may have important ramifications to petitioners and they were neither participants nor parties to I&S M–29788, their request for an extension will be granted. For all other persons affected by the Commission decision in I&S M–29788, the due date for comments remains May 11, 1983 [48 FR 17407 (April 22, 1983)].

It is ordered:

The petition is granted. The time for filing comments in Section 10706(a) Application No. 12 and Section 5(b) Application No. 5 is extended to June 20, 1983.

Decided: May 6, 1983.

By the Commission, Reese H. Taylor, Jr., Chairman.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs; Pittsburgh and Lake Erie Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice.[1] These exemptions may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the **Federal Register.**

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washingont, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C. 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract No., and specifics	Review Board [1]	Decided date
921	The Pittsburgh and Lake Erie Railroad Co., ICC–PLE–C–19 (Waste paper)	1	5–5–83
922	Seaboard System Railroad, Inc., ICC–SBD–C–0062 (Chemicals)	2	5–6–83

[1] Review Board No. 1, Members Parker, Chandler and Fortier. Review Board No. 2, Members Carleton, Williams, and Ewing.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

Authority: 49 U.S.C. 10505.

Agatha L. Mergenovich,

Secretary.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

[1] Note: Tariff supplements advancing contract's effective date shall refer to these decisions for authority.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property-that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier-that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property , freight forwarder, and household goods broker-that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.
